Questions by Members tended to be concerned with three broad subjects: arms control verification and Soviet compliance with previous agreements, arms control, and the broader issues of nuclear weapons proliferation, and the future of the U.S. strategic nuclear triad. A specific concern was the role of the MX missile in our strategic forces and in the Geneva negotiations.

Combining the CRS comprehensive study on U.S. arms control policy with this series of workshops for Members seemed to me to be an excellent way of learning more about the contributions that arms control has made to our national security, of testing assumptions about arms control, of pinpointing the additional things we need to know, and of brainstorming some new approaches and ideas for the future of arms control. The first two workshops were successful and I hope that other colleagues who are interested will join us at our next workshop on April 16 and in the future.●

REMARKS OF HON. STEPHEN J. SOLARZ BEFORE THE SUGAR USER'S GROUP

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. BARNES. Mr. Speaker, I would like to bring to my colleagues' attention a speech delivered by our colleague, STEVE SOLARZ, before the Sugar User's Group in Palm Springs, CA, on February 19, in which he makes some valuable points regarding the administration's sugar policy and its effects on the economies of Latin America and the Caribbean.

STATEMENT OF STEVE J. SOLARZ

Let me confess that I really first became aware of the problems that you were facing when a group of sugar refiners who were located in my own district back in Brooklyn indicated they wanted to meet with me because of a pressing problem that they were facing. When this request came in, I said to myself, "Uh-oh. I'm sure to be asked to support some protectionist proposal designed to protect this local industry, even though, as a matter of principle, I happen to be very much in favor of free trade."

I went to the luncheon with a sense of political trepidation, fearing that I would be obligated to weigh the claims of my conscience and my convictions on the one hand against the claims of my constituents on the other. And lo and behold, much to my amazement, I found out not only about the problems that the sugar industry was facing in this country, but also how so much of that problem was a result of the imposition of the sugar quotas and the implicit sugar subsidies which we have.

The solution to the problem, it seemed, was not the enactment or enhancement of existing protectionist policies; the solution to the problem seemed to be to adopt a kind of classic free-trade approach, which called for the elimination of these barriers to the importation of sugar into our own country. This, of course, was very welcome news. It was a little bit, perhaps, like a "Man bites dog" story, with a Congressman being asked to help a group of constituents by supporting policies based on the principles of free trade, rather than policies based on the principles of protectionism.

But it was certainly a request which I found extremely congenial. As I began to look into the question more and more deeply, it became clear to me that this was an issue which not only had very significant domestic consequences, but that it was an issue which had extraordinarily important foreign policy implications as well. Since I've spent much of my time over the course of the last decade in the Congress as a member of the Foreign Affairs Committee, concentrating on foreign policy problems, this was a dimension of the issue which I found extremely interesting and, I might say, quite important as well.

When we examine American foreign policy, we have an understandable and natural tendency to focus on weapons sales, or human rights or meetings between heads of state. Very often, as a consequence, we overlook another principal element of our relations with other countries, namely the question of our trade policies. It seems to me that in the case of sugar we have an absolutely classic example of how our policy on trade is running completely counter to other extremely important American foreign policy interests.

Take, for example, the situation in Central and South America. I recently returned from a two-week trip to Central America, where I met with the leaders of countries such as Honduras, Guatemala, El Salvador, Nicaragua, Panama, and Costa Rica. This is a region which is, very clearly, in turmoil after decades of economic inequity and social injustice combined with political re-

pression. The revolutionary chickens are coming home to roost. One doesn't have to accept the Administration's view of a kind of Central American domino theory—which says that should the government in El Salvador fall, every other nation in the hemisphere will inevitably and ineluctably fall to communism as well—in order to conclude that it would clearly not be in the interests of the United States for the forces of revolution to triumph south of the Rio Grande.

And yet, I would submit that, in the final analysis, the fate and the future of revolution in Central America will primarily be a function of indiginous forces and circumstances in each of the countries in the region. More than anything else, it will depend on the ability of the governments of Central America to deal with the pressing social and economic problems of the peoples of the region.

I don't want to suggest that the willingness on the part of the U.S. to provide military assistance to embattled regimes is unimportant in stanching the tide of revolution in Central America. But in the final analysis, what will really make the difference, much more than the level of our military assistance, is the kind of social and economic help we can provide these nations. It seems to me, for reasons I will explain shortly, that our trade policy on sugar is clearly undermining all of our other efforts to provide significant economic resources to friendly governments in the region in order to help them help the people of their countries cope with the problems that confront them.

The situation in South America is not very different. Over the course of the last few years, South America has witnessed a tidal wave of democracy, as one country after another has emerged from the dark shadows of dictatorship into the sunlight of democracy. In Argentina, in Brazil, in Peru, in Colombia, in country after country, nations that were previously ruled by repressive military regimes have witnessed the return of the military to the barracks, and the emergence of democratically elected civilian government. To a large extent the transition from military dictatorships to civilian democracies was a function of growing economic problems which the military leadership of those nations are incapable of dealing with. And the consequent demand on the part of the peoples of those countries was for a new leadership presumably more capable of coping with the economic crisis that confronted it.

In the long run, the survival of democracy in South America, which is a matter in which we have a great ideological and political interest, will be more than anything else a function of the ability on the part of democratically elected governments in South America to improve the economic plight of their peoples. If we are going to support and sustain democracy in South America, and if we are going to contain the tide of revolution in Central America, then we have got to be prepared to make additional resources available to friendly governments throughout Latin America.

We have tried to do this. We have tried to do it through the enactment of the Caribbean Basin Initiative, which was designed to give trade preferences to countries of the Caribbean and Central America in order to enable them to generate the additional resources they need to meet the legitimate demands of their own people. We've had a very substantial increase in the level of our foreign aid programs, particularly in Central America, stemming to some extent from the recommendation of the Kissinger Commission.

Take, for example, the impact of our sugar policy on the Caribbean Basin Initiative. You have here, I think, a very dramatic example of how what we give with one hand we take away with another. Many of us in the Congress who have disagreed with other aspects of the Administration's Latin American policy supported the CBI as a creative and even cost-effective means of bolstering economic development, and thereby enhancing democracy in the Caribbean.

In 1982 President Reagan told the Organization of American States that the linchpin of the CBI would be free trade of Caribbean Basin products to the U.S. But 1982, as you so well know, was also the year in which the President reimposed sugar quotas. Since that time, these quotas have been successively tightened, and sugar revenues for Caribbean and Central American countries have drastically decliend.

In 1981, U.S. sugar imports from Latin America totaled 3.4 million tons. By 1984, the quotas for these countries allowed for less than half that amount. The 1985 sugar quotas are even more restrictive. Two months ago the ambassadors from 11 Caribbean and Central American nations wrote to Secretary of State Shultz that the 1985 fiscal year sugar import quota would collectively cost their countries $80 million in lost revenue from the previous year. That is $80 million less for jobs, $80 million less for education, $80 million less for social welfare, less for housing—less for all of the things which make it possible for people to have faith in democracy and to reject the forces of revolution.

The Caribbean Basin Initiative was ballyhooed as an important new departure. The objectives of this program are being seriously eroded by our highly protectionist sugar policy. Almost all of our sugar imports come from less developed countries, with over 70 percent of them coming from the Caribbean and South America. Many of these nations have a comparative advantage in sugar, but in few other products. Indeed, most of these nations have only a handful of major products which they are even in a position to export. And if we deny them the right to maximize their exports of sugar to the United States, it has extraordinarily grave consequences for their economies.

The sugar quotas that we have imposed undermine the process of development and the prospects for democracy in the Caribbean Basin and in Central and South America. On the one hand, the U.S. extends economic aid to foster development in many of these nations. On the other hand, we establish a substantial and growing barrier against the third largest export in dollar terms in the region.

Looking at some of the individual recipients of our foreign aid, we can see how our sugar policy is clearly working at cross purposes with our foreign policy. El Salvador, for example, received about $36 million from sugar sales to the U.S. in fiscal year 1984, but will probably get only a little more than half that amount in fiscal year 1986.

The Dominican Republic received $330 million from sugar sales here in calendar year 1981. By fiscal year 1984 that figure had dropped by $100 million, and it is expected to fall almost another $100 million by fiscal year 1986. This decline in sugar earnings for the Dominican Republic over the past four years easily exceeds the total amount of economic aid, roughly $93 million, that we provided to that country in fiscal year 1984.

Or take Panama, which received about $12 million in economic aid from the United States in the 1984 fiscal year. That $12 million is roughly equivalent to the year-by-year decline in Panamanian revenue from sugar sales to the U.S. In Honduras, which has a fledgling democracy we are trying so hard to sustain and support, sugar revenues from exports to the U.S. have fallen about $30 million over the past four years, or about one-third of the total of our economic aid to that country in fiscal year 1984.

If our sugar policy is at odds with our foreign aid program in Central America, it also deepens the debt problem of such nations as Argentina and Brazil in South America—which are not recipients of significant amounts of our economic assistance, but which do depend to a large extent on exports to the U.S. to raise the revenues they need to solve their growing problem associated with the debt crisis. Export earnings from sugar sales to the United States have declined precipitously for both these countries. Four years ago, Brazil earned $388 million from sugar sales in the U.S. Their current annual earning total is at only about one-fourth that level. Argentina earned $210 million in 1981, but earns less than one-fifth of that figure on an annual basis today. The election of Raul Alfonsin as President of Argentina a year ago, which brought to an end five decades of political repression in Argentina, was one of the most significant political developments in the hemisphere in a long, long time.

But democracy is not yet out of the woods in Argentina. If we don't provide more assistance to Argentina, if we are not responsive to their concerns, President Alfonsin may well go under to a rising tide of social and economic discontent, and democracy will have been lost in such an important country.

For much of the Caribbean and Latin America, the sugar industry has been a leading source of export earnings. It is also—and this is a particularly important point—a labor-intensive industry. A dramatic decline in sugar revenues can have severe political and economic repercussions. To see the dimensions of this problem, it is important to note that the revenue from sugar exports to the U.S. on a worldwide basis dropped from $2.1 billion in 1981 to only $1 billion in 1983. By denying badly needed foreign exchange to sugar exporters in the Caribbean and Latin America and in such other developing countries as the Philippines, we can give momentum to a terrible cycle of government austerity measures, increased economic suffering, political protest, repressive government response, and increased militarization.

If we are truly serious about promoting democracy and political pluralism in the Third World, we can hardly afford to seal off or substantially close our markets to foreign goods. Our sugar policy collides, as I've indicated, with both the Caribbean Basin Initiative and our foreign program. It exacerbates the problem of Third World debt to the United States. And it compromises our ability to persuasively advocate reduction or elimination of trade barriers against American goods.

As the world's largest exporter of agricultural commodities, the U.S. clearly has an overriding interest in securing agreements that will allow our farm products to enter foreign markets. Yet, at the same time that Bill Brock and other American trade repre-

sentatives are pressing to get American beef and citrus into Japan or American soybeans into Europe, we are erecting walls against the importation of sugar into the United States. Our sugar quota system clearly fans the fires of protectionism and calls into serious question our commitment to free and fair trade in agricultural commodities or other products.

The negative impact of our sugar policy is evident, however, not only with respect to our foreign policy. It also has negative consequences in terms of our domestic policy as well. Refiners and dockworkers are paying a heavy price for our sugar policy. Since the 1981 farm bill came into effect, four large American sugar refineries have had to close their doors, and thousands of American workers have lost their jobs.

At the same time, the domestic sugar subsidy has harmed American consumers. I can only classify this, as I began to look into it, as the Great American Rip-Off. Last year that subsidy totalled about $3 billion, or roughly $250,000 for each of the 1,200 domestic sugar producers in the U.S. Consider by comparison the subsidy we provide to 800,000 wheat farmers, which averages $3,500 per producer. Or compare it to the subsidy we provide to 300,000 dairy producers, who receive an average subsidy of $9,000 per producer. When it comes to sugar, we are providing a subsidy which is equivalent to $250,000 for each of only 1,200 producers.

It has also forced the price of sugar in the U.S. up, and sugar refiners are obligated to pay over 20 cents per pound for imported sugar that sells for 4 cents to 6 cents in the world market. Last week, in testimony before the Congress, budget director David Stockman spotlighted the cost to the Federal Government of direct agricultural subsidies. Mr. Stockman has focused the country's attention on a serious problem. But I think we have to look not only at direct subsidies, but also at hidden or indirect subsidies such as the sugar program.

At a time when massive budget deficits are likely to lead to significant sacrifices by many Americans, it is fair to ask how we can justify a $250,000-per producer sugar subsidy. If I can take the liberty of paraphrasing the remarks of Winston Churchill, who, after the Battle of Britain paid tribute, in a famous speech in the House of Commons, to the handful of British airmen who saved his country from defeat at the hands of the Nazis during the blitz over London. He said at that time, "Never have so many owed so much to so few." I think if Winston Churchill were living today and was asked to comment on the sugar subsidy, he would say, "Never have so few extracted so much from so many." [Applause]

Let me say in conclusion that I think our sugar policy must be significantly changed. When the farm bill comes up for consideration in the House later this year I expect to actively support an effort to ease the quotas we have clamped on foreign sugar producers and reduce the price support levels. It is simply not acceptable to continue a policy which contradicts important foreign policy objectives of the United States, such as preventing the spread of revolution in Central America and supporting the development of democracy in South America, while at the same time extracting a heavy price from American consumers, American refiners, and American dockworkers and laborers here at home.

The time has clearly come for a fundamental redirection of our sugar policy, and I am hopeful that 1985 will be the year when we succeed in that endeavor. [Applause]●

ANN MARGARET SCHNELLER, VOICE OF DEMOCRACY WINNER

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. DASCHLE. Mr. Speaker, I am delighted to recognize Ann Margaret Schneller of Rapid City, SD, who has won the Voice of Democracy scriptwriting contest for South Dakota. Additionally, Ann, the daughter of John and Mary Schneller, has been awarded one of six national scholarships for the excellence of her script and I join with her family and friends in congratulating her on both of these fine achievements.

Recognizing that we, as a nation and as individuals, have changed, Ann challenges us to recapture, reawaken, and renew our sense of patriotism and love of country. Ann reminds us that our patriotism and our love of country, like our flag, need to be continuously unfurled, not placed in storage and displayed merely on ceremonial occasions; our patriotism and our love of country should truly be active and personal, not impersonal and passive.

Mr. Speaker, as a nation and as individuals our patriotism and love of country should be encouraged and I commend the script of Ann Schneller to my colleagues.

MY PLEDGE TO AMERICA

(By Ann M. Schneller)

America, you've changed.

Your boundaries have extended far beyond the dreams of your original colonies. Your people are from every race, creed, tongue and region of the earth. Your industries have grown and matured into an unsurpassed technological era. Your arms have held and embraced the unknown depths of the ocean floors and your hand has caressed the moon in its palm.

Yes, America, outwardly you've changed, yet the principles and beliefs you were founded on are still strongly evident in our system. They have given us a foundation on which we've relied to overcome the problems of the past, and it is with these timeless tools of universal suffrage and all the freedoms that guarantee the will of the people, that we will forge solutions for the future.

But America, your people have changed too. Presently your children have been so caught up in their own little worlds, that they neglect to be in yours.

Contrary to what is popularly believed, the opposite of love is not hate, rather, the opposite of love is indifference. This apathy can kill all that you represent, as it is for the love of this country that your people remain free.

Patriotism is dusty, America. You've seen your citizens with their hands in their pockets and hats on their heads during the National Anthem and the flying of your flag. The stirring hymns of your grandeur remain unknown to the youngsters—even your anthem's words have been forgotten by many. Flags, the glorious and patriotic symbol of your freedoms, remain folded and unused. Even your holidays are more of a three day vacation than a celebration of your liberties and freedoms under God.

It's time for an internal change, America. An attitude change. it is time to scrape off the barnacles of indifference, fear, and pessimism and to concentrate on the beauty of all that you stand for.

Your children need to actively reclaim the companionship and responsibility of your lands and liberties. We must become involved, exercising our rights of sufferage and the freedoms of speech. For it is through involvement and participation that your people will come to claim America as their own. So, instead of saying "the country of America", it will be "my country, America!" and rather than "the flag", it will be "my flag of freedom!"

Then your flags will be unfurled and your songs sung throughout the world. The Fourth of July will no longer be just a fireworks display, but a true celebration of all that you stand for and of all you've come through.

Patriotism can thrive in the face of all difficulties except neglect. So, America, I promise to CARE!●

SUGAR LEGISLATION

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. GRADISON. Mr. Speaker, I am pleased to join with Congressman DOWNEY in introducing a bill which addresses the sugar program established by the 1981 farm bill. The quotas which have been imposed under that legislation to protect sugar prices are proving to be extremely costly to consumers and are undermining our Government's efforts to open world markets to American products.

The administration reluctantly imposed quotas in May 1982 after a drop in the world sugar price made it impossible to continue to protect the sugar loan program with import duties and fees. In order to avoid the Government's acquisition of sugar through the forfeiture of loans, the Department of Agriculture determined that the market price should be maintained several cents above the statutory loan level. When quotas were used as a means of achieving that price, sugar prices went even higher.

Quotas are not an effective tool for setting prices. It is difficult, if not impossible, to "fine tune" the market relying upon them. As a result, USDA felt it should be safe and err on the high side. Thus, USDA has set very restrictive country by country quotas which have caused domestic sugar prices to rise to 22 cents per pound today, over four times the world price of 5 cents per pound.

All of this is extremely costly to our constituents, Mr. Speaker. It is estimated that the cost to Americans for each 1-cent increase in the price of sugar is at least $300 million a year. This is particularly hard on the poor

who pay such a large percentage of their wages for food.

Mr. Speaker, I have worked very hard in my years in Congress toward deregulation of the economy and to eliminate restrictions, protections, and subsidies from special segments of our economy. I believe that through tough, healthy, and unrestricted, competition, with protections only when they are clearly needed, the American economy will regain its vigor and retain its place as the most creative and efficient economic force in the world.

I also believe that our trade policy should reflect these goals. I have applauded every effort our President has made to encourage foreign nations, who wish to export their goods to the United States, to open their own markets to products made in America. There is no question in my mind that we can compete with any nation if we are permitted to do so.

I am grateful, Mr. Speaker, that many of my colleagues share these views, and I hope they will join me in giving careful scrutiny to the sugar program. Quotas are the most restrictive and damaging of trade barriers. As U.S. Trade Representative Brock has stated, their imposition under the sugar program has made our efforts to remove barriers to American goods in Europe and Japan an even more difficult task. Our bargaining position will be seriously jeopardized as long as quotas remain in force, and provide an excuse for foreign nations to protect their home markets from American goods.

Further, Mr. Speaker, the quotas are creating tremendous difficulties for sugar-producing nations. This is particularly true in Latin America and the Caribbean. Quotas have reduced the quantities of sugar they can sell to the United States by more than 60 percent since the implementation of this program. Since many of these nations depend upon sugar as one of their most important cash crops, our policy is having tremendously destabilizing impacts upon their economies. This is directly contrary to the Caribbean Basin Initiative and years of bipartisan support from the administration and the Congress for efforts to help bolster the economies of our Latin American allies. Further, Mr. Speaker, these nations cannot buy our products if they cannot earn dollars by selling their own products.

Our bill will eliminate the hypocrisy of quotas from the sugar program and our trade policy, and, at the same time, give the President authority to rebate fees to foreign nations whose economic viability is of critical concern to us. The bill will also reduce the loan level provided under the sugar program, and I believe this is equally as appropriate. The sugar program provides a higher degree of support than nearly any other commodity. The reductions set out in our bill will bring the sugar program in line with other agricultural programs over a period of time.

The sugar support prices are much higher relative to production costs than virtually all other agricultural commodities. It will take a 7-cent reduction in sugar prices to bring that program in line with programs for such commodities as corn and soybeans. Our bill envisions a 5-cent reduction for the first year, a 3-cent reduction the following year and then 1-cent reductions in the next 2 years. These reductions bring the sugar program in line with other programs and keep it there.

Congress is reexamining nearly all of its agricultural programs, Mr. Speaker. Surely, we must also look again at the most generous farm program of them all—sugar. This program is costing our constituents a fortune each year. It is disrupting our trade policy and moving us away from the free market we have been working so hard to restore. It is also creating tremendous difficulties for our friends in the Caribbean and Latin America.

I hope my colleagues will carefully consider this legislation and support our efforts to provide rationality in the sugar program. Our bill will significantly reduce the irritant that program has been in the international marketplace. It will also save consumers $1.5 billion in the first year alone. I believe it is time that we take action.●

A BILL TO RECOGNIZE THE MERCHANT SEAMEN WHO SERVE DURING TIMES OF WAR

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. JONES of North Carolina. Mr. Speaker, I am offering a bill to recognize and honor the long neglected heroism of the merchant seamen who have served our country in wartime.

During World War II, merchant mariners, all of whom were volunteers, manned the "bridge of ships" to United States and Allied forces, transporting supplies and personnel through dangerous combat areas.

At the outbreak of the war, the U.S. Navy failed to incorporate all merchant marine personnel into the U.S. Naval Reserve, although mariners were subject to the Uniform Code of Military Justice; they were also required to meet professional standards set by the U.S. Coast Guard. In addition, many merchant seamen, upon official Navy request, voluntarily served as gun crews to supplement the Armed Forces, valorously protecting troops and cargoes against submarine and air attack.

A total of 5,638 seamen were killed during World War II, a death rate of 2.8 percent of the merchant seamen registered with the maritime service. This rate is second only to the U.S. Marine Corps for World War II casualties. Many of these deaths were the result of action by enemy U-boats which refused to rescue the seamen after they had abandoned their torpedoed ships. Forty years later, many of those mariners involved in the war still suffer from combat injuries for which they receive no provision for treatment or hospitalization.

Furthermore, when the GI bill was presented to President Roosevelt for his signature in 1943, merchant seamen were not included in the provisions, and they were further denied the status of military veterans under a ruling by the Department of Defense in 1982.

The bill that I have proposed would acknowledge and honor those individuals who serve aboard seagoing merchant vessels of the United States during periods of war, as well as furnishing an American flag to drape the casket of those merchant seamen who served in wartime prior to the end of World War II.

The cost of this recognition to the Federal Government would be negligible, and it is the very least we can do in return for the patriotism, courage, and valor shown by these American heroes. It would be long overdue thanks for essential service they have provided our country in times of great national need.●

CONSUMERS PAYING MORE FOR BANKING SERVICES

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Ms. OAKAR. Mr. Speaker, consumers are paying more for basic banking services than ever before. Service fees imposed by banks and other depository institutions unnecessarily penalize consumers who can't afford to maintain large deposit balances in savings or checking accounts. For them, financial deregulation has not provided the benefits that it has for others.

Last year, my chairman of the Committee on Banking, Finance and Urban Affairs held comprehensive hearings on the financial system and how it can be shaped to best meet the needs of the average consumer. Throughout the hearings, we focused on the responsiveness of financial institutions in meeting the basic financial needs of the average consumer. What we learned was that deregulation is a disaster for low-income consumers.

In terms of service fees, delayed funds availability, truth in savings, and community service, much improvement is needed by our financial institutions.

In 1980 and 1982, legislation was enacted to deregulate the financial services marketplace by phasing out limits on interest rate ceilings and allowing banks and other depository institutions to compete with money market mutual funds by offering deposit accounts that pay market rates of interest. Clearly this is popular with consumers who can now earn higher rates of interest than ever before on their federally insured deposits. Unfortunately some are discouraged from participating and their access to the payments system is limited.

In 1979, prior to enactment of deregulation measures, basic banking services cost the average consumer approximately $90 annually. Astonishingly, those same basic banking services, after enactment of two major deregulation measures, cost the consumer more than $180 annually. Factoring out inflation, service fees increased 63 percent.

Service fees are imposed through a regressive system whereby the poor pay more. Routinely, depository institutions impose fees based on the amount of money held in an account. If the balance is low, the consumer is assessed a fee. If the balance is high, no service fee is levied. Additionally, the rate of interest paid on low balance accounts is lower. In some cases, payment of interest on low balance accounts is suspended. The low-income consumer could actually have less money after deposit as a result of service charges, reduced interest payments, or no interest payments at all.

Mr. Speaker, today I am introducing the financial services access act to require federally insured depository institutions to offer access accounts which provide minimum banking services to low-income consumers.

If enacted, my legislation would require federally insured institutions to offer consumers an account without service charges, no minimum balance requirement, and no more than 10 transactions per month. Additionally the account would be limited to low-income consumers by placing a ceiling on the permissible deposit balance and requiring direct deposit for recurring Federal payments. Each such account shall offer consumers a detailed monthly record of transactions or as substitute a passbook.

Reserves held against such accounts by depository institutions shall receive interest. Finally, provision of such an account is to become part of an institutions overall compliance with the Community Reinvestment Act.

Mr. Speaker, the Congress will be pressured once again by special-interest groups seeking passage of financial deregulation legislation this Congress. I hope we do not proceed with such legislation until we are certain that institutions receiving the tremendous benefit of Federal deposit insurance provide access to all consumers regardless of income.●

CONGRESSIONAL CALL TO CONSCIENCE SOVIET REFUSENIK IOSIF BERENSHTEIN

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. MANTON. Mr. Speaker, we will momentarily be adjourning for the Passover/Easter district work period. We will be going back home to celebrate Easter or Passover with our families, constituents, and friends. Most of us will not think twice about the fact that we are free to celebrate our respective religious holidays as we choose. However, I think it is appropriate for us to take a moment before we adjourn, and remember that there are people around the world who do not have that freedom.

For the Jewish people, the Passover holiday is a festival of freedom, commemorating the liberation of the Jewish people from slavery under the Pharaohs of Egypt. The Passover season is a time to celebrate freedom. Therefore, it is particularly appropriate for us to call attention today to the plight of the Jews in the Soviet Union who are denied their freedom of religion and who are denied the right to emigrate to Israel. The 2½ million Jews in the Soviet Union are unable to hold a Seder in their homes, the traditional observance of Passover, without risking harassment and possibly arrest. In all reality, it is illegal for the Jewish people of the Soviet Union to practice their religion or study their heritage. As we are about to return home, we must remember the Jewish people of the Soviet Union.

Mr. Speaker, today I would like to share with my colleagues the plight of the Berenshtein family. Theirs is an all too common story in the Soviet Union today. Iosif Berenshtein, his wife Fania and their daughter Yanna, applied for an exit visa to Israel in 1979. As a result, all lost their jobs and have been subjected to a campaign of harassment. Mr. Berenshtein, who is an activist in emigration activities, had twice been arrested for 15 days and in 1980 he was threatened with 7 years' imprisonment. In September 1982, the Berenshtein home was searched and numerous items, including Hebrew study books, were confiscated. In 1983 the Berenshtein family was granted Israeli citizenship. Iosif was told by Soviet authorities that he might be indicted for slandering the U.S.S.R.

Most recently, on November 12, 1984, Iosif went to the city of Novograd-Volinski to purchase a monument for his mother's grave. There he was arrested and charged with "resisting the authorities." His family was not notified of his arrest until 3 days later. The actual arrest warrant was issued on November 13, 1984, the day after his actual arrest. A complaint has been lodged with the Prosecutor General's office because the arrest warrant was postdated. Although Iosif is a diabetic, he was not allowed to receive special food from his family.

On December 10, 1984, Iosif was sentenced to 4 years in a labor camp. Iosif was put into a prison cell with two hardened criminals and was attacked by them with a piece of broken glass. Mrs. Berenshtein believes that this attack was encouraged by Soviet authorities. As a result of the attack, Iosif has lost 60 percent of the vision in his right eye, which he is unable to open, and he has lost 30 percent of the vision in his left eye. At the beginning of 1985, Iosif was transferred to Zheltie Vody prison camp in Donetsk. If Mr. Berenshtein does not receive medical attention, he faces the possibility of permanent and complete blindness. Prison authorities have not allowed Mr. Berenshtein to receive medical treatment.

I am planning to write to Soviet leader Gorbachev, asking that he intervene on behalf of Mr. Berenshtein and allow him medical treatment. I will also ask that Mr. Berenshtein be freed from prison and that he and his family be allowed to emigrate to Israel.

Mr. Speaker, I call upon the Soviet Union to honor the Helsinki accords, the Universal Declaration on Human Rights, and other international agreements to which they are a signator and grant the Jewish people of the Soviet Union their basic human rights. We in the Congress will not waiver in our commitment to Soviet Jewry. We will continue to be the voice for these people who have no voice.

Mr. Speaker, it is traditional at the end of the Passover Seder for all present say, "Next Year in Jerusalem." I hope that any of my colleagues who are interested will join me in my letter to Mr. Gorbachev and help me in making it possible for this dream to be a reality for the Berenshteins and all the Jewish people in the Soviet Union.●

DR. RUSH—PIONEER IN BONE PINNING

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. MONTGOMERY. Mr. Speaker, I would like to take this opportunity today to acknowledge the accomplishments of a man who has contributed greatly to the medical treatment of long bone fractures—Dr. Leslie Rush, Sr.

On September 25, 1936, in the town of Meridian, MS, Dr. Leslie Rush, Sr., performed the first successful intramedullary bone pinning in the United States. Kate Belle Rembert had suffered a very severe fracture of the elbow—the sort of fracture which would eventually wind up as a stiff, painful, and likely deformed elbow. Dr. Rush introduced a metal pin at the point of the elbow and discovered its stabilizing effect. This master stroke of innovation led to the evolution of the Rush pin, now used worldwide for the treatment of fractures.

The technique was so impressive it was reported in the American Journal of Surgery in 1937 and presented before the Southern Medical Association the same year. The Rush pin, as it is now known, was finally perfected in 1948 after many years of research and experimentation.

Dr. Rush has dedicated his life to the development of the Rush pin and the establishment and development of the Rush Medical Complex in Meridian, MS. The Rush technique, which follows the principles of dynamic fixation, is known worldwide, although it is chiefly used in the United States. While other types of intramedullary pins are also in use today, many of these owe their development to Dr. Rush's idea of so long ago.

Because of the increased demand for the pin, Dr. Rush formed the Berivon Co. to manufacture and market the Rush pin. Over 60,000 Rush pins were produced by the Berivon Co. last year and distributed throughout the United States and the world. Berivon also manufactures various accessories, including mallets, pliers, wire loops, racks, and the Rush fracture table, for use with the pins. The company sells to Medimex, the West German medical supply giant, which distributes Berivon products in seven West European countries. Additionally, Rush pins are exported to Italy, Bangladesh, Taiwan, and parts of Africa. In 1984, the Federal Small Business Administration honored Berivon for excellence in exports.

The Rush technique offers a viable alternative for the treatment of fractures in children. Conventional fracture treatment generally forbids the use of rigid, internal fixation in children because rigid nail insertion damages the growth plate and the medullary canal, and plating requires large incisions. Children with fractures that cannot be managed by simple external means must be put in traction for 4 to 6 weeks and wear spica casts after that. The Rush pin can be introduced away from the growth plate through a tiny incision and removed as soon as healing is secure. No growth disturbances have been observed and hospital stays can be significantly reduced. This is very important in light of today's increasing medical costs. The potential for savings is high, with the average stay of 4 days using the Rush technique versus 35 days for those using the conventional treatment.

Even today in underdeveloped countries, many people are left suffering in pain and deformed because of lack of treatment and facilities to perform needed surgery. Because of the simplification of insertion and limited equipment needed, the Rush pin should be just the pin for Third World countries to treat those suffering from broken bones.

Intramedullary pinning is still primarily relied upon in the treatment of long bone fractures and the medical field owes much to the accomplishments and medical advances of Dr. Leslie Rush. I have written the chairman of the Nobel Prize Committee to request consideration of Dr. Rush for a Nobel Prize for Medicine.

It gives me great pleasure to take this time to honor the work and accomplishments of Dr. Leslie Rush, Sr.●

OPPORTUNITY ACT, APRIL 4, 1985

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. SCHUMER. Mr. Speaker, today I am introducing legislation along with Mr. MCKINNEY of Connecticut and seven of our colleagues which could help revive the American dream of home ownership for families living in our inner cities with incomes as low as $20,000 and below. This legislation is modeled after the widely acclaimed Nehemiah plan, currently rising in East Brooklyn, NY.

Perhaps the best way to describe this legislation is to begin with a description of the Nehemiah plan itself. The plan—named for the biblical prophet who rebuilt the walls of Jerusalem—is an ambitious proposal to build 5,000 single family homes in some of the poorest, most deteriorated neighborhoods of New York City. When it was first announced, its proponents were dismissed as idle dreamers. But now, with over 250 homes occupied, and enough resources to meet a schedule that calls for completing over 40 houses per month, the Nehemiah plan has proven to be much more than an idle dream.

At the heart of the plan is a group of 40 local churches brought together as East Brooklyn Churches, Inc., with the assistance of the Industrial Areas Foundation. Their determination to fight the seemingly irreversible deterioration of their neighborhoods was perhaps the most important element in making the Nehemiah plan a success.

The plan was announced with the commitment of $5 million for use as a revolving fund to make interest-free construction loans by the Roman Catholic Diocese of Brooklyn. Since the announcement the fund has been built up to $8 million with contributions by the Episcopal and Lutheran Churches. This fund has made it possible to pay suppliers and contractors in 10 days or less; the certainty of payment has encouraged them to offer the Nehemiah plan reduced prices, further cutting construction costs. The city of New York has contributed land, tax abatements, and $10,000—as an interest-free second mortgage—per house. And the State of New York has floated mortgage revenue bonds to provide low-cost permanent financing.

With this assistance, and the economies of large-scale construction methods, homes can be built for $49,000. After the $5,000 downpayment required of each purchaser, and the $10,000 loan from the city, homes can be sold with a mortgage of $34,000. A family earning $20,000 can easily afford the home.

The Nehemiah plan has served as a catalyst for the transformation of East Brooklyn. Its success has been on three distinct levels. First, it is providing housing for hundreds, and soon thousands, of families who previously believed that home ownership would be forever beyond their reach. These are the solidly built two- and three-bedroom homes with full basements that are desperately needed in our cities.

Second, it has built a new neighborhood. By building on a large scale the Nehemiah plan is building a neighborhood large enough to withstand the forces of deterioration that operated in economically depressed neighborhoods. Small scale in-fill projects in these neighborhoods expose the new homes to more rapid deterioration. A large-scale project concentrated on a single area can be self-protecting and self-sustaining, and can serve as a stimulus to development of the surrounding areas rather than be engulfed by it.

Third, and perhaps most importantly, the Nehemiah plan has helped neighborhood residents take control of

their own lives. East Brooklyn's residents are no longer simply individuals, but are citizens in the fullest sense of that word. They have a new feeling of belonging to a larger group, which, through collective effort, is shaping its own future instead of having it shaped by others. Pulling together to triumph over seemingly insurmountable obstacles has given them a taste of success. They feel a new optimistic sense of neighborhood, and a feeling of confidence in their ability to shape their own future. In short, there is new life and new hope in a neighborhood that had been written off as beyond hope.

People who were resigned to a life of renting or living in public housing—three of every seven Nehemiah purchasers come from public housing—now line up early on Saturday mornings to view the model homes on display. People who had never thought that they would take out a mortgage are putting aside whatever they can toward the goal of saving the $5,000 downpayment. Yards which were once cluttered with trash and broken bottles now sprout fresh grass. The sounds of hammers, saws, and shovels fill the air as if it was a new suburban subdivision rather than the middle of Brooklyn.

The theory behind this legislation is that through the targeted use of limited Federal assistance, the Nehemiah experience can be repeated in similar neighborhoods throughout the Nation.

Like the Nehemiah plan, the legislation begins with neighborhood organizations. Applications for assistance may be submitted only by nonprofit organizations, who must demonstrate that they have the full support of residents in the project area, as well as the support of the local government. Funds awarded under the program will be used as a second mortgage loan to purchasers, up to $15,000 per unit. These second mortgages will not bear interest, but will be repayable when the home is sold. Assistance may be used for construction or substantial rehabilitation of one to four family homes. Moderate rehabilitation is not eligible; this is not a fix-up program.

The act contains a number of restrictions designed to target funds to distressed neighborhoods, and to build developments that are large and concentrated enough to generate positive externalities.

Funds may only be used in census tracts in which the median income is less than 80 percent of the area median income. This is the same restriction which currently applies to HUD's Rental Rehabilitation Program.

The maximum income for a family eligible to purchase a home is 115 percent of the area median income. This figure was chosen to allow Nehemiah projects to attract families with a broad mix of incomes. Attracting a mix has proven essential to the success of the Nehemiah plan in Brooklyn. Due to the neighborhood targeting, it is estimated that the bulk of the families purchasing homes will be at or below the median income. In the Brooklyn Nehemiah plan, for example, although families earning up to $40,000 are eligible to purchase a home, the average income of a purchasing family is around $23,000, which is below the median income of the New York area.

The minimum program size is 50 units, or 1 percent of the number of housing units in the applicant's jurisdiction, with no program required to be larger than 1,000 units. As stated before, if a new development is to be successful, it must be large enough to be self-sustaining. The larger a city is, the larger a program should be to be successful. In addition, large jobs are cheaper than small ones. They allow the exploitation of economies of scale in the building process. They reduce the costs of compliance with local regulations, since it is just as hard to get a small job through local housing, planning, environmental, and other bureaucracies as it is to get a large job through. And large projects reduce the per unit legal, architectural, engineering, and selling costs.

Eligible purchasers must put 10 percent of the purchase price down as a downpayment at a time of signing a contract. This may operate as an obstacle to eligibility for some families. But the downpayment requirement has proven to be a valuable incentive to save for families wishing to purchase a home. And by giving the families some equity in their homes, it gives them a greater stake in its upkeep.

In deciding among competing applications for funding, the Secretary of HUD will take into account factors which are designed to stretch Federal dollars to produce the largest number of units possible, and to maximize contributions from State and local governments and the private sector. Specifically, the Secretary will take into account the extent to which:

Non-Federal public and private entities will contribute land required to make the program feasible;

Non-Federal public and private entities will make other contributions—including, but not limited to tax abatements, waivers of fees related to development, or direct financial contributions—which will reduce the carrying charges of homes built under the program;

The program is concentrated in an area of poverty, abandonment, disinvestment, and severe economic blight;

The program uses construction methods that will reduce the cost per square foot below the average construction cost in the market area involved;

The program will produce the greatest number of units for the least amount requested from the Federal Government, taking into account cost differences among different areas;

The program calls for the employment of local residents in the planning and construction of homes.

In order to assure that funds awarded under the program are used efficiently, grantees may not break ground, except on model homes to be used to assist in sales, until at least 25 percent of the homes to be built are contracted for sale to a purchaser who intends to live in the home, and an appropriate downpayment has been made.

This legislation authorizes $300 million to be used for the program. If the maximum grant is used for every home, 20,000 homes could be built.

I believe that this program can become an essential element in the revitalization of the Nation's most distressed neighborhoods. I welcome all comments and suggestions from my colleagues, and invite cosponsors.

Mr. Speaker, I ask that a summary of the bill be printed in the RECORD.

SUMMARY OF THE NATIONAL NEHEMIAH HOMEOWNERSHIP OPPORTUNITY ACT

PURPOSE

This Act authorizes a competitive grant program in which federal funds will help leverage local private and public funds in the construction of low-cost, single-family homes in severely blighted urban neighborhoods.

ELIGIBLE APPLICANTS

Non-profit organizations, with endorsement of local government.

USE OF FUNDS

Funds shall be used as a second mortgage loan, not exceeding $15,000 per loan, to families purchasing homes built or rehabilitated with assistance under the Act. These second mortgages shall not bear interest, and shall be repayable out of the proceeds of the sale of the home, if the proceeds exceed the amount due on the first mortgage. The second mortgages will be held by the federal govenment.

MINIMUM PROGRAM REQUIREMENTS

1. Assistance may be used for new construction or substantial rehabilitation of 1-4 family homes. Substantial rehabilitation is defined as: a) construction involving costs in excess of 60 percent of the maximum sales price of a home assisted under this Act in the area in which it is located, or b) the rehabilitation of a vacant, uninhabitable structure.

2. Eligible families are families with annual incomes not more than the greater of: a) 115 percent of the median income for a family of four in the project's metropolitan area; or b) the national median income. Purchasers must be first-time homebuyers.

3. The minimum program size is the lesser of one percent of the number of housing units in the local jurisdiction or 1,000 units.

4. Purchasers must make a minimum downpayment of at least 10 percent of the price of the home, or higher if the sponsor-

ing group prefers. The sponsoring group must pay interest to the purchaser on the downpayment during the construction period.

5. A purchaser may not lease the property.

TERMS AND CONDITIONS OF ASSISTANCE

1. Applicants must demonstrate that they have consulted with and received the support of residents in the neighborhood in which the project is to be located.

2. Applicants must submit an estimated schedule, agreed to by the local government, setting forth a timetable for completion of the project.

3. Grantees may not break ground (except on model homes to be used to assist in sales) until at least 25% of the homes to be built are contracted for sale to a true purchaser (one who intends to live in the home) and an appropriate downpayment has been made.

4. Assistance may be used only in census tracts in which the median income is below 80 percent of the area median income.

5. All homes assisted under the Act must be on contiguous parcels of land, except that 25 percent of the funds may be used for projects not on contiguous parcels of land, but confined to a single neighborhood.

6. Sales contracts entered into under the program must contain provisions requiring repayment of the second mortgage upon resale or other transfer of the home, unless the Secretary approves otherwise. If any transfer without repayment is approved, the lien shall remain in force until it is paid in full.

PROGRAM SELECTION CRITERIA

In selecting programs for assistance under the Act from among the eligible projects, the Secretary shall make such selection on the basis of the extent to which:

1. Non-Federal public and private entities will contribute the land necessary to make each program feasible;

2. Non-Federal public and private financial or other contributions (including, but not limited to tax abatements, waivers of fees related to development, or direct financial contributions) which will reduce carrying charges of homes built under the program;

3. The program is concentrated in an area of poverty, abandonment, disinvestment, an severe economic blight;

4. The program uses construction methods that will reduce the cost per square foot below the average construction cost in the market area involved;

5. The program will produce the greatest number of units for the least amount requested from the federal government, taking into account cost differences among different areas;

6. The program calls for the employment of local residents in the planning and construction of homes;

AUTHORIZATION

FY 1986, $300 million, which would assist at least 20,000 units, and more if the average amount requested is below the maximum amount.●

THE HAZARDOUS WASTE REDUCTION ACT

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mrs. SCHNEIDER. Mr. Speaker, today I join with Mr. WYDEN and a bipartisan coalition of 47 House Members in introducing the Hazardous Waste Reduction Act of 1985.

The Hazardous Waste Reduction Act will amend Superfund with a waste-end tax on the land disposal and storage of hazardous waste. The bill is an improved version of the legislation that was approved by the House Energy and Commerce Committee during the 98th Congress.

The waste-end tax will apply to all forms of land disposal, including surface impoundments, underground injection wells, and landfills. The tax rate is $20 per ton, except for underground injection, which will be taxed at a rate of $5 per ton. All forms of treatment that render a waste nonhazardous within 1 year would be exempt from the tax, including waste water treatment permitted under the Clean Water Act.

The tax will be collected from the owners and operators of RCRA permitted subtitle C treatment, storage, and disposal facilities. There are 4,800 of these facilities currently in operation, and 95 percent of all treatment, storage, and disposal takes place at just 240 facilities.

The tax will be administered on a wet weight basis in order to streamline the administration of the tax and to guarantee a study flow of revenue.

With proper administration and using conservative revenue estimates, this waste-end tax is expected to raise $286 million a year. We have included a clause mandating an automatic escalation in tax rates if the tax falls short of revenue goals in order to guarantee a stable revenue stream.

The benefits of the waste-end tax are twofold: First, the waste-end creates an economic incentive for waste producers to switch to environmentally preferable methods of waste management. EPA's 4-year evaluation of the Superfund Program concluded that a waste-end tax at relatively modest rates could cause a significant shift from land disposal to treatment and recycling technologies. The waste-end can work in concert with new RCRA regulations on land disposal to hasten the switch to safe waste-management technologies.

Second, the waste-end tax will broaden the tax base and increase the revenue available to clean up the thousands of toxic waste sites nationwide. Proposals to expand the Superfund range from the $5.3 billion, 5-year program backed by the administration, to the $13.5 billion, 5-year program backed by the National Campaign Against Toxics. Regardless of the proposal you prefer, it is clear that the current $300 million a year feedstock tax will have to be supplemented. The waste-end tax offers a fair and efficient way to provide another reliable stream of revenue for Superfund.

Mr. Speaker, the long-term solution to the toxic waste problem involves more than efforts to clean up abandoned waste dumps. It must also include specific action to discourage future reliance on land disposal. Experience has shown that there is no such thing as a safe landfill, and that supposedly safe Superfund repositories are starting to leak and will eventually require Superfund attention. The waste-end tax, together with strong RCRA regulations, can help us move toward the day when only an absolute minimum of waste is land disposed.

The waste-end concept has also been endorsed by the Chemical Manufacturers Association, the Environmental Policy Institute [EPI], the National Wildlife Federation, and the Center for the Study of the American Business. The bipartisan group of Members who join with me today in introducing this legislation recognize that the waste-end tax is a progressive, responsible idea whose time has come.

Without objection, I ask permission to enter into the RECORD a series of questions and answers on the Hazardous Waste Reduction Act.

Who Pays the Tax?

The tax is collected from the owners and operators of treatment, storage and disposal facilities (TSD) permitted under the Resource Conservation and Recovery Act (RCRA). All hazardous wastes regulated under RCRA must be taken to a permitted TSD facility.

According to EPA, there are 4,818 of these off-site and on-site facilities currently in operation. Ninety-five percent of all treatment, storage, and disposal takes place at only 240 facilities.

What Types of Waste Disposal are Taxable?

All Forms of land disposal regulated by RCRA would be taxable, including landfills, surface impoundments used for disposal, and injection wells. The tax also would apply to land treatment, ocean disposal, and the export of hazardous waste.

The tax would apply to any wastes treated or disposed of in violation of RCRA permits.

Both on-site and off-site disposal would be subject to the tax. EPA estimates that 85 percent of all hazardous waste disposal occurs on-site, typically in large surface impoundments or injection wells.

What Are the Tax Rates?

All forms of land disposal except injection wells would be taxed at a rate of $20 per ton. The $20 rate would apply to landfills, disposal surface impoundments, waste piles, and land treatment. The $20 rate also covers ocean disposal, the export of hazardous waste, and wastes treated or disposed of in violation of RCRA permits.

51-059 O-86-24 (Pt. 6)

The disposal of hazardous wastes in underground injection wells would be taxed at a rate of $5 per ton.

What About Treatment of Hazardous Waste?

The bill provides that wastes rendered nonhazardous by RCRA standards within one year of receipt at the TSD Facility would receive full credit against the tax. This credit would cover such treatment processes as incineration, recycling, and the neutralization of corrosive acids. Wastewater treatment under Clean Water Act permits would not be subject to the tax.

Any waste that remains hazardous after twelve months of treatment would be taxed. This provision is intended to prevent "pseudo-treatment" (such as solar evaporation ponds) to avoid the tax.

Residues from any treatment process that are land disposed would be subject to the tax. The tax also would apply retroactively to any waste treated in violation of permit specifications.

What types of Waste are Taxable?

All wastes classified as hazardous under the Resource Conservation and Recovery Act at the time this waste-end tax legislation is enacted into law would be taxable. These include toxic as well as characteristic wastes that are ignitable, corrosive, or reactive.

Are any Hazardous Wastes Excluded from the Tax?

All hazardous wastes not covered by RCRA's regulatory framework are exempt from the tax. Examples include small generator wastes, mining waste, the temporary on-site storage of hazardous waste (90-day limit), and the discharge of effluents permitted under the Clean Water Act.

Waste removed from a Superfund site to a permitted land disposal facility would not be taxed, in order to help keep down the cost of cleanup. While it would be more appropriate to destroy Superfund wastes than to shift them to another land disposal facility, the choice of cleanup method under the program should be determined under guidelines provided by Congress, rather than through waste-end tax policy.

In addition, a number of existing disposal sites are expected to close, due to their inability to met more stringent operating requirements imposed by Congress during reauthorization of RCRA. Wastes removed from these closed sites to permitted facilities would not be taxed. As with the exclusion for Superfund wastes, the rationale is to avoid creating obstacles to compliance with RCRA regulations.

How Much Revenue Would the Tax Raise?

The bill would raise an estimated $286 million per year, a figure based on data derived from EPA and the Chemical Manufacturers Association. The revenue estimated is calculated below:

Method	Volume (MMT)	Tax (tons)	Revenue (millions)
Landfills	3	$20	$60
Land treatment and waste piles	1	20	20
Disposal impoundments	1	20	20
Injection wells	32	5	160
Convert from Metric to English tons			26
Total revenue			286

All volume estimates are expressed in metric tons, while the tax is based on English tons (Metric Tons: English Tons=1.1:1). The volume data is taken from EPA's Westat Survey, except for disposal impoundment figures, which are derived from a survey conducted by the Chemical manufacturers Association.

How Would the Tax be Paid?

The tax would be paid by the TSD facility on a quarterly basis upon receipt of hazardous waste. A full credit would be provided for all wastes rendered nonhazardous by treatment within 12 months of receipt at the facility. To avoid double taxation, full credit would be provided for waste moving from one or facility to another.

How Would the Tax be Administered?

RCRA requires that all off-site disposal be recorded on a manifest, and on-site disposal on an operating log. In addition, all waste disposal facilities are required to prepare a comprehensive biennial report listing the amount and types of waste handled.

These documents will provide the basis for record-keeping under the tax. The bill directs the IRS to refine further the reporting system for tax purposes. An EPA study has concluded: "Although changes to the existing reporting and information systems are necessary to provide data on an annual basis for all facilities, these changes are not likely to impose a large incremental burden on the regulated community, the states, or EPA."

Would The Tax Rates Provide an Incentive to Reduce Waste Disposal?

Yes. An EPA study found that a waste-end tax would have a significant effect in shifting waste to treatment. Relatively low tax rates provide a substantial incentive to reduce high volume disposal of liquid wastes. This is due to the economies of scale that can be realized in treating large volumes of waste.

For example, the EPA study estimated that at a $5 per ton rate, about a quarter of all wastes now injected in deep wells could be rendered nonhazardous through treatment, principally by neutralizing corrosive and reactive wastes.

Are the Goals of Waste Reduction and Raising Revenue from the Waste-End Tax Contradictory?

Both objectives can be accomodated if the revenue projections for the waste-end tax are based on the most conservative estimates possible.

For this reason, a number of waste management activities that would be subject to the tax—and would produce some revenues—deliberately were excluded from the revenue estimates because they are difficult to quantify. They include wastes "stored" in the land for longer than the RCRA 90-day limit, wastes "treated" for longer than 12 months, and wastes taxed because of a violation of treatment or disposal permits.

The bill also provides for an automatic upward adjustment of the rates for any year in which the waste-end tax revenues fell short of projections.

This provision is similar to that included by the administration in its Superfund reauthorizaton proposal.

Why Tax Deep Well Injection?

An estimated 32 million tons of hazardous wastes are injected into deep wells every year, making this method the largest source of land disposal in use today. While little is known about deep wells, the available evidence suggests cause for concern about the environmental side-effects of this technology.

Leaks at Chemical Waste Management's deep wells in Vickery, Ohio prompted the state EPA to slap two fines totalling $16 million on the site operators. The rupture of an injection well in Presque Isle, Pennsylvania led to the possible contamination of Lake Erie, and to the site's placement on the Superfund National Priority List. The industry trade journal Chemical Week has warned about the potential hazards of deep well injection.

The lower rate of $5 per ton for injection wells provided by the bill compensates for the fact that wastes must be dilute to be suitable for this method of disposal.

Why Not Tax on a Dry-Weight Basis?

Wastes with a higher water content are not necessarily "better" than solid wastes. Liquid wastes are more mobile, more liable to move into groundwater, and less susceptible to containment through land disposal.

The practical effect of a dry-weight tax would be to reduce drastically revenues from injection wells. For example, the nonwater content of injected wastes ranges from 1 to 5 percent of total volume. A $50 per ton dry-weight tax would raise as little as 50 cents per ton on a wet-weight basis from wastes injected into underground wells.

An EPA study concluded that a dry-weight tax would be more complex to administer and take longer to implement than a wet-weight tax. As a result, it would be virtually impossible to predict revenues from a dry-weight tax.

The same EPA study found that the high cost of sampling ($35 to $70 per barrel) for non-water content would make the tax prohibitively expensive for small business.

Will a Waste-End Tax Encourage Illegal Disposal?

EPA compared states with waste-end taxes to those without to determine whether the reported incidence of midnight dumping increased with the tax. The study found no such correlation.

EPA has indicated that a waste-end tax could help refine the existing data on the treatment, storage and disposal of hazardous waste. The data could be used by both the IRS and EPA to target subsequent permitting and enforcement activities.

Have State Waste-End Taxes produced the Revenues Projected?

In the summer of 1984, EPA conducted a survey of the waste-end tax programs in eight states.

In six states, waste-end taxes had generated 71 to 98 percent of projections; in two states, revenues were ahead of projections. (For perspective, the Superfund feedstock tax has realized 78 to 84 percent of revenue projections).

EPA found that previously reported shortfalls in initial revenues from waste-end taxes were due primarily to inadequate data on actual waste volumes, overall economic recession during the startup period, failure to account accurately for the cost of tax exemptions, and lack of programmatic resources during startup.●

HAROLD L. HOLLIDAY, SR.

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. WHEAT. Mr. Speaker, I am greatly saddened by the death of Harold L. Holliday, Sr., a founder of one of Kansas City's major political

organizations and a courageous civil rights activist.

A forceful personality and a brilliant orator, his contribution to civil rights and social justice in the Kansas City community is immeasurable. Mr. Holliday was literally a pioneer in the field of civil rights. He was fighting for social and economic justice long before the civil rights movement of the 1960's attracted popular support. The legacy he leaves will be felt for generations to come in Kansas City.

One of his early civil rights struggles was to challenge the rule that banned blacks from the University of Kansas City School of Law. He was successful and he received his law degree from that school in 1952, the first black person ever to do so. For the rest of his life he used his keen legal mind to help break down racial prejudice.

Mr. Holliday was one of the founders of Freedom, Inc., the powerful black political organization that is a dominant political force in local, State, and national elections. Mr. Holliday served as a Jackson County magistrate, a leader in the NAACP, and the Missouri Bar and the American, National, Kansas City and Jackson County Bar Associations. Mr. Holliday also served 12 distinguished years in the Missouri House of Representatives.

During his tenure in the Missouri Legislature from 1965 to 1976, he was noted for supporting progressive legislation not only in civil rights, but in consumer protection and other areas as well. His revision of the criminal code was especially noteworthy. Mr. Holliday consistently fought against proposed increases in interest rate ceilings on small loans and helped win support for new laws to tighten requirements on door-to-door sales and to permit suspension of payments on defective merchandise. Throughout his career in Jefferson City, Mr. Holliday was a strong voice in the Missouri House. He was not always liked, but he was always admired. His was a voice of courage and conviction.

In 1976, Harold Holliday put his political future at stake when he relinquished a safe seat in the Missouri House of Representatives to attempt to give Kansas City's black community representation in the Missouri State Senate for the very first time. He realized the odds were slim, but made the effort willingly, pointing out that those who were able to serve had a responsibility to give of themselves even if only to pave the road for those who would follow.

In seeking someone to support as his successor in the Missouri House of Representatives, Mr. Holliday settled on me, informing me of his support on Valentine's night in 1976 by saying:

"Wheat, you know we looked long and hard for someone bright and able, someone really capable, someone couragous, someone with statute, someone who can fill my shoes . . . , but we couldn't find anyone so, I guess you'll have to do,

and he laughed. Later that year, as I was winning my first election to public office, Harold Holliday lost his bid for the senate by less than 300 votes out of more than 10,000 votes cast in an election divided strictly on racial lines.

It was a bitter defeat for one who was regarded by all objective sources as one of the most able persons ever to serve in the house of representatives and a powerful force for progressive causes without regard to race. But even at this disheartening time he was ready with counsel typical of his steadfast commitment to service telling me that "in Jefferson City there's a lobbyist for every cause under the Sun, liquor lobbyists, truck and bus lobbyists, utility lobbyists, a voice for everyone but the people; you go be a voice for the people." And he laughed, a laugh that showed no trace of bitter disappointment he felt.

My career in State politics lasted from 1977 to 1982, with the standard set by Harold Holliday, Sr., not only a goal to strive for, but an ethic to live by. While never intruding, he was always available to lend a helping hand. He encouraged me to support Ken Rothman for speaker of the house of representatives saying he was "by far the most qualified candidate and if he doesn't win, it will be only because white folks don't elect Jews" and "if a Jewish person can become a speaker today, maybe a black person will make it tomorrow," and he laughed. Ken Rothman not only became speaker of the house, he was later elected Lieutenant Governor of the State of Missouri and in 1984 was the Democratic nominee for Governor.

Holliday was the keynote speaker of the first Missouri Legislative Black Caucus weekend in 1981. He recalled for a captivated audience, earlier days of the political rights struggle in Jefferson City when in 1970 just a few black legislators had worked together—"like fingers on a hand; like a fist," to create a seat for a black Congressman in St. Louis. Holliday's impassioned call for unity among black legislators was the catalyst that spurred, in 1981 a strong effort to prevent BILL CLAY from being gerrymandered out of his seat in the U.S. Congress.

In 1981, Dick Bolling announced his intention to retire from the U.S. House of Representatives. I approached community leaders, both black and white, to gauge their opinion as to whether I ought to run for Congress. While many were complimentary, almost without question all wondered whether a black person could win a district with only a 20-percent black population. Harold Holliday, Sr., however, was different. He said that it was my obligation to at least make the attempt; that perhaps I would not win, but "you know WHEAT, black people have a right to fail too," and he laughed.

On election night the vote totals came in and I had won by 1,000 votes over my nearest opponent and media representatives were calling it a stunning upset. Holliday said he too was surprised—that he hadn't expected it to be that close.

In recent months I saw Mr. Holliday only infrequently, usually at a public function for a progressive group that could count Harold Holliday, Sr., as a long-committed supporter. He remarked to me at the last of those meetings that it seemed we saw each other only when one of us was receiving an award presented by the other and he only wondered what we had done to deserve it, and as he said that he laughed.

Last week I saw Harold Holliday as he was laid to rest, and I realized there was no trophy or plaque which could honor his life.

I feel fortunate to say I knew Mr. Holliday. He was a rare individual and his death is a loss shared by all his determined spirit touched. Many have benefited from his knowledge and his dedication, and he will not be forgotten. Each of us will remember this man in some special way. His laugh, his spirit, his intellect, his compassion will be missed especially by his family, but Harold Holliday will live in the memories of his loving wife Margaret, his son Harold, Jr., his daughter Bertha, his daughter-in-law Gayle, his grandchildren Harold and Holli.

Perhaps they commemorate his life best, as he instilled in them the spirit that was his hallmark. His 12-year-old grandson, Harold III, told me recently that he expected to be Kansas City's Congressman someday soon. Because Harold Holliday, Sr., lived the life he did, his grandson will have that opportunity and because he inherited Holliday's spirit, I expect he'll make it.●

ERIC TRAYNOR, ST. PETERSBURG'S AWARD WINNING AUTHOR

HON. C.W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. YOUNG of Florida. Mr. Speaker, the John F. Kennedy Center for the Performing Arts will present again this year a special edition of Children's Radio Theatre featuring award winning plays written by talented children throughout our Nation. One of this year's five winning authors, selected from more than 1,000 entries, is Eric Traynor, a 14-year-old student from St. Petersburg, FL.

Eric's winning play "A Dagger of the Mind" particularly impressed the com-

petition's judges with its "topicality and depth of emotions." The play is especially relevant because it deals with the serious subject of suicide by children. "A Dagger of the Mind" is a moving account of a teenager's struggle with his feelings about his parent's divorce. The play within a play takes place during a rehearsal of "Macbeth," where a young man is finally able to confess his thoughts of suicide to his leading lady, a Cambodian boat person.

Eric's parents, Anthony and Page Traynor, both professional writers, can be proud because their son exhibits the creative energy that our youth provide our Nation. I recommend to my colleagues this hour-long broadcast of Eric's and the other four students' plays during the Seventh Annual Henny Penny Playwriting Contest that will be aired nationally on public radio stations beginning April 13. Listening to these works by young authors will reassure you that our Nation has a bright future when this generation of Americans assumes their position to guide our country.●

IN MEMORY OF DEA SPECIAL AGENT ENRIQUE CAMARENA SALAZAR

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. RANGEL. Mr. Speaker, recently we were shocked and saddened at the tragic outcome of the kidnaping in Guadalajara, Mexico, of DEA Special Agent Enrique Camarena Salazar and the pilot who occasionally assisted him, Alfredo Zaval Avelar. The slaying of these brave men is a blow to the DEA, indeed to our entire Nation, as the tragedy of drug abuse strikes every segment of society. Most importantly, it is a great loss to their families and friends. My deepest sympathies go out to them.

A veteran DEA agent, Mr. Camarena has been involved in successful investigations of cocaine and marijuana traffickers in the Guadelajara area. We will remember Enrique Camarena for his skill and dedication to his work as a special agent and for having made the supreme sacrifice to preserve the health and integrity of his country. May his death not be in vain. I pray that the citizens of our great country unite to overcome the viciousness and brutality of the criminals who so ruthlessly took Agent Camarena's and Mr. Zaval's lives in order to continue to saturate our country with their poison, narcotics.

The single most important thing we can do to honor these men is to not only continue their fight, but to win it. In the memory of these two brave men, we must overcome.●

CONGRATULATIONS TO MAX SCHENKLER ON HIS 80TH BIRTHDAY

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. ACKERMAN. Mr. Speaker, I would like to ask my colleagues in the U.S. House of Representatives to join me now in congratulating Max Schenkler on the occasion of his 80th birthday, on April 16, 1985.

Mr. Speaker, Max Schenkler is a man who is much loved in Queens County, NY, where he lived for almost 25 years. When he and his wife, Pearl, left several years ago to make their home in Boca Raton, FL, it was no surprise that their departure was deeply felt by the entire community—because they had made everyone in that community part of their family. Max and Pearl Schenkler are cherished by everyone who comes to know them. And in Queens, a great many people came to know and love then—in their neighborhood and synagogue, through Max's many years as a teacher and educator, and through their loving service in community organizations. We in New York still miss them.

Max gives himself to people in many ways. He spent 40 years giving his talent, humor, and insight to New York City schoolchildren. As a teacher, Max did much more than impart knowledge. His enthusiasm for life and gift for sharing himself with others gave him a special relationship with his students. If children are to become interested in learning, in growing, and in stretching their minds and imaginations to meet new challenges, they must be shown the way. Max Schenkler did that. Generations of young students were instilled with an excitement about learning. For thousands of young New Yorkers, Max provided the spark so vital and so necessary to propel them on to higher education and exciting careers and opportunities.

Mr. Speaker, Max has had a distinguished career as an educator, and as principal of Public School 143, an elementary school in Queens. There he trained and inspired scores of dedicated teachers to the extent that his impact will be felt for many generations yet to come. He is a man of wide interests and talents, one who throws himself into whatever he's doing—whether he's helping someone in need or in trouble, hosting a birthday or anniversary celebration for a friend, or pursuing his most beloved hobby—golf.

Max's professional and family life have been rich with success. His 80th birthday is a joyous occasion for his many friends and his beautiful family—his lovely wife, Pearl, his loving daughter, Carol Jacobson and her husband, Gil, and daughter, Debbie, and Max's son and my dear friend, Michael. Max always gave his children the love and encouragement they needed when the time came to make tough decisions or embark on new challenges.

Mr. Speaker, Max Schenkler is a beautiful man who has touched many lives. I would like to ask all of my colleagues in the U.S. House of Representatives to join with me now in wishing him a joyous 80th birthday.●

OPPORTUNITY WENT THATAWAY

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mrs. ROUKEMA. Mr. Speaker, of the many priorities facing the present Congress, the reauthorization of the Higher Education Act, which includes the Federal student aid programs, is certainly near the top.

In my view, the Higher Education Act is not only an essential component of the higher education system, but is a fundamental tool in our effort to maintain a healthy and competitive economy and social structure. Hence, even among those of us who harbor a healthy skepticism of a strong Federal role in education, the need for continuation of the student aid programs is beyond question. Of course, this does not presume that these programs cannot be further perfected based upon our experience with them. Obviously, the need for that perfection defines the role of this Congress in reauthorizing the programs.

As it turns out, the reauthorization process, which involves numerous complex issues, has become further complicated because it occurs at a time when we are faced with massive budget deficits. In an attempt to curb those deficits, the administration has proposed significant changes in the programs. Regardless of one's position on the merits of those proposals, one can reasonably ask the question of whether we should be considering drastic changes before we engage in the reauthorization process, which will not be completed until next year.

This is precisely the question that has been so well articulated by my colleague on the Postsecondary Education Subcommittee, JOHN MCKERNAN, in an op-ed column which appeared in the Washington Times on March 15, 1985. I commend the attention of my colleagues to this article. The points raised by the gentleman from Maine are well deserving of our attention as we continue with the budget deliberations.

The article follows:

OPPORTUNITY WENT THATAWAY

(By John McKernan)

Recent budget proposals by President Reagan and Education Secretary William J. Bennett to cut student aid by 25 percent is more than a swipe at "stereos, cars, and beach vacations"—to paraphrase Mr. Bennett's now-famous insult to the American college student.

It is also a very bad sign for those of us in the Republican Party who attribute our party's recent success to its promise of opportunity—economic, educational, or otherwise. After all, hasn't GOP come to mean "Grand Opportunity Party?"

So why then is President Reagan sending signals to millions of American families that they may well be denied the chance to pursue a slice of this nation's prosperity? What's our party doing talking about denying people the educational opportunity that is so instrumental to economic success?

At no time in our history has economic "opportunity" been more closely tied to education. With our whole economic system in transition, it is imperative that individuals have the skills and knowledge to succeed in today's fast-changing labor market. "The most formidable challenge for the future will be to train people to work in the information society," John Naisbitt said in Megatrends. "Jobs will become available, but who will possess the high-tech skills to fill them?"

Since Richard Nixon said in 1971 that "no qualified student who wants to go to college should be barred by lack of money," the Republican Party has been a front-line advocate for all who demonstrated the ability and desire for further education. It is, indeed, ironic that administration officials are jeopardizing post-secondary education for 1 million youngsters, when, for the first time in 50 years, a plurality of Americans now find themselves identifying with the Republican Party, and when the greatest gain made by the GOP has been among younger voters.

There is no question that our current federal deficit problems must restrict funding for student aid as well as other worthy programs. To stretch the available dollars, we need to make changes in our current student aid portfolio. As it did in 1981, the Reagan administration makes some valid suggestions for reform.

A major overhaul of student aid programs, however, should be part of the reauthorization of the Higher Education Act, scheduled to take place later in the 99th Congress. Withholding major revisions in the program until then will allow for a thorough review of the impact of the proposed changes, in addition to allowing us to find a streamlined, efficient way of providing assistance to the neediest of students.

I, for one, hope the Congress will eventually adopt some of the proposals, such as requiring multiple disbursements by lenders and reducing the reinsurance rate, as well as combining some of the programs to give more flexibility to institutions themselves.

Regardless of one's position on the administration's proposals, however, we should not use the budget process to make significant changes in a program that has done its job. Instead, we should consider a funding freeze for student aid at 1985 fiscal year levels. With the reduced levels of real dollars available for student aid, an income limit on eligibility might be necessary, but not the arbitrary $32,500 limit proposed by the administration. Nor should we accept the proposed $4,000 cap on total aid, since that affects those having the greatest need.

After careful and orderly evaluation, we should make whatever changes are necessary to distribute equitably the burden that reduced funding would entail, taking into consideration family size and needs.

The Republican Party is on the verge of being considered a true "opportunity" party by a majority of the American people. Those who believe in an opportunity society know there are limits to that which government can and should provide. They understand that programs, such as the student loan program, cannot be open-ended. Yet, they also recognize that the key to opportunity is preserving access to education.

Any party purporting to champion opportunity must be tested by its stand on student aid, because it is mainly through our schools that we can offer hope for a better future.

It was the father of our party, Abraham Lincoln, who said: "I can only say that I view [education] as the most important subject which we, as a people, can be engaged in." ●

GIVE THE WHISTLEBLOWER SOME INCENTIVE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. STARK. Mr. Speaker, while hardly a new phenomenon, fraudulent contracting at the expense of the American taxpayer is assuming levels that, in this era of severe spending constraints, both threatens the budget and weakens our Armed Forces. Daily we hear of inadequately tested or shoddy goods being foisted on the Government with virtual impunity. Currently, Government officials who expose such occurrences against the wishes of their superiors risk their careers and derive little benefit for their conscientiousness. Both the incentives to blow the whistle and the relatively risk-free environment for contract cheating must be reformed in order to correct this problem.

The False Claims Act of 1863 was intended to check these abuses. This act allows qui tam actions to be brought; that is, a civil action initiated by an individual for himself as well as for the U.S. Government. That person is entitled to a proportion of any damages awarded to the U.S. Government. The Department of Justice must decide within 60 days of notification of the action whether to assume full responsibility for the suit; if it does not, or if in the court's judgment it has failed to prosecute the case vigorously within 6 months, control of the case reverts to the individual.

While apparently a useful means of encouraging the revelation and prosecution of contract fraud, this law currently contains one great self-defeating flaw. A qui tam—private—action will be dismissed if the information relevant to the false claim is in the possession of the Government. Thus Government employees cannot bring such a suit. Private individuals would also experience difficulty in successfully prosecuting a qui tam action because, in this era, the Government can claim to have possession of, or access to, almost all information.

The reform I propose allows citizens, including Government employees and military officers, to proceed with a qui tam suit if, after bringing evidence of a contract abuse to the attention of the head of the appropriate agency, that agency fails to undertake proper corrective action within 6 months.

To prevent grossly excessive rewards for what is, after all, basic good citizenship, I also think we should lower the percentage of damages awarded to the individual bringing suit from the current law's 10 to 25 percent, to not less than 1 percent of the total but not more than $1,000,000.

Conventional remedies have proved inadequate against these types of consensual procurement crimes due to a lack of both complaining witnesses and sufficient incentive to inform. I believe that the qui tam action could be a powerful ancillary method of law enforcement that would bring to book dishonest contractors, discourage others from the temptation to cheat the Government, and save our taxpayers billions of dollars every year. ●

DISINVESTING FEDERAL SUPPORT FOR APARTHEID

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. CONYERS. Mr. Speaker, today I am introducing H.R. 1986, the "Federal Contracts for Apartheid Prohibition Act of 1985." If enacted, this bill would deny Federal contracts and/or grants to any business or corporation with direct or subsidiary investment of any kind in South Africa. This would include those who make loans to any South African enterprise or the Government. The objective of the bill is to remove direct and indirect Federal support for the apartheid system and in so doing to further encourage the disinvestment process from South Africa, already undertaken by over 40 firms.

Countless corporations and firms with investments in South Africa receive Federal contracts and grants of some kind. Because, as virtually all analysis and studies show, foreign investment in South Africa directly supports the economic, political, and social structures of apartheid, this continued Federal contribution to the brutally racist system of apartheid is

contrary both to our principles and interests.

The time to start Federal as well as corporate disinvestment from South Africa is now. While U.S. firms employ less than 1 percent of the black South Africans, they control major sectors of the economy which are crucial to the maintenance of the apartheid structure. Numerous studies point to the deteriorating and increasingly repressive conditions that have accompanied increased foreign investment in South Africa during the course of the past 20 years. Federal support for this racist repression, direct or indirect, is unacceptable.

Indeed, it is telling that while the major black trade union federations in South Africa have issued strong statements calling for disinvestment from South Africa, the regime has spent millions of dollars fighting disinvestment legislation in the United States and has also imposed strong criminal penalties against those in South Africa who advocate disinvestment.

Many well-intentioned individuals have acknowledged the direct material support that U.S. investment provides apartheid, but argue that if the United States were to disinvest, firms from other countries would replace them. This argument is fatuous. Were a major superpower like the United States, with control over a large segment of the South African economy, to disinvest, the investment climate would be so dramatically changed that no prudent firm would risk investing in South Africa, particularly when the walls of apartheid are crumbling under internal turmoil and civil war. Indeed, this contention has been supported by many South African economists and business leaders, most notably Harry Oppenheimer, chairman of the Anglo-American Corp. which is South Africa's largest industrial corporation and the world's top producer of gold.

Recent events underscore the fact that time is running out for the apartheid regime. The demonstrations against City Corp in South Africa this week remind us that unless the U.S. Government and U.S. firms take a clear position on the side of the black South Africans, then we will become increasingly the object of the unrest. As the managing director of Goodyear Tire & Rubber Co.'s South African subsidiary explains, "foreign firms are going to be the target * * * we are right here in the tinderbox." We must now constructively disengage while doing so can still be perceived in a positive light.

A summary of the bill and the text follows:

SUMMARY OF H.R. 1986

I. A bill to prohibit any federal contract or grant from being awarded to any person with investments in South Africa, until South Africa is rid of its system of apartheid and moves to a system of one-man, one vote.

II. Definition of Investment in South Africa:

(a) Investment in the Government.—A person makes or holds an investment in the government of South Africa if that person makes a loan or other extension of credit to, or beneficially owns or controls a bond or other debt instrument issued by the government of, South Africa or any corporation, partnership or other organization which is owned or controlled by the Government of South Africa.

(b) Investment in a business enterprise.—A person makes or holds an investment in a business enterprise if that person (1) establishes or controls funds or other resources (including making a loan or other extension of credit) for the establishment of such a business enterprise; (2) otherwise invests funds or resources in such a business enterprise including beneficially owning or controlling a share or interest in such a business enterprise including beneficially owning or controlling a bond or other debt instrument issued by such a business enterprise, making capital contributions in money or kind to such a business enterprise, and making a loan or other extension of credit to such a business enterprise, or giving security for the debts or such a business enterprise.

III. Enactment: The provisions of the bill are to become effective seven (7) days after its enactment and are to remain in effect until the President determines, and both houses of Congress agree by Joint Resolution, that apartheid has been eliminated.

H.R. 1986

A bill to prohibit any Federal contract from being awarded to any person with investments in South Africa, until the Government of South Africa makes substantial progress towards an end to discrimination based on race or ethnic origin

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROHIBITION ON FEDERAL CONTRACTS.

No contract may be entered into by the United States Government with any person who makes or holds any investment in the Government of South Africa or in a business enterprise in South Africa until—

(1) the President determines and certifies to the Congress that—

(A) the Republic of South Africa has ended its military occupation and political control of Namibia and has recognized the independent sovereignty of Namibia, and

(B) the Government of South Africa has made substantial progress toward the full participation of all the people of South Africa in the social, political, and economic life in that country, and toward an end to discrimination based on race or ethnic origin; and

(2) a joint resolution is enacted approving the President's certification.

SEC. 2. REGULATIONS AND REPORTS.

The President may issue such regulations, licenses, and orders as are necessary to carry out this Act. The President may require persons subject to section 1 of this Act to file such reports as may be necessary to ensure compliance with that section.

SEC. 3. ENFORCEMENT.

The President shall take the necessary steps to ensure compliance with the provisions of this Act and any regulations, orders, and licenses issued under this Act, including establishing mechanisms to monitor compliance with the prohibitions contained in this Act. In ensuring such compliance, the President may conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to any matter under investigation.

SEC. 4. PENALTIES.

Any officer or employee of the United States who violates section 1 of this Act shall be fined not more than [$] or imprisoned not more than — years, or both.]

SEC. 6. DEFINITIONS.

For purposes of this Act—

(1) PERSON.—The term "person" includes a State or local government.

(2) SOUTH AFRICA.—The term "South Africa" includes—

(A) the Republic of South Africa,

(B) any territory under the administration, legal or illegal, of South Africa, and

(C) the "bantustans" or "homelands", to which South African blacks are assigned on the basis of ethnic origin, including the Transkei, Bophuthatswana, Venda, and Ciske.

(3) INVESTMENT IN THE GOVERNMENT OF SOUTH AFRICA.—A person makes or holds an investment in the Government in South Africa if that person makes a loan or other extension of credit to, or beneficially owns or controls a bond or other debt instrument issued by, the Government of South Africa or any corporation, partnership, or other organization which is owned or controlled by the Government of South Africa, as determined under regulations issued by the President;

(4) INVESTMENT IN A BUSINESS ENTERPRISE IN SOUTH AFRICA.—

(A) IN GENERAL.—A person makes or holds an investment in a business enterprise in South Africa if that person—

(i) establishes or controls funds or other resources (including making a loan or other extension of credit) for the establishment of such a business enterprise;

(ii) otherwise invests funds or other resources in such a business enterprise, including—

(I) beneficially owning or controlling a share or interest in such a business enterprise;

(II) beneficially owning or controlling a bond or other debt instrument issued by such a business enterprise;

(III) making capital contributions in money or kind to such a business enterprise; and

(IV) except as provided in subparagraph (B) of this paragraph, making a loan or other extension of credit to such a business enterprise, or giving security for the debts of such a business enterprise; or

(iii) controls a business enterprise in South Africa, in cases to which clauses (i) and (ii) do not apply.

(B) EXCETION FOR CERTAIN EXTENSIONS OF CREDIT.—The term "investment in a business enterprise in South Africa" does not include an extension of credit which—

(i) is made to finance the sale of goods or services to a business enterprise in South Africa, and

(ii) is repayable not more than [60] days after the goods or services are delivered.

(5) BUSINESS ENTERPRISE.—The term "business enterprise" means any organization, association, branch, or venture which exists

for profitmaking purposes or to otherwise secure economic advantage, and such term includes the ownership of real estate.

(6) BRANCH.—The term "branch" means the operations or activities conducted by a person in a different location in its own name rather than through an incorporated entity.

(7) CONTROL.—A person shall be presumed to control a business enterprise in South Africa if—

(A) a majority of the members of the board of directors of the business enterprise are also members of the comparable governing body of that person;

(B) that person has authority to appoint a majority of the members of the board of directors of the business enterprise;

(C) that person has authority to appoint the chief operating officer of the business enterprise; or

(D) the business enterprise is oprated by that person in accordance with an exclusive management contract.

SEC. 7 EFFECTIVE DATE.

This Act shall take effect —— days after the date of the enactment of this Act.●

DEFENSE CONTRACT ABUSES

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. BRYANT. Mr. Speaker, the Washington Post has begun a series of articles which will examine the abuses uncovered in defense contracting, an issue which has been under scrutiny by the Energy and Commerce Subcommittee on Oversight and Investigation.

I commend this second in the series to my colleagues' attention:

PROFITS SOAR IN BUILDUP AS FIRMS CASH IN, QUESTIONS CROP UP

(By Fred Hiatt and Rick Atkinson)

MARIETTA, GA.—The arsenal of democracy is busy these days at Air Force Plant No. 6. Where the Lockheed Corp. nearly died 15 years ago, 17,000 workers now move with an agile hustle among the heaps of aluminum and rivets and tires being fashioned into military cargo planes—and record profits.

Five miles to the north, in the shadow of Kennesaw Mountain, one of Lockheed's 5,871 subcontractors also is flourishing. While Lockheed builds the world's largest airplane, workers at the Torco Inc. machine shop turn out thousands of slender metal pegs destined for the fuselage of that plane, the C5B. The pegs represent Torco's reentry into military contracting after an eight-year hiatus.

Colossal Lockheed and tiny Torco are among tens of thousands of beneficiaries of a spending spree so intense that aerospace sales this year are expected to break the record set at the peak of the Vietnam war. The industry's backlog, built mostly from Pentagon orders, has reached a staggering $133 billion. Defense production since 1980 has grown at three times the clip of U.S. industry as a whole.

President Reagan's $2.3 trillion buildup is like nothing ever seen in peacetime America. It has produced jobs, advances in science and, for many Americans, a renewed sense of patriotism.

RENEWAL OF SUSPICIONS

With that pride, however, have come age-old suspicions of war profiteering by arms merchants.

The arsenal of democracy, as Reagan calls the weapons industry, is cashing in at an astonishing rate. And critics question whether it is delivering fair value for the taxpayers' billions.

Defense contracts are yielding profits rarely matched by commercial business; the Pentagon's top dozen companies earned more than $6 billion last year.

But few of those defense giants are paying any federal income taxes to help finance the buildup—instead exploiting a giant loophole, known as "The Method" to industry accountants.

Some of the most profitable have collected tax refunds, payments from the government that amount to a negative income tax.

While charging the government inflated prices for everything from pliers to helicopters, according to Pentagon and congressional investigations, the companies often reward top executives with million-dollar salaries and other employees with wages far above national norms.

Nor does top dollar appear to be buying top quality. Just in the past year, the Pentagon has found improperly tested microchips and sloppily soldered missiles, as well as cracks in the wings of attack planes and the tails of its newest jet fighters.

Furthermore, there are vexing questions about whether the Pentagon is getting a lot less bang for a lot more buck.

Although warplanes today obviously are bigger and more complex, Air force Plant No. 6 was cranking out three B29 bombers a day during World War II; today, Lockheed is muscling up to build one C5B a month.

Finally, a spotlight has been turned on the industry's ethics by allegations of improper billing for nucler-warhead contracts (General Electric); falsifying bills on the MX missile (Sperry); billing taxpayers for boarding an executive's dog (General Dynamics); charging the Navy $25 million in legal fees (McDonnell Douglas); cutting corners in testing electronic chips (National Semiconductor) and billing the Pentagon for political contributions (Boeing).

Administration and business leaders contend that abuses are rare and unfairly sensationalized by the news media and congressional critics.

"We care as Americans, and we care as an industry," Roy A. Anderson, Lockheed's chairman, told Congress.

"Sure, industry has made some mistakes, but I believe that in relation to the magnitude and complexity of defense procurement, they have been isolated."

But former deputy defense secretary Frank C. Carlucci, who left the Pentagon two years ago, said he was dismayed that companies expend so much energy elbowing each other for a bigger slice of the pie.

"The biggest problem I have with the defense industry is their desire to expand their own program at the expense of the other fellow," Carlucci said.

"As I've told them publicly, it's kind of like rearranging deck chairs on the Titanic . . . Maybe [I am] unrealistic and utopian, but certainly other industries have looked to the common good."

WAGES TAKE OFF

It was only a quarter century ago that the Air Force used to scrutinize every contractor salary above $25,000 a year, reserving the right to approve or quash those deemed exorbitant.

Times have changed. The lowest annual pay for a chief executive among the top 10 defense contractors is just under $500,000. Several earn more than twice that.

Executive pay at a dozen large defense aerospace companies averages 42 percent higher than the average salaries and bonuses at comparably large commercial companies, according to a General Accounting Office study last fall.

The relatively high salaries aren't limited to the corporate brass, either.

The Congressional Budget Office last year found that aerospace workers earned 21 percent more than the average U.S. worker, even after adjusting for their higher skills and training.

Defense Department auditors last year found that security guards at 13 defense plants were earning as much as $26,000 a year more than guards at nearby commercial plants. Other studies show similar results for secretaries and janitors.

The Pentagon's interest in salaries is more than idle curiosity: about 70 percent of contract dollars underwrite wages, according to Maj. Gen. Bernard L. Weiss, chief of Air Force contracting policy.

The Defense Department has a legal obligation to ensure that those contractor wages are "reasonable," but the burden of proof for demonstrating exorbitance rests with the government.

SALARIES AT THE TOP: 1983

[What Executives Earned at the Biggest Defense Contractors]

Corporation and executive	Annual pay	Long-term compensation[1]
General Dynamics:		
D.S Lewis, chairman	$478,000	$898,000
O.C. Boileau, president	539,000	605,000
McDonnell Douglas:		
S.N. McDonnell, chairman	567,000	(2)
J.F. McDonnell, president	357,000	(2)
Rockwell International:		
R. Anderson, chairman	1,047,000	(2)
D.R. Beall, president	782,000	(2)
General Electric:		
J.F. Welch, Jr., chairman	1,158,000	1,673,000

That has been nearly impossible. An Air Force memo in March 1984 complained about contractor "wage escalations far in excess of actual inflation" and lamented that the Pentagon lacks the clout to challenge "excessive compensation costs."

Inflated salaries also boost a contractor's profits. Because profit often is calculated as a percentage of overall costs, the higher the costs paid by the government—including reimbursement for wages—the greater the profit.

The Pentagon may even pay for employees of the contractor who aren't working on government business. The Air Force memo cited one "blatant example" involving the Stanwick Corp., in which the Armed Services Board of Contract Appeals ruled that the Pentagon had to pay for "admittedly 'unproductive' engineers."

Why? Because, according to the memo, "the contractor had to retain its technical expertise in order to attract new work."

OUT OF A NOSEDIVE

After a brush with bankruptcy and a billion-dollar loss in the 1970s on a commercial jetliner, the L1011, Lockheed has found the secret of success in the 1980s: government work.

Lockheed, which now gets 85 percent of its sales money from the U.S. government, isn't alone. Boeing, General Dynamics, Litton, Martin Marietta, Rockwell and other giants with both government and commercial contracts have leaned increasingly toward the Pentagon.

The reason is simple: Work is bountiful and profits are dwarfing companies' earnings on commercial work. In some cases, defense work is 10 times as lucrative, according to an internal Navy study, a sharp reversal from the 1970s.

In 1983, Boeing reported a profit of $98 million on about $7 billion in commercial sales. Its military work, by contrast, reaped almost three times the profit—$289 million—on $2.6 billion in sales. Moreover, Boeing had nearly four times as much of its money tied up on the commercial side, according to company figures.

Across the board, the defense industry is flush with cash and boasting about it to stockholders. Lockheed: "1984 was the third consecutive year of record earnings." United Technologies: "Best year ever in 1984." General Dynamics: "For the first time in many years, all operating units were profitable."

Industry chieftains point out that when profits are calculated in proportion to sales, the returns are modest.

Lockheed, for example, earned about a 4 percent profit on sales last year, according to Lockheed-Georgia president W.P. Frech, who observed, "It's not the lucrative thing that people think."

But when using the yardstick most analysts say gives a truer picture—return on equity, or profit as proportion of money invested—quite a different story emerges. Lockheed ranked first among defense contractors, with a remarkable 87 percent annual return on equity during the past five years, according to Forbes magazine.

The Pentagon usually doesn't ask its suppliers how much profit they end up making, and companies balk at disclosing contract-by-contract earnings.

But some notion can be gleaned from a General Accounting Office study of several cases that Adm. Hyman G. Rickover had denounced as excessive:

On a contract to supply cobalt material for large valves in Navy nuclear ships, the Cabot Corp. of Boston earned profits of 61 percent of the contract value.

The Carborundum Co. of Niagara Falls, NY, earned 25 percent profits on a contract to provide boron carbide for Navy nuclear reactor cores.

The United States Steel Corp. insisted on profits between 27 and 38 percent for high-pressure cylinders used in Trident nuclear submarines.

In each case, the companies either disputed the GAO's conclusions or asserted that the profits were in line with the difficulty of the job.

Since 1976, the Pentagon has steadily increased profits for its contractors in hopes that the companies will plough more cash into modern equipment. But an Air Force study in 1982 found that, while profits had increased sharply, "relative investment did not change."

Once again, the Pentagon is doing a major study of industry profits and investment, with results expected this spring.

Some critics say that contractors have little incentive to invest, either because the government often antes up its own money or because Pentagon logic frequently dictates that the more money a contractor spends building a weapon, the more profit he earns.

"Therefore, a contractor may actually see profits reduced as a result of efforts to improve productivity and reduce costs," two Pentagon officials concluded in Industrial Engineering magazine last year.

To encourage savings, the Pentagon has tried to replace "cost-plus contracts"—which reimburse a company for whatever it spends—with fixed-price contracts. But some contractors beat the system by shifting costs from fixed-price contracts in one part of their factory onto cost-plus work under way elsewhere, according to Pentagon investigators.

Inappropriate charging, for which General Electric was indicted last week, is common, the Pentagon told Congress last year.

"Because the government reimburses all costs which are allowable, allocable and reasonable, the contractor may increase profit by mischarging," the Pentagon added. "Frequently, work that is being done by low-level technicians is billed as being done by senior scientists or engineers at much higher rates."

In addition to paying a negotiated profit, the Pentagon reimburses contractors for part of their overhead costs—electricity or clerical help, for example—just as other companies cover overhead in the price of their products. But overhead has long been "the contractor's carpet, the one where you lift the corner to sweep the dirt under," according to Pentagon critic Gordon Adams.

Recent investigations have shown how General Dynamics billed taxpayers for such overhead expenses as babysitters for executive's children, kennel fees for an executive's dog and the purchase of a $546 mattress for an executive displeased with a standard hotel bed.

But General Dynamics isn't alone, according to George R. Spanton, who recently retired as chief Pentagon auditor at Pratt & Whitney's aircraft engine plant in West Palm Beach, Fla.

The government has challenged billings by Pratt & Whitney for such overhead costs as a Halloween party thrown for "employee morale" and a $67,500 donation to an Oklahoma arts society favored by an Air Force general's wife, Spanton said.

A spokesman for Pratt & Whitney said that the donation was charged in error and quickly withdrawn and that, in general, the company has not billed the government improperly. None of the charges questioned by the Pentagon since 1978 have been "negotiated" or resolved yet, the spokesman added.

"It's not billions of dollars," Spanton said. "But it gives you an idea of their 'I don't give a damn' attitude."

A FREE LOAN

Hidden under the $314 billion the Reagan administration wants to spend on defense next year is an annex to the military budget: the money the government won't collect from defense contractors in taxes.

"When you have deferred taxes of $10 billion, that's a free loan," defense analyst Laurence Lytton said. "It costs the taxpayers $1 billion a year."

According to spokesmen for the companies, General Dynamics has paid no federal income taxes since 1972, Lockheed since 1979, Boeing since 1980. Grumman has paid about $30 million in the past few months, the company's first contributions to the Treasury since 1976.

In fact, like many American corporations, some defense giants have collected massive refunds from the government by taking advantage of 1981 tax legislation.

General Electric, ranked fourth in the defense industry, earned $6.5 billion in profits from 1981 to 1983, yet paid no federal income tax and claimed a refund of $283 million, according to a study by Robert S. McIntyre of Citizens for Tax Justice, a labor-backed interest group.

McIntyre said the five companies named above, with profits of $10.5 billion in the first three years of the Reagan administration, "have been able to exempt themselves from contributing one dime toward the cost of the national defense buildup from which they stand to profit so handsomely."

"It looks to somebody who looks at this for the first time that the company is getting away with something," said Doug Dahlgard, Grumman's director of taxes. "The story is really a lot longer than that."

None of the tax avoidance is illegal, Dahlgard said. Instead, the companies largely rely on what industry has come to know as The Method.

Construction companies traditionally used the "completed contract" method of accounting to delay paying taxes until a building project was finished and profits could be measured accurately.

In the mid-1970s, the Treasury Department expanded The Method, and defense contractors quickly turned it to their advantage, since arms contracts may remain open for many years. In 1982 Congress again tightened some aspects of The Method, and the deferred taxes eventually will be paid. In the meantime, however, the contractors get what amounts to hundreds of millions of dollars in interest-free loans.

"No question the company has made some fine uses of the deferred taxes," Dahlgard said.

In addition, defense companies have profited from the same tax saving opportunities extended to other manufacturers, amounting to millions of dollars in investment credits and accelerated write-offs for the cost of heavy machinery and research credits—even for projects financed by the government.

"Nothing is really fair in this world," Dahlgard said. "Everybody has to take advantage of every situation."●

NEW YORK CITY AWASH IN DRUGS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. RANGEL. Mr. Speaker, an article from the March 13, 1985, edition of the New York Post proclaimed "City Is Trapped By Drug Users." The article contains several grim statistics on the relationship between drugs and crime.

For example, there are an estimated 200,000 heroin addicts in New York City. In a recent study of 6,000 Manhattan males charged with serious

crimes, 54 percent showed evidence of recent drug use—with cocaine used most often.

In 1985, New York City's special narcotics prosecutor, Mr. Sterling Johnson, and his 50 staff attorneys plan to prosecute more the 3,000 drug dealers and buyers. That is an increase of 250 percent from the 1,200 felony indictments his office handled 5 years ago. Because of a shortage of prosecutors, judges, and courtrooms, only 139 of Johnson's 2,900 drug indictments went to trial last year.

Mr. Speaker, these figures are made more alarming, because of the inability of the Federal Drug Enforcement Administration to concentrate its resources to reduce the problem. For example, the article reports that the DEA spokesman, Andy Fenrick, acknowledged that New York City "has a huge cocaine problem, but we simply don't have the men to concentrate on it. "Except for occasional high-level cocaine cases," he says, "his 200 agents are devoting their time almost exclusively to heroin investigations."

As the elected representative of the people of the 16th Congressional District of New York, and the chairman of the House Select Committee on Narcotics, I am committed to doing everything I can to curtail drug abuse in my city, State, and Nation.

It is for this reason that I introduced on Janaury 7, 1985, H.R. 526, the "State and Local Narcotics Control Assistance Act of 1985." This legislation would, beginning in fiscal year 1986 and running through fiscal year 1990, make available to States and local governments $750 million for more prosecutors, judges, jails, eradication activities, and drug abuse prevention, education, and treatment programs.

Mayor Koch says that "no matter what we do we will not be able to end pushing." I, for one, am not about to give up the fight against drugs. The situation is serious. Our DEA agents are being murdered, and Colombian drug traffickers have threatened to kill five Americans for every suspected Colombian drug smuggler extradited to the United States. Drug abuse is destroying the vitality and creativity of many people in our society, especially the young. I call again for my colleagues to join with me as cosponsors of H.R. 526. By enactment of this bill, we will give our rhetoric new meaning, and demonstrate to our constituents that we are serious, when we say we are working to bring drug abuse under control.

Mr. Speaker, I ask that the article entitled "City Is Trapped By Drug Users" be inserted in the CONGRESSIONAL RECORD at this point.

The article follows:

[From the New York Post, Mar. 13, 1985]

"CITY IS TRAPPED BY DRUG USERS"

(By Ransdell Pierson)

The city's 200,000 heroin addicts and a new class of "cocaine junkies" are responsible for more than half the city's robberies, burglaries and other crimes, according to local law enforcement officials.

"These folks aren't working," says Sterling Johnson, Jr., the city's special narcotics prosecutor. "They're stealing from supermarkets, stores, robbing people on the street. Anything to get $100 or $200 a day to support their habits."

Johnson estimates the average heroin addict steals more than $25,000 a year in cash and merchandise.

"They're not overly concerned about the police. The only thing they're afraid of is not getting their drugs."

He cited a Baltimore study which showed that 243 heroin addicts committed a total of 500,000 crimes over an 11-year period—more than 2000 each.

In a recent study of 6000 Manhattan males charged with serious crimes, 54 percent showed evidence of recent drug use—with cocaine used most often.

Harlem, Bedford-Stuyvesant, the Lower East Side, and the South Bronx are the city's worst heroin centers. Addicts, however, can be found in depressingly large numbers throughout the city.

This year, Johnson and his 50 staff attorneys plan to prosecute more than 3000 drug dealers and buyers through the city's Special Narcotics Courts Program.

That's up 250 percent from the 1200 felony indictments his office handled five years ago.

Johnson attributes the dramatic surge in cases to police round-ups, such as Operation Pressure Point—and the increased drug smuggling into the U.S.

Johnson said his biggest surprise has been the "explosion" of cocaine charges coming in.

Cocaine-related cases now surpass the number of heroin indictments on his court calendar.

"If you are spending $100,000 a year to put cocaine up your nose, which is not unusual, that's an addiction. You've got to steal to support that kind of lifestyle.

"The city is being trapped by drug users," he said. "It's worse and worse every year."

Because of a shortage of prosecutors, judges and courtrooms, only 139 of Johnson's 2900 drug indictments went to trail last year.

"We'll arrest a person for selling drugs, and it will take a year to dispose of the case," he explained. "If you have a prosecutor with 100 cases, what can you do?

"You can plea bargain."

Local agents of the Federal Drug Enforcement Administration told The Post they are unequipped to tackle the city's mushrooming cocaine problem.

DEA spokesman Andy Fenrich acknowledged that the Big Apple "has a huge cocaine problem, but we simply don't have the men to concentrate on it."

Except for occasional high-level cocaine cases, he says, his 200 agents are devoting their time almost exclusively to heroin investigations.

"That does not mean we don't have a huge cocaine problem.

"Heroin over the last few years has remained fairly stable, while the cocaine problem has gotten much worse.

"But we simply don't have the men to work on both the cocaine and the heroin."

State Appellate Justice Francis Murphy Jr. estimates that "one out of every 40 of the city's citizens is a heroin addict."

"That's more than the whole population of a lot of major cities. When does the our war against narcotics begin?" asks Murphy, who serves as president of the New York State Federation of Judges.

"Should we wait till it's one in 20—or one in five?"

Mayor Koch says the drug statistics keep him awake at night.

"No matter what we do we will not be able to end drug pushing," he conceded. "All that we can do is move it around. Operation Pressure Point gets it out of the Lower East Side, in part. But I know, and the police know, that it moves elsewhere—either off the street into buildings, or into other communities.

"It's just too lucrative for those smuggling heroin and cocaine into this country—at least $50 billion annually in street value."

He compared drug smugglers to "terrorists carrying bombs" and said the military—not just the U.S. Customs Service and the Border Patrol—should be given authority to police the country's borders and apprehend dealers.

"Why aren't the armed forces given the same mission—to apprehend terrorists of a different form. Some say that in some way it would violate civil liberties and civil rights. And I say, whose civil liberties—that of a terrorist?"

Julio Martinez, director of the state Division of Substance Abuse Services, said his agency is keeping 23,921 heroin addicts away from crime by daily doses of methadone—a drug which inhibits withdrawal pains when substituted for heroin.

"But another 200,000 addicts aren't receiving any treatment, because his agency doesn't have enough funds to serve them," said Martinez.●

OPPORTUNITY FOR DIPLOMATIC BREAKTHROUGH IN NORTHERN IRELAND?

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. BIAGGI. Mr. Speaker, as chairman of the bipartisan Ad Hoc Congressional Committee for Irish Affairs I am fortunate to come in contact with a number of individuals who have a deep commitment to the cause of peace and justice for Northern Ireland. One of the most effective of these is Peter T. King, county comptroller of Nassau County in New York.

Peter King recently embarked on one of the several trips he has taken to Northern Ireland. During his trip which commenced on January 26 and ended on January 31, he observed another group of so-called supergrass trials; a highly controversial process under which paid informants provide uncorroborated testimony which can be used and which is used to convict defendants.

I call upon my colleagues to review the report which Peter King compiled on this trip. It serves to focus atten-

tion on still another facet of British policy in Northern Ireland which takes extraordinary liberties with the rights of individuals to due process.

At this point in the RECORD I wish to insert Peter King's report and I would also like to add that Peter did serve with great distinction as the grand marshal of the glorious St. Patrick's Day parade in New York this past March 17.

LOYALIST ALIENATION IN NORTHERN IRELAND: AN OPPORTUNITY FOR A DIPLOMATIC BREAKTHROUGH

(By Peter T. King)

During the period of January 26-January 31, 1985, I was in Belfast, Northern Ireland at the invitation of Families For Legal Rights which is an organization comprised of relatives of loyalist defendants who have been charged on the uncorroborated testiony of "supergrass" informers.

The purposes of this visit were (a) to observe the current loyalist supergrass trial where 29 alleged members of the outlawed loyalist para-military Ulster Volunteer Force [UVF] are being tried on the uncorroborated testimony of supergrass James Crockard and (b) to meet with leaders and representatives of the loyalist community.

I had previously been to Northern Ireland five times. While I had met with loyalists on several of those occasions, my main contact had been with nationalists. It has been a fact of life and death in Northern Ireland that political and sectarian divides are not easily crossed.

In October 1983 I had been in Belfast to observe two supergrass trials (McGrady and Grimley) of nationalist defendants. At a news conference in Belfast and in a report which I wrote upon my return to the United States, I stated that these supergrass trials, where large numbers of defendants are tried together for unrelated crimes, without a jury, and are convicted on the uncorroborated testimony of a supergrass informer, are show trials reminiscent of Stalin's Russia. I charged that the judiciary of Northern Ireland had surrendered its independence and had become a mere adjunct of British military policy. I contended that the use of supergrasses was merely the latest abuse by England of Northern Ireland's criminal justice system. Previous abuses, some of which continue to date, include internment without trial, tortured confessions, the use of lethal plastic bullets against civilians, and indiscriminate searches of homes and arrests of civilians by security forces.

In January 1984 I participated in the filming of a television documentary on the supergrass system for the program "20/20 Vision" which is shown on Channel 4 in England. At that time I met with relatives of loyalist defendants in supergrass trials. While they made me aware of loyalist disaffection with British rule, I did not realize the actual extent of that disaffection.

I accepted the invitation of Families For Legal Rights because it has always been my position it is just as wrong when loyalists have their rights violated as it is when nationalists' rights are violated. Human rights are universal and cannot be allowed to be restricted by political or sectarian boundaries. I also believed it was significant that a hard-core loyalist group, which was fully cognizant that I was a Catholic and supported the nationalist cause, would invite me to assist it. This signalled to me a considerable change in loyalist thinking.

The Crockard trial is as violative of due process and civil and human rights as were the McGrady and Grimley trials. In virtually every particular this loyalist trial equalled the nationalist trials in its perversion of justice. Even if any or all of the 29 defendants are acquitted, justice will not have been done because the lives of the defendants and their families will have been devastated because of a criminal prosecution and trial which were fatally defective *ab initio*. In fact, the supergrass trials are a sophisticated version of internment because whether or not the defendants are convicted—bowing to international pressure, the judges have been acquitting defendants on evidence which would have been more than sufficient for conviction just one year ago—large numbers of them are imprisoned from the time of their arrest until trial. This time "on remand" often exceeds two years.

The prevalent thinking in Northern Ireland today is that the use of supergrasses has just about run its course with only two significant cases remaining—Kirkpatrick (nationalist) and Gibson (loyalist). This, however, should provide little solace because recent history has demonstrated that England replaces one draconian system with another—e.g., internment was succeeded by Diplock Courts which were characterized first by tortured confessions and then by supergrasses.

What has made the supergrass system unique is the extent to which it has been imposed upon the loyalist community. Internment, tortured confessions and plastic bullets were directed primarily against the nationalist community and this caused England considerable public relations problems. England attempted to avoid this problem with the supergrass system by charging loyalists as well as nationalists, thereby giving the appearance of even-handedness.

This had outraged the loyalist community for several very basic reasons. First, in their frenzied pursuit to erect the facade of impartiality, the British have charged loyalists on evidence which, in some instances, is even less credible than the evidence against nationalists. Second, the "terrorist" offenses for which the loyalists are now being charged are the very type actions which, in the past, the British security forces condoned and even encouraged them to commit against the nationalists. Third, while the British have moved against the loyalists in the past, it has never been on this scale or to this extent. Indeed, the loyalists have historically viewed themselves as the ultimate defenders of British rule in the six counties. For loyalists to witness the British system of justice being so horribly perverted with themselves included among its victims is psychologically shattering to growing numbers of loyalists.

The extent to which many working class loyalists feel alienated from England was made clear to me in my meetings with Families For Legal Rights and with loyalist politician George Seawright and with Andy Tyrie who is the commander of the loyalist para-military Ulster Defense Association [UDA].

At this juncture, I believe that my terminology should be defined. In the context of Northern Ireland, "loyalist" is interchanged with "Protestant" and "nationalist" is interchanged with "Catholic". It has been, however, and continues to be my firm belief that the tragedy of Northern Ireland is in no sense a "religious" conflict. The loyalists historically were Scotch or English settlers who happened to be Protestant and the nationalists were native Irish who happened to be Catholic. It has also been my belief that the loyalist and nationalist communities have far more in common with one another than they do with England. The British, however, have succeeded in dividing the communities and pitting one against the other by according the loyalist majority a status superior to the nationalists. Among the working class, however, where, ironically, the animosity is most bitter, the loyalist superiority is often marginal. As Andy Tyrie states to me: "The Catholics have always claimed they have been second class citizens in Northern Ireland. That is not true. The loyalists were the second class citizens; the Catholics were third class citizens."

Because of the traditional loyalist attachment to British rule, however, loyalist politicians generally refrain from any criticism of British policy. Thus many loyalist politicians support the use of supergrasses because they believe that to attack any part of the British system would give credence to the nationalist movement. Thus, while loyalists are being illegally imprisoned, their elected representatives have been silent and, accordingly, have lost touch with many of their constituents.

George Seawright is an elected member of the Belfast City Council and the Northern Ireland Assembly. Some of his remarks, such as his desire to "incinerate" Catholics, can only be described as undisguised bigotry. He does, however, demonstrate an intellectual consistency uncommon among loyalist politicians. For instance, he has sided with Sinn Fein in the Belfast Council when he believes nationalist representatives are being denied their rights. He is also an outspoken opponent of the supergrass trials and is opposed to the strip-searches of women in Armagh Prison even though few loyalists have yet been victimized by this degrading process.

Andy Tyrie heads a para-military organization which has killed many nationalists. For several years, however, he has advocated independence from Britain in the form of a six-county Ulster. Understandably, the nationalists reject Tyrie's proposal because they believe—quite rightly in my opinion—that a loyalist controlled six-county state would result in the same type of government sanctioned oppression of the nationalists that characterized Northern Ireland from 1920-68. Tyrie is, however, very much opposed to supergrasses and strip searches and is anxious to set forth his positions on these issues to Irish-Americans. Indeed, my meeting with him at the UDA headquarters in East Belfast went on for more than 3 hours.

What most vividly demonstrated to me the dramatic change in loyalist attitude and thinking, however, was my meeting with accused UVF members and their relatives which Seawright also attended. The meeting was held in the Loyalist Club on the Shankill Road which is the embodiment of the most bitter hatred between loyalists and nationalists. Yet, as a Catholic and professed nationalist supporter, I was graciously and politely received. Quite frankly, I could not imagine such a meeting taking place several years ago. These most dedicated loyalists were willing to ignore my Catholic religion and republican sympathies in an attempt to reach agreement on matters such as supergrasses which are of concern to both loyalists and nationalists.

I do not for a moment minimize the extent of the breach between the communities. Nonetheless, I believe that there now

exists a unique diplomatic opportunity which should be seized before the moment passes. The ideal role for the United States to play is as an honest broker. Every effort should be made by the United States to encourage meaningful dialogue between the two communities on issues of mutual relevance and importance. Supergrasses and strip-searches are two such issues. Additionally, the United States must not only permit but indeed encourage loyalist and nationalist representatives to set forth and articulate their positions to the American people. In short, the United States must discard its visa denial policy and allow all Northern Ireland representatives into our country including nationalists such as Gerry Adams, Danny Morrison, and Owen Carron and loyalists such as Andy Tyrie, George Seawright, and Ian Paisley.

The time has also long since come to acknowledge that a war situation exists in Northern Ireland and that peace will never come until all parties to the conflict including para-militaries such as the Ulster Defense Association, the Ulster Volunteer Force and the Irish Republican Army are permitted to take part in whatever negotiations are ultimately held.

My own views on Northern Ireland are unchanged. I believe that Northern Ireland is a failed political entity and that the only viable, long-term solution is a united 32 county Ireland wherein the legitimate rights of loyalists and nationalists would be guaranteed. The precise framework and time table for a united Ireland would be arrived at after honest and meaningful diplomatic initiatives by London and Dublin and negotiations among all parties including para-militaries.

Ideally, the United States would set this process in motion by furthering the dialogue between loyalists and nationalists. Even, however, if the dialogue does not bring about a long-term political solution, it could nevertheless result in the alleviation of human rights violations by the British against both communities and that in itself would be a very meaningful achievement.

Finally, London and Dublin can be expected to resist any effort to achieve nationalist-loyalist dialogue because that will limit their influence. The English and Irish governments have, however, failed miserably over the past 65 years in Northern Ireland. Each has cynically manipulated and abandoned the communities whose interests it supposedly represented. In short, the bankrupt policies of London and Dublin cannot be allowed to once again frustrate the hope of progress.

The people of Northern Ireland have suffered too long and too hard for the United States to ignore the potentially historic diplomatic opportunity which presently exists. The time for action is now. The judge is history.●

FAMILY PLANNING AND FOREIGN AID

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. MOODY. Mr. Speaker, on Tuesday the Foreign Affairs Committee voted to restore funding in the foreign aid appropriations bill for family planning programs, thus recognizing the urgent need to bring the world's population under control and exhibit the ability to show some foresight regarding a situation that can only become worse if left unchecked.

I am especially cognizant of the immediacy of this problem, having just participated in a public policy seminar on population and development held by the population Institute in Ciudad Juarez, Mexico. The seminar's other participants, coming from every corner of our hemisphere, appropriately pointed out how close the relationship is between the Third World's poverty and its burgeoning population. We had the opportunity to view firsthand one of the most successful programs of its kind, organized and sponsored by the Federacion Mexicana de Asociaciones Privadas de Planificacion Familiar [FEMAP], an umbrella organization of private family planning groups.

Many of us are aware of the social, economic, and cultural pressures which bear down on the people of this region, making all the more impressive the progress made by FEMAP. I visited with people who are intimately involved at all levels of the program, from its charismatic founder, Guadalupe de la Vega to users of its services who ardently praise FEMAP's efforts.

Two experiences in particular deserve special notice. Our visit to a local high school revealed some very sophisticated, articulate young people who themselves aid the FEMAP program by offering information and counseling on a limited basis to their peers. These dynamic students have been chosen specifically because of their talent for communicating with others. During our meeting, I was struck by the pride they take in helping form Mexico's future and the hope they express for improving the quality of life for all of Mexico's citizens.

The final stop on our tour was the house of a woman who has helped many people in her neighborhood achieve important goals in the number and spacing of children in their families. She spoke to us with great feeling and conviction, and brought tears to our eyes with a poignant request not to forget the children of Mexico—because they, too, want the ability to plan families.

In conjunction with the seminar the institute held its fifth annual awards program for excellence in media reporting on population issues. I am pleased to list the honorees:

Best Radio Program, Steve McVicker, National Public Radio. Honorable Mentions: Rene Augusto Flores, Radio Diario, Guatemala Vaughn Phillip, Radio Grenada.

Best Periodical, Veja Brazil.

Best English Daily in Latin America, Roger Toll, Mexico City News.

Best Public Service Announcement, Maria Christina Rosales Diaz, APROFAM, Guatemala.

Most Conscientious News Service, Jose Luis Alcazar, Inter Press Service, New York.

Best Individual Reporting, Olivia Ward, Toronto Star, Canada.

Best Team Reporting, Paul Goodsell, James Flanery, Omaha World Herald.

Best Editorial, Juan Vasquez, Los Angeles Times (Mexico City Bureau).

Best Television, Turner Broadcasting Inc.

Best Daily in Latin America, Roger Toll, Novedades, Mexico City.

In addition, cited as best independent national columnist was Georgie Ann Geyer of the Universal Press Syndicate. Her acceptance remarks are particularly relative to the importance of the population issue and I am pleased to also include them at this point:

I cannot tell you how deeply honored and pleased I am to receive this meaningful award.

The work you are doing stands today not only as an important work but as work of unprecedented importance in the entire history of man. Modern wars? Many of them—El Salvador's bloody war, for instance, stem directly out of overpopulation. Ethiopia's famine? At the turn of the century Ethiopia had 40 percent of its land arable; today, that percentage is 4 percent. With the doubling of its population in the last 20 years, it is no wonder there is massive famine. Indeed, it can be no other way.

Of course, it could be another way. Mankind could learn to plan rationally so that we evolve and devolve. Yet, that is not happening in most of the world. Where there is rational planning—in the countries around the rim of the Pacific, for instance—mankind is forging ahead.

You are in the vanguard of this planning. You are in the vanguard of the only hope for a better life for mankind. The work you are doing is no longer a luxury, it is today a desperate necessity if we are all even to survive.

Bless you all—and thank you.

These sobering remarks, and those of the other honorees, raise serious issues which can only be ignored at our peril. We must continue to help the people who want help. Family planning programs are crucial to raising the quality of life for untold numbers of citizens in Third World countries—those who are here today and those who will come tomorrow.●

MILITARY RETIREMENT REFORM

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. ASPIN. Mr. Speaker, I have introduced today a bill to cut $4 billion from the Military Retirement Program in order to force a change in the Pentagon's pension system.

Congress and the Pentagon have dickered with the retirement issue for two decades. It's time to bring matters to a head.

I am not proposing detailed legislation rewriting the military retirement system. What I am proposing would

force the Pentagon to draft legislation. Under my bill, Congress simply removes money from the requested budget for military pay and benefits. The Pentagon would then have to draft legislation to change the retirement system in order to have enough money left to make its payroll.

I am taking this tack for several reasons.

First, there are many intricate, technical issues involved in retirement. I want the Pentagon to have first crack at dealing with these.

Second, there are always great moans from the Pentagon that any change in the pension plan will induce service members to quit the military. The Pentagon will obviously design legislation that it feels will have the least impact on retention; career service personnel will feel happier if their own people are doing the drafting, rather than civilians in Congress.

Third, there's a pure and simple political reason. Members of Congress may want to reduce the military pension burden, but they feel ill at ease dealing with the technical intricacies and facing lobbyists who argue that this or that or another proposal is damaging to the military.

The tack I am suggesting allows Congress to make the fundamental policy decision—how much money do we want to spend on military pensions—while allowing specialists in uniform to draft the details.

I emphasize that I am not asking for a study. This issue has been studied to death. The last thing we need is another sheaf of paper. In the last two decades, there have been at least nine studies, including five done by the Defense Department itself. All have recommended significant changes. In the 1980's, we have seen the Grace Commission call for fundamental reform, and we've seen the Pentagon's own staff draft the Fifth Quadrennial Review of Military Compensation—a proposal for reform that has languished in the Pentagon for lack of support from higher-ups.

The change I am proposing is made possible by a change we put into the defense bill 2 years ago to shift from a pay-as-you-go system to an accrual system. Previously, we simply provided money each year to pay current retirees. The only way you could save money was to cut pensions for current retirees. Cutting the pensions promised to new recruits would save nothing for 20 years. Now we use an accrual system under which the Pentagon makes payments into a trust fund to cover the pension obligations it incurs for the year's incoming group of recruits.

This means that a decision to reduce the pensions promised to recruits entering next year would translate directly into a reduction in amounts the services must pay into the retirement trust fund.

I caution that a reduction in benefits offered new entrants would not translate into an immediate reduction in the deficit, however. If we cut pension promises, we cut the defense budget—but the trust fund will still be paying out an unchanged amount to current retirees. You only get an immediate deficit reduction if you trim the benefits paid those already retired.

The huge deficit looming before us and the fact that military retirement is just about the only entitlement program not cut under the Reagan administration prompts some in Congress to think about cutting back the benefits paid current retirees and those nearing retirement. Personally, I have never thought we should cut benefits for these people. The point of this proposal, of course, is that it is up to the Defense Department whether it wants to propose such reductions.

I know of no proposal that has ever been made by anyone respected in this area that would cut basic benefits, as opposed to COLA's, for current retirees, so I doubt that poses any grounds for concern. Personally, I don't think any changes should apply to those with long years of service. But, again, under my proposal, it is up to the Pentagon whether it wants to grandfather everybody or nobody.

A second concern that I have heard is that Congress might pick apart any Pentagon proposal—choosing the parts that save the most money while rejecting those parts that might improve some benefits. I don't think that's a reasonable fear under my proposal. Congress will work its will in deciding the dollar amount of the cut. If the Pentagon makes that mark, Congress will have no incentive to get involved in the nitty-gritty.

THE ACCRUAL SYSTEM

The heart of the change I am proposing lies in the nature of accrual accounting. So, let me explain the budget arcana.

In the past, appropriations were voted each year to cover the military retired pay actually paid to retirees in that year.

Beginning in fiscal year 1985, however, a new retirement fund was established. The Department of Defense is required to pay into the fund a percentage of its military payroll sufficient to pay for the retirement benefits earned in that year—but to be paid in the future. In other words, until fiscal year 1985, the Department of Defense had to pay for retirement benefits earned in the past but due in the present; now the department must pay for retirement benefits as they are earned.

The amount that needs to be placed in the fund each year in order to pay for the future retirement benefits earned in that year is called the accrual charge. It is now equal to approximately 50 percent of the basic pay appropriated for that year. Payments to the fund are made from the military personnel appropriations. This category includes basic pay, allowances, special and incentive pays, and permanent change of station travel, as well as the retirement accrual charge.

For fiscal year 1986, the Department of Defense has requested $73.4 billion for the military personnel appropriation, of which $35.9 billion is for basic pay, $18.2 billion is for the accrual charge, and $19.3 billion for the other items I just mentioned.

PROPOSED APPROACH

A permanent change to the military retirement system carries with it a change to the accrual charge. For example, a reduction in future benefits means that less money needs to be set aside in the fund to pay for benefits earned in that year.

Working in the opposite direction, Congress could reduce the funds available for the accrual charge as an incentive to change the retirement system. The law requires the department to pay the accrual charge. A reduction in the funds available for the accrual charge would leave the department with no realistic alternative but to change the retirement system.

Such an approach will require an expeditious response from the Department of Defense. The change in the retirement system would have to come sometime close to the start of the fiscal year. A savings mandated in the 1986 accrual charge would require a change to the retirement system to take place close to October 1. If the change is delayed much beyond October 1, the change will have to be more substantial to achieve the same savings in that fiscal year. To save $4 billion via a retirement change that takes place halfway through the year would require cuts that would annualize at $8 billion.

It should not be impossible for the department to come up with a plan expeditiously. Nine recent studies have provided a wealth of suggestions for change—the most recent study, the Fifth Quadrennial Review of Military Compensation, offered a variety of proposals only a year ago. All the spade work has been done. What remains for the Department of Defense is the decisionmaking on the specifics.

The proposal I am introducing today would reduce the amount available for the accrual charge by $4 billion. No specific change to the retirement system is recommended—savings of this amount could be achieved through enactment of any number of recommendations made in the past. Several proposals that could achieve a reduction of at least $4 billion per year are shown in table I. No specific proposal is being suggested; the specifics

would be left up to the services and the Department of Defense.

My bill also explicitly directs the Department of Defense to submit a legislative proposal that would change the military nondisability retirement system in such a way as to reduce the accrual charge by the amount necessary to meet the ceiling. This direction is intended to prevent the Department from attempting to obtain the savings from some other source, from simply changing actuarial assumptions or methodology, or from structuring a situation in which the Congress may have no alternative but to increase the appropriation categories late in the year.

Because the accrual charge is based on benefits to be earned in the future, the savings could be achieved without affecting those already retired or those in the service. The changes could grandfather everyone or no one or some. It is a matter for the services to decide.

BACKGROUND

For background purposes, let me explain the features of the current military retirement system. There are three key parts.

First, an immediate annuity is available to a service member who completes 20 years of service; no benefit is available for a service member who separates before completing 20 years of service.

Second, retired pay equals final basic pay times a multiplier. For those entering active duty for the first time after September 7, 1980, retired pay will be based on a high-three average of basic pay instead of final basic pay. The multiplier equals 2½ percent times years of service and ranges from 50 percent at 20 years of service to 75 percent at 30 or more years of service.

Third, retired pay is adjusted annually by the increase in the cost of living as measured by the Consumer Price Index [CPI].

PAST STUDIES

I have mentioned that many studies of the military retirement system have been conducted in the past 10 years. All have recommended change in the system. These recommendations have followed the same general form:

First, earlier vesting. A benefit from the retirement system, though usually deferred to age 60 or later, would be offered after completing as few as 5 or 10 years of service.

Second, a reduced immediate annuity for those service members completing only 20 years of service, perhaps coupled with a larger annuity for those completing 30 or more years of service. Often the reduced annuity for the early retirees would be increased to current levels at some later point, for example, when the member would have completed 30 years of service or at some age associated with normal retirement.

Third, averaging the final 3 or 5 years of basic pay as the base for computing the retirement annuity.

Fourth, integrating military retired pay with the social security benefit earned as a result of military service.

Fifth, early withdrawal. A lump sum payment representing some commuted value of the retirement annuity but offered to offset the adverse retention impact of a reduced lifetime stream of earnings.

TABLE I.—*Examples of the cost impact of recent studies*

[Annual savings in billions of dollars]

Grace Commission	13.2
Uniformed Services Retirement Benefits Act (DOD recommendation, 1979)	5.1
Half COLA to age 62; full COLA thereafter	4.4
Retirement multiplier reduced 1 percent for each year before 30 yr of service and COLA minus 1 percent	4.2
Retirement Modernization Act (DOD recommendation, 1974)	2.4

HMO PROGRAM

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. MICA. Mr. Speaker, today I am introducing legislation to improve the enrollment and disenrollment procedures for Medicare beneficiaries who join health maintenance organizations [HMO's].

As the HMO Program is expanded nationwide, I believe we must learn from the HMO experiences of Florida and provide the quality health care that the seniors of this country deserve.

This legislation is a direct outgrowth of a field hearing conducted by the House Select Committee on Aging in Boca Raton last July, and is based on a recent General Accounting Office report on Florida HMO's.

One of the greatest concerns regarding HMO's is the procedure for enrolling and disenrolling. This proposal would ensure that there is no gap in health care coverage under enrollment. It also would speed up the process for disenrollment.

Under the current regulations, it is unclear who is responsible for the doctor bills of a Medicare beneficiary who is already hospitalized when their HMO membership becomes effective. According to a recent GAO study, although the incidence of such cases is relatively small, the financial impact on individuals and their families is potentially catastrophic.

This legislation would require the HMO to be responsible for medical bills incurred after the effective enrollment date. This clarification will ensure that their is no break in coverage under the HMO Program.

A second concern over HMO's is the time that it takes to disenroll. Under the current regulations, a minimum of 4 weeks and a maximum of about 8 weeks is required to disenroll from an HMO, depending on what part of the month a member requests disenrollment.

When people are dissatisfied, I do not believe that they should have to wait several weeks or months to obtain alternative health care under Medicare. The proposed legislation would reduce the waiting period for disenrollment to 7 days after the request to disenroll is made.

Mr. Speaker, I urge my colleagues to join me in working for the passage of this legislation to improve the HMO Program for Medicare beneficiaries. I am also pleased to note that congressional scrutiny of HMO's will continue this spring when the Aging Committee holds a national hearing on the subject.●

THE AGRICULTURAL ACT OF 1985

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. ROSE. Mr. Speaker, today I am introducing the Agricultural Act of 1985, and I have a statement for the RECORD which goes into it in some detail, but I would like to say now that I believe this bill will accomplish three major and much sought purposes. It will enable farmers to earn a decent living and pay their debts, it will provide adequate supplies of commodities and food at reasonable prices, and it will greatly lower costs to the Government.

THE AGRICULTURAL ACT OF 1985

The farm owners and operators who produce a substantial amount of the raw food and fiber so vital to our national well-being are in deep trouble. This is especially true of the mid-range growers who derive a major portion of their income from farming and ranching. It has been repeatedly stated by many authorities that, despite the losses of recent years, approximately one-third of our remaining producers in that group are in danger of failure in 1985 or 1986.

These are efficient producers. They are the victims of high interest rates and other increasing production costs that are beyond their control. Their export markets are soft or declining despite the promises of earlier administrations and some of our academic forecasts of more market expansion widely released only a few years ago. I am concerned about these good families that have provided the very strength and stability for rural America since the founding of this country. If we lose them, the banks, businesses, schools, churches and other elements of rural America will vanish also and they can never be re-established.

The recent trends of increasing bankruptcy rates, business failures and anticipated

increases in world supplies of several commodities point to more headaches in the farming segment of our economy. This contrasts sharply with improvements predicted sometime in the future by the Administration when its 1985 farm program proposal was recently released. The provisions of the 1981 Farm Act will run out this year. It must be replaced with more effective legislation.

For the first time in many years, farm land and related assets are subjected to tremendous deflationary pressures. As a result, farm asset values have declined $58 billion since 1981. Land prices have declined as much as 50 percent in some hard-pressed communities. It will be impossible to restore liquidity in land values and stabilize local economies throughout most farming areas of the U.S. unless we can arrange modest increases in prices paid for our farm products.

I offer a modification of the current program for wheat, cotton, rice and feed grains designed to reduce the cost of program operation, while increasing the income for those producers who qualify through meaningful conversion of some land to conserving uses. It is now reluctantly acknowledged by many qualified observers that we cannot borrow our way out of the farm crisis. We must afford these producers an opportunity to earn reasonable returns and retire some of their debts in an orderly manner.

That does not appear to be possible under the program proposed by Secretary Block. I offer this Agricultural Act of 1985 as an alternative, and hasten to assure you that this does not pretend to cover all the commodities. For example, legislation is also necessary in the case of milk. This bill is offered now, however, to point the way to a new, clean approach for these important commodities.

TIME AND COST

The Agricultural Act of 1985 is designed to run for five years on the crops for 1986 through 1990. Farmers and others concerned with production or processing of food, as well as the financial community dealing with agriculture, want a program of at least five years to facilitate adequate long-range plans.

The cost of Commodity Credit Corporation outlays in billions of dollars for the three most recent five-year periods, including a projection for 1985, are as follows:

	Total outlay (billions)	Annual average (billions)
1971–1975	$12.2	$2.44
1976–1980	17.0	3.4
1981–1985 [1]	56.93	11.4

[1] The cost of the Payment in Kind program variously estimated at $8 to $12 billion, depending upon a fair accounting of all costs, is not included in the 1983 program cost.

The record of economists in anticipating annual farm program costs is not very encouraging. When the current program was written into law in 1981, according to the National Journal, "the Reagan Administration predicted that its cost from fiscal 1982 until the farm bill expired in fiscal 1986 would be about $11 billion. In fact, the cost will be $63.4 billion, according to the Agriculture Department's latest projection."

The following summary of cost of the Deficiency and Diversion Expenditures by crop points up a very important difference of opinion to be resolved regarding this 1985 farm bill. Deficiency payments once made from the Treasury are cash pay-outs that are gone once the checks are mailed—these payments are not retrievable or repayable. In contrast, loans made in a well administered program are repaid with interest if the market improves. If the commodity is delivered in satisfaction of the non-recourse loan, that commodity becomes the property of the CCC and it may be marketed in a wise manner that returns part or all of the original loan value to the U.S. Treasury. Much depends upon good management on the part of those in charge of the U.S. Department of Agriculture.

I propose to terminate entirely the deficiency payments and reduce the diversion payments to mere assistance for establishing a conserving crop cover, or similar conserving practice, on a set-aside acreage in some instances. That would be only a few dollars per acre if that type of cover is seeded or a similar conserving use is installed. It would not be a payment designed to off-set taxes, debt service or otherwise buy the land out of production.

THE NEW PROGRAM

Section 2 of the bill sets up this new program. Non-recourse loan rates are to be established at 75 percent of parity for these crops that are basic to much of American agriculture. Such rates must be established, not at a level necessary to guarantee a profit, but high enough to provide the more efficient operators a chance to retire some of the overpowering debt now plaguing our best farmers. Only by offering these increased loan rates to brace up the farm economy and persuade producers to participate in the program, we also offer to forego the payments summarized above.

An accurate estimate of loans to be made cannot be forecast as demonstrated by the record of cash outlays over the last fifteen years. Weather and markets that are often influenced by foreign governments both have a bearing on this question.

I believe the conclusion is obvious if one studies these numbers. Even with the modest increases in loan rates called for in this bill, there should be substantial net savings to the Treasury if the deficiency payments and most of the diversion payments are discontinued as contemplated in the Agricultural Act of 1985.

NATIONAL PRODUCTION GOAL

Section 2 of the bill also directs the Secretary of Agriculture to set, for each crop at the beginning of each year, a National Production Goal, an Estimate of Production that will be harvested in the absence of any set-aside program, and the amount of set-aside of production to be required by the Secretary if that is deemed necessary to bring production in line with the Goal.

The Production Goal to be determined each year for each crop, shall be the amount needed, in addition to the amount of any carry-over stocks on hand, that will be required to meet both domestic and export demands, plus a reserve believed necessary to protect the public interest from any shortage of supplies.

ESTIMATE OF PRODUCTION

The Secretary shall estimate the amount of each crop that would be produced in a year in the absence of any adjustment under this program. In accordance with regulations he shall issue, the county ASC committees shall establish individual farm bases. These bases may be set in bushels or pounds, or in acres based on the production harvested in the previous three crop years. Adjustments are to be made to reflect production adjustments for bad weather and participation in previous programs.

SET-ASIDE PROGRAM

When the national production goal is announced for a crop the Secretary also shall announce whether a set-aside program is to be in effect for the coming year and, if so, the percentage of reduction to be accomplished on each farm in order for the production on that farm to be eligible for price support loans or purchases.

At the time of this decision, the Secretary also must decide whether to administer all such set-aside programs for the coming year in pounds and bushels, or in terms of acreage. Many producers and their organization spokesmen have expressed a keen desire for these programs to be administered in terms of bushels and pounds, thus providing a more effective reduction in the crop if that is needed.

This approach also affords the producer an opportunity to cut back production by reducing the acreage planted or by cutting back on other production elements. The choice, as to administrative approach, is left to the Secretary, however, in order that the decision may be made in terms of the latest information available when the program is placed in operation.

PRODUCER RESPONSE

In order to establish eligibility for a loan or purchase on a farm, the producer must certify that he has not exceeded his production base as reduced by any set-aside requirement for the year applicable to that farm. He also must comply with bases and set-aside requirements on other farms in which he has a substantial interest. This arrangement is to be developed in more detail in regulations, but the intent of the law is to prohibit any producer with multiple farm interests from benefiting from the program on one farm or, in the case of one crop, while increasing production elsewhere and defeating the purpose of the program.

If the Secretary determines, pursuant to Subsection (d)(2)(A), that compliance will be determined in terms of the amount produced, the producer may meet that set-aside requirement by reducing production inputs, or he may choose to set aside acreage. If the latter course is taken, he must cut back production on a percentage basis determined by the Secretary in setting national production goal. If, on the other and, the Secretary chooses to administer the progam in terms of acreage, then all participating producers must reduce plantings and set aside the required number of acres on all farms participating in the program.

The producer's certification, and any supporting evidence of the amount harvested for market, will be subject to compliance checks performed by ASCS personnel. Finally, this provision was drafted with due regard for accidental errors or unusual weather conditions by providing for exceptions to be made by the county committees in determining eligibility for price support when the producer has made an honest effort to be eligible but failed within reasonable bounds, either unintentionally or for reasons beyond his control.

PAYMENTS

If the producer chooses to meet program requirements by setting aside acres, or if the program is administered only through an acreage set-aside requirement, the Secretary may offer modest financial assistance to share the cost of establishing a conserving use on such set-aside acreage. This is not regarded as a payment to buy land out of production, but only as assistance to encourage

the best conserving treatment of that acreage. Conserving uses are to be defined in a manner consistent with the high quality conservation standards appropriate to any production area.

REPAYMENT OF LOANS

This feature is designed to set the farm program on a new and equitable course. It is the provision that will enable this government to reverse the present financial crisis in agriculture by providing reasonable market prices for the commodities and still make them available to compete in foreign markets.

This arrangement will do two things of real significance. First, if there are some losses of the loans, it means that all our people who pay taxes are sharing the cost of fighting for foreign markets that are considered vital to our best national interests—not just our producers who can no longer carry this burden alone. It also means maintenance of very reasonably priced raw food materials for our own consumers.

Second, this arrangement places the control of costs of the program squarely in the hands of the Secretary. By wisely estimating the production goals and establishing set-aside requirements to bring supplies closely in line with market demands, the Secretary can limit the losses represented by the gap between loan levels and the prices received by farmers.

Loan rates set at the levels required, 75 percent of parity, will bring in voluntary participation. If administrators of the program faithfully try to make it work well, they can cut the expense of farm programs below the runaway levels of recent years while improving the financial position of producers. Obviously, the thrust of this bill is to make the loan rates sufficiently attractive that farmers will want to participate. They can reduce production if necessary to do so.

SUSPENSIONS

Sections 3, 4, and 5 suspends certain permanent provisions of law relating to programs for wheat, feed grains and cotton that are outdated and inconsistent with this new approach to a sound farm program.

PRODUCER RESERVE

Provision for a farmer-owned reserve of wheat and feed grains in the 1978 Act, and amendments adopted in 1981, have served a purpose in the past. However, it is also true that this provision has been misused somewhat, by making it the dumping ground for production quite in excess of any reasonable reserve needed to protect the public.

The provisions defining entry and release of the commodities from the farmer-owned reserve have been too confusing for farmers to use the program as intended.

The same purpose can be accomplished by the Secretary through the long-standing authority to extend a particular loan when it is about to mature, if that is considered in the best interest of farmers and the program. This authority was just used by the Secretary in making such an announcement on March 27, 1985.

In summary, the Agricultural Act of 1985 is designed to change the direction of the farm program, reduce the cost thereof and provide a means of survival for the independent owner-operator style of farming in this country. Time has run out on the old system in which we have tried to hang on with both loans and payments at such inadequate rates that the program became both ineffective and expensive.●

FISCAL CHILD ABUSE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. PORTER. Mr. Speaker, fiscal child abuse. That's a strong term, but that's exactly what a decade-long string of $200 billion deficits amounts to. Fiscal child abuse is a threat to the very future of America—a threat to the long-term opportunity and freedom of every child in our land.

Everyone concerned about our young people—every parent, grandparent, educator, legislator, or community leader—should pause and take note of these numbers:

Every year we run a $200 billion deficit—that's two $200,000 million—means another $10,000 in extra taxes that every child will have to pay, over his or her lifetime, just to cover the interest costs.

If we have a $3 trillion national debt—that's $3 million million—each child will have to pay $150,000 in extra taxes, over a lifetime, just to cover the interest costs. We could easily reach that milestone by the end of this decade.

These sums have staggering implications for our children's future. Someday, they will need to pay to maintain a national defense, provide pensions—for which we may be beneficiaries—make infrastructive repairs, and finance the many services we have come to expect from Government. But before our children can spend 1 penny for any of this, their Treasury will have to pay roughly $300 billion per year in interest charges on old debts. That's more than we presently spend on the entire defense budget.

Our children already face enormous economic obstacles that we, their parents, never confronted. Just 15 years ago, a family with an income 26 percent below the national median could buy an average house. Today, a young family has to have an income 29 percent above the median to buy the same house.

As houses have become more expensive, young people have become poorer. The real per capita income for the young adult age bracket has declined by one-fifth since 1970. The poverty rate for Americans under age 25—including children—is higher than for any other age group—and growing the most rapidly.

The long-term retirement prospects for today's young people are very uncertain. They confront a Social Security System which often takes a bigger bite from their paycheck than all other taxes combined. We may have cut other taxes, but we keep raising—and have never cut—the FICA tax. Young taxpayers know that when they retire, Social Security will be far less generous toward them than it has been for today's senior citizens. Today's typical retiree receives at least $3 back—sometimes $5 or $10 back—for every $1 contributed in payroll taxes. But today's 12-year-old boy can expect to receive less than 75 cents back for every dollar he will have to pay in Social Security taxes.

Add to this long-term burden of huge budget deficits, year after year, and I ask—what are we doing to our children?

Will more than a small percentage of them ever enjoy the same standard of living that we, their parents, enjoy today? Our society has long set the standard for economic opportunity and upward mobility. That is what we mean by the "American Dreams." But with these huge deficits, this dream may be slipping beyond our children's reach.

Over the first 200 years of American history, no generation passed to the next a long-term debt of this consequence. Thomas Jefferson had warned against doing so.

> The question whether one generation has the right to bind another by the deficit it imposes is a question of such consequence as to place it among the fundamental principles of government. We should consider ourselves unauthorized to saddle posterity with our debts, and morally bound to pay them ourselves.

According to Mr. Jefferson, each generation should leave for the next the same liberties, the same opportunities it enjoyed in its own turn.

Our own parents and grandparents did this for us. They survived the Great Depression, and fought and won World War II. To meet these challenges, they had to borrow to a degree unprecedented in American history. The debt was justified. It was manageable, and interest rates were reasonable. We, their children, were left with an annual debt burden which, in the 1950's, was about $7 billion.

Compare this with what we are doing to our own children, whose annual debt burden could rise, on our watch, to as much as $300 billion. Adjusted any way you like, we are passing on to the next generation an annual debt burden five times what our parents left us. And what are our great accomplishements to justify this huge burden?

America's young people are just beginning to awaken to what this debt will mean for them. Frankly, I am surprised they have not already marched into Washington, circled the Capitol Building with pickets, and shouted through bullhorns for us to stop this fiscal nonsense. I wish they had, some time ago. As things stand now, I worry that our children—and especially the historians among them—may someday render a harsh verdict upon us, their parents. They may call us, and deservedly so, the most financially irrespon-

sible generation of leaders in America's history: the one which couldn't—or wouldn't—pay its bills.

Earlier this year, I met with seven high shool students from my northeastern Illinois congressional district. They were so distressed about what Federal budget deficits meant to them and their future that they held their own Washington, DC, press conference. They said:

It's just commonsense. When you borrow money, you have to pay it back. Our parents won't let us run up a bill on their credit cards. So why should we sit quietly while our government runs up a huge bill on ours?

Why, indeed?

Whenever we say "yes" to all our spending plans, without having the courage to tax the American people to pay for them, we are saying "no" to our children's future.

It's time we started saying "yes" to our children, and "no" to any calls, from any quarter, for increased Government spending—and "no" to Government programs that make little or no sense to anyone other than their own narrow constituencies. This will hurt. We can't deny it. But these short-term sacrifices hardly compare with the fiscal child abuse America's young people will suffer at our hands if we do nothing and leave the deficits unabated.

Let's redirect our compassion and our generosity toward our children. Let's remind ourselves of the old-fashioned American virtue of not buying what we can't afford.

In particular, let's remember that America is at root an extended family—a family that owes devotion and responsible stewardship to its young people.●

DON'T PENALIZE OUR TAXPAYERS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. HUBBARD. Mr. Speaker, on March 26, 1985, Nita Gellhaus of Gellhaus Insurance Agency in Hopkinsville, KY, wrote to me about an issue that I have been hearing from on a steady basis—the U.S. Treasury Department's tax reform proposals.

I am certain my colleagues will be interested to read her timely comments in opposition to taxing individual life insurance and annuity policies as well as employee benefit programs.

I agree with Nita Gellhaus and the others who have written to me about placing a tax that would penalize our taxpayers who "have worked hard to achieve important benefits."

The letter from my constituent follows:

GELLHAUS INSURANCE AGENCY,
HOPKINSVILLE, KY,
March 26, 1985.

Hon. CARROLL HUBBARD, Jr.,
Kentucky House of Congress, Rayburn House Building, Washington, DC.

DEAR MR. HUBBARD: As a licensed agent representing the insurance industry, I am strongly opposed to any government tax on individual life insurance and annuity policies as well as employee benefit programs.

I cannot stress enough how detrimental such a tax would be to my clients—Americans who have worked hard to achieve these benefits and rely on the financial security they provide during times of crisis. I urge you not to minimize the life and health insurance benefits they have earned.

Please keep my opinion in mind when this proposal is presented and vote accordingly.

Sincerely,

NITA GELLHAUS.●

ROOTS—A TURKISH AMERICAN'S EXPERIENCES

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. LANTOS. Mr. Speaker, the phenomenon of Americans returning to their roots in other lands is one that Alex Hailey dramatized, but it is one that many others have also written about with nostalgia and understanding.

This week—as we have been honored by a visit of the Prime Minister of Turkey and the relations between our two countries have been given considerable attention—I would like to call the attention of my colleagues to an excellent, beautifully written article by Lenor Skenazy about the return to her family's ancestral home in Canakkale, Turkey. It highlights the positive attitude of the Turks toward their Jewish citizens and the Jewish tradition in Turkey.

The article follows:

[From the Washington Post, Feb. 17, 1985]

THE ROAD TO CANAKKALE: IN SEARCH OF TURKISH ROOTS

(By Lenore Skenazy)

"Haven't you seen the movie 'Midnight Express'?" friends asked, agitated, when I announced I was off to seek my Turkish roots, alone. They had seen the film of Billy-the-Drug-Dealer's trauma in Turkish prison and harbored the image of Turkey as a torture chamber. But to me, Turkey meant a land of tolerance: My Jewish ancestors had lived there for more than 400 years without persecution.

In 1914 my paternal grandparents left that world beyond. Like any second-generation child, with a cushion of parents between my American ease and the ordeal of immigration, I found myself wondering, "What if I had been born one hundred years earlier. . . ?"

I had to complete the picture; I had to connect the dots. I would visit my grandparents' hometown on the Dardanelles: Canakkale, on the far west coast of Turkey.

By the time my bus pulled into Canakkale late one autumn afternoon, I had been traveling through Turkey for three weeks. Along the way, I'd picked up two useful things: a little Turkish and a lot of confidence.

"Traveling alone" merely means starting out alone, I'd quickly learned. After that, you meet the world, if only by asking directions. The Turks, especially, love to help their few tourists for, as Allah said, "A guest comes from God." A rare young American guest is especially welcome.

I got off the bus armed with my octogenarian aunts reminiscences of their town's Jewish quarter 70 years ago:

"There was a bakery in the corner of the central square," one aunt had told me back home. "And a bath opposite it," recalled her sister. In Istanbul I met a man, originally from Canakkale, who drew a crude map of that intersection, and I carried this with me, too. The map proved my salvation. I showed it to the clerk in a store near the bus station, and though just those two landmarks were labeled, he led me directly to the square.

"Let me say this," I wrote my relatives at the end of the day. "I don't think the town has changed much since you left." Fresh loaves of crusty *ekmek* were on sale at the old bakery, and bathers still bustled to the Turkish bath. Hand-painted horse-drawn carts and vintage cars rumbled by, while the square screamed with rag-tag children, their chickens, tomcats and mothers.

"My kin?" I wondered, and suddenly realized I was at a loss. Were these people perhaps long-lost relatives, or strangers? Were there, in fact, any Jews left in town? I had made it to Canakkale: Now what?

I found a clean, cheery pensione, overpriced by Turkish standards at $5 a night (most nights on my travels I paid $1.50 for less-comfortable quarters). Passing small stores selling cast-iron stoves, juicy baklava, knitting yarn, auto parts and lamb. I asked, "Synagogue? Jewish mosque?" of the people I met. At length I came upon the building I sought—and immediately wished I had not. It stood grand, inspiring, antique—and padlocked, it looked, for eternity. I had come too late ever to see inside.

Heartsick, I paced the hard dirt lot facing the temple until a young, pregnant woman behind me called out from her window, "Welcome!"

Startled to hear my language, I spun around to face a bleak apartment building, its paint peeling, its closest neighbor a structure torn down by earthquake or man. "You English-speak?" asked the young woman, standing out against this scene by virtue of her liveliness. I nodded. "Wait," she said. "I bring you English-speak man."

And, knocking on her next-door neighbor's crumbling stucco apartment, she did. An aged man, stooped and unshaven, emerged and greeted me with, "How do you do? Where are you from?"

I explained my grandparents came from his town.

"Their names?" he asked.

But when I told him, he smiled and shook his head.

"No," he insisted, "their names in Hebrew."

Then the old man introduced himself. He was one of Canakkale's 35 remaining Jews, Haim Sidi, age 71, the rabbi.

"It is 7 o'clock now," he continued, "at 8 we go to the synagogue to welcome Shabbat," the Jewish day of rest.

Night falling, the rabbi unlocked the gates I'd feared permanently shut. I entered the synagogue with great emotion: It was beau-

tiful. The grand sanctuary's ceiling was high, the bema (from which the rabbi reads the Torah) carved of fine dark wood, the women's balcony gracefully peering down on this musty splendor like the best seats in an opera house. But it was in the cozy antechamber that the rabbi held services this night—a small room adorned with hand-illuminsted prayers and an ark draped with velvet. I took a seat in this room, as my forebears must once have done, and Rabbi Sidi led four old men, the remnants of his congregation, in thanks to God.

The Jews of Turkey have had much to be thankful for: half a millenium without persecution. In 1492, when Columbus left Spain sailing west toward America, the Spanish Jews headed in the opposite direction, fleeing the Inquisition. Five years later they were followed by their Portuguese-Jewish counterparts.

In Turkey, Sultan Bayezid II not only welcomed these refugees, he actually sent a fleet to rescue them. As a ruler of a young Islamic empire at a time when Moslems considered commerce beneath them, Sultan Bayezid hoped the Jewish artisans and multilingual businessmen would enrich his country.

This the Spanish or "Sephardic" (from sepharad, Hebrew for Spain) Jews did—and, in the process, many enriched themselves. Throughout the centuries, however, rich and poor Jews alike kept a very low profile. They lived their lives apart from the Moslem mainstream and never aspired to political or military power. And for 400 years very few Jews learned Turkish.

The spoke, instead, "Ladino," medieval Spanish written with Hebrew characters—the Sephardic equivalent of Yiddish. Today Ladino is dying out. For the last 30 years, Jewish children in Turkey have grown up speaking Turkish. But my father's family in Chicago still speaks Ladino, and so does Rabbi Sidi, in Canakkale.

I was connecting the dots.

That evening the rabbi invited me home for dinner. His house was damp. The table was wooden, the oilcloth worn, the plaster veining and the light fluorescent.

We shared Mrs. Sidi's modest meal of stuffed peppers and decanted a dusty bottle of Coca-Cola to toast my trip. "Normally," explained the rabbi, "we drink water."

After dinner he showed me his few treasures: an 1816 Ladino-Hebrew prayer book, a parchment he was caligraphing and a 1949 English primer. The primer's expressions were archaic—"old chap," "darling"—as were its jokes, but by studying this book one hour every night for three years, the rabbi had taught himself an English we could speak.

Finally, he picked up a yellowing song book stuffed with hand-copied ballads. Trembling slightly, the rabbi sight-read them in Hebrew, Turkish and Ladino.

When I returned to my pensione after midnight, I marveled that I had made it here, the place where my family worked, prayed, gossiped and sang, and that now I'd heard songs here, too.

The next day, after morning services, the rabbi declared he was at my service.

"I'd like to find my ancestors, in the cemetery," I said.

"You will find them 60 years from now, in Paradise," replied the rabbi, "not today in Canakkale."

Our trek to the graveyard proved him right. Passing pleasant homes and an outdoor market deserted on Saturdays except for its wooden stands and a few forgotten vegetables, we came to our sad conclusion. All that remained of my readable roots were crumbled tombstones, scattered and worn smooth, grazed by the occasional goat.

Back in town the rabbi introduced me to more lively links: a significant sample of Canakkale's 35 Jews. We met the baker, who plied us with rolls fresh from his deep, roaring oven, and a pair of delicate white-haired ladies invited us in for Turkish coffee served with marzipan and gentility. Then we met Yasar.

Jolly Yasar Yohay runs a sporting goods store about two people wide by three people deep (one person wide, if you're Yasar). But "Shalom! Bienvenido! Welcome!" he said, placing the rabbi and me squarely at the entrance, nearly blocking it, and summoned tea for us.

As we sipped, the townswomen—dressed in traditional salvar (baggy pants)—came bustling by with their crew-cut boys and pigtailed girls, all anxious to buy book bags and shoes since school throughout Turkey would begin the following Monday. Between these sales, Yasar and the rabbi discussed the next day's plans conspiratorily. Both men loved tourists, but met them all too rarely. So while Yasar gleefully set the agenda, the rabbi nodded, pleased. At last Rabbi Sidi suggested, in English, "Will you permit us to show you Truva tomorrow?"

Truva, in English, means Troy.

Homer's Troy, Helen of Troy's Troy, lies only 15 miles from Canakkale. But as both the rabbi and Yasar almost never leave their town, this was a grand outing.

To get there we took a mini-bus that traveled along a twisting, one-lane road, constantly stopping at tea and hookah parlors to pick up passengers, animals and, for the driver, cigarettes. The view out to the coast was ravishing—the water as blue as it must have been in Homer's time—but I preferred the scenes of village life, especially watching the old men play backgammon at the small cafes and the women hanging clothes to dry in the bright sunshine. The rabbi smiled, drinking in the scenery and chatter, but Yasar greeted fellow commuters with nearly deafening 'Hellos!" When he recognized someone outside the bus, he banged on the windows, waving frantically. And he knew, it seemed, almost everyone.

His circle of friends included Troy's one tour guide, so we got a private tour of the site. Except for one monument to kitsch, a huge wooden horse sired by the most modern of Trojans, little distinguished this desolate landscape. Acres of tumbled walls and gray white rocks are all that remains of the historic site.

Much of Troy was destroyed, explained the guide, by the very man who discovered it, Heinrich Schliemann. Schliemann devoted his life to finding the Troy of Homer, but when at last he did, he plowed straight through it, convinced that another deeper level, was the layer he sought.

Poor Schliemann, I thought. He tried to connect and missed. No Rabbi Sidi had awaited him with a key to the past he sought.

After our tour we stopped for lunch at a tiny outdoor restaurant run from the kitchen of another of Yasar's pals. While we waited in the sunshine for our fried eggs drenched in butter and salt, Yasar played with his friends dogs and I showed the rabbi how to use the square-root function of my solar-powered calculator. If he could bring me my past, I owed him a glimpse of the future.

Lunch finished, we walked to the beachside fig orchard and white-washed home of Hamit Kartal, former curator of the Truva museum and director of the archeological site of Troy. He came out to greet us looking so pleased to have visitors that I smiled with a lump in my throat.

"Ask him questions," Yasar and the Rabbi whispered. "He is a very great expert."

I did, and the distinguished old man hauled out books and maps to the porch where we sat, delighted to have a student again. When he finished his lesson, Kartal opened an illustrated archeology tome and pointed to a photograph of Troy's earthenware jugs. He would, he vowed, give anything to fashion jugs like these and exhibit them in New York.

Such is the stuff of dreams. While American romantics dream of ruins and roots, the man whose ward was Troy hoped someday to sell kitsch in Manhattan.

Another friend of Yasar's motorcycled by as we spoke. He was Canakkale's one journalist. With the rabbi intrepreting, he took down the story of my odyssey and snapped a picture of me sitting between the rabbi and Yasar, in an orchard midway between ancient history and my own.

As evening fell we bade goodbye to the Troy director and, having missed the minibus, hitchhiked back to town. The driver picking us up turned out to be—what else?—a friend of Yasar's.

At last it was time for me to leave Canakkale: In one weekend I had seen what I hoped to see. The impoverished rabbi insisted on buying me sandwiches and sweets for the bus ride to Bursa en route to Ankara. At the station he also handed me a tiny piece of homemade parchment. On it he had calligraphed the prayer all Jews are commanded to post on their doorways.

The rabbi will thus be with me whenever I come and go from home.

About a month after leaving Turkey, I received a copy of the country's biggest newspaper. Hurriyet, mailed to me from Yasar in Canakkale. On page 15, I found myself sitting between him and the rabbi again, in the fig orchard near Troy. I felt proud for the young woman who had made that adventurous journey all by herself.

But the truth is that when I was traveling, I was very rarely alone. Throughout Turkey strangers met and helped me. And while I was there, I did not need to be brave or deliberately adventurous. For six weeks I just woke up to explore Turkey the way I woke up today to go to work.

Moreover, as the cemetery was in ruins and I did not search for genealogical documents, I cannot claim to have found my Canakkale roots, per se. I found, instead, the last living tree, scraggly but beautiful, 35 branches strong, thanks to Rabbi Sidi, Yasar and their friends.●

THOMAS F. RILEY HONORED

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. BADHAM. Mr. Speaker, it gives me great pleasure to announce that on April 15, 1985, there will be a William Spurgeon luncheon to honor Orange County Supervisor Thomas F. Riley for his service to our community and especially for his significant contributions to Scouting.

Tom was first appointed on September 4, 1974, to the board of supervisors by then-Gov. Ronald Reagan to fill the unexpired term of Supervisor Ronald Caspers. When Gov. Edmund G. Brown, Jr, was elected, Tom was reappointed to fill out the term. In June 1976, Tom won his first public election, receiving 64 percent of the votes cast and has since been reelected every 4 years. He has been selected for two consecutive terms as chairman of the board by his peers in recognition of his outstanding leadership and consistent fairness.

In addition to representing the fastest growing district of the county, Tom serves as chairman of the board of supervisors for 1985 and has accepted his share of memberships on a number of important commissions, districts, and committees.

Tom has been a leader in working with other affected jurisdictions to solve the sedimentation problem in Upper Newport Bay. He has earned a reputation of honesty, integrity, and openness to the local residents and maintains an open door policy in his office, always welcoming visits from his constituents.

Under his leadership, strong commitments have been established to coastal recreational areas, inland parks, wide greenbelts through the county's high priority open space corridors, and to quality residential development.

Born Thomas Felton Riley on July 6, 1912, in Harrisonburg, VA, Tom attended Virginia Military Institute and graduated with a bachelor of science degree in civil engineering. He then accepted an appointment as a second lieutenant in the U.S. Marine Corps. In this way, Tom began a long career in the Marine Corps that lasted until his retirement in 1964 as a brigadier general. During his career in the military, he distinguished himself by receiving more than 15 medals and decorations.

It will be my pleasure to join the William Spurgeon luncheon on the 15th in honor of Supervisor Thomas F. Riley for his dedication and commitment to the community.●

INTRODUCTION OF LEGISLATION TO END TRADE PROBLEMS WITH JAPAN AND TO MAINTAIN VITAL UNITED STATES-JAPAN RELATIONS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. STARK. Mr. Speaker, I am today, reintroducing a resolution to cap our trade deficits with Japan. This bill is an effort to end the increasingly bitter trade dispute between our two nations, which is threatening the even more important political alliance.

The latest telecommunications agreements between our two nations announced this week are not going to solve the trade problem. We are going to be back, justifiably hammering at the Japanese on something else within a few days. We are going to continue to have $100 million a day trade deficits with Japan.

On paper, she is going to appear to be an open trading partner—and yet she is different. She is a poor importer. A people (some have used the word clan) who have lived by themselves on a set of islands for nearly 2,000 years of recorded time do not buy readily from outsiders. There is no GATT, there is no law, there is no treaty, there is no negotiation that is going to change that.

Time might change it. But we don't have time, not with our trade deficits and not with our high unemployment and not with the overvalued dollar which, even if it corrects itself overnight, will not provide trade relief for 1 year to 18 months.

We can all admit that much of the trade problem is America's fault: the high deficits and high interest rates have brought us an overvalued dollar that makes imports attractive and our exports less competitive. We let inflation and profit and salary and wage rates get out of hand in the 1960's and 1970's and lost competitiveness. Our business management styles are not always as good as the Japanese in dealing with workers. We got careless and sloppy and the quality of our products has not always been what it should. Even our Tax Code is not as good as the Japanese code (which we gave them and which they kept pure) and our laws have encouraged questionable investments.

Having said this, much of the trade deficit—perhaps a third of it—is not our fault but is the fault of legal and extra-legal, unspoken Japanese protectionism. Raw and processed foods, lumber, cigarettes (as long as the Japanese want to smoke, why not our cigarettes?), chemicals, some hi-tech items, military aircraft—in all these areas there have been denied sales and lost jobs for Americans. In hi-tech industries particularly, the Japanese are endlessly creative at blunting our competitive advantage. They are, to put it mildly, screwing us on the industries of the future.

But more important than the trading relationship, is the political relationship. Japan is a democratic success story. She is a nation of incredibly hard-working, talented people who can bring progress to all of Asia. She is an important military ally. For example, we keep urging Japan to spend more on military, but she is one of the top 10 military powers in the world in terms of spending and talent.

But the trade wars—and that is a phrase one Senator used last week—are damaging the political relationship. It does sound like war: the Finance Committee Chairman has said, "an eye for an eye."

The United States-Japan Wisemen's Group offered many ideas for improving the relations between our two countries, and the most important recommendation for the American side was to start treating Japan as an equal nation.

We don't. To listen to many of my colleagues in the Congress in recent days, you would think that Japan is the same as Grenada.

Japan is not Grenada. Japan is a major world power. General MacArthur did not fade away. He is dead. The General Headquarters—to respond to one Japanese comment—has not been reopened in downtown Tokyo.

Can you imagine the reaction of Americans if a foreign nation wanted us to translate our telephone regulations—say Judge Green's opinions—into Japanese at our expense? Can you imagine if the Japanese insisted as a negotiating point that a foreigner or a foreign company sit on one of our Government Advisory Commissions? Can you imagine the reaction of American cattlemen or American dairymen if a foreign country insisted that we repeal the meat import quota and cheese quota acts? Can you imagine our reaction if Japanese politicians scorned meeting with top level American delegations? Can you imagine the reaction if the Diet passed a resolution 500 to zip threatening the United States with trade retaliation?

We'd go nuts.

Yet that is what we are demanding of the Japanese. As one of our chief negotiators said recently, "No American effort since the Occupation has dug into the guts of the Japanese system as we have done in the past year."

Let's stop it.

Let's stop tearing apart the guts of an ally.

Let's preserve the political and cultural relationship.

Let's admit that the Japanese are lousy importers and we can't make them buy from us. Let's admit that they make a good product and that our consumers want to buy from them. Let's admit that under any economic theory, it would be natural and normal for Japan—as a small, resource poor nation—to be running an export surplus with the world in capital and consumer goods.

Let's admit all that, and set a limit to it.

The bill I am proposing was inspired by MIT economics professor Lester Thurow and is the same as House Joint Resolution 195 of the 98th Congress. It would cap Japan's balance-of-trade surplus with the United States

at $15 billion per year. The more Japan buys from us, the more she can sell. She just can't run an overdraft of more than $15 billion a year.

Under this approach, there will be no hassles or frustrating negotiations on specific products, on the interpretation of regulations, on goodwill and the keeping of one's commitments. The cap is substantially below today's Japanese trade surplus but does not require a balance. This recognizes the fact that with truly free trade, the deficit might be about one-third less; and Americans do want to buy a substantial number of Japanese products. Once the cap is reached, that is it for the year. No hassles. No pressure for negotiations. No bullying. No more screaming speeches from Congressmen.

When I first proposed this Thurow idea in legislative form, it was ridiculed as unwise protectionism. Two years have passed. I ask the critics: "Will you now admit that the economic tension is seriously threatening the political relationship? Will you admit that we have just been drifting in the bilateral trade area with no solutions in sight? Will you admit that Japan is different and that maybe—to save the political and friendship relations—we should apply new approaches to a unique problem?"

Anyone who gives thoughtful response to these questions will see the need for new approaches. Maybe my approach is not the right one. But current policy is a disaster that threatens much more than our pocketbooks.

I am trying to save the United States-Japan relationship. If you have a better idea, offer it now. Increasing the tension on our bilateral relationship will only create contention.●

TRIBUTE TO ALONDRA DE LA FRONTERA

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. ORTIZ. Mr. Speaker, I rise today to pay tribute to an outstanding member of the arts, a renowned ethnic recording artist of Mexican-American folklore, better known as Alondra de la Frontera, the Lark of the Border, Mrs. Lydia Mendoza. Lydia will be honored on April 14, 1985, at the Stardust Ballroom in Corpus Christi, TX, in commemoration of 50 years, her golden anniversary, as a recording artist.

Lydia grew up in San Antonio and now resides in Houston, TX. Her music career commenced in 1927 when she started singing with her family. Then, in 1934, she recorded her first, well noted song, "Mal Hombre." Since the 1930's Lydia has affectionately been known as Alondra de la Frontera or the Lark of the Border. Lydia's recording career continued throughout the years with such well known recording studios as Radio Corp. of America, Victor, Columbia Studios, and Falcon. Through her gift of song, she has enriched the lives of many who have come to know her expressive style and warmth. The lives of many in our community have been deeply and emotionally touched by Alondra de la Frontera.

Lydia was an artist in residence with the California State University at Fresno. Her autobiography was featured in 1982 by the Library of Congress in their publication "Ethnic Recording in America—A Neglected Heritage." On July 3, 1982, the National Endowment for the Arts honored Alondra de la Frontera by awarding her a National Heritage Fellowship in recognition of her outstanding artistic contributions to our national heritage. In conjunction with the award ceremony in Washington, DC, Lydia was invited to and did participate in the Smithsonian Institute Festival of American Folklife. During this last decade there has been a reawakening or rebirth of Lydia's music. Many of her earlier recordings have been reissued on the Arhoolie label.

We thank you Lydia, the Lark of the Border for lifting our hearts and enriching our lives, where ever we go, with your songs. God bless you Alondra de la Frontera and be with you where ever you go.●

UNFAIR TAX PROPOSALS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. HUBBARD. Mr. Speaker, I received a March 21 letter from one of my constituents, Mr. James E. Venable, Jr. special agent for Northwestern Mutual Life Insurance Co. in Paducah, KY.

I believe my colleagues will be interested in Mr. Venable's comments after his study of the proposed tax reform plans. Although I agree with his support of efforts to produce greater fairness and equity to all taxpayers, I agree with his strong opposition to efforts to drastically change the tax treatment of life insurance products.

I urge my colleagues in the U.S. House of Representatives to carefully review James E. Venable, Jr.'s, comments. His letter follows:

MARCH 21, 1985.

Congressman CARROLL HUBBARD,
Room 2182, Rayburn Building,
Washington, DC.

DEAR CONGRESSMAN HUBBARD: I have looked forward with great interest to the administration's tax reform proposals, both as a concerned citizen and tax payer, and as a life insurance agent. Revision of the tax code to produce greater fairness and equity by removing loop holes that benefit the wealthy to the detriment of everyone else is long overdue. Since I consider myself, as well as the vast majority of my clients, to be the sort of average tax payer who would be helped by tax reform, I was surprised and extremely distressed at the Treasury Department proposals to drastically change the tax treatment of life insurance products.

Under Treasury's plan, increases in the value of a life insurance policy (inside buildup) would be taxed as current income to the policyholder despite the fact that the policyholder has not received any money. This would be akin to taxing a homeowner who has not sold his home on the property's appreciation. Loans taken out against the cash value of life policies would be taxed as income to the borrower, while deductions of the interest paid on such loans would be denied. This is both absurd and ironic. A loan, which must be paid back with interest, is certainly not income, and an action usually taken as a last resort to avoid having to surrender a policy should not be deemed a surrender which generates income for tax purposes. Furthermore, interest paid on such loans should be deductible as long as any interest on any kind of loan is deductible. With specific reference to the Treasury's proposal to allow deductions for home mortgages, I cannot understand why ownership of life insurance can be considered an any less desirable goal than his home ownership. Finally, the Treasury plan would also tax employees on the full value of employer provided group term life insurance.

When the Treasury proposal was first released last November, Secretary Regan noted that under it, there would be winners and there would be losers. If Treasury's provisions affecting the taxation of life insurance were adopted, the losers would be each and every owner of a whole life insurance policy and each and every employee covered by employer provided group term life insurance, as well as all of their beneficiaries. According to statistics published by the American Council of Life Insurance in it's "Life Insurance Fact Book", 1983, this would mean 86% of U.S. families.

Another big loser under the Treasury scheme is likely to be the U.S. economy. Aside from being a major pillar of economic security to many millions of average American families, the assets which build up in whole life policies are a major source of capital formation in our economy. In 1983 alone, life insurance contributed 56.5 billion dollars to U.S. capital markets including government securities, corporate stocks and bonds, public utility and railroad bonds, and real estate properties of all kinds, including shopping centers, hospitals, residents and offices.

In view of all of these facts, I think it is appropriate to seriously question whether the public interest would be served by Treasury's Life Insurance Proposals. The income of 61% of those who own life insurance is less than $25,000 per year. The current (and long standing) tax treatment of insurance products has made self-help possible for these many millions of working Americans. Congress saw no reason to change the thrust of this tax treatment as recently as last year. Making the changes that Treasury suggests would, by increasing costs to individuals and businesses, probably result in cutbacks of coverage by those who have the least financial security as it is, and

could least afford the consequences of inadequate coverage. Government policy should be aimed at making it easier, not harder for people to provide for themselves at their own cost and initiative, for if they cannot, expensive government programs will be needed to pick up the slack.

Since the announcement of the Treasury plan the market for insurance products has been damaged as many pending sales have fallen through. The long range nature of the financial commitment needed to sustain a whole life policy makes these products extremely vulnerable to this kind of uncertainty. I strongly urge you, Congressman Hubbard, to prevent further damage by rejecting the above mentioned elements of the Treasury proposal as quickly as possible.

Best personal regards,

JAMES E. VENABLE, Jr.,
Special Agent,
Northwestern Mutual Life.●

NICARAGUAN FREEDOM FIGHTERS

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. LIVINGSTON. Mr. Speaker, let's clear the air about the Nicaraguan freedom fighters President Reagan is trying to get this Congress to support. The American people should be told that our Government is on the side of the progressive forces inside Nicaragua. The individuals who make up these forces are relatively few—too few in actual fighters to ever overthrow the self-avowed Marxist Communists who rule them. But when we count the much larger number of average Nicaraguan citizens who are suffering under this rule, these progressive freedom forces are far too many for us to simply ignore.

As reported in the February 28 Washington Post—no friend of the President's policies—the main organization of freedom fighters, the Nicaraguan Democatic force, is "a mainly peasant army, backed by a political organization headed by (Adolfo) Calero and other civilian opponents of the late dictator Anastasio Somoza." The military component is "14,000, mostly peasants" and only "40 officers and about 200 fighters served in Somoza's National Guard." That's less than 2 percent. The Post added that "even committed critics of the FDN agree" to the fact that the commander to this peasant army, Enrique Bermudez, "never played a role in atrocities or abuses carried out by National Guard troops during the civil war leading to Sandinista rule." He was Nicaragua's military attache in Washington at that time.

And what about the other leaders of the FDN, Mr. Speaker? Here's how the Post describes them: Indalecio Rodriguez, "A former university dean who was active against Somoza * * * (who) was active in armed rebellion against the dictator's rule"; Adolfo Calero and Marco Zeledon, key figures "in organizing strikes against Somoza during an uprising against the dictator"; Alfonso Callejas, originally an official in the Somoza government, "but resigned in 1972 in disagreement with the government"—7 years before it fell; and Lucia Cardenal, "widow of Jorge Salazar, a prominent businessman who shielded clandestine Sandinistas under Somoza but turned against them when the leftist direction of their government became clear after 1979."

The Post describes those freedom fighters who are working separately from the FDN against the Sandinistas: Eden Pastora, "Closely tied to the original Sandinista revolution * * * a hero of the war" and Alfonso Robelo, "A businessman who served in the first Sandinista government until he became disillusioned and went into opposition in exile." These two men and others have formed the Revolutionary Democratic Alliance [ARDE] together with labor leaders and the Miskito Indians of Nicaragua, the Post reports. The Miskitos, by the way, have been the victims of any number of atrocities at the hands of the Sandinista government of Nicaragua.

I was appalled to learn recently from Wycliffe Diego, a Miskito leader who was forced to flee his homeland into Honduras, that the human rights abuses of the Sandinistas against the Miskitos continue inside Nicaragua.

On January 2, 1985, residents of the Columbus relocation camp were allowed to return to their village of Bihmuna, as a purported act of good faith by the Sandinista front. Bihmuna is located at the far northeastern corner of the country.

On January 12, 1985, as the residents were beginning to rebuild the village, Sandinista aircraft completely destroyed Bihmuna with aerial bombardment. Twelve villagers were killed.

On February 12, 1985, the villages of Halover, Waunta, Laya Siksa, Kuka Laya, Wawa, and Tasbapauni were burned by Sandinista troops, 2,000 civilians fled to the jungle where they remain today without shelter, food, or medicine. About 300 were captured by the Sandinistas and sent to a "relocation" camp near Wawa. The Sandinista troops also destroyed all crops and fruit trees near these villages, located in northeastern Nicaragua near Pueurto Cabezas on the Atlantic coast.

So, Mr. Speaker, let's make it clear, the President is on the right side. No one is going to topple the Sandinista regime. But that regime is the equivalent of a far-left Somoza. And, like Somoza before, it will never negotiate away its power in good faith if this Congress turns its back on the progressive forces inside Nicaragua.●

ALCOHOL ABUSE AND ITS IMPLICATIONS FOR FAMILIES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. MILLER of California. Mr. Speaker, the Select Committee on Children, Youth, and Families has just concluded its first hearing of the 99th Congress: Alcohol Abuse and Its Implications for Families.

Held jointly by the task forces on Crisis Intervention and Prevention Strategies, the hearing began our in-depth look at the connections between alcohol abuse and many of our most serious family problems.

As we began to see during the 98th Congress, abuse of alcohol, and other drugs appears to be very strongly associated, for example, with marital dysfunction and family violence; with emotional, learning and behavior problems in young children; and, with running away, delinquency, depression, and suicide in adolescents.

Substance abuse is a problem of paramount significance to American families. The economic costs of alcohol and drug abuse are estimated to be more than 4 times that of cancer and 3 times more than cardiovascular diseases. As staggering as they are, these figures hardly reflect the damage done to the lives of family members that surround the substance abuser.

Our members were extremely interested in taking a look at this issue. The comments I received after the hearing reflected even a greater interest in further pursuing the questions of prevention and intervention with regard to alcohol abuse and families.

If there is one thing that sticks in my mind from this hearing it is the words of Dr. Sheila Blume, one of our expert witnesses. Testifying after the family members, Dr. Blume said:

> Each of those whom you heard from today is typical, except for one thing—they all had the advantage of treatment. In every case, it was the treatment that turned them around.

As we have seen many times at the select committee, some of the most severe problems facing children and families, like teenage pregnancy, infant mortality, and family violence, are preventable and treatable.

So, we learned at this hearing, is alcohol abuse.

As policy makers, we needn't despair because no miracle cures are available.

The only miracle we need in this, as in so many other cases, is understanding and commitment.

Our first panel was comprised of family members who had directly experienced problems with alcohol abuse, and it was their involvement in treatment programs that has allowed

them to face, and successfully deal with their destructive behavior.

Mrs. Dot West and her 21-year-old son Bret from Baton Rouge, LA, described in graphic and emotional terms how the alcohol and drug addictions of each of the West's three teenage sons transformed a close-knit, religious family into a divided, argumentative household. Mrs. West, a public school teacher, and her husband, a businessman, tried without success to help their sons. Every effort, even including clinical mental health counseling by those not trained to deal with addictive persons, failed. Finally, with help from a local, publicly funded substance abuse treatment center, which treated the entire family, each son has overcome his addiction and is attending a local university.

The committee heard similar experiences from Marjorie, from Montgomery County, MD, a 36-year-old mother of two daughters and Mrs. Beverly Faria, from Concord, CA, a 28-year-old mother of three young children.

Marjorie described her childhood spent with alcoholic parents where she assumed responsibility early in life for her four siblings and for managing the household. At crisis points, as when her younger brother was hit by a school bus, the children were left to manage on their own. The chaos and loneliness led to her own addiction to alcohol and Valium as an adult, and later to her daughter's problem drinking at age 13. Fortunately, she was able, with her family, to obtain help, and neither Marjorie, her parents, or her daughter abuse alcohol or drugs any longer.

Mrs. Faria's problem drinking began at age 20, and quickly progressed to the point where it disrupted her marriage and interfered with her ability to care for her preschool-age children. When a local child protective services agency intervened, she was faced with the choice of staying in a residential treatment program long enough to overcome her addiction and giving up her children to foster care, or keeping her children, but obtaining less intense treatment and risking a return to drinking.

Unfortunately, under our current system, since many residential substance abuse treatment centers do not accommodate children, many single parents must give up their children to foster care. Mrs. Faria has not had a drink for 10 months.

Dr. Ian Macdonald, Chief Administrator of the Alcohol, Drug Abuse and Mental Health Administration [ADAMHA] began our second panel of witnesses. He was followed by Judge Albert L. Kramer, presiding justice of the Quincy District Court in Massachusetts, and Judge Andy Devine of Lucas Court, Court of Common Pleas, Juvenile Division, in Toledo, OH.

Dr. Macdonald told us that alcohol abuse directly affects 10 million American adults and 3.3 million teenagers between the ages of 14 and 17. He reported that alcohol abuse in 1983 cost our society $116.7 billion. He told us that the rate of separation and divorce among alcoholics is 7 times that of the general population, and is a factor in 50 percent of spouse abuse cases and 38 percent of child abuse cases.

He was very careful to point out, however, that treatment for alcohol abuse works, and that funding for those treatment services is essential.

Judge Kramer described the connection between alcohol abuse and the family problems he sees in his courtroom.

For example, of 139 child abuse cases heard at Quincy District Court between 1980 and 1984, 42 percent of the children involved had alcohol or drug dependent mothers, and 34 percent had similarly addicted fathers. Of 75 cases of spouse abuse seen in one 3-month period during 1984, 81 percent of the abusers were alcoholic, and 54 percent of them came from alcoholic homes. Furthermore, 25 percent of the victims were problem drinkers and 53 percent of them came from families with alcohol problems. Judge Kramer stated that alcohol abuse was also a factor in cases involving adolescent runaway behavior and delinquency.

Since the evidence of alcohol involvement is so strong among his cases, Judge Kramer has ordered his court to provide a comprehensive evaluation of all suspected problem drinkers. In cases where the court has direct control, intensive treatment for substance abuse has also been made part of the sentencing procedure.

Judge Andy Devine next described a communitywide effort to address the problems of alcohol and drug abuse which began after it was learned that 13,000 juveniles in the Toledo community were heavy users of alcohol and/or marijuana. With Devine's leadership, a communitywide educational effort was undertaken. Three years later, it has become a nonprofit agency called C.A.R.E.S [Chemical Abuse Reduced Through Education and Services]. Incorporating parents, schools, hospitals, police, and mental health agencies, C.A.R.E.S is currently seeking a grant to evaluate whether its work has been effective in reducing teenage substance abuse in Toledo.

A researcher, two program administrators, and a representative of a parent self-help group completed our witness list.

Dr. Sheila Blume, medical director of the Alcoholism and Compulsive Gambling Programs at South Oaks Hospital, Amityville, NY, and a member of the board of directors, Children of Alcoholics Foundation, Inc. [CAF], also in New York, shared with us a review of recent literature on children of alcoholics.

Dr. Blume described a Children of Alcoholics Foundation study which suggests there are 28.6 million children of alcoholics in the United States—nearly 7 million under the age of 18. She believes that the most recent research strongly indicates that alcoholism is, in part, an inherited problem, which itself suggests the importance of targeting "at risk" individuals. Dr. Blume also pointed out that while we now know much more about substance abuse, treatment services are not reaching the vast majority of individuals who need them.

Mr. John Daigle, executive director of the Florida Alcohol and Drug Abuse Association, and vice chairperson of the Governor's Commission on Drug and Alcohol Concerns, described the commission's findings. The data from Florida underscore the strong link we have seen so often between substance abuse and a host of serious social problems. For example, one-third of all reported child abuse cases in Florida are drug-related. Fully 64 percent of all homicides are substance abuse related, and direct involvement with drugs or alcohol caused the incarceration of 1 out of 4 inmates in Florida's prisons.

As a result of the commission's work, Florida is beginning a comprehensive, statewide prevention, early intervention, and treatment program. Implementation will directly involve parents, schools, churches, businesses, and all aspects of the media.

Members heard next from Mr. John Bland, director of Maryland's Alcoholism Control Administration. Mr. Bland's agency has also found that alcohol abuse is correlated with truancy, school and community vandalism, poor school performance, adolescent pregnancy, suicide, and auto accidents and deaths.

Mr. Bland stressed that substance-abusing teenagers are frequently reacting to problems at home. As a result, they cannot be successfully treated unless the entire family is involved in the treatment process. This awareness guides the continuum of treatment services Maryland provides to address the problems of substance abuse.

Our final witness was Ms. Carolyn Burns, vice president of the National Federation of Parents for Drug Free Youth [NFP]. NFP provides technical assistance, resource materials, and advice to nearly 9,000 parent groups across the country. Burns echoed a theme heard throughout the hearing—that effective treatment for a substance abusing adult or child must involve the entire family. She explained that family members can adopt various roles—like ignoring, overpolicing or overcompensating—to protect themselves against a substance

abusing relative, but that these roles can harm those who assume them and can perpetuate the addiction of the substance abuser.

Committee members saw the extent to which individuals, families, and society suffer due to alcohol abuse. But we also learned that there is much that can be done to repair the wreckage or to prevent it from occurring.

The families who came before us and so courageously shared their personal struggle with substance abuse stressed the importance of obtaining help from professionals and self-help organizations who recognize addiction as a primary disease that must be tackled directly. Only when the addiction is controlled can more traditional counseling efforts have a chance to succeed.

We also learned that we must view an alcohol or drug dependent individual as a member of a family. Regardless of whether the substance abuser is a child or an adult, other family members suffer both directly and indirectly, through the self-protective behaviors they adopt in defense. Those defenses can remain throughtout life, seriously affecting an individual's functioning in important areas of his or her life, as well as perpetuating the addiction of the substance abuser. That is why the entire family should be involved in a program of treatment.

The first step in developing an effective prevention approach is recognition from the community as to the extent of alcohol and drug abuse in its midst—and it exists everywhere—and its connection to so many other serious social problems. Facing up to the dimensions of substance abuse can galvanize a community to take broad and concerted action. Truly effective measures involve every aspect of the community, parents, schools, churches, and other key institutions.

The effectiveness of prevention and treatment programs was clear to everyone who participated in the hearing. Reducing or eliminating support for these efforts won't make the problems any less, but will dramatically reduce our ability to offer alternatives and assistance to families affected by substance abuse.

We would be wise to remember that many of our programs work very well, keep families together, and help people through troubled periods. For those who would continue to attack these efforts, I only ask: What is your alternative?

Mr. Speaker, I would like to conclude by further submitting, for the RECORD, a very useful fact sheet entitled "Alcohol Abuse and Its Implications for Families." I believe every member who was unable to attend our hearing will learn much if they simply skim this document.

Thank you.●

TRIBUTE TO DOROTHY B. WHITTINGTON

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. DOWDY of Mississippi. Mr. Speaker, I would like to call my colleagues' attention to an act of bravery, selflessness, and heroism on the part of the late Mrs. Dorothy B. Whittington of Smithdale, MS. On the night of December 23, 1983, Mrs. Whittington sacrificed her life in an attempt to save her grandchild, 3-month-old Kristi N. Mitchell. Kristi was asleep at Mrs. Whittington's home when fire broke out in another part of the house. Mrs. Whittington awoke and tried to report the fire, but the phone was inoperable. She, then, thinking not of her own safety, ran through the smoke-filled rooms to rescue Kristi. As conditions in the house worsened rapidly, Mrs. Whittington took Kristi into her arms and made her way to a window in another bedroom, where she was overcome by the smoke. Efforts by other family members to reach the two failed and both died. Mrs. Whittington could have easily escaped on her own, but instead remained in the burning home in an effort to save Kristi. For her courage and sacrifice, Mrs. Whittington has been presented posthumously the Carnegie Hero Fund Commission's Medal of Heroism. I join, today, the family of Mrs. Dorothy Whittington and the many Mississippians who knew and loved her in saluting her for her great and unselfish act.●

BEER AND WINE ADS ON TV

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. HANSEN. Mr. Speaker, I would like to call to the attention of my colleagues an insightful and important editorial in the February 19, 1985, edition of the Christian Science Monitor. The editorial addresses an issue which Congress might have to confront in the near future, namely a proposal to ban beer and wine advertising from TV and radio.

There is a growing concern in this Nation about the health risks of alcohol consumption and the enormous cost society pays due to alcohol abuse. We need to increase the public debate about the costs of alcohol abuse and the wisdom of this proposal to ban beer and wine ads. I'm confident this editorial from the Christian Science Monitor and others like it, pro and con, will help us find the correct solutions.

[From the Christian Science Monitor, Feb. 19, 1985]

No To TV BEER ADS

A move is afoot in the United States to ban nationwide the advertising of beer and wine on television, on grounds the ads glamorize alcohol and contribute to the problems arising from drinking.

The effort is being pushed by a coalition of organizations, led by the Center of Science in the Public Interest. Earlier this month a Senate subcommittee held hearings on the issue. The endeavor is worthwhile; organizations and individuals that care about young Americans should support it actively. Alcohol use results in considerable financial and health problems for America, as a broad spectrum of the public is increasingly realizing.

Getting beer and wine ads off TV will not be easy. Some analysts are now saying it is unlikely the Congress can pass a law this year that forbids TV advertising; the opposition, which includes broadcasters and the alcoholic beverage industry, is extremely powerful.

Hard liquor is not advertised on television, as the result of an agreement between liquor manufacturers and the National Association of Broadcasters.

Precedent exists for a ban on beer and wine advertising. Cigarette advertising has not been shown on TV since 1970; a year earlier the National Association of Broadcasters, under heavy pressure from the Federal Trade Commission, agreed to end all cigarette advertising on television. In 1971 the United States Supreme Court held that such a ban was constitutional, over the objections of tobacco companies, which claimed it violated the First Amendment's protection of free speech.

As proponents point out, the television ad drive is a logical extension of the increasingly successful nationwide effort to combat drunken driving.

Proponents are saying in effect that it is time to attack a more fundamental issue: the advertising of beer and wine that seeks to entice the impressionable young to drink by a variety of subtle but insistent messages.

These commercials are shown on television programs watched by the young, such as sporting events. Particularly reprehensible is the use of sports figures, role models for the young, to sell beer in the commercials.

The effort to ban these ads from TV comes when per capita alcohol consumption has been declining in the United States, and the alcohol beverages industry is fighting to reverse the decline. Televised ads are not the only effort to woo the young: Some breweries are sponsoring highly promoted beer nights on college campuses, featuring their own brands. Already alcohol is the No. 1 abuse problem on college campuses today.

Action is warranted to reduce the specious appeal of alcohol to the young. Banning beer and wine ads from TV would be a good first step.●

H.R. 1918—WORLD WAR I SERVICE PENSION ACT OF 1985

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. ANDERSON. Mr. Speaker, this week I have reintroduced H.R. 1918, the World War I Service Pension Act of 1985. My bill would award a service pension of $150 a month to veterans of World War I and $100 a month to their widows.

Mr. Speaker, time is rapidly running out for the men and women who served in the armed forces during World War I. These veterans average over 80 years of age—last year approximately 50,000 of them died without being honored for their heroic service with receipt of a service pension. Of the 5 million men and women who served their country during the war, only 225,000 remain.

The veterans of every war prior to World War I have received a service pension, from the Revolutionary War to the Spanish-American War and even the Boxer Rebellion in China. Due to a policy shift, veterans from every war after World War I received GI bill benefits to help them readjust to civilian life. However, the World War I veterans were caught in the switches and receive neither. Last year, this Congress passed a new GI bill for newly recruited military personnel. I supported this bill because I believe it will assist the military in recruiting quality people, however, I think that it would behoove this body to repay its old debts before creating new ones.

In order to attempt to reach a compromise on H.R. 1918 with the chairman of the Veterans Committee, my colleague from Mississippi, I have made significant concessions to reduce the cost of this program. The cost of this bill as written in the 98th Congress for fiscal year 1986 would have been approximately $775 million. The cost of this year's leaner, trimmer H.R. 1918 for the same fiscal year will be on the order of $250 million. It is my hope that this action will induce the esteemed chairman to meet me and all of H.R. 1918's supporters halfway.

Last year, 221 of my colleagues joined me as cosponsors of H.R. 1918. This year 117 Members asked to become original cosponsors. Due to an administrative error in my office, H.R. 1918 was submitted without the accompanying list of original cosponsors. I apologize for this oversight and ask that the list be printed here so that these Members can be recognized for their generous support for World War I veterans. I and the veterans of World War I and their families are grateful for their efforts and would be equally grateful to additional cosponsors.

ORIGINAL COSPONSORS

Representative Hoyer, Representative Conte, Representative Smith (Nebraska), Representative Flippo, Representative Frank, Representative McKernan, Representative Fields, Representative Tauke, Representative Young (Florida), Representative Kastenmeier, Representative Williams, Representative Holt, Representative Dorgan, Representative Biaggi, Representative Skelton, Representative Bates, Representative Bonior, Representative Smith (Florida), Representative McEwen, and Representative Lundine.

Representative Mitchell, Representative Lehman (Florida), Representative Thomas (California), Representative Gonzalez, Representative Howard, Representative Lowery, Representative Murtha, Representative English, Representative Kanjorski, Representative Torres, Representative Young (Missouri), Representative Schneider, Representative Stokes, Representative O'Brien, Representative Stangeland, Representative Boland, Representative Chappie, Representative Clay, Representative Evans (Illinois), and Representative Torricelli.

Representative Roybal, Representative Oakar, Representative Matsui, Representative Marlenee, Representative Staggers, Representative Waxman, Representative Ford (Michigan), Representative Watkins, Representative Rahall, Representative Vander Jagt, Representative Coyne, Representative Dornan, Representative Gaydos, Representative Brooks, Representative Wise, Representative Moakley, Representative Lagomarsino, Representative Fauntroy, Representative Rinaldo, and Representative Gunderson.

Representative Vento, Representative Wolf, Representative Roe, Representative Horton, Representative Rudd, Representative Roberts, Representative McGrath, Representative Boxer, Representative Bevill, Representative Walgren, Representative Kennelly, Representative Yatron, Representative Rose, Representative Bedell, Representative Hughes, Representative Petri, Representative Lloyd, Representative Mikulski, Representative de la Garza, and Representative Wyden.

Representative McCandless, Representative Derrick, Representative Ackerman, Representative Sunia, Representative Fish, Representative Ireland, Representative Mack, Representative Sikorski, Representative Dymally, Representative MacKay, Representative Florio, Representative Mrazek, Representative Sabo, Representative Gilman, Representative Volkmer, Representative Fazio, Representative Martinez, Representative Scheuer, Representative Lott, and Representative Kildee.

Representative Mollohan, Representative DeWine, Representative Jeffords, Representative Blaz, Representative Mavroules, Representative Rangel, Representative Addabbo, Representative Schroeder, Representative Bustamante, Representative Murphy, Representative Gekas, Representative Russo, Representative Purcell, Representative Hartnett, Representative Bilirakis, Representative Badham, and Representative de Lugo.●

VOLUNTEERING IN GOVERNMENT ACT OF 1985

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. EDWARDS of Oklahoma. Mr. Speaker, today I have introduced the Volunteering in Government Act of 1985, a bill to open more doors of opportunity for volunteers in the United States. I am excited about the prospect of creating a thriving volunteer work force within the Federal Government.

Currently, Federal law prohibits the acceptance of volunteer services by the Federal Government, except in specifically exempted agencies such as the National Forest Service and the Federal Emergency Management Administration. This antiquated law, approved at the turn of the century, has been allowed to obstruct the volunteer spirit for too long.

No reasonable explanation exists to deny people the opportunity to volunteer in Federal programs, as long as their service is needed, their tasks are appropriate for voluntary action and protections exist for Federal employees. All three of these safeguards are expressed within the language of the Volunteering in Government Act.

The Volunteering in Government Act affords all executive agencies of the Federal Government permission to accept volunteer services. The bill limits the amount of funds which can be expended on behalf of these programs and also encourages agencies to consider voluntarism when awarding grants to private organizations.

While we all know that volunteers run fire departments and fold bandages at the Red Cross, we perhaps did not know that they also conduct research, provide financial counseling, tutor the young and the disabled, assist with health examinations, and operate computers. Volunteers consist of attorneys, doctors, construction workers, teachers, artists, housewives, college students, retirees—a general cross-section of American society.

By approving the Volunteering in Government Act, Congress will make it possible for these and other Americans to contribute their time and talents on behalf of others through programs administered by the Federal Government.

I urge my colleagues to support the Volunteering in Government Act of 1985.●

LOYOLA UNIVERSITY OF CHICAGO RAMBLERS

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. LIPINSKI. Mr. Speaker, now that one of the most memorable NCAA basketball tournaments has been captured by a Cinderella basketball team, I rise today to recognize another Cinderella team—the Loyola University of Chicago Ramblers. While operating in the crowded Chicago sports market often dominated by the shadow of the DePaul Blue Demons and the venerable Ray Meyer, the team captured the hearts and the imagination of Chicagoans everywhere by completing one of the school's most successful seasons.

Coach Gene Sullivan, despite operating on a shoestring budget, put together one of this Nation's most prolific scoring machines of the 1984–85 season. In posting a final record of 27–6, this team was comprised of many Chicago public league players who were overlooked by the Nation's top-college recruiters. Noted for their run and shoot style of play, the Ramblers bested such perennial powerhouses as Illinois, Louisville, and SMU. They also won bragging rights in the windy city by defeating the DePaul Blue Demons in an exciting, emotional contest.

The team was led by consensus third team All-American Alfredrick "The Great" Hughes, who was second in the Nation in scoring with a 26.3-points-per-game average. Alfredrick finished his collegiate career at Loyola as the fifth leading scorer in NCAA basketball history with 2,914 career points. Senior Andre Battle, a graduate of Chicago Simeon High School, also completed his collegiate career at Loyola by averaging over 20 points per game and being named "Honorable Mention All-American" by the Associated Press. The team's sparkplug, 5 foot 9½ inch guard Carl Golston, hailing from Chicago Phillips High School, led the Nation in total assists with 305 and was second in assists per game at 9.2 per game. Carl was also named to the first team of the United Press International's "Small All-American" team.

Chicago Collins High School's Greg Williams provided the team with his great quickness and defensive ability at the off-guard position. Center Andre Moore showed his flexibility in playing out of his natural forward position but still holding his own on the glass often against taller and more physical players, including SMU's Jon Konchak and Georgetown's Patrick Ewing. Also contributing to the Rambler's successful season were the performances off the bench of Mike Cenar, a graduate of Loyola Academy High School and Ivan Young, a graduate of Chicago Simeon High School.

This season was especially satisfying for Coach Gene Sullivan and his two assistants, Doug Bruno and Andre Wakefield. After being shunned by both the NCAA and NIT Tournament Selection Committees the past two seasons, Coach Sullivan proved his program's tournament worthiness by advancing to the semifinals of the Eastern Regional. Coach Sullivan's "gas tank" recruiting strategy of only concentrating on local talent within a 25-mile radius of the Loyola campus finally received the attention it deserves.

In conclusion Mr. Speaker, I want to extend my personal congratulations for the fine efforts and achievements of Coach Sullivan and his Loyola Ramblers. I am optimistic Loyola's basketball program will continue to provide the fans of Chicago with great excitement in the years to come. This team has truly embodied the spirit of the underdog, which was certainly the prevalent theme of this year's NCAA basketball tournament.●

A TRIBUTE TO MR. EDGAR BRIDGES, SR.

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. DOWDY of Mississippi. Mr. Speaker, I want to take this opportunity to extend my congratulations to Mr. Edgar Bridges, Sr. of Monticello, who has been elected Grand Master of the Most Worshipful Stringer Grand Lodge, Jurisdiction of Mississippi. Mr. Bridges originally took office on February 27, 1984 following the death of Mr. H.M. Thompson. He was elected again on December 3, 1984.

Mr. Bridges has an outstanding record of service to the community. He has served as president of the Lawrence County Education and Recreational Association, president of the Lawrence County Black Federation, superintendent of mission, Lawrence County Baptist Association, dean of the Lawrence County Extension Center of the Mississippi Baptist Seminary, and as a member of the board of trustees of McCullough High School in Monticello.

Among the many awards he has been honored with are outstanding contribution to Head Start for several years, life membership in the Mississippi State Conference, NAACP, and the Medgar Evers Award, southeast region, for outstanding leadership.

In addition, Mr. Bridges has served as chairman of the board of directors of Five County Child Development Program, deacon and treasurer of the Pearl River Valley Baptist Church, co-chairman of the home health agency, Lawrence County Hospital, and member of the board of directors and executive committee of the Southwest Planning and Development District.

I know that my colleagues here in Congress join me in extending congratulations and best wishes to a very dedicated Mason, Mr. Edgar Bridges, Sr.●

NICARAGUA DEBATE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. MILLER of California. Mr. Speaker, the attention of the Congress and the country will soon be riveted on the so-called Nicaragua debate. The President has made his position clear: The antigovernment Contras are peace-loving freedom fighters who deserve Amercian moral and financial support; the current Nicaraguan Government does not suit our interests; and the regime should be overthrown—by violent force, if need be.

Many of us may challenge Mr. Reagan's perception of reality in this particular instance.

We must avoid being pushed into a potentially perilous confrontation, one that could easily involve the introduction of U.S. troops and many, many more millions of dollars. It is only too easy to be lulled into that kind of a conflict, if we accept the rhetoric and ignore the facts. Glittering generalities, if repeated often enough, have a tendency to transcend reality; the results can be fatal.

One very thoughtful columnist who understands that danger is Richard Cohen. I urge my colleagues to carefully consider the following column, which he authored in the April 3, 1985, Washington Post.

[The article follows:]

[From the Washington Post, Apr. 3, 1985]

TELL ME NO "NICARAGUAS"

(By Richard Cohen)

Washington loathes the word lie. Instead, it prefers such imprecisions as "misspoke," "political rhetoric" or, in congressional testimony, "to the best of my recollection." In that spirit, let me propose a new word for a statement that is—ahem—at variance with the facts: a Nicaragua.

A recent "Nicaragua" was the president's charge that the Sandinistas were "using Stalin's tactic of gulag relocation. . . ." Stalin? The Gulag? What's this man talking about? The Sandinistas are moving people out of combat areas. That may or may not be a nice thing to do, but it is a long way from Josef Stalin and his prison system.

Similarly, the president stretched things a lot when he called the contras "our brothers" and "the moral equivalent of the Founding Fathers." A whopper of a "Nicaragua" there. Unless Washington, Jefferson

and the venerable Mr. Franklin did some raping on the way to Valley Forge, the contras are something less than their moral equivalent. In fact, they are a mostly peasant army created not by Nicaraguan dissidents, but by the CIA, and whose significant leaders are former officers of the brutal National Guard.

Still another "Nicaragua" is the repeated assertion that the Sandinista regime is ruthless and tyrannical. It is not by any means a democracy, and it may, in fact, be heading toward a communist dictatorship, but it is not there yet—not by a long shot. In fact, compared with El Salvador, Nicaragua has an admirable record on human rights. The Sandinistas do not drag people out of their homes and decapitate them in gullies.

Yet another "Nicaragua" is the canard that Nicaragua poses a military threat to its neighbors. In fact, Nicaragua's army of 40,000 is smaller than El Salvador's and not significantly larger, if the 20,000-man civilian militia is included. It has hardly any air force, and its tanks, Soviet-built T54s and 55s, are 25 to 30 years old—sitting ducks against modern anti-tank weapons or the repectable air forces of Honduras and El Salvador. Moreover, the Sandinistas must know that even a feint toward a neighboring state would bring the wrath of Reagan down on them. Talk about making his day!

So what's going on? Why is the president (and his Charlie McCarthy of a vice president) so exaggerating the fault and the capabilities of the Sandinistas and the attributes and vulnerabilities of their enemies? Why is the administration's rhetoric so out of proportion to the facts? In other words, why so many "Nicaraguas" about Nicaragua?

The answer is Cuba. It's the monkey on the administration's back. The creation of a communist state in our hemisphere is to Reagan's brand of conservatism what the treaty of Versailles was to a generation of Germans—a sellout and a humiliation. Reagan will not permit it to happen again, not again allow what he thinks is the inescapable nature of Marxism to be camouflaged by gains in literacy or health, declaration of peaceful intent, promises of an eventual democracy and the seemingly limitless ability of some Americans, particularly liberals, to be taken in by all this.

You may want to argue with some or all of that, but it is a legitimate enough theory. The trouble is, though, it's not what the president tells the American people. Instead, in the manner of a parent talking to a child, he dispenses with ambiguities and subtleties and even with the future tense. In rhetoric, he has created a Nicaragua that is already a Cuba and he treats it as such. He makes war against it, forces it to militarize and then cites that very militarization as evidence of aggressive designs. He plants mines in the harbors, sabateurs on land and then cries totalitarianism when the Sandinistas respond with a state of emergency.

Maybe in the end the president will be able to vindicate his own exaggerations. Given his actions and the proclivities of the Sandinastas, Nicaragua may well end up being another Cuba, and then we can all wonder who's to blame—the United States for its hostility or the Sandinistas for causing that hostility. In the meantime, though, Nicaragua is a long way from becoming a Cuba. To declare otherwise simply forecloses policy options—and hastens the day when a lie finally becomes the truth.●

THE TRADE DEFICIT

HON. TERRY L. BRUCE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. BRUCE. Mr. Speaker, our trade deficit continues to rise. Last year it was $123 billion; this year it may rise to $150 billion. The implications of this record-setting deficit are clear. The American workplace has shrunk by 2 million jobs since 1980; 57,000 of those jobs were in my home State of Illinois.

There are two things we must do here in Congress. First, we must make the hard choices necessary to reduce the budget deficit which is driving up our dollar and producing a flood of imports. The overvalued dollar puts the equivalent of a 30-percent tax on every items the United States exports.

Second, we must work to ensure that where our products are competitive, foreign markets are open to them. Given that we have a $37 billion trade deficit with Japan, removing the voluntary restraint agreements which kept Japan's share of the American automobile market to around 20 percent is not good policy. "Free trade" is a popular term, but we will not produce free trade merely by laying our markets wide open to foreign competitors. Free trade involves reciprocity, and we should not permit the Japanese to exploit the U.S. auto market without lessening the restrictions they place on highly competitive American products such as telecommunications equipment, wood products, medical equipment, and some agricultural commodities.

By ending the voluntary restraint agreements, the United States stands to lose another 110,000 jobs by 1987. The Department of Commerce has said that several of the 10 plants in the United States which assemble small cars could close if Japan picks up another 10 percent of the small car market. One of these plants is located in Illinois, which already has double-digit unemployment.

The American economy cannot stand continued strain of this sort. I urge my colleagues to support legislation such as House Concurrent Resolution 93, which would permit Japan to increase its auto exports to the United States gradually if it at the same time increases its imports of U.S. agricultural and industrial products. This kind of reasoned approach offers incentives for the Japanese and jobs for Americans. Coupling a balanced trade policy with a strong attack on the budget deficit will help maintain America's long-term prosperity.●

EXTENDING FEDERAL SUPPLEMENTAL COMPENSATION

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. BORSKI. Mr. Speaker, I rise on behalf of many long-term jobless workers facing the loss of unemployment benefits.

Two days ago, we approved a bill to continue benefits for those already on the Federal supplemental compensation [FSC] rolls, allowing them to receive the full number of weeks of payments to which they are entitled under the expiring law. Unfortunately, because benefits last no more than 14 weeks, this will mean an end to the current FSC Program by early July.

This bill is little more than a Band-Aid approach to solving our country's unemployment problem. We need a revised and permanent plan to aid those suffering from the deterioration of industrial America.

Despite the economic recovery being experienced across the country, unemployment remains at persistently high levels. There are currently 8.9 million unemployed workers looking for jobs, and 1.4 million of these have been looking for work for more than 6 months. Another 1.3 million jobless fall into the "discouraged worker" category—people who are so discouraged about the prospects of finding jobs that they have given up looking, and are thus not counted among the officially unemployed.

The extension of unemployment benefits is especially important for industrial States with high unemployment, such as Pennsylvania. Last year in my State, 499,000 workers were classified as unemployed. Only California and New York, States which have the highest numbers of people in the work force, have more unemployed workers than Pennsylvania. Additionally, many unaccounted long-term jobless reside in my State.

While I supported the bipartisan measure to extend FSC benefits because it will provide a life raft for hundreds of thousands of unemployed workers faced with the immediate loss of benefits, I do not believe we have gone far enough in addressing the long-term unemployment picture. As one of our colleagues put it: "This is not the very most we can do. It is the least we can do."

For precisely this reason, I am hopeful that in the coming months Congress will work to permanently reform our unemployment system so that benefits will continue to be available to meet the needs of our unemployed in times of high unemployment.●

DR. MARTIN LUTHER KING, JR.

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. LELAND. Mr. Speaker, today, April 4, marks the 17th anniversary of the death of Martin Luther King, Jr., an American who actively sought to remind us that justice and equality are the cornerstones of American democracy. An American whose thirst for justice and whose strength of will exemplified the best qualities of the American spirit.

We here in the U.S. Congress, designated with the responsibility of preserving and protecting the rights of the American people, can use the words and philosophies of Dr. King to guide us in our legislative duties. The issues we contemplate here are grave. Should we allocate funds to develop more weapons for our defense? Should we finance the civil wars of foreign countries?

If we vote yes to purchase more weapons, then how many weapons is enough? If we vote yes to participate in another country's civil war, which side do we support?

Dr. King, with all his brilliance, gave us a guideline to use to answer questions such as these. He said:

> The ultimate test of a man is not where he stands on positions of comfort and convenience but where he stands on positions of challenge and controversy. So on some questions cowardice asks, "Is a position safe?" Expediency asks, "Is a position politic?" Vanity asks, "Is the position popular?" But conscience asks, "Is the position right?"

My fellow colleagues, I challenge you to make decisions on what is right. On the anniversary of this great man's death, let's reacquaint ourselves with his philosophy and renew our commitment to decide issues on the side of morality, human consciousness, and justice.●

PERSONAL EXPLANATION

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. COUGHLIN. Mr. Speaker, I rise to explain my absence from the Chamber the evening of April 2, 1985. I was meeting with the Prime Minister of Turkey and my pager did not sound.

Had I been present in the Chamber, I would have recorded my votes as follows:

Roll No. 43: Motion to suspend and pass H.R. 1373, designating Point Reyes National Seashore Wilderness as the Phillip Burton Wilderness Area. I would have voted "yea."

Roll No. 44: Motion to suspend and pass H.R. 1869, repealing contemporaneous recordkeeping requirements added by Tax Reform Act of 1984. I would have voted "yea."

Roll No. 45: Motion to suspend and pass House Concurrent Resolution 107, expressing the sense of Congress that the President take action relating to trade deficit and unfair trade practices of Japan. I would have voted "yea."●

PERSONAL EXPLANATION

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. ORTIZ. Mr. Speaker, on Tuesday, April 2, 1985, and Wednesday, April 3, 1985, I was unable to be present and voting. My presence was required in my Corpus Christi District Office due to an issue of significant economic impact on the 27th Congressional District of Texas.

Several important votes were taken in my absence. If I had been able to cast my vote on these issues, I would have voted in the following manner:

Rollcall No. 40, on approving the Journal, "yea."

Rollcall No. 42, H.R. 1239, supplemental appropriations for African famine relief, "yea."

Rollcall No. 43, H.R. 1373, designating the Philip Burton Wilderness Area, "yea."

Rollcall No. 44, H.R. 1869, repeal of contemporaneous recordkeeing requirements of the Internal Revenue Code, "yea."

Rollcall No. 45, House Concurrent Resolution 107, relating to the U.S. trade deficit and the unfair international trade practices of Japan, "yea."

Rollcall No. 46, on approving the Journal, "yea."

Rollcall No. 48, the Walker substitute to the Meyers amendment to H.R. 1714, NASA authorization, "yea."

Rollcall No. 49, Walker amendment to H.R. 1714, NASA authorization, "nay."

Rollcall No. 50, Morrison amendment to H.R. 1714, NASA authorization, "yea."

Rollcall No. 51, on passage of H.R. 1714, NASA authorization for fiscal year 1986, "yea."●

IN SUPPORT OF THE AFGHAN PEOPLE

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. CONTE. Mr. Speaker, Thursday, March 21, 1985, people remembered and honored a country which is being murdered bit by bit and piece by piece. This country has never been a threat to its neighbors; it has never had expansionist ambitions; and it has never concerned itself with the internal workings of other nations. In the past, those who tried to conquer this land and its people, despite military and organizational superiority, found that they could not control a people who loved freedom so deeply. Today, as we speak in this building which represents freedom for so many around the world, the Soviet Union is trying to crush and murder a people who refuse to die without a fierce and valiant struggle.

Earlier this year, I joined some of my House and Senate colleagues in forming the Congressional Task Force on Afghanistan. The purpose of the task force is to help focus attention and heighten public awareness on the human tragedy which is Afghanistan. The time has come for a public debate on this issue. To date the task force has held three hearings dealing with the humanitarian situation in Afghanistan. The picture painted by these hearings can be described in one word: grim.

For over 5 years the Afghan people, the Pushtuns, Tajiks, Uzbeks, Turkmen, and several other tribes, have withstood a harsh and brutal occupation. Let us not delude ourselves, however, into thinking that just because the freedom fighters have fought the Soviet forces to a standstill that they are winning this war. They are not, and this is due mainly to a policy instituted by the Soviet Union which some have termed "migratory genocide." Reports abound of crops bombed and burned, orchards destroyed, villages razed, and livestock killed. The Soviets appear not to care whether the people stay in Afghanistan or leave their homeland for Pakistan. The message that they are sending is clear: fall under our domination or suffer the consequences. Many of the people, however, would rather tend their fields at night by lantern light than leave the land of their ancestors. Because the Kabul government will not allow international relief agencies to operate within Afghanistan, alternative ways of providing humanitarian assistance to the people still inside Afghanistan must be found. At the same time we must not forget those who have been forced out of Afghanistan. There are over 3 million refugees in Pakistan, and we must continue to assist the Pakistani authorities and worldwide relief agencies in aiding them.

Five years of oppression by the Soviets have made one thing clear; they are in Afghanistan for the long haul. They are undertaking a massive program of Sovietization. They rob the cream of the Afghan youth, and take them into the Soviet Union to train them in their own fashion. Soldiers,

professors, teachers, and political people are indoctrinated in the Soviet Union, and then sent back to Afghanistan. It is all part of a Soviet policy of killing the individuality and culture of the Afghan people, and substituting it with one more palatable to their own.

The Karmal government and its Soviet masters have demonstrated a complete disregard for human rights. Human rights abuses are so brutal and numerous that Amnesty International has targeted Afghanistan in its anti-torture campaign. Amnesty International has reported the use of various forms of torture by the Afghan Secret Police. Beatings, electric shocks, solitary confinement, filthy prison conditions, and other forms of torture too ghastly to mention are frequent occurrences. As a recent Washington Post article stated, "These are the facts in Afghanistan. It is necessary for everyone to know them."

These are the facts, and the time is long overdue for a heightened public debate on the situation in Afghanistan and an assessment of an appropriate U.S. role. The very life and identity of a nation are at stake.●

FAIR TREATMENT FOR STEPPARENTS AND CHILDREN UNDER AFDC

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. FRANK. Mr. Speaker, I introduced a bill today to correct the injustices done to stepparents living with dependent children eligible for aid to families with dependent children assistance [AFDC] created by budget cuts contained in the Omnibus Budget Reconciliation Act of 1981. In 1981 the Reagan administration succeeded in passing budget cuts in the AFDC Program which now require that the income of a stepparent living with a dependent child be considered in determining the child's eligibility for AFDC. My bill would not consider such income in determining AFDC assistance for children and stepparents already living together on September 30, 1981. I think it is unfair to disrupt the budget of essentially poor families, which are delicately balanced.

I think we must consider the legal duties of stepparents to children living in their household, when reviewing the appropriateness of the 1981 AFDC budget cuts. Unless a stepparent adopts the child of their spouse, they have no legal duty to support such a child. A child has a right of financial support from his or her parents, whether they be birth parents or adoptive parents, but not from stepparents. The 1981 Budget Act disregards the laws on child support and reaches for the nearest pocket. It does not consider if the stepparents already have a legal duty to support children living or not living with them. Children in the end will loose by this attempt to save a few dollars on domestic spending. Children will not receive the support from AFDC and have not legal rights to demand support from their stepparents. I am sure that in most cases these families will try to make up for the loss of AFDC, but such families have little discretionary money. AFDC assistance is important to the welfare of children not able to receive adequate financial support from their parents. I think parents, if they are financially able, must be made to financially support their children, and I commend the Congress' work last session of passing legislation to assist with the enforcement of child support. I think counting the income of stepparents to deny children AFDC assistance is injust. I am asking my colleagues to join me in correcting this problem and restore fairness to families already living together when the AFDC budget cuts were enacted.●

HAITI: RIGHTS DENIED

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. TOWNS. Mr. Speaker, the House Foreign Affairs Committee recently reported out the foreign aid authorization bill for fiscal year 1986. The committee rightfully retained the Certification for Haiti in the legislation. The current human rights situation has been marred by a series of arrests in November and December 1984 of people who were associated with agricultural and community development organizations and church groups. These 30 or so Haitians were held without charge until this February when the Government of Haiti revealed that 23 of those detained in November would be tried together for conspiracy against the internal security of the Haitian state. To date, no trial date has been set.

These actions suggest that the Government of Haiti is conducting business as usual—the intimidation of any forces for positive social change. The arrests in late 1984 are the most serious crackdown on development workers since the 1980 arrest and expulsion of independent press and human rights monitors. The Department of State's Country Report for 1984 supports the contention that basic freedoms continue to be denied by law and in practice. The report states clearly that "constitutionally guaranteed freedoms, such as freedom of speech, press, and association, are in practice effectively restricted by other legislation and laws. Due process guarantees relating to judicial procedures are often not respected."

A synopsis of the current human rights situation is described in a recent report to the United Nations Commission on Human Rights by the National Coalition for Haitian Refugees, Americas Watch and the Lawyers Committee on International Human Rights. The report is entitled "Haiti: Rights Denied, A Report on Human Rights in Haiti in 1984." I have included the conclusions of this report for my colleagues' review. An examination of these conclusions, as well as the report itself, clearly indicate that the certification process should be maintained for Haiti.

HAITI: RIGHTS DENIED—A REPORT ON HUMAN RIGHTS IN HAITI IN 1984

CONCLUSIONS

1. Haitian security forces continue to detain without charge or explanation persons perceived to be opponents of the current President-for-Life, Jean Claude Duvalier. Detainees are held incommunicado and are often severely beaten during interrogation by security force officials.

2. In 1984 the Haitian government engaged in the most pronounced campaign of intimidation since the November 1980 crackdown on independent journalists, human rights advocates, lawyers, politicians and trade union officials. In November and December 1984 the security forces detained without explanation or charge approximately 35 persons, primarily church and community development workers. Many were held incommunicado and no trial dates have been announced, although it appears that some 16 of these persons may be brought to trial for "conspiracy against the internal security of the Haitian state."

3. Throughout 1984 independent human rights monitors continued to be subjected to considerable harassment by Haitian security forces. A National Commission on Human Rights was created by the Haitian government, but has failed to take any action or position that is even mildly independent or critical of the government. By its own admissions the Commission will not act on "political cases," cases involving "national security," or other cases of "immediate importance to the government."

4. The Haitian government continues to effectively suppress political opposition. A 1984 communique indefinitely banned political parties and other "political groupings," and the activities of the Haitian Christian Democratic Party and the Haitian Social Christian Party were subject to increased harassment and intimidation.

5. Freedom of the press in Haiti has been significantly curtailed through the Press Laws of 1979 and 1980 and through state security legislation. In 1984 censorship and other restrictions were increased through a communique ordering the suspension of all newspapers and periodicals that were not approved in advance by the government. Haiti's few remaining independent editors were detained by the security police in 1984 without explanation and one was injured during interrogation by secret police officials.●

REAGAN BUDGET CONTINUES TO DENIGRATE FEDERAL WORKERS, RETIREES

HON. JAMES J. HOWARD
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. HOWARD. Mr. Speaker, several weeks ago, a number of my colleagues on the Federal Government Service Task Force discussed the administration's budget proposals affecting Federal employees and retirees. I would like to take this opportunity to add my voice to those who have already publicly denounced these proposals.

Over the past 3 years, I have heard from hundreds of Federal workers and retirees who reside in my district regarding proposals to reduce their benefits. When looking at the proposals recommended by the Reagan administration over this period of time, one can certainly justify their concern.

Fortunately, the Congress has had the wisdom to reject the majority of these proposals. Now don't get me wrong. Federal employees and retirees have made their sacrifices during the past 3 years. Despite the fact that Federal workers trail their private-sector counterparts in pay by a substantial amount, cost-of-living adjustments [COLA's] have been postponed and reduced. For retirees living on a fixed income, COLA's have been delayed and curtailed. Employees and retirees have seen the cost of health insurance increase, while benefits have been slashed. Federal employees have also been subjected to a new Medicare tax. Certainly, no one can argue that the civil servant has not sacrificed.

With the deficit still in record proportions and knowing of the attitude this administration has toward the civil servant, it is not surprising to see the Reagan administration again attempt to lower the deficit on the backs of the Federal worker and retiree.

However, unlike previous recommendations, the administration has offered a new proposal—one which would reduce pay for civil servants by 5 percent. Although this proposal is so ludicrous that it should not even be seriously considered, I think it is necessary to discuss the pay cut to further illustrate the contempt this administration has for Federal workers.

Mr. Speaker, only once has the Federal Government asked its workers to take a pay cut. That was during the Great Depression. Requesting something that was done only during the Great Depression seems to contradict all of the happy talk we have been hearing from this administration over the last year regarding economic recovery. Try explaining economic recovery to a Federal worker after he has had his pay cut 5 percent.

I wonder if President Reagan, David Stockman, or Donald Devine realize that Federal employees are the only group of employees in the U.S. labor force whose real earnings have not increased since 1982. If they don't realize this fact, then they should. However, if they are aware of this fact and yet they still make this recommendation, it further illustrates the belief of many that this administration views Federal workers as second-class citizens.

I would like to make one final point regarding the proposed pay cut. There is no question that the Federal worker is an easy target. Sadly, many people have the view that Federal workers are lazy and very overpaid. It is unfortunate that the Office of Personnel Management has perpetuated this myth by using phony statistics such as quit rates. But just for one moment, I think we should look at a typical Federal worker and what this pay cut really means.

A single mother in my district who works at Fort Monmouth making $15,007 would take home approximately $950 per month. After she pays $300 rent and $100 in utilities for her modest apartment, she is left with $550. After you subtract insurance and child care, she is left with $375 a month for clothing and food. If the administration gets the 5 percent pay cut it requested, she will be left with only $317—under $80 a week for clothing and food for herself and her 6 year-old son. This does not include transportation expenses or any out-of-pocket health expenditures. In addition, if you take the entire President's budget, then you would also have to figure in an increase in her retirement contribution of another 2 percent. Certainly, this person cannot afford to have your budget adopted, Mr. Reagan.

This is just not one isolated case and the numbers I have used are very conservative. I am told that approximately 30 percent of the employees at Fort Monmouth fall within the lower grades. In addition, a 5-percent pay cut would also drain the Long Branch-Asbury Park area of $8.3 million.

Of course, Mr. Speaker, the general feeling is that the administration is really seeking to freeze the COLA for Federal workers. With 4-percent inflation, a freeze is not a freeze, it is an actual cut of 4 percent. And remember, Federal workers are already trailing their private-sector counterparts in pay by 7 to 18 percent.

Freezing the COLA is also unfair to the Federal retiree. These persons, living on a fixed income, are experiencing increases in medical costs, utilities, and food. A freeze is unfair unless you also talk about freezing these other costs. However, as we all know, the President's budget would require senior citizens to pay even more for health care.

The final budgetary item I would like to address is the proposal to raise the retirement age from 55 to 65. My constituents tell me that they started working for the Federal Government 20 years ago not because of tremendous salaries—they were just as far behind then as they are today—but because of the retirement program. To change the rules, after one has faithfully worked for the Government for a number of years would be morally wrong. Mr. Speaker, the Civil Service Retirement Program is a contract this Government took out with its employees. We must not break this contract.

Mr. Speaker, I simply want to state again that this assault on the pay and benefits of Federal workers and retirees must cease. It is in our national interests to have a government made up of competent working men and women. Whether it be the dedicated person working for the FBI, the Defense Department, or the person processing Social Security checks, or risking his life at the Drug Enforcement Agency, this Government cannot afford to employ anything but the best and the brightest.●

THE COPPER INDUSTRY

HON. JIM KOLBE
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. KOLBE. Mr. Speaker, I am introducing today a resolution that would abolish the compensatory financing facility of the International Monetary Fund. A recent study has again brought to our attention the dire condition of the U.S. copper industry. The Western Economic Analysis Center has released a study which shows that in 1 year alone, 1983, and in one State alone, Arizona, copper producers have lost over $100 million. Table 1 gives a complete breakdown of this costly loss.

The domestic copper industry is in serious trouble because foreign copper producers, most of which are located in lesser developed countries and most of which are controlled by the various governments, are flooding the market with cheap copper. Why are they doing this? Because the CIPEC countries such as Chile, Peru, Zambia, and Zaire all rely heavily on copper exports as a source of foreign exchange. The more copper they produce, the more money they get.

The irony of this situation is that much of this foreign copper production has been funded by U.S. money through loans by the International Monetary Fund. Between 1975 and 1983, the IMF has loaned $4.4 billion to Chile, Peru, Zambia, and Zaire.

Thirty-eight percent of the current loans are made through the compensatory financing facility. Although the Fund does not loan money for specific projects, it has had the effect of stimulating copper production. Because of their dependence on copper exports as a source of revenues necessary to pay off the IMF loans, CIPEC countries have responded by increasing copper production. This has caused an oversupply of copper in the marketplace and a severe fall in the price of copper. This in turn causes them to produce even more copper to maintain the same total revenues necessary to pay off the loans.

Privately owned U.S. companies have responded to harsh economic times by restricting production and improving operating efficiencies. The U.S. industry continues to be the most efficient miner of copper ore in the world. But this has not been nearly enough to compete with copper produced by foreign governments. An article in last Saturday's Washington Post vividly described the situation that exists in the Southwest where a number of mines have reduced production or closed, and thousands of former copper workers are unemployed. I am enclosing that article because it contains one of the best descriptions of the conditions that the domestic copper industry and the thousands who depend on it for their livelihood are facing. We must take steps to remedy this deplorable situation.

The compensatory financing facility was created to assist Fund members in weathering temporary falls in commodity prices that were beyond their control. It now plays an integral part in causing the fall of those same commodity prices. I urge my colleagues to join me in the support of this resolution and eliminate the compensatory financing facility.

The table and article follows:

TABLE 1.—*The distribution of copper industry income directly to the Arizona Economy, 1983*

Industry sales of	$1,295,685,000
Provided: Personal income for Arizonans of	415,220,000
Including:	
Wages and salaries for Arizona workers of	372,892,000
Dividends to Arizona stockholders of	1,353,000
Transfer payments to Arizona residents of	40,975,000
Sales for other Arizona businesses of	507,137,000
Including sales to copper producers by:	
Wholesalers of	169,293,000
Public utilities of	141,760,000
Manufacturing firms of	100,336,000
Service businesses of	28,304,000
Transportation firms of	25,274,000
Construction contractors of	23,016,000
All other types of businesses of	19,154,000
State and local government revenues of	81,480,000
Including amounts for:	
Public Schools and Junior Colleges of	37,480,000
Counties, Cities, and Towns of	21,319,000
The State of Arizona of	22,556,000
Special District Governments of	125,000
With a net result for the Arizona economy of a total direct contribution of	1,003,837,000
But to do this, copper producers had to make expenditures outside of Arizona of	392,810,000
To cover:	
Out-of-State business expenses of	356,560,000
Federal income and payroll taxes of	26,102,000
Dividends to non-Arizona investors of	10,148,000
Resulting in a net loss for Arizona copper producers of	100,962,000

Source: Western Economic Analysis Center.

COPPER INDUSTRY LANGUISHES IN THE ECONOMIC PITS—MINING HURT BY COMPETITION, AIR STANDARDS

(By Paul Taylor)

MORENCI, ARIZ.—This is where copper is coming a cropper.

The great open pit copper mines of Arizona, New Mexico and Utah, world-dominant for most of this century, are mired in a three-year depression.

It has halved mining employment, idled 16 of the nation's 28 largest mines, triggered the longest strike in industry history (21 months and counting here at Phelps Dodge's mile-wide Morenci mine), generated net industry operating losses of nearly $3 billion since 1981 despite a 29 percent reduction in per-ton production costs and set off a round of almost panic-stricken divestitures by the same oil companies that went on a cash-happy shopping spree for copper mines in the 1970s.

This week, Phelps Dodge announced that its smelter in Ajo will close April 4, laying off 200 workers. Prognoses for the survival of the industry as a whole—from whose vivid, sometimes violent, history could be chronicled the taming of the American Southwest—range from dire to dour.

Copper is not the only afflicted metal in this country.

Lead producers have been stung by the unleading of gasoline; the great iron ore mines of Minnesota's Mesabi Range have been losing a generation-long battle with low-cost imports; gold and silver prices have gone soft, and aluminum producers have been hurt by the high cost of power, which they use abundantly in smelting.

Nationwide, metals mining employment dropped from 109,000 in 1981 to 44,800 last year.

But the $2.4 billion copper industry is the largest metal miner and, at the moment, the most crippled. And it is mined in a sparsely populated, politically vulnerable part of the country, reducing prospects for a congressional bailout.

Copper's humiliation has come at the hands of a rougue's gallery of economic and social forces that mugged a swath of Smokestack America throughout the 1980s.

This lineup includes: low-wage third World competitors that have been overproducing (and driving the world copper price to Depression-era depths) to raise the money their countries need to pay off international loans financed, in part, by U.S. taxpayers; federal clean air standards that have forced the industry to spend—and often misspend—hundreds of millions of dollars on antipollution processes that have added to cost but not productivity, and a strong dollar that has devoured export markets as voraciously as it has sucked in copper imports.

Besides these generic causes of U.S. deindustrialization, there is a another problem specific to copper.

Most of the known high-grade copper ore in this country has been mined. The grade or copper content of the ore in the gargantuan Chuquicamata mine in Chile, which has become the Saudi Arabia of copper, is twice that of a typical U.S. mine, and the ore grades in Zaire's nationalized mines are more than five times the U.S. average.

Given these multiple ills, the copper debate will bump into some hard questions. Are old-line "dirty" industries like copper worth saving? If so, are they capable of salvation? Or, sooner or later are they bound to be done in by broad forces of economic change?

In the darkest hours of auto and steel, such questions were not entertained seriously. At stake were too many jobs, too much national security, too expansive an economic ripple.

"The next 12 to 18 months will decide whether there's going to be a domestic copper industry," said Bruce Wright, administrative aid to Rep. Morris K. Udall (D-Ariz.), who earlier this month introduced a rescue bill in Congress.

"The only difference between us and the industries that get bailed out," said Carl J. Forstram, plant manager of the Phelps Dodge mine here, "is that we don't have the votes in Congress."

Udall's bill, introduced on behalf of the new congressional Copper Caucus, would provide a five-year "recovery window" by negotiating production limits for foreign competitors. (Under the legislation, competitors that refused to live within the limits would have tariffs slapped on their exports to the United States).

IMPORT QUOTAS URGED

Prospects for passage are not good. There are 23,000 jobs left in copper mining and smelting, a fraction of the auto and steel payroll. Moreover, the copper fabricating industry—which buys refined copper from U.S. and overseas producers—employs five times as many workers as the mines.

Last year, after the International Trade Commission found that unfair foreign competition had hurt the American copper producers, the fabricators opposed ITC recommendations for tariffs or quotas, fearing that either approach would create a two-tier pricing structure—one U.S. price and a lower world price—that would place them at a competitive disadvantage.

The Reagan administration sided with the fabricators. "It was a political year, and in a

political year, you count heads," said Robert Wardell, president of the Copper and Brass Fabricators Council. "We had 125,000 jobs, the producers 25,000."

"It's not just the politics of it," said Don Phillips of the Office of the U.S. Trade Representative, which turned down the ITC request. "If, by imposing tariffs, you are going to lose more jobs in fabrication than you save in mining, that's a legitimate economic consideration."

If the jobs argument alone cannot carry the day for the mines, Udall and others say defense considerations should.

Copper is used in everything from ammunition casing to battlefield communications lines to engine parts. The nation experienced copper shortages during each of its last three wars; the shortages were deemed so serious that in the late 1960s the federal government, through the Defense Production Act, helped finance the development of several large private mines.

Copper is one of 61 commodities designated by Congress as part of the National Defense Stockpile, but as of 1984, the government had filled only 3 percent of its target stockpile of 1 million short tons of copper. The industry has been clamoring for additional reserve purchases in this, its hour of need, but government experts say that, given the current world oversupply of copper, there are more pressing purchasing priorities.

"The national security danger is that this is an industry that can't be turned on and off like a faucet," said C.J. Hansen, president of the Arizona Mining Association. "Once you close mines, you tend to lose them."

Industry leaders believe that is what Chile is banking on. They say that Chilean overproduction—which they describe as a deliberate strategy of selling two pounds of copper at 50 cent a pound rather than one pound at $1—amounts to a predatory "squeeze play" designed to drive high-cost U.S. producers under.

Chile can make a profit on low-price copper; the U.S. producers, whose costs are 50 percent higher, cannot. Already the U.S. share of the world market has dropped from 50 to 13 percent over the past two generations.

Domestic copper producers are enraged that the Chilean copper industry has been aided by loans from the International Monetary Fund and World Bank granted in what J. Hugh Leidke, chairman of the Pennzoil Co. (which recently put its copper subsidiary, Duval Corp., up for sale), calls a "global Ponzi game" to ensure that developing countries will have the revenue to pay off earlier loans.

Most parties to the copper debate agree that the domestic industry has legitimate gripes. But one school holds that, even so, any rescue effort would only postpone the inevitable.

"Let's face it, what's happening with copper is what we are supposed to want to happen," said Robert Horton, director of the Interior Department's Bureau of Mines. "The developing countries are in fact developing. No government can stand in the way of long-term trends for very long."

Even Arizona Gov. Bruce E. Babbitt has been muted in his calls for federal help. "The governor realizes that copper's heyday has come and gone," said Jim West, Babbitt's press secretary. ". . . He doesn't want to raise hopes that will only be dashed later. He's more interested in economic diversification."

UNION MOVE BLUNTED

Behind the cold-eyed assessment of economic history, there is a human and intensely poignant side to the decline of a "company-town" industry.

Copper is the source of the genteel wealth of the Hearsts and the Guggenheims, but its history is that of a rugged, Wild West industry, pioneered by prospectors who spilled as much blood fending off each other as they did fighting the Apache.

Because copper deposits were so remote, mining companies built company towns to attract and hold a stable work force. Labor relations in such towns have ranged from violent to imperial to benign; one historian has likened them to imperial Britain's mercantilistic outposts, with their rigid social and economic strata.

Seventy years ago, the Industrial Workers of the World ("wobblies") tried to establish a foothold in the copper towns. But in 1917, in one of the infamous episodes of U.S. labor history, 1,250 workers and IWW sympathizers at Phelps Dodge's Bisbee, Ariz., mine were rounded up by a sheriff's posse on orders from Phelps Dodge officials and set by train to a town in New Mexico with a warning never to return.

The labor movement in the copper mines never has been the same, nor has management ever been quite so heavy-handed. Company towns like the one here grew into little mountaintop oases of the good life: palm trees, manicured lawns, good schools, plenty of hunting and fishing, all set in the stark beauty of the southern Rockies.

By 1983, when the current Phelps Dodge strike began, workers here were getting wage and benefit packages worth an average of $36,000 a year. "As an industry, we had gotten fat, dumb and happy," Hansen said.

Most of the Phelps Dodge workers grew up as second- or third-generation miners; the whole town had the quality of a extended—and fairly happy—family. Race relations among Hispanics, Anglos and Indians were good, on the whole.

"It was a pretty good life, no question," said Angel Rodriguez, head of United Steel Workers Local 616, the largest of 13 unions that used to represent 2,000 workers here.

A BRUTAL, BITTER STRIKE

It came unglued July 1, 1983. Other copper companies had agreed that spring to a pattern contract that involved a wage freeze; Phelps Dodge also wanted to eliminate cost-of-living adjustments and extract some other concessions. When the unions went on strike, the company decided to keep the mine open, which it was able to in the critical first days only with the help of National Guard units mobilized by Babbitt.

It has been a brutal, bitter strike. There have been no deaths, but vandalism in Morenci is in the $250,000 range, company officials say; comparable damage has been done in Ajo, Douglas and other Phelps Dodge towns.

Brother has been set against brother, friend against friend, father against son as miners have made the agonizing choice between working and striking. About half the jobs at the mine are filled by ex-union members who crossed their own picket lines.

The strike has been a disaster for the unions. Phelps Dodge has been able to operate; it says that it even set production records last fall. New workers' wage scales have been cut by one-third, and all 13 unions were kicked out last fall in a decertification vote that is still being appealed. Workers at other mines in Arizona, fearful for their jobs, are decertifying their unions as well.

Nearly 21 months after the strike began, strikers and "scabs" still wave ritual obscene gestures at one another each afternoon at the shift change, but the strike long since has been lost.

"I'm just sort of hanging around to see how the [appeal of the] decertification vote comes out," said Janner Nessler, a striking filter helper. Most of his fellow strikers long ago drifted away to Tucson or Phoenix or Stafford, leaving behind not just their jobs, but also their roots, their homes, their relations.

Even with the cost-cutting and union-busting, the Phelps Dodge mine here may not be able to make it. In January the company had to close its Morenci smelter into which it had poured $90 million in an effort, ultimately futile, to comply with an Environmental Protection Agency consent decree.

"In hindsight, they would have been better tearing the smelter down and starting from scratch," Hansen said. "They tried for an innovative approach to pollution control, and they could never get it to work."

Phelps Dodge is not the only company to miscalculate antipollution strategy. The Duval Corp. spent millions developing a state-of-the-art hydrometallurgical smelting system that does not foul the air but has proven too costly to operate.

When the Phelps Dodge smelter here closed, it meant laying off permanently 600 workers, some of whom were the very ex-union members who had estranged themselves from their families by choosing to work. Officials said the Ajo smelter, the town's only industry, could reopen if copper prices rise.

JAPANESE FIRMS BUY IN

Phelps Dodge, Arizona's largest copper producer and the nation's second largest (behind Kennecott), lost $267.8 million in 1984. The most optimistic reading of its future is uncertain. And if a miracle rescue comes, it may come from a strange corner of the globe.

Earlier this year the Sumitomo Corp., a Japanese trading company, signed a letter of intent to purchase 25 to 40 percent of the Morenci mine. Sumitomo is following the footsteps of the Mitsubishi Corp., which in 1980 became a one-third owner of Kennecott's Chino Mines in New Mexico.

Japan is a copper importer, and its modern, post-World War II smelters, which are low in pollution, are always hungry for more ore concentrate. the company apparently plans to ship the concentrate—which is 25 percent copper—across the ocean from Morenci and smelt it in Japan.

If that happens, the mine here would serve a function commonly associated with those in the Third World as a supplier of a raw metal to an industrial power that would smelt it, fabricate it and sell it on the world market.

A circle, of sorts, would be closed in Morenci. The world's first and foremost industrial giant, unable to compete with the developing nations, would become one.

"The Japanese are our best hope," said J.D. Ferrin, an instrument repairer who moved here with his wife and three children a few months after the strike began because the pay was 50 percent better than he could make anywhere else.

"I can't imagine them sinking a lot of money in here and not giving it a good try," he said.

MAJOR COPPER-PRODUCING COUNTRIES IN 1983

Country	Metric tons	Percent of free world total	Percent of domestic production capacity
Chile	1,245,000	20.4	100
United States	1,046,000	17.1	59
Canada	625,000	10.2	73
Zambia	514,000	8.4	100

JOB CORPS PROGRAM VITAL TO OUR YOUTH

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. DOWDY of Mississippi. Mr. Speaker, this administration has recommended that the Job Corps Program be eliminated. As a representative of a State that has benefited a great deal from this important program, I cannot urge too strongly that the Congress oppose such an unwise move.

In Mississippi we have three Job Corps centers: at Crystal Springs, Batesville, and Gulfport. I visited the center in Crystal Springs recently and was greatly impressed by the services and help being extended to our young people.

Mississippi is a poor State. We are struggling to improve the standard of living and the level of education of all of our citizens. We are trying to attract industry to expand our economic base. The Job Corps is a major help in these pursuits. It has allowed many young people who have dropped out of school or who never have had the opportunity to attend school to learn skills necessary for today's competitive job market. To cut the program now would immeasurably harm the progress we have been able to make.

We are all concerned with the deficit, but cutting Job Corps does not further our long-term goals of a balanced budget. The economy as a whole is better served and the level of Government revenues is increased when we provide training and employment for all of our citizens. An unproductive citizen carries a much higher cost to Government than what we are expending on the Job Corps Program.

It is also pertinent that Job Corps has won such widespread support throughout the State of Mississippi. I have received hundreds of letters from students, workers, employers, and elected officials all urging that the Job Corps Program be continued. I think this is a measure of the effectiveness of the program.

The Job Corps Program is a vital investment in our Nation's future. We cannot afford to discontinue it now.●

SDI BUDGET REVEALS NEGATIVE IMPACT ON ABM TREATY

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 4, 1985

● Mr. FASCELL. Mr. Speaker, in keeping with the House Foreign Affairs Committee's oversight of the national security and defense policy of this administration, the Subcommittee on Arms Control, which I chair, will continue the series of hearings it began last Congress in an effort to monitor and evaluate the arms control, technical feasibility, and budgetary implications of the administration's strategic defense initiative [SDI].

In this light, I have requested the administration to provide the committee with the budget history and the projected budget for ballistic missile defense/strategic defense programs through fiscal year 1987.

The budget figures that follow outline selected Army, Navy, Air Force, DARPA [Defense Advanced Research Projects Agency] and DNA [Defense Nuclear Agency] ballistic missile defense/strategic defense programs from fiscal year 1962 through fiscal year 1987. The figures were compiled by the Office of the Assistant Secretary of Defense for the Comptroller.

Previously unavailable, these figures provide in unprecedented detail the past, current, and future budget status of ballistic missile defense and strategic defense programs.

Of particular note are the figures listed for the SDI. The administration is requesting funds for the initial development in fiscal year 1986 of several programs for actual demonstration in the late 1980's, early 1990's. Based on subcommittee hearings to date, there is growing concern that such demonstrations are inconsistent with the ABM treaty and could, therefore, result in violation of that important arms control agreement. This will remain an area of ongoing examination by my Arms Control Subcommittee in its series of hearings on "Arms Control in Space" in the 99th Congress.

Finally, it would be useful if the administration would be forthcoming with the unclassified report it was required by law to submit to the Congress on March 15. The administration is required to provide an analysis of SDI programs and their impact on the ABM treaty. Such a report would be of use to this committee and others in evaluating what the budget figures mean as well as their policy implications.

HOUSE OF REPRESENTATIVES—*Monday, April 15, 1985*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore [Mr. WRIGHT].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
April 4, 1985.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Monday, April 15, 1985.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The heavens declare Your glory, O God, the beauty of the Earth reminds of Your renewing presence. As You give new life to Your creation, so renew us with a desire to seek those things that make for justice and love in our lives and in our world. May Your gracious spirit keep us in Your grace now and evermore. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On March 8, 1985:

H.J. Res. 50. Joint resolution designating the week beginning March 3, 1985, as "Women's History Week."

On March 13, 1985:

H.R. 1251. An act to apportion funds for construction of the National System of Interstate and Defense Highways for fiscal years 1985 and 1986 and substitute highway and transit projects for fiscal years 1984 and 1985.

On March 15, 1985:

H.R. 1093. An act to give effect to the Treaty Between the Government of the United States of America and the Government of Canada Concerning Pacific Salmon, signed at Ottawa, January 28, 1985.

On March 22, 1985:

H.J. Res. 85. Joint resolution to designate the week of March 24, 1985, through March 30, 1985, as "National Skin Cancer Prevention and Detection Week".

On April 3, 1985:

H.J. Res. 134. Joint resolution authorizing and requesting the President to designate the week of March 10 through 16, 1985, as "National Employ-the-Older-Worker Week".

On April 4, 1985:

H.R. 1239. An act making urgent supplemental appropriations for the fiscal year ending September 30, 1985, for emergency famine relief and recovery in Africa, and for other purposes;

H.R. 1866. An act to phase out the Federal supplemental compensation program;

H.J. Res. 121. Joint resolution to designate the month of April 1985 as "National Child Abuse Prevention Month";

H.J. Res. 160. Joint resolution designating March 22, 1985, as "National Energy Education Day";

H.J. Res. 181. Joint resolution to approve the obligation and availability of prior year unobligated balances made available for fiscal year 1985 for the procurement of additional operational MX missiles; and

H.J. Res. 186. Joint resolution designating April 2, 1985, as "Education Day, U.S.A."

On April 14, 1985:

H.J. Res. 74. Joint resolution designating September 8 through 14, 1985, as "National Independent Retail Grocer Week."

NEW TAX POLICIES MUST PUT FAMILIES FIRST

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, during the 98th Congress, I introduced a bill that would have increased the amount of the deduction allowed for personal exemptions from $1,000 to $2,600. I did so because of clear evidence that families with children were suffering because of tax policies which had increased the average tax rates for a couple with two children 43 percent since 1960 and 223 percent for a couple with four children. Working poor families were most severely impacted by the effects of the 1981 tax act which failed to make adjustments for inflation for the tax provisions most important to families—the personal exemption, the standard deduction—zero bracket amount—and the earned income tax credit. As a result, a family of four at the poverty line which paid $462 in taxes in 1980 was required to pay $1,079 in 1984.

Hopefully, this Congress will move forward on the various tax simplification measures before it and come to an agreement on a bill which will be fair and workable for all taxpayers. Though I believe in a comprehensive approach to tax reform, I am reintroducing my bill to increase the deduction for personal exemptions from $1,000 to $2,600. I am doing so to highlight that it is the one deduction in the Tax Code which benefits all families, and is, as my colleague Mr. COATS has said, "the family exemption." I am doing so to say to those of my colleagues who are willing to deal down this exemption from the levels presently proposed in the major bills—all of the bills are inadequate. Don't be misled by those who call for small reductions in the proposals in order to use the amounts saved to continue loopholes for the corporations. While a reduction of as little as $100 from the proposals may indeed give us $5 billion to play with, such an approach is unconscionable. Big business had its "Corporate Welfare Act" in the guise of the 1981 Tax Act and the inequities of that act visited upon families should be rectified by this Congress, not compounded.

The family exemption should be set at a level that bears some relation to its purpose. The $2,600 figure represents what the exemption approximately would be if it had been indexed since 1948, when it was $600. I must point out that the actual cost of raising a child is far in excess of this amount. Statistics of the U.S. Department of Agriculture indicate that in 1984, it cost an average of $4,794 to raise a child at a moderate standard of living in an urban north central area of the country.

I ask my colleagues who believe, as I do, that any change in tax policy should put families first, to join with me in supporting a realistic and fair increase in the personal and dependent exemptions.

ADDRESS AT STANFORD UNIVERSITY: ALTERNATIVE TO WAR IN CENTRAL AMERICA

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, during the recess I was privileged to be invited to address the Latin American Studies School at Stanford University in Palo Alto, CA. My subject was,

"U.S. Policy in Central America: An Alternative to War."

Mr. Speaker, it is clear that a military solution in Central America is not a permanent solution to the problems there. While the United States possesses the military might to destroy Nicaragua or, for that matter, any nation in the Western Hemisphere, militarism as a U.S. policy in Central America does not address the problems of poverty, disease, malnutrition, social injustice, and political corruption.

A long-term solution requires a policy that addresses the aspirations of the people of the region. A return to the military dictatorships of the past ignores the problems and prolongs the conflict.

The address follows:

U.S. POLICY IN CENTRAL AMERICA: AN ALTERNATIVE TO WAR

(Address by Hon. William Alexander)

Dr. Wirth, Ladies and Gentlemen, before the end of the month, Congress will vote on a request by President Reagan for $14 million in aid for the guerrilla army fighting to overthrow the government of Nicaragua. While the amount of the aid request may seem relatively insignificant, this vote is in reality a vote on the overall direction of American foreign policy in Latin America for well into the next decade.

During a recent trip to Central America, I had dinner with one of Mr. Reagan's most ideological ambassadors. At one point I asked him what Latin America would look like if the Reagan Administration were 100 percent successful in pursuing its foreign policy objectives. What kind of society . . . what kind of an economy . . . what kind of government would we see in that part of the world if Mr. Reagan's vision became a reality.

The Ambassador thought for a moment—almost as if he had never even considered the question—and he said, "Congressman, it would be like things were down here in the 1950's—commerce was flourishing, the people loved and respected Americans, and there was a general sense of contentment with things."

After spending most of my life in or around politics, I am not astounded at anything very often. But this response was astounding.

To me it seems that it was the social and economic condition in Latin America in the 1950's that gave rise to the political upheaval of the 1960's and 1970's. The vestiges of that period are still having their impact today. The 50's were years marked by extraordinary repression and deprivation for most Latin peoples. There was rampant poverty and disease for most, while economic prosperity and political power resided in the hands of a relative handful of fortunate families.

The governments of these nations could be described variously as "tin horn dictatorships" and "banana republics . . ." most bought and paid for through outside forces—mostly in the United States.

For many years, we in this country enjoyed a comfortable, paternalistic relationship with these nations. However, slowly we began to see a threat to that relationship spawned by a growing restlessness. We Americans saw a threat to our security in Latin America—and we focused our fears on the appearance of Marxism.

It would be easy to let the story end there. It would be far more simple to adopt the view—as has been adopted by the Reagan Administration—that Marxism is the cause of all evil in Central and South America . . . and if we could just contain that movement all would be right again.

That is a convenient view but not one firmly rooted in reality.

Latin America—and especially those nations in Central America—is a series of unique nations undergoing an inevitable transition. In every one of those countries there is a process underway in which an old order is failing, and a new order is coming to power.

In Central America the symbol of this process of transition is Nicaragua. Somoza and his loyalists stayed well beyond their time, lost touch with the public, undercut the moderate opposition, allowed the center to be destroyed, and created conditions that permitted revolution by extremists to dominate the opposition. When Somoza ultimately fled, there was no popular-based moderate force to fill the void.

Other nations in Central America are undergoing a similar process of change. The traditional alliances between the landed oligarchy, political elites and military commanders are encountering greater and greater difficulty in controlling events.

The questions are what new alliances and systems will take over, whether they will be consistent with the interests and values of the United States, and what policies will best serve those interests and values under these conditions of change.

Basically, the nations of Central America are members of the Western rather than the Eastern world, and should be more open to Western than Eastern models. There is no reason that the United States cannot successfully help these nations along this course.

The challenge faced by the United States is to develop policies which carefully define and effectively protect U.S. national interests in the long term, and work comprehensively to support pluralistic and stable new structures in Central America.

Given the strategic and psychological importance of Central America to the United States, we must clearly define these goals and objectives.

The essential institutional requirements will differ somewhat from one nation to another, but will include:

1. Development of respect for the rule of law and human rights.

2. Creation of political institutions that allow and encourage citizen participation.

3. Emphasis on building up human resources through education, training and other means.

4. Development of region-wide cooperation.

The most practical way to achieve U.S. objectives is to help Central American nations deal with one another, and to help them solve internal problems through negotiations rather than militarism and violence. We should support change through democratization and peace through diplomacy, seeking a region-wide system of economic cooperation and open trading markets.

Progressive policy-makers in this country must realize that monolithic communism in Latin America has failed. Cuba is a virtual economic client state of the Eastern bloc countries.

The real enemies of the United States' interests in Latin America are disease, hunger and poverty. These are the forces that could well defeat our most well-intentioned initiative.

Last Thursday afternoon, President Reagan was doing what he does best as he stood before a national television audience and attempted to sell a peace plan. The President argued his case for increasing aid to the guerrillas in Nicaragua by conjuring up a world view completely at odds with reality. He recast the situation in Central America in such a way as to argue that—in Orwell's words—"war is peace."

Mr. Reagan reiterated his support for peace and democracy in Central America. He repeated his opposition to the spread of communism. . . and I speak for all in my party when I applaud these goals.

Unfortunately, we cannot support the means by which the President hopes to achieve these goals. His thinking is rooted deep in the world of the 1950's. Instead of providing an incentive for peace, his proposal is an invitation to greater violence and a further step away from the processes of change taking place in Latin America today.

There is nothing new in what the President said last week. The essential realities remain the same. The President wants Congress to give its approval to his war against the Nicaraguan government. It is a new face on an old horror.

This new proposal for negotiations is a very sophisticated subterfuge. Do not be fooled . . . it is a ploy . . . a ploy designed to give Mr. Reagan what he wants, and that is official sanction from Congress to fight a war in Nicaragua.

Mr. Reagan wants Congress to approve $14 million for the "Reaganistas," which he says will only be used initially for "humanitarian support." The leadership of the House has been advised that the Administration defines "humanitarian" as inclusive of trucks, uniforms and other logistical support short of actual guns and bullets.

Mr. Reagan says that only if the negotiations break down will he convert the so-called "humanitarian aid" to military assistance.

This proposal insults the intelligence of Members of Congress and the American people—under the Reagan plan, the Reaganistas are guaranteed $14 million if they walk away from the negotiating table! They have no incentive to try to achieve some sort of settlement. Clearly, Mr. Reagan developed this plan as a round-about way of getting his aid request through Congress—a request he was told by leaders of his own party on Wednesday ". . . was dead in the water."

Mr. Reagan would have Americans take their eyes off the ball. He would divert our attention away from the real issues. Mr. Reagan does not want peaceful solution in Nicaragua. He will not tolerate the presence of the Sandinistas in a government there. He is using a suggestion of peace to induce support for a policy of war.

The real question here is "Why is the United States involved militarily in Nicaragua in the first place?" Mr. Reagan has given us the answer time and time again—we are there to overthrow the Sandinista Government. Mr. Reagan has repeatedly said that he will not tolerate "another Cuba" in Latin America. On several occasions, including his speech last Thursday, he referred to the Sandinistas as thugs or murderers. Are we to believe that he has changed his position? That he is now willing to tolerate their continued presence there?

Mr. Reagan—in that speech last week—tried to pass himself off as the compassion-

ate peacemaker in a war which he has helped create. The Reaganistas army exists largely because Mr. Reagan has provided it with the means to fight a war of bedevilment against the Sandinista government. The Reaganistas are essentially an American mercenary army—and Mr. Reagan is asking the Congress and the American people to give their official support to that cause.

Mr. Reagan and his supporters suggest that gunboat diplomacy will bring democracy to Latin America. However, history does not support that conclusion. Instead, history demonstrates that democracy in Latin America has taken hold only when democratic structures offered real hope for coming to terms with poverty, disease and despair that plagues Latin societies. Mr. Reagan should understand that no amount of military aid, that no increase in arms will be big enough to make democracy work in Latin America. Our foreign policy in Latin America will only succeed when we align our objectives with those of the people of the region. Then there can be hope. Then there can be true progress.

Contrary to the claims of the President, U.S. policy in Central America is out of control—lacking in direction and substance. We are wasting millions upon millions of dollars, while needlessly placing at risk the lives of brave American soldiers along with countless other Latin civilians.

Mr. Reagan is transfixed by an antiquated view of Latin America, wholly inconsistent with modern realities. His policies make it more likely that we Americans will repeat the mistakes of the past than to learn from them. Gunboat diplomacy did not work in the 1950's—it is not likely to succeed today.

Is the United States going to fulfill the fear of Simon Bolivar, the George Washington of Latin America, who worried that:

"Los Estados Unidos paracen destinados . . . plagar a las Americas de miseriea e nombre de la libertad.

"The United States appears destined . . . to plague the Americas with misery in the name of freedom."

Or, are we going to provide the leadership which is the mark of a great nation?

I urge those in my party to look at the constructive, positive alternatives available to our nation. Mr. Reagan would have us resort to a policy which substitutes military action for diplomacy. I cannot endorse that. The opportunities for a comprehensive diplomatic settlement in Central America are real and available. Let us offer words of hope rather than threats of war.

To achieve a long term settlement in this region, I suggest the following:

1. The full force and power of the United States should be placed in support of the Contradora negotiations. There should remain no doubt in the minds of the leaders of the Contradora nations, and others throughout Latin America that the United States is taking every possible step and using all possible leverage in support of an end to the bloodshed through the use of diplomacy.

The example of President Bellisario Betancur of Colombia is important. Through diplomatic leadership, personal courage and good faith, President Bettancur has begun to bring peace to Colombia by negotiating with his opponents. The United States should fully support his efforts and other similar efforts, to negotiate an end to the region-wide violence.

2. The Administration should work with Congress in a bi-partisan effort to devise a significant foreign assistance program, directed toward the following objectives:

a. To support the creation or improvement of institutions designed to strengthen the administration of justice and the democratic process.

b. To improve education and training programs including projects within Central American nations and student exchange programs between those nations and the United States.

c. To improve local infrastructure (e.g., transportation) as an aid to economic development.

d. To improve local health care.

e. To support economic cooperation projects, movements toward inter-American economic integration, and a more open regional trading system.

f. To support local agricultural projects, and to promote export of American agricultural products.

g. To improve training of armed forces, respect for human rights by military personnel, and defensive military capabilities.

3. The Administration might approach friends and allies in Latin America and Europe to propose that the above program involve joint funding as part of an international "democratic initiative."

The policy stated above could be implemented by taking the following steps:

1. The United States should put its full force and power behind the Contradora initiative undertaken by Mexico, Panama, Colombia, and Venezuela.

2. The United States should offer to support, promote, or organize a general hemispheric peace conference, which would focus on the major disputed questions of the Americas, should the Contadora heads of state conclude that such a conference would contribute to the search for peace.

3. The United States should express a willingness to work with any nation, through Contadora, a hemispheric peace conference, or any other appropriate forum that professes an interest in pursuing non-violent solutions to the crises in Central America. The United States, working with and through the Contadora nations, should test the sincerity of claims by Cuban President Fidel Castro that he will take strong action in support of the Contadora process. U.S. policy towards Cuba should avoid the mistaken extremes of naive optimism or blind paranoia and instead should offer a willingness to pursue careful, realistic and tough-minded diplomacy in search of gradual lessening of U.S.-Cuban tensions.

In 1945 the Soviet Union emerged from World War II as a superpower in sole competition with the United states for influence among the developing nations. The Soviets were eager to demonstrate the merits of communism as an economic system. During the forty years that have elapsed, Marxism is failing and has succeeded only as a process of distribution, unable to compete with capitalism in production. Committed Marxists continue to flirt with the U.S. and the Western World:

The Peoples Republic of China (PRC) turned to the West in 1978, adapting capitalistic methods in order to increase productivity;

Cuba's Fidel Castro, a disciple of Marxism, describes the "China Model" as a goal for future Cuban-U.S. relations;

North Korea hints a coming to terms with South Korea in exchange for economic ties with the U.S. and Japan;

Vietnam increases its cooperation with the U.S. to discover and return MIA's lost in the conflict;

Ethiopia turns to the U.S. and Europe for food to relieve famine;

And, Mozambique and Angola look to the U.S. to broker deals with South Africa.

Indeed, the United States has a unique opportunity to lure Third World States away from the influence of the Soviet Union to the capitalist orbit. But, we must seize the initiative to take advantage of the oportunity that exists at this time to proposed change within the Kremlin.

Democratic capitalism can compete ideologically in the Third World with Marxist Communism. Militaristic competition between the U.S. and U.S.S.R. appears inevitable; however, armed conflict need not be a solution when dealing with Soviet client states. The success of capitalism as a superior system of productivity demonstrates that the Marxist ideology of the Soviet Union is not, per se, a threat to the United States.

The triumph of capitalism continues simultaneously with the tragic lessons learned by the failure of militarism. This week marks the tenth year of the defeat of militarism as a policy in Vietnam. We must develop a policy that is not rooted in the brute force of militarism but instead builds upon the success of capitalism.

"To live bravely by convictions in which the free peoples of this world can take heart, the American people must put their faith in stable, long range policies—political, economic, and military—programs that will not be heated and cooled with the brightening and waning of tension.

"The United States has matured to world leadership; it is time we steered by the stars, not by the lights of each passing ship." (General Omar Bradley, 1945)

President Reagan's position on Central America is not a policy—it is a tactic. Moreover, it is outmoded because of the heavy reliance upon militarism.

Most knowledgable observers agree that militarism is not a solution in Central America inasmuch as it does not address the problems of poverty, disease, malnutrition, social injustice and political corruption.

A long-term solution requires a long-term policy that addresses the aspirations of the people of the Central American region. A return to the military dicatorships of the past ignores the problems and prolongs the conflict. And, a U.S. policy is bound to fail which violates American traditions and values.

"In the great struggle against Communism, we must find our strength by developing and applying our own principles, not in abandoning them." (Walter Lippmann, 1962)

It is time to stop squandering billions of dollars; needlessly wasting lives, and alienating our allies; and to gain control of U.S. foreign policy in a positive and meaningful way that serves America's best interest—peace.

Thank you.

CAPTURED GRENADA COMMUNIST DOCUMENTS

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, I think the distinguished gentleman from Arkansas has, in a sense, correctly laid out one side of the story for Central America. Over the course of

the next few days, in a series of special orders, I hope to take a recent publication, "The Grenada Documents: An Overview and Selection," which is a study of some of the 35,000 pounds of Communist documentation that were captured when we liberated the island of Grenada.

I think by looking at the record of the actual Communist Government of Grenada and its relationships and then looking at the record we have so far of Nicaragua, it will become obvious just how Communist leaders think and how Communist governments behave, and since this is the historical record, I think we can begin to learn about precisely what it is that they are really doing and why they say one set of things while doing another.

So I think as a study in communism in the Western Hemisphere, the Grenada documents are well worth looking at before voting on Nicaragua.

EMPLOYMENT OPPORTUNITIES FOR DISABLED AMERICANS ACT

(Mr. BARTLETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTLETT. Mr. Speaker, today I, along with a number of other colleagues, introduced the Employment Opportunities for Disabled Americans Act.

This legislation, which is long overdue, would permanently authorize section 1619 of the Social Security Act and require a notification to disabled Americans that that amendment is available. It would also create two new demonstration programs at a very low cost to taxpayers to match disabled Americans who are seeking employment with jobs, and to demonstrate to employers techniques to retrain and to rehire their own disabled workers.

Mr. Speaker, in this country we estimate that there are approximately 16 percent of all disabled Americans who are employed, or an 84-percent unemployment rate. I am told and I believe it to be true that the No. 1 disincentive to full employment is the lack of availability of medical insurance for disabled Americans while they are employed.

This is significant legislation, and it is a first step to correct that lack of availability to lead to full employment for disabled Americans.

PRESIDENTIAL VISIT TO BITBERG CEMETERY REPREHENSIBLE

(Mr. YATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YATES. Mr. Speaker, the press reports that President Reagan proposes on his forthcoming trip to West Germany to visit the cemetery at Bitberg and to lay a wreath. Such a ceremony would be shocking to all Americans. The American Legion has already protested.

Buried in that cemetery are many of the Waffen SS soldiers, the contingent most responsible for carrying out Hitler's crusade to annihilate the Jewish people of Europe.

Particularly would such a visit be reprehensible when it is coupled with Mr. Reagan's announced determination not to visit Dachau or any concentration camp because, according to a Reagan assistant, it would revive guilt feelings that would be imposed on today's German population for the Holocaust.

Mr. Speaker, the President cannot sweep under the rug the horrible crimes that were committed against the Jewish people in the Holocaust, nor should he make the attempt. Later this week, pursuant to a resolution passed by both the House and the Senate, in the rotunda of the Capitol the Holocaust will be commemorated in the Days of Remembrance ceremony which has now became a national observance.

I trust, Mr. Speaker, that the President will revise his schedule to show a more realistic and sensitive portrayal of the views and ideals of the American people.

A TRIBUTE TO S. ROY WOODALL, SR.

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to and memory of a longtime friend and constituent of mine, Samuel Roy Woodall, Sr., of Paducah, KY, who died at the age of 81 on November 2, 1984.

A native of Crittenden County, KY, Roy Woodall lived in Paducah for 59 years. An outstanding citizen and well respected by his community, Roy was the former owner of Woodall & Melton Insurance Agency and worked in his insurance business for 50 years.

Roy Woodall was especially active in Paducah. He was on the first board of directors at Western Baptist Hospital, a noted hospital in Paducah. He was past president of the Paducah Lions Club and a member of the group for 50 years. In fact, in 1982 Roy Woodall was voted Outstanding Lion of the year by his fellow members.

His accomplishments continue. Roy was past president of the Paducah Chamber of Commerce and of the State Insurance Agencies in Kentucky. Indeed, he was certainly recognized by all Kentuckians for his concern and business expertise. A member of Immanuel Baptist Church in Paducah, he was deacon for 50 years as well. Roy was also proud to be a Kentucky Colonel.

He was a good citizen—a man who loved his country, his State, and his community. Obviously, this Member of Congress was fond of Roy Woodall and proud to recognize his many accomplishments.

In addition to his wife Louise—to whom Roy had been married for 57 years—Roy Woodall, Sr., is survived by his son Samuel Roy Woodall, Jr., of Atlanta, GA; a daughter, Phyllis Shelton of Flanders, NJ; three brothers, Howard Woodall, Dalton Woodall, both of Paducah, and C.A. Woodall, Jr., of Princeton, KY; one sister, Carrie Baldree of Frankfort, KY; five grandsons, one granddaugther, and several nieces and nephews.

My wife Carol and I extend our deepest sympathy to the family and friends of this outstanding western Kentuckian, Roy Woodall, Sr.

□ 1210

DISTRICT OF COLUMBIA BUDGET, FISCAL YEAR 1986—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 99-51)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed.

(For message, see proceedings of the Senate of today, Monday, April 15, 1985.)

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, I was unable to be present the evening of Tuesday, April 2, 1985, when, after 7:20 p.m., there were three votes at unexpected times in the House. The first bill, H.R. 1373, passed by a vote of 342 to 69 and was roll No. 43. Had I been present, I would have voted "aye."

The second vote was on the question of suspending the rules and passing the bill, H.R. 1869, which passed by a vote of 412 to 1 and was roll No. 44. Had I been present, I would have voted "aye."

House Concurrent Resolution 107 expressed the sense of Congress that the President take action relating to the trade deficit and unfair trade practices of Japan and passed by a vote of 394 to 19. This was roll No. 45. Had I been present, I would have voted "aye."

On April 3, 1985, I was unable to be present for the Chair's approval of the

Journal; that passed by a vote of 246 to 155 and was roll No. 46. Had I been present, I would have voted "aye."

On the evening of April 3, 1985, at 8 p.m., there was a vote on the passage of H.R. 1714, a bill to authorize appropriations to the National Aeronautics and Space Administration, roll No. 51. The vote was 395 to 3. I was unable to be present at the time of the unexpected final vote. Had I been present, I would have voted "aye."●

LESSIONS FROM GRENADA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, today, in the first of a series of special orders, I am going to take up the "Grenada Documents: An Overview and Selection," a publication of the State Department of September 1984. This rather heavy blue book, which has several hundred pages of documents from the Government of Grenada and the Communist Party of Grenada, represents the first time we have ever captured the entire basic bureaucracy of a Communist Party and a Communist government, and it has in it a number of very specific lessons that I think the people of the United States need to look at.

It was very striking this morning when Paul Harvey said that in politics, President Reagan's popularity rating, as measured by the Gallup pollsters, shows that 60 percent think he is doing a good job but only 20 percent are with him on Nicaragua. At the same time, when you look here in the House and you listen to well-reasoned and well-intentioned Members of Congress who do not agree with the President on Nicaragua, you have to ask yourself, why is there such a vast difference between the President's general approval and general understanding in this one area? Is it a situation where he is wrong, or is it a situation where he may be well informed but for some reason, in a very un-Reagan-like manner, has not been able to articulate clearly what is going on?

I suggest that we are in the last stages in which American foreign policy, partially because of Vietnam and partially because of the McCarthyism period in the 1950's, has seen a very powerful segment of the American Nation with an ostrichlike view of what is happening in the world; that is, very important, very intelligent people were committed to a belief about the way the world worked that is simply wrong but to which they were also very deeply committed not to learn about, almost, if you will, ostriches who first hide their heads in the sand in reality and then have amnesia when in fact lessons are developed.

There can be a lot of arguments about past American relationships with Communist states, but I think in this case we are looking at the case of Grenada and what it teaches us about another Western Hemisphere Communist government, that of Nicaragua.

As a former history teacher, I hope that every Member of the House will, first of all, get a copy of the Grenada Documents. It is available from the State Department. I hope that every library in America will someday have a copy of this volume. In addition, I hope they will look at one particular speech from the Grenada Documents and compare it with one speech by a Nicaraguan Communist, Commandante Baryardo Arce, a secret speech which was given in 1984. Now, Arce's speech is available in a small document from the State Department, as is the original copy of Maurice Bishop's secret speech. Both have been published, both are available to the public, to libraries, and to Members of Congress.

Maurice Bishop was chairman of the Central Committee, and on Monday, September 13, 1982, he talked to the Grenadian Communist Party. The speech was called "The Line of March for the Party," a speech presented by Comrade Maurice Bishop, Chairman of the Central Committee. It is a fascinating document. It basically walks through, step by step, what the Grenadian Communist Party was attempting to do. It is a 49-page-long speech, and obviously, even in a 1-hour special order, I am not going to be able to put the whole speech in. Furthermore, large parts of the speech relate to the local situation at that time in Grenada.

But what is important is to recognize that Maurice Bishop, in speaking secretly, was clearly a Communist, thought of himself as a Communist and thought of himself as leading a Communist Party. Let me give you some examples.

He said on page 7:

> It requires a serious Marxist-Leninist vanguard party leading, guiding, and directing the whole process.

He goes on to say on page 8:

> Obviously if we are speaking of building socialism, and we are, then it is clear that our objective as Marxist-Leninists must be in the first instance to construct socialism as rapidly and as scientifically as possible.

Again on pages 14 and 15, he goes on to say that "it is only under the leadership of the working class led by a Marxist-Leninist vanguard party."

Now, Americans listening to this might ask, what does all this stuff mean? Why all these terms like "Marxist-Leninist" and "vanguard party"? The important thing for Americans to understand is that Lenin, the founder of the Bolshevik Party, which now dominates the Soviet Union, was an intellectual. He used words for very deliberate reasons. He created the concept of a vanguard party to justify the dictatorship in which the Communists control the country.

Let me quote again from Maurice Bishop in Grenada. On page 15, he said:

> The essence of that political aspect is the dictatorship of the working people, the dictatorship of rule of the working people. That is the essence.

Now, in the Soviet Communist jargon, a "dictatorship of the working people" in fact becomes a secret police state, a state in which the secret police dominates everybody else and in which you can go to jail without any recourse to law and in which there are no elections.

□ 1220

I will come back to that, but I want to emphasize that clearly when you read the Grenada Documents, when you look at this volume of documents which were captured when we liberated the island of Grenada, that the Communist Government of Grenada was committed to becoming a dictatorship in which a secret policy would dominate.

Let me carry this a stage further in Maurice Bishop's secret speech. Why, Bishop asks in effect, why if we are going to be Communist, do we have to have all these other people participate in government?

This is what he said and I think this applies absolutely, directly, to Nicaragua and the Nicaraguan experience. From page 17:

> Within the first few hours of taking power, we tried to build an alliance and we began to build that alliance for two main reasons. First, to hold on to power in the first few seconds, minutes, hours, days, and weeks; and the second reason was to defeat imperialism in the months and years thereafter, because defeating imperialism is a complex process that requires a political orientation.

In other words, in the classic manner suggested by Lenin, when the Grenadian Communists took power, they deliberately set up a common front, allowed a few businessmen to participate so that the Americans would think that it really was not a Comunist dictatorship.

What was happening in fact behind the scenes? All this applies very directly to Nicaragua, where there is today a Communist dictatorship which is systematically lying to the United States and lying to the American people. What did Maurice Bishop say in his secret speech to the Grenadian Communists? He said on page 17 again: "It was the party and the party alone that took power."

Let me repeat that: "It was the party and the party alone that took power."

He goes on to say: "There was no alliance with any upper petty bourgeoisie or any national bourgeoisie on seizing power."

He goes on to say: "We took power on its own, but NJM"—that is the Communist party of Grenada—"then decided correctly that an alliance was needed to hold power."

In other words, the only reason they are allowing anybody but Communists into the government in the beginning stages is to deceive the United States so that they could lie to the Americans and say, "Oh, we really aren't just Communists. We have a lot of people in this popular government."

But let us go on again to say, what does Maurice Bishop, the Communist leader of Grenada say, in this period? On page 18:

"It is very significant, Comrades, that from the start, from the very first second of the Grenada revolution (let us say 4:30 a.m. on March 13, 1979), from the very first second of the Grenada revolution, what was established was a dictatorship of the entire working people in its operationalization, in its initial concretetisation. It took the form of the anti-Gairy poor and working people; in other words, those people who were opposed to Gairy were the ones who appeared to be in the vanguard, and that is true. They were in the vanguard; but right from the start the effective dictatorship was not only of the anti-Gairy working people, it was a dictatorship of the entire working people.

Now, what is that saying in Communist doctrine? Bishop is saying that from the very second they seized power, they were determined to establish a Communist secret police dictatorship.

What is the parallel in Nicaragua? The fact is that the FSLN, the Nicaraguan Communist Party, from the very day it seized power was dedicated to establishing a Communist dictatorship in Nicaragua.

Let me carry on, because it is very important to recognize how they did that. When he talks about setting up the alliance, this is how Bishop explains the Grenadian Communists setting up an alliance, from his secret speech on page 19:

This was done deliberately so that imperialism won't get too excited and would say, "Well, they have some nice fellows in that thing. Everything all right, and as a result wouldn't think about sending in troops."

In other words, the Grenadian Communists guided by the Soviets and the Cubans deliberately set up a phony front in order to kid the Americans so that the Americans at that time under Jimmy Carter would say, "Oh, gosh,"—and let me quote what he said. This is Bishop describing the United States: "Well, they have some nice fellows in that thing. Everything all right."

In other words, the Grenadian Communists were confident, based on their Cuban and Soviet advice, that we, as a country, we Americans, are so gullible, so naive, so eager to be taken in, that as long as they had a handful of people at the front of the government, they could fool us as to the real nature of their government.

Again, this is not some conservative analyst. This is the actual secret speech which we captured of the Communist dictator explaining to the Communist members of his party in a secret meeting what they were doing, and you can apply it directly to Nicaragua. All of the nice, naive church groups that come in talking about "the Sandinistas," they are talking about Communists. All the people who go down there and are given a sincere show where they will walk around and they are shown only the people the dictatorship wants them to see, they are shown only the situation the dictatorship wants them to have.

Once again, the ability of the American left to become an ostrich, the ability of the American left to hide from reality, is being counted on by the Communists as the best way of insuring that they can establish a military dictatorship of Communist style with secret police in Nicaragua.

Now, why did they do this? Well, Bishop goes on to say that the reason they put up a phony front was because they knew if they were openly Communist, they would be deposed. Here is what he says, from page 19 of the secret speech:

That was the mistake, for example, the comrades in Gambia made a few months ago. Remember the Gambia coup d'etat a few months ago? What was the first thing those comrades did? They say, "We are Marxist-Leninists and we have just had a Marxist-Leninist revolution and we go wipe out the bourgeoisie." The same day they overthrew them, the same day, they did not even give them three days. So fortunately, NJM had a little more sense than that, and like I said, comrades, the first 14 names were bourgeoisie, big capitalists, petty bourgeoisie, middle capitalists, peasantry and professional middle strata. That is who made up the people's revolutionary government. It is only after about a week and a half, if I recall correctly, when we held the party general meeting in Radio Free Grenada's studio, and some comrades here would have been present at that meeting, that we finally got around to pooling some more party comrades. You all remember that meeting down in Radio Free Grenada's studio. It was then we chose nine more comrades to make up the 23, but the first set of names were Lyden Pam Buxo, Norris Bain, Lloyd Noel, and so on. That is what I mean by saying that the alliance began from the first few hours, from the first few days. That alliance was and is extremely important. From our point of view, comrades, why do we need the alliance? We need the alliance, firstly, as we pointed out already, to hold power in the first few days and weeks. We need the alliance, secondly, to consolidate and build the revolution and to insure the defeat of imperialism. This time we can't do this effectively without the alliance.

Now, what is the Communist leader of Grenada saying on these two pages of his secret speech? He is saying that they form a phony alliance to deceive the United States in order to buy time to consolidate their power, to establish a secret police state. This is exactly the pattern used by Castro in 1959 and 1960. It is exactly the pattern being used today in Nicaragua and it is exactly the pattern which was described by Lenin in the 1920's.

Let me go on to say that there is absolute contempt for the West, for the left, for the United States on the part of Communists. Listen to Maurice Bishop again secretly telling his own comrades how they are setting up a Communist dictatorship, on page 23:

Part of the reason we can form the alliance with them is because of their own low level of class consciousness. Therefore, they don't really fully understand what it is we are doing. It comes over in a million things they say from time to time. They are not really sure. They are still hoping that what we are building is not Socialist, but as one of them puts it, Socialist-Capitalism or Capitalist-Socialism, whatever that means; so there is that area of confusion; but comrades, a few more words in the nature of the alliance that we have with these sections. First of all, it is important to us to understand that the alliance we have gives full, total, complete control to the party and the working people. The party and the working people have hegemony. A monopoly will mean total power. Hegemony will mean total control and that is the distinction we are drawing between hegemony and monopoly; but there is absolutely no doubt that we have a hegemonic control on power and over all the capital areas of the state.

□ 1230

In other words, what the Communist dictator of Grenada was saying is, we can lie to the businessmen because they are so gullible and so foolish they will accept our lies. But the fact is that the Communists have absolute control.

In fact, he goes on to quote on page 23:

If you look at the party and the Cabinet and you analyze them carefully, you will discover an over-90-percent control by the party of the ruling council.

In other words, behind the phony front set up to deceive the Americans, the Communists in Grenada controlled 90 percent of what was going on.

Let us apply that to Nicaragua. The fact is that in Nicaragua, the Communist Party has established a Communist dictatorship and is lying to us just as cheerfully as the Communists did in Grenada.

He goes on to say, to reassure his friends about the dictatorship they are establishing:

Look at the composition of our army and militia. We don't have any upper or petit bourgeoisie or bourgeoisie in our army or militia. When you look at the officers in the army it is working class comrades or petit-bourgeoisie revolutionary democrats or Communists who are the officers in the

army. That's the situation in our army. Thirdly, comrades, consider our zonal Councils and Workers' Councils and so on. The bourgeoisie is not invited deliberately and consciously, so they don't have the opportunity to come and try to confuse people inside the councils. When we're having a zonal council in this building or workers' parish council, we send out the invitations, we decide who we want to invite, and we leave the bourgeoisie out deliberately and consciously.

In other words, the Communists in Grenada deliberately set up a system where the average person on the surface could think that there was an open government but every method of controls, the army, the militia, the government, the neighborhood councils, were totally controlled by Communists in a deliberate and systematic manner.

He goes on to say, "There is no doubt about it; what we have is hegemony; we have full control."

Now, for people who talk about legality and they tell us about how concerned they are about American legality, and they tell us all their concerns for Nicaragua, listen to what the Communist dictator of Grenada said about the law:

Just consider, comrades, how laws are made in this country. Laws are made in this country when cabinet agrees and when I sign a document on behalf of cabinet. And then that is what everybody in the country, like it or don't like it, has to follow. Or consider how people get detained in this country. We don't go and call for no votes. You get detained when I sign an order after discussing it with the National Security Committee of the Party or with a higher Party body. Once I sign it, like it or don't like it, it's up the hill for them.

Up the hill was a reference to where the prison was on top of a hill.

What is in this secret document from Grenada? What is the Communist dictator saying about how they operate? It is very simple.

They have a small, secret committee of Communist members who decide who to arrest, when to arrest them, where to send them, and what happens to them. And, as he says, and it is a wonderful line: "We don't go and call for no votes. You get detained when I sign an order."

In other words, when we say how free is Nicaragua, it is about as free as the Grenadian Communist dictatorship. It is about as free as Cuba. It is about as free as the Soviet Union.

Why do American tourists get this impression of a free country? Because the Communists deliberately set up a sort of a Disneyland. They designed an artificial world in which to fool the Americans, and when you get the secret documents from Grenada, and this is the secret document that we captured, and I keep reminding you this is an actual document from a Communist government captured when we liberated the island of Grenada, and what do we learn from studying the secret documents of the Communists? We learn that in fact they systematically dominate in secret and they know what they are doing.

Listen again to the Communist dictator of Grenada as he explains how they do it. This is on page 24:

It is also important to note, comrades, that while we are in an alliance with sections of the bourgeoisie and the upper petitbourgeoisie, they are not part of our dictatorship. They are not part of our rule and control—they are not part of it. We bring them in for what we want to bring them in for. They are not part of our dictatorship because when they try to hold public meetings and we don't want that, the masses shut down the meeting.

What is he saying here? This is exactly parallel to Nicaragua where when they tried to have honest democracy-loving free people campaign last year they used a system called divine mobs. The divine mob of Nicaragua is described by the Grenadian Communists as: "When they try to hold public meetings and we don't want that, the masses shut down the meeting." It is the very same pattern in the Grenadian Communist Party and in the Nicaraguan Communist Party.

He goes on to say:

When we want to hold zonal councils and we don't want them there, we keep them out. When they want to put out a newspaper and we don't want that, we close it down. When they want freedom of expression to attack the Government or to link up with the CIA and we don't want that, we crush them and jail them. They are not part of the dictatorship. In fact, if the truth is told, they have been repressed by the dictatorship. They have lost some of the rights they used to have.

In other words, what is this guy saying in the secret meeting? This Communist dictator is saying, "Look, if you don't believe in communism, you don't get to print a newspaper," which explains, for example, in Nicaragua, why La Prenza has been censored more by the Communists than it was in 28 years of the Somoza regime. They are saying if you are a free businessman and we don't like it, the phrase is pretty clear: "We crush them and jail them."

That is as true for the Grenadian Communist Party as it is true in Nicaragua.

Well, what should we say then when a Nicaraguan Communist comes to the United States and gets on television and says to Dan Rather: "Gosh, I don't really know that these things are going on"? What did Maurice Bishop say? He says, "We pretend we don't know what is happening." This is a direct quote from page 26 of the secret speech of the Communist dictatorship.

When you see Fidel Castro telling CBS News things that are clearly lies, what you need to know is he is lying, but what is so disturbing is that Dan Rather and CBS News are so totally uninformed about the nature of communism that they allow him to get away with his lies as though he is a reasonable man. It would be like interviewing Adolf Hitler and having him explain that there is no Auschwitz, and saying "Go ahead," and saying, "Gosh, Adolf Hitler assured us that he is not massacreing anybody."

We know that that is crazy, and I would suggest to you when you read the secret documents from Grenada which the Government of the United States has now published after having captured them when we liberated that island of Grenada, there is no excuse for not knowing when a Communist lies to you, that all you have is a lying Communist, that it has nothing to do with reality as we would describe it.

The point is all rights are not for them, all freedoms are not for them, but all rights and freedoms are now for the majority, who are no longer oppressed and repressed by a tiny minority. That is very important to understand because that is what dictatorship or rule means. That is how every state operates.

What is he saying here? You have to again understand Communist language. The Communist dictator of Grenada was saying in his secret meeting that the police state will oppress anybody it defines as not being part of the Communist Party.

He goes on to say: "It means control by the party."

Now, what is the nature of all of this? The nature of all of this is that Maurice Bishop is clearly and deliberately a Marxist-Leninist Communist; he was committed to the establishment of a Communist dictatorship in Grenada, and he saw himself as the active ally of the Soviet Union. He saw the United States as his enemy, and he saw his job to be the destruction of the United States. He felt that it was his job to work closely with the Soviet Union. He saw the Soviet Union as "the land of Lenin." He saw it as necessary to work with the Cubans and the Russians in order to establish what he called a Leninist vanguard party.

He was very committed to establishing, as he said, "Strengthening the Leninist character of the party."

He talked about "building the internal organization of the party."

Now, that is Communist language for establishing a police state. When you read his secret speech on page 49 you will see the term Lenin, Leninist, Marxist, Leninist, again and again and again, because he was, no matter what honest, well-meaning ostriches were saying in America, no matter what the leftwing of America thought he was saying, no matter what good, decent, church men and women would like to have believed, the fact was that the Communist dictator of Grenada knew he was a Communist, was determined to be a Communist, thought of himself as a Communist, was trained in

communism, worked with the Communist Governments of Cuba and the Soviet Union, and was establishing a Communist police state.

□ 1240

When did they start doing that? Was it in reaction to the Americans? You know the classic argument of the American left, of our liberal friends who are committed particularly in the Democratic Party but also a handful of Republicans, is also this notion that "Gosh, if only Ronald Reagan will be reasonable." You are going to hear in the next 2 weeks again and again left-wing ostriches get up and say, "We are scaring the Nicaraguans." Well, let us look at it: When did the Communist Party in Grenada decide that they had to become a Leninist secret police-dominated dictatorship? He says it was in April of 1974. In other words the Grenadian Communists, if you take the ostrich analysis of the world, the Grenadian Communists in 1974, when Ronald Reagan was Governor of California, knew that some day Ronald Reagan would become President and so they had to be a secret police dominated Leninist party; in April 1974 when they were not in power, when Ronald Reagan was in California as Governor. It was not in reaction to Ronald Reagan. It was because, and he is very clear about this and it is something that Americans have got to learn to understand, they tried to take power in 1984 and they failed and they sat down and here is how he said it happened: From pages 39 and 40:

After the defeat in January 1974, the party held its first major evaluation in April 1974 and we were then exactly one year and one month old. We spent a few days, a whole weekend looking at the party and trying to decide where we went wrong and what corrective action was needed. That is when we decided in theory and in principle that we should build a Leninist party. That decision was taken in April 1974 but in practice that decision was not implemented for many years. In fact it was a constant struggle within the party to get Leninist principles in practice and in a concrete way going. But it was always an uphill struggle, particularly on the need for collective study.

He goes on to say:

In the time period July 1977 to August 1978, the party did make a qualitative leap forward in terms of Leninist standards and principles.

What is he saying here? He is saying that under Gerald Ford as President, under Jimmy Carter as President, when they were still out of power, that the Communists of Grenada made a systematic conscious effort to become a Leninist secret police-dominated Soviet style dictatorial party, that it was not in reaction to the United States, it was not in reaction to Ronald Reagan, it was not in reaction to any of our threats, but before they ever took power they had thought through and defined themselves as a Leninist dictatorial Communist secret police state.

Now, in that situation all of the modern ostrich analysis, all the speeches by various Members of this House about Grenada were just plain wrong. The analysis was wrong. In fact, our leftwing ostrich friends who kept saying, "Gosh, these people aren't really Communists," were wrong. We have the absolute secret speech of Maurice Bishop, the head of the Communist Party in Grenada in which he says flatly, "Hey, we were Communists all along. We always meant to be Communists."

Let me continue. What does he think the historical pattern was going to be? He talks about establishing:

We are required to work on a dozen critical fronts at the same time and that is going to require a lot more application of Leninist standards of discipline, consistency and seriousness. All of this, comrades, means that our ideological and organizational level as a party will have to rise considerably. It is clear that if we had not insisted on higher standards, we would have not reached where we have reached but it is equally clear, comrades, that holding power is much more difficult than taking power. There is no doubt that the party can be built more rapidly on the basis of lower standards but this will mean that the task we have set ourselves, including our historical task of building socialism, will not be accomplished. As Lenin told us a long time ago "Better fewer but better". Immortal words that we must never forget.

What is he saying? The Communist dictator of Grenada is saying we are going to establish a highly disciplined internally controlled secret police style party on the writings of Lenin and we are going to control the country of Grenada. His answer was never to negotiate with the United States, it was never to be reasonable, it was to lie to the Americans while rapidly consolidating power.

What do they mean by a Leninist Party being disciplined? He is rather clear about this, on page 44:

This last requirement includes a complete willingness to accept party discipline in many, many areas of one's personal life, not just political life; to fully and really accept and implement the principles and programs of the party requires you to let the party decide when you can get vacation and sometimes even what kind of activities you can be involved in. In other words, even our personal life is under security to some extent.

In other words, in Grenada under the Communists, when you took a vacation, where you went on vacation, what you did on your vacation, what you were allowed to say when you were on vacation were all controlled.

Now, when our good ostrich friends visit Nicaragua, if they do not realize it is a secret police state, if they do not realize that there are neighborhood block organizations that watch every single person, if they do not realize that it is controlled down to the level of when you are allowed to go on vacation and what kind of a vacation you can take and they listen to people, what do you expect people to say when they live in a Communist police state? Do you think they are going to run up to you and say, "Gosh, these Communists are terrible," and then get shot or get put in jail or have their ration cards taken away? Of course not.

So when our good ostrich friends visit Nicaragua and discover people who love their government they ought to ask themselves what would the penalty be for not loving your government in a Communist dictatorship? How foolish do you have to be to be actually taken in by this kind of Communist language?

Let me carry it a stage further. He talks in here about "accepts the science of Marxism Leninism."

Now this is the core of why I am beginning this series of special orders. Real Communists believe in the way of thinking, in a way of doing business, in a way of working which is best described as a Marxist-Leninist science. A Marxist-Leninist science is a way of survival just like the Nazis and if we try to translate that into America, if we define communism as sort of like belonging to the Kiwanis Club, "Oh, he is a Communist," as though he were a Rotarian, we misunderstand the nature of what we are dealing with. Communism is a virus. It has a very clear pattern. It establishes a popular front which is a phony organization to lie to the West; it lies deliberately to the United States; it manipulates church groups, it manipulates the news media, it sends people up here who smile and lie but at home it is a ruthless brutal secret police dominated dictatorship in alliance with the Soviet Union determined to destroy America.

The minute you say the Nicaraguans are Communists, you are saying they are at war with the United States. We are living in a state of war with Cuba and with Nicaragua and anyone who does not understand that does not understand communism.

Let me give you an example. When I say Communists, why do I say Communist? I say Communist in part because Maurice Bishop who many of our ostrich friends standing in this very room promised us was not a Communist, uses the word Communist. He says, "Being a Communist, comrades, means becoming a different kind of person."

He says, "It takes time for a Communist to be built."

In other words, Maurice Bishop, when he was developing his secret speech to his Communist comrades was very clear about who he was; he was a Communist and he was equally clear about lying to the United States. So when you see Fidel Castro lying to Dan Rather, it tells you a lot about

how gullible Dan Rather is, it does not tell you anything about Fidel Castro, who is open about being a Communist. It is the nature of Communists to lie to Dan Rather. It is unfortunately the nature of all too many American newsmen to cheerfully be lied to.

One topic I will take up later out of the Grenada document volume is specifically written instructions on how to manipulate the American news media. There are also written instructions on how to infiltrate churches. It is a fascinating volume and I hope that every American citizen will take seriously the obligation to get a copy of this book for free from the Department of State and put it in your high school library, put it in your college library, put it in your public library. Every library in America should have a copy of the Grenada documents and every Member of Congress should read the key speeches and the key documents in this book before they vote next week or the week after on Nicaragua.

□ 1250

Because once you have read the actual secret documents of a Communist dictatorship, you never again quite have the same sense of what it is they are doing. From that point on, you understand that if they are truly Communist, they are probably lying to you.

Now, let me turn and show you an exact parallel from the captured documents of Grenada with a document which was by accident released from Nicaragua. Just as we have a secret speech by Maurice Bishop, the Communist dictator of Grenada, we have a secret speech by a Communist leader of Nicaragua.

Comandante Bayardo Arce gave a speech in May of 1984 which is a secret speech. This was tape recorded without his knowledge and was printed originally in the Barcelona, Spain, La Vanguardia, July 31, 1984.

According to Foreign Report, August 23, 1984, published by the Economist in London: "Junta coordinator now President, Daniel Ortega acknowledged the authenticity of the text."

This speech was reprinted by the U.S. State Department in an English language translation, and is available to every Congressman before the vote on Nicaraguan money, is available for every American citizen, is available to all of those church groups that are so well-meaning and so naive and so uninformed.

And I say flatly: Any church person who stands up and tells you that the Communists in Nicaragua are not Communists is clearly uninformed. They are the ostriches that may well doom the West in its struggle with communism.

Bayardo Arce is a Communist. He is proud of being a Communist. Here is what he says in his very first paragraph: quote:

"We Communists" close quote. He does not say "you Communists," he does not say "some Communists." As a leader of the Nicaragua Communist Government he says: "We Communists."

He goes on to say: And I want you to think again about the secret speech of the Grenadian Communists and why they set up a front organization. Why it was necessary to go through a process. They consider themselves, he talks about in here, as quote: "state of war," close quote. In other words, they are in a state of war with the United States. They are engaged in war with the Americans, whatever we think of.

Some of our friends will say to you "Well, that is because of Ronald Reagan." Let me quote directly from the Nicaragua Communists, quote: The war will not end on November 4 or on January 10. The war will continue with or without Reagan. It may take on other forms, but it will go on." Close quote.

In other words, from the Nicaraguan Communist viewpoint, they hate the United States; they are anti-American; they are determined to destroy democracy, they do not care who the President of the United States is; if Walter Mondale were now President, the war would go on. This is again from a speech by a Nicaraguan Communist. This is not an analysis by some conservatives.

What did he say in that speech? Remember how the Grenadian Communist dictator said we have to have a popular front; we have to involve other people in order to be able to lie to the Americans? This is what he says:

They took risks that were "manageable from the revolutionary standpoint."

Of course, if we did not have the war situation imposed on us by the United States, the electoral problem would be totally out of place in terms of its usefulness. What a revolution really needs is the power to act. The power to act is precisely what constitutes the essence of the dictatorship of the proletariat—the ability of the [working] class to impose its will by using the means at hand [without] bourgeois formalities.

For us, then, the elections, viewed from that perspective, are a nuisance, just as a number of things that make up the reality of our revolution are a nuisance.

But from a realistic standpoint, being in a war with the United States, those things become weapons of the revolution to move forward the construction of socialism. Furthermore, for us it is useful, for example, to be able to display an entrepreneurial class and private production in the mixed economy system we promulgated, while we move ahead in strategic ways. The important thing is that the entrepreneurial class no longer controls all the means to reproduce itself. It no longer controls the banks, foreign trade, or the source of foreign exchange. Therefore, any investment project in our country belongs to the State. The bourgeoisie no longer invests—it subsists.

What is he saying? He is saying that the Communists in Nicaragua deliberately run a phony front in order to deceive the Americans. If you were to take this paragraph and put it next to the same paragraph in the speech by the Grenadian Communist, it is almost word for word. Only the local dialect and the translation from Spanish to English changes it.

Now, why is it so similar? It is similar because they are both Marxist-Leninists. It is similar because they are both Communists. It is similar because the Cuban and Russian advisers tell them the same things.

It is like having two football teams with the same coach; they both run the same play because the coach designed the same play. The coach in this case is Castro and the Cuban Communists—the coach in this case is the Soviet Union and communism.

He says, flatly, that in fact they are having elections only for the phony purpose of deceiving the United States. But our friends will say, Well, even if they are going to be a dictatorship, can't they, nonetheless, be worked with? Cannot we have a reasonable deal?

Here is what he says:

Imperialism asks three things of us: to abandon interventionism, to abandon our strategic ties with the Soviet Union and the socialist community, and to be democratic. We cannot cease being internationalists unless we cease being revolutionaries.

We cannot discontinue strategic relationships unless we cease being revolutionaries. It is impossible even to consider this.

Yet the superstructure aspects, democracy as they call it, bourgeois democracy, has an element which we can manage and even derive advantages from for the construction of socialism in Nicaragua.

In other words, we can pretend to have an election to deceive the Americans, but under no circumstance can we give up trying to destroy our neighbors; under no circumstance can we cut our ties with the Soviet Union.

It is very important to understand that; as long as the Communist dictatorship exists in Nicaragua, it is a deliberate, systematic, moral commitment to destroy freedom in Costa Rica, to destroy freedom in Honduras and El Salvador, and to destroy the United States of America.

They say they are at war with us. Our ostrich friends in the United States continue to say, Oh, gosh, they don't really mean it.

Quoting again from the secret speech by the Nicaraguan Communists:

We have not declared ourselves Marxist-Leninists publicly and officially, we get along without definition. The United States did us the favor of saying who we are and tried to frighten the whole world. But they failed. So now, what ideological value do we see in the electoral process?

In other words, the only reason they are not calling themselves Marxist-

Leninists is because that way they can lie to the American press, the American churches, and to the American politicians.

In fact, they are getting advice from the Cubans and the Soviets not to call themselves Communists.

He goes on to say, the Nicaraguan Communist says:

> Why are we Communists going to be putting on different shirts if real, concrete socialism is being constructed through the strategy of power of the Sandinista Front?
>
> Our strategic allies tell us not to declare ourselves Marxist-Leninists, not to declare socialism.

He goes on to say:

□ 1300

> We thus urge the party, for this is still not a decision for us to make (we have begun to discuss it), but urge you also to discuss the matter—whether we decide after the elections to drop the fiction of a Marxist-Leninist Socialist Party on the one side and on the other those of the Sandinista Front who have not yet changed labels.

Now, let me be quite clear, particularly to my Democratic friends, but also to the handful of Republican ostriches in this House.

It is my intention in the next 2 weeks to challenge every speaker who uses the word "Sandinista," to ask them if they have read Arce's speech and to ask them if in fact they will not recognize that Arce himself says it is a fiction. There is no Sandinista government. It is, in fact, an insult to Sandino, who was a true Nicaraguan nationalist, to use the word "Sandinista" to describe Communists. Sandino himself repudiated communism. Sandino said flatly, "I am a nationalist from Nicaragua, communism is an international form of imperialism, and I am against it."

He wrote a very strong letter to the Communist guerrilla in El Salvador, repudiating that Communist guerrilla's communism. The Communist Party of Mexico in 1933 attacked Sandino on the grounds that he was not a Communist but was a nationalist.

In that setting, I say to all of my friends, even the most committed ostrich on the left, when you have a Communist in Nicaragua in a secret speech saying flatly that it is a fiction to talk about the Sandinista front, why should we not honor their own feelings? They are Communists, they secretly call themselves Communists, they want to be Communists, and they only use other words to deceive America.

He talks about "this artifice of pluralism * * * which has been useful thus far."

In other words, in their private meetings, they see themselves deliberately deceiving Americans by using words that will not scare us, while they go ahead and impose a dictatorship. They have contempt for us. They think we are incredibly stupid and gullible.

He says here, on page 7—and every American ought to read this before they decide that they would not support freedom fighters against Nicaragua:

> Our strategic allies tell us not to declare ourselves Marxist-Leninists, not to declare socialism. Here and in Rome, we know, we've talked about this being the first experience of building socialism with the dollars of capitalism.

Lenin once said, "The capitalists will sell you the rope with which we will hang the capitalists."

The Nicaraguan Communists, with the advice of the Cubans and the Russians, and with the help of American ostriches, are going a stage better. Now the capitalists do not sell them the rope, we give them the rope with which to hang us.

And listen how they describe it: "We've talked about this being the first experience of building socialism with the dollars of capitalism."

What he is saying is that they are Communists, they are getting advice from Cuban and Russian Communists, they are at war with the United States, and they are able to get us to stupidly cover it as though we are at peace. They use our language to lie to us while they know what they are doing. And we allow them to get away with it.

Remember, I quoted from the Communist dictator of Grenada about how they used mobs to close down people who are not Communists. Listen to the Communists of Nicaragua:

"We still have not worked the turbas (Sandinista mobs), as they say, because it is not yet time."

Now, why do you see mobs in Grenada? And why do you see mobs in Nicaragua? Because the Cubans and the Russians train Communist dictatorships to set up mobs. They have organized, paid mob organizers. They have people who go out and arrange the mob, and they say to you,

> You have two choices. You can join the mob, and that counts as good Brownie points toward being a good Communist, or you cannot join the mob, you have mob duty, it is time to go out and be part of a mob.

What happens then? CBS News goes down and films the mob and says, "Gosh, look at this popular demonstration."

Now, here we have in both the Grenada papers and in the papers from Nicaragua absolute Communist secret doctrine on how to organize a mob. Are you going to see that on CBS tonight? Are you going to see a study, are you going to see a reporter starting to say, on CBS, "Gosh, here is another Communist demonstration"? No. American newsmen have a passionate commitment to be gullible. They are determined to pretend that there is no normal difference between Communist dictatorships. I should not say all American newsmen, but there are certainly specific American newsmen who seem to have a passion; they are not only ostriches, they are ostriches with amnesia; they forget each new experience and go ahead and pretend as though it never happened. And, of course, in this body, we have ostriches with amnesia, and there are all too many church groups who are ostriches.

Here is his closing line. I want to come back and really bring this together as it relates to the upcoming vote. Arce, the Communist from Nicaragua, says, in closing:

> We believe that between the Nicaraguan socialist party and the Sandinista front, strategically there is nothing to debate. We must take advantage of the change offered by the elections to gain other positive benefits: the unity of the Marxist-Leninists of Nicaragua.

Now, we have today two documents, a rather fat book, the Grenada documents available from the State Department, and Comandante Bayardo Arce's secret speech available from the State Department, both in English. They are free. Every citizen can read them. Every newsman can read them, every politician can read them, every church group can read them. And what is their message? Their message, in overwhelming detail, is that the Communist dictatorship of Nicaragua is the active and deliberate ally of Cuba and the Soviet Union, attempting to destroy the United States.

Their message is that the Communists in Nicaragua are systematically, intellectually, committed to establishing a secret police dictatorship. Their message is that communism and Marxism, Leninism is a specific form of behavior which is knowable by reading Lenin's writings, which is understandable by studying the Grenadian documents and that in fact we are engaged in a war with communism which we, in the West, have persistently refused to deal with head-on.

Meanwhile, what do they also tell us? They tell us that the Communists in Nicaragua will lie, that they will lie to the church groups, they will lie to the news media, they will lie to politicians.

They tell us that they understand Americans pretty well and they will count on our gullibility, that they believe they can seduce us into impotence where they could never rape us into impotence. They are deliberately attempting to seduce the American Nation into believing that they are not Communists while they are deliberately working with the Cubans and the Soviets to establish Communist dictatorships across Latin America.

The choice which will come up in about 2 weeks is simple: Which signal are we going to send? Are we going to send a signal of impotence? Are we

going to have ostrich after ostrich get up on the floor and say, "Gosh, I don't like those Communists either, but what can we do?"

Are we going to have people get up here who visited recently, who have found their particular fantasy, who have allowed the Communists to lie to them and say, "Well, you know, when I talked to them, they were very nice to me"?

Are we going to have people who refuse to read the documents, who refuse to deal with the historical reality, who are determined to be impotent and incapable of stopping communism?

And what will the American people do? In the next 2 weeks, will you try to find out the truth? Will you call your Congressman and Senator? Will you get involved in your local radio call-in show? Will you write letters to your local newspaper editor?

Or will you allow the deliberate public relations manipulation?

And it is wonderful stuff to read. The Grenadian Communists actually hired American public relations firms to teach them how to manipulate the American Congress and the American news media.

They talk openly in this book about how to infiltrate churches and how to find sympathetic church leaders that you can get to be gullible.

The next time your church minister gets up and tells you about how good the Communists are in Nicaragua, will you ask them if they have read the Grenadian Documents, ask them if they have read Arce's secret speech?

If we cannot draw the line in Nicaragua, a country which is closer to Miami than Miami is to Washington, DC, if we cannot draw the line when we have documents of a Communist dictatorship that prove what communism is like, then where do we draw the line? In Honduras? In Guatemala? In Mexico?

Do we really want 70 million Mexicans faced with the problem of a civil war?

And if you think that is false, in later special orders week, I will read from the messages of the Grenadian Embassy in Moscow, in which they said flatly that the amount of money they were getting from the Russians depended on their ability to undermine other countries. In the case of Grenada, their assignment was Belize and Surinam. And they talk very specifically in their documents about their job of undermining governments in order to get the Soviets to send them money.

Now, the Nicaraguans are getting a lot more money from Russia than the Grenadians did. If the Nicaraguans are getting more Communist money than the Grenadians did, what does that tell you about the Nicaraguan secret commitment to undermine democracies in free countries if in fact the Soviet Communists measure their aid, in part, based on how willing a Communist government is to deal with it.

I will also outline in the future special orders the very real fact, as you go through all of this, that there were secret treaties that had specific clauses promising to keep them secret. And I would suggest to you if they were secret, why don't we assume that the Nicaraguan Communists have similar treaties?

So, I say to my colleagues, in the coming 2 weeks, as a former history teacher, I hope to raise again and again and again the lessons of history. I say to my leftwing ostrich friends that the day of the ostrich being unchallenged is over. If you are determined to come on the floor with your head buried in the sand and deny the nature of the Government of Nicaragua, I shall do everything I can, and I hope many of my colleagues will join me, both Democrats and Republicans. There are many Democrats who know better. There are many Democrats who know that communism is communism.

I also say to my friends in the State Department and the White House that the time has come to drop the phony term "Sandinista," to accept the Communist dictators' words at face value, to recognize that they are truly Communists and to talk only of the Communist Government of Nicaragua and of Communist guerrillas in El Salavador.

□ 1310

We are dealing with a straightforward, simple issue of communism, and I am confident, as Winston Churchill once said to the British people, that, "The American people, given the truth, will rally to reality. That the American people, given leadership, will rally to that leadership."

That reminded of how close Nicaragua is; reminded of the military danger of that 12,000-foot military runway, if it handles Soviet bombers; reminded of the danger of Soviet-led subversion with Cuban advisers and Nicaraguan forces, that the American people will rally to a policy that is clear, that is firm, that is decisive. But for that policy to work, they must be told about it in clear terms.

I am delighted to yield to my good friend, the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. I thank the gentleman from Georgia for yielding.

Mr. Speaker, I want to compliment the gentleman for taking this special order, and also join him in asking others who have similar or opposite views to make their views known here on the floor. I think we as Americans all too often forget the lessons of history, and we have often been told and retold that those who ignore history are fated to repeat the lessons of history.

Serving on the Foreign Affairs Committee, I was going to mention to the gentleman from Georgia, always I am concerned somewhat when people other than the President speak for our country overseas. For example, I was reading in yesterday's paper about a group of Congressmen who were in Nicaragua asking the leader of Nicaragua if he would give them certain guarantees if they guarantee that we are going to defeat $14 million of aid to the Contras.

I think that we in this body have an obligation, and a very important obligation, to pass judgment. But I do not think that we in this body can take it upon ourselves, individually, or even in small groups, to contact foreign leaders and ask them what they will do if we vote one way or another on this floor.

I think that the American people still make the foreign policy of this Government, and not some foreign dictator. I think these are important lessons that the gentleman from Georgia is bringing to the attention of the American people. I want to compliment him for doing it.

I hope people that may view the situation differently also take the floor, because the American people have to make the ultimate judgment. They can only make that judgment if they are informed of the facts. The American people today are not informed of what the real facts are in many of these situations, especially an important situation like this.

I want to again compliment the gentleman from Georgia for taking this time and educating the American people.

Mr. GINGRICH. It is interesting, in looking at the Grenadian document, that there were Members of this Congress dealing with the Grenadian Communists, and the Grenadian Communists saw themselves working in active alliance with Members of this House against the American Government. They saw themselves in a situation where they literally expected help in defeating the policies of the U.S. Government.

I think it is a very serious problem, and the Grenadian documents raise very serious challenges to every Member of Congress about how we are going to deal with communism. The fact is that Communists systematically and cynically manipulate American politicians and manipulate the American news media and are contemptuous of us. They say in effect to each other, look how foolish the Americans are. You know, when is the next American delegation going to come so we can manipulate them and use them to get across our particular point?

I yield to my good friend from Arizona [Mr. RUDD].

Mr. RUDD. I thank the gentleman for yielding, and I appreciate his taking this time on a special order which relates to Grenada, Nicaragua, and Communist encroachment in the Western Hemisphere.

I will tell the gentleman that I just returned from a trip into seven countries, into Central America and South America, also, and the feeling there is a lot different than it was a year ago and a year before that when I visited the same general area. In talking with the people, they no longer have any doubts about the fact that the United States of America is their friend.

THE PUBLIC SECURITIES ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. DINGELL] is recognized for 5 minutes.

Mr. DINGELL. Mr. Speaker, today, I am introducing legislation entitled the Public Securities Act of 1985 to provide improved protection for investors in Government-related securities.

Prompt action on this legislation is needed to restore investor confidence in the Government securities market and to provide for the efficiency, liquidity and integrity of the giant market in U.S. Treasury securities. The successful operation of this market is essential to the conduct of fiscal and monetary policy.

The recent failures of two small unregulated dealers, ESM Government Securities, Inc., and Bevill, Bresler & Schulman, provide dramatic evidence of the inability of the Securities and Exchange Commission and other Federal and State regulators to prevent serious failures in the Government securities market.

The failure of ESM victimized school districts and city governments across the country to the tune of over $300 million and led to a savings and loan panic in Ohio, forcing a temporary closing of 71 privately insured savings and loans associations. Last week's failure of Bevill, Bresler, coming so quickly on the heels of the ESM failure, rekindled widespread fears over the integrity of the huge unregulated Government securities market. Bond prices fell and the dollar declined as a result of renewed concern.

These are not isolated incidents. In 1982 Drysdale Government Securities, Inc., and Lombard-Wall, Inc., collapsed. The Drysdale failure cost Chase Manhattan Bank over $135 million. Lion Capital Group failed last year. We are witnessing a pattern of bankruptcies caused by unsupervised, speculative trading practices and the failure to conform to strong financial standards.

Government securities dealers finance their operations primarily with borrowed funds, which places them in a highly leveraged position. Dealers face failure if losses on securities deplete what is sometimes a thin margin of capital relative to the risks assumed. Dealer failures can result in losses to, and possible failures of, their counterparts—creditors and other dealers with whom they conduct business. Such failures can also have an adverse effect on Government securities market by causing reluctance on the part of creditors to lend funds—even to dealers who are leveraged at an acceptable level. Such reluctance could reduce the availability of dealer financing and, consequently, the capability of dealers to market the national debt. Debt that cannot be sold to the public must be bought by the Federal Reserve. This is not a desirable result since Fed purchases pump up money growth, planting the seeds for inflation. Problems in the Treasury market can be transmitted into interest rates, capital flows and inflationary pressures worldwide.

Current regulatory controls are insufficient to restore order to this market. There is no direct regulation of Government securities dealers by either the Federal Reserve Board or the SEC. No regulatory body even knows how many dealers operate in this market. The Federal Reserve Board exercises some control over the 36 primary dealers with whom it does business. However, the Fed has no statutory authority to regulate these dealers; it merely requires strong financial standards and outside auditing as a condition of doing business with the Fed. The capital adequacy guidelines proposed by the New York Bank—calling for a 1.2-to-1 capital-to-risk ratio and outside auditing—are appropriate. However, they necessarily retain the status of voluntary guidelines, not mandatory requirements, under current law.

Two weeks ago, E. Gerald Corrigan, the president of the Federal Reserve Bank of New York stated in congressional testimony that:

> Perhaps the more serious problem is that by having an informal monitoring role, we may create an appearance of providing much greater protection from abuse than it is realistic to assume.

Skepticism about the Fed's reliance on voluntary financial disclosure by dealers was highlighted when Mr. Corrigan disclosed that the New York Federal Reserve Bank had been receiving voluntary reports from ESM since April 1984.

"Indeed, even when such firms report monthly, as ESM did, the mere presence of such a reporting relationship may work to create a false and unwarranted sense of confidence about such firms," said Mr. Corrigan.

The SEC is limited as well. After each of the recent failures, the SEC has come in after the fact, asserting its antifraud jurisdiction. The SEC has acknowledged that it does not have the statutory authority to inspect the books and records of these securities dealers or take other steps which might have prevented the fraudulent activities.

The loophole in regulatory authority was created in the 1930's by exemptions in the U.S. securities laws. Government securities are exempt from registration under the Securities Act and regulation under the Securities Exchange Act. Broker-dealers who effect transactions exclusively in Government securities are also exempt. The SEC has regulatory authority over registered broker-dealers that engage in Government securities business. But, it does not have statutory authority to regularly examine broker-dealers that restrict their business to Government securities transactions. The theory was that an exemption for these dealers was warranted because Government securities represented the safest, most secure form of investment, backed by the full faith and credit of the U.S. Government.

However, in recent years we have seen the development of new investment vehicles and products relating to Treasury securities, for example, when-issued trading, futures and options, forward commitments, zero-coupon securities such as Salomon Bros.' certificates of accrual on Treasury secuities—or CATS. Sophisticated new financial techniques related to Government securities, such as repurchase agreements, reverse repurchases and "matched books"—offsetting repurchase and reverse repurchase agreements—have developed for general investors. In a repurchase agreement, an investor purchases Government securities from a Government securities dealer. At the same time, the dealer agrees to buy the securities back at a fixed time at a higher price. In a reverse repurchase, the dealer purchases the securities and agrees to sell them back to the customer. In both cases, the dealer is essentially borrowing money with the securities acting as collateral.

There is nothing in principle wrong with these financial dealings. Indeed, the Fed itself uses these mechanisms to implement monetary policy. The problem arises in assuring general investors that the dealers involved in these transactions have sufficient reserves to cover potential losses, and in assuring that potential fraud is uncovered in time to prevent investor losses. The limited regulatory authority available today does not allow sufficient regulatory oversight of government securities dealers to resolve these problems.

The proposed legislation would amend section 15B of the Securities Exchange Act of 1934. Section 15B was added by amendments to the Exchange Act in 1975, to bring previously unregulated municipal securities dealers under the regulation of a newly created self-regulatory organization, the Municipal Securities Rulemaking Board, composed largely of industry participants. The Board promulgates regulations requiring the registration of all municipal securities dealers, subjecting them to customer protection, antifraud, recordkeeping and other requirements, and providing for inspections of their books and records. The rules of the MSRB are enforced by the NASD, the SEC and the appropriate Federal bank regulators.

The proposed legislation would expand the authority of the MSRB to include dealers in Treasury securities and Government agency securities, and would rename the MSRB the "Public Securities Rulemaking Board." This would provide uniform regulation of Government securities dealers, subjecting them to inspections, books and records and capital adequacy requirements and other protections. Absent this additional statutory authority, the reputable firms in the industry—which are an overwhelming majority—and the regulators appear to be unable to prevent dangerous abuses. We are giving the industry an opportunity to clean up its own act.

Mr. Speaker, a summary of the legislation follows the close of my remarks. I commend Representatives BROYHILL, WIRTH, RINALDO, LUKEN, SWIFT, COLLINS, BRYANT, and RODINO. For joining me in cosponsoring this bill. I especially wish to thank the distinguished gentleman from Colorado, Mr. WIRTH, for his cooperation with me and vigorous efforts on behalf of this bill. I look forward to full consideration being given to this proposal in the near future and enactment of legislation on this subject during the course of this Congress. We cannot take any more massive firm and system failures in this market.

THE PUBLIC SECURITIES ACT OF 1985—SECTION-BY-SECTION ANALYSIS

TITLE I—ESTABLISHMENT OF A SELF-REGULATORY ORGANIZATION WITH RESPECT TO MUNICIPAL AND GOVERNMENT SECURITIES

Section 101 creates a new Section 15B of the Securities Exchange Act of 1934 to provide for the registration and regulation of public securities dealers.

Section 15B(a)—Registration and regulation of municipal securities dealers

Paragraph (1)—Regulation.—This paragraph would prohibit any public securities dealer from making use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce the purchase or sale of, any public security unless registered with the Commission or exempted by rule or by order. A broker or dealer already registered with the Commission under section 15 would not be required to re-register.

Paragraph (2)—Registration Statement and Grant or Denial of Registration.—A person would register as a public securities dealer by filing a registration statement with the Commission containing such information and documents concerning the public securities dealer and any persons associated with the public securities dealers as the Commission may, by rule, prescribe. The registration of a public securities dealer would become effective in the same manner as presently provided for the registration of brokers and dealers in section 15(b).

The Commission is authorized to grant the registration if it finds that the requirements of this section are met and may deny such registration if it is unable to make that finding or if it finds that the registration, if granted, would be subject to suspension or revocation under subsection (c) of this section.

Paragraph (3)—Prohibited Conduct of Public Securities Dealers.—This paragraph would make unlawful any act or practice or course of business prohibited by the Act (other than section 5 or paragraph (1) of this subsection) by a registered public securities professional which would be prohibited if the mails or any means or instrumentality of interstate commerce were used in connection therewith irrespective of any use of such means.

Paragraph (4)—Commission Exemptive Authority.—The Commission would be granted broad powers to exempt, by rule or by order, upon its own motion or upon application, conditionally or unconditionally, any broker, dealer or public securities dealer in whole or in part from any provisions of this section or any rule or regulation promulgated under authority of this section. The intent of this grant of broad exemptive power is to give the Commission flexibility to implement the policies of the bill and to allow the Commission to develop practical and workable means of regulating the public securities industry and trading in public securities.

Paragraph 15B(b)—The Public Securities Rulemaking Board.—This subsection would establish and delegate rulemaking responsibility to the Public Securities Rulemaking Board, a self-regulatory organization for the public securities industry. Like the existing Municipal Securities Rulemaking Board, the Board would not be a membership organization, nor would it have any inspection or enforcement responsibilities.

Paragraph (1)—Establishment of the Board.—This paragraph would create the Board and provide for the equal division of its membership among representatives of, investors in, and issuers of, public securities who are not associated with any public securities professional, representatives of public securities professionals which are brokers or dealers, and representatives of public securities dealers which are banks or departments thereof ("public representatives," "broker-dealer representatives" and "bank representatives," respectively.) The Department of the Treasury and the Federal Reserve would have a role in appointment of members.

Paragraph (2)—Board Rulemaking Authority.—The sole function and responsibility of the Board would be to prescribe rules for the public securities industry and with respect to transactions in public securities (otherwise than on a national securities exchange), subject, of course, to Commission review and approval. Accordingly, paragraph (2) would grant to the Board broad rulemaking authority over all public securities dealers and require it to promulgate rules to effect the purposes of this legislation and the Exchange Act. Similarly, the procedures established in section 15 of the bill for SEC review of proposed changes in the rules of the Board would be applicable and no rule of the Board or change in, addition to, or deletion from the rules of the Board may take effect except in accordance with section 19 of the Act. Furthermore, the Federal Reserve Board is given a role with respect to the impact and appropriateness of any proposed rules with special relation to and effect on government securities. The Board is required to include with the materials submitted to the Commission under section 19(b), the Board's response to any written comments or suggestions submitted by the Federal Reserve or the Department of the Treasury with respect to the impact of the proposed rule on the efficiency, liquidity, or integrity of the markets for Government securities.

The scope of the Board's authority would be defined in terms of purposes rather than subject matters in prescribed areas.

Subparagraph (A) would require the promulgation of rules establishing professional standards with respect to training, competence, experience and other qualifications deemed necessary for public securities professionals and natural persons associated with public securities brokers and dealers, including financial responsibility of such persons. The Board would be permitted to classify public securities professionals in adopting such professional qualifications and standards, taking into account all relevant factors, in a manner analogous to the classification powers granted to registered securities associations under section 15A.

Subparagraph (B) would require the adoption of rules establishing fair procedures for the nomination and election of members of the Board. Such rules would be required to provide that nominees for membership on the Board as public representatives must be, in fact, representative of issuers of and investors in public securities and not associated with any public securities professional. In addition, the subparagraph would make clear that the size of the Board may be varied by rule so long as membership is equally divided among the three categories identified in paragraph (1) of this subsection, is an odd number, and the proportion of public representatives is not materially reduced.

Subparagraph (C) would require that the rules of the Board, be designed to regulate the dealings of securities professionals so as to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation with self-regulatory organizations and certain other persons, to remove impediments to and perfect the mechanism of a free and open market in public securities, and, in general, to protect investors and the public interest. The subparagraph would require that such rules not be designed to permit unfair discrimination among customers, issuers, public securities brokers, or public securities dealers, to fix minimum profits or other fees to be charged by members, to regulate matters not related to the purposes of the Exchange Act or to the administration of the Board or to impose any burden on competition not necessary or appropriate in furtherance of its purposes. No such rules shall relate to issuing, bidding, or underwrit-

ing procedures fixed or approved by the Department of the Treasury.

Subparagraph (D) specifically states that the Board may promulgate regulations requiring the arbitration of claims, disputes and controversies relating to transactions in public securities, but provides that no person other than a public securities professional or person associated with a public securities professional shall be compelled to submit to such arbitration except at his instance and in accordance with Section 29 of the Act.

Subparagraph (E) would require the Board to promulgate regulations governing the periodic examination of public securities professionals to determine compliance with the provisions of the Exchange Act and the rules and regulations promulgated thereunder by the Commission and by the Board. This provision would enable the Board to determine the minimum frequency of such examinations and the matters to be inspected. Inspections would be carried out in accordance with paragraph (7) of subsection (c).

Subparagraph (F) would require the Board to promulgate rules governing the form and content of quotations relating to public securities and the persons to whom such quotations may be supplied to provide fair and informative quotations, to prevent fictitious or misleading quotations, and to promote orderly procedures for collecting and publishing quotations. Such authority should enable the Board to ensure uniformity of quotations in public securities and uniform methods of disseminating quotations.

Subparagraph (G) would authorize the Board to prescribe recordkeeping and maintenance requirements for public securities professionals.

Subparagraph (H) would require the Board to define the term "separately identifiable department or division" with reference to banks by establishing specific criteria for determining the circumstances under which a bank division or department is sufficiently "separately identifiable" to permit its registration as a public securities dealer entity pursuant to section 30(a)(30). At the minimum, to avoid registration of the entire bank with the SEC as a "public securities dealer," the department or division of the bank must, by its operations, personnel and organization, permit independent examination, and the enforcement of applicable provisions of this Act, rules and regulations thereunder and the rules of the Board.

Subparagraphs (I) and (J) would delegate authority to the Board to provide for the administration of its affairs and operations, including selection of a Chairman from among the members of the Board, and setting the compensation for Board members as well as appointing and compensating the personnel necessary to conduct its self-regulatory functions.

Under subparagraph (K), the Board would have the responsibility of exercising its rulemaking authority to establish the terms and conditions under which any municipal securities dealer may sell, or prohibit the sale by any such dealer, of any part of a new municipal securities issue during the underwriting period to any municipal securities investment portfolio. Thus, the Board will continuously be in a position to exercise its powers to promulgate rules governing syndicate practices and conflicts of interest to prevent any preferential treatment or advantage which may accrue to participating syndicate members, banks or nonbanks, or any proprietary investment portfolios to the detriment of public investors.

Subparagraph (L) empowers the Board, in consultation with the Federal Reserve, to formulate rules to regulate the amount of initial and maintenance margin in connection with the purchase, sale, or carrying of government securities. Rules may also be developed concerning the type of deposit or collateral which shall be furnished; the carrying of undermargined accounts for limited periods and under specified conditions; the withdrawal of funds or securities; the substitution or additional purchase of securities; the transfer of accounts from one government securities broker or government securities dealer to another; special or different margin requirements for delayed deliveries, short sales, repurchase and reverse repurchase agreements, and arbitrage transactions; the bases and methods to be used in calculating collateral deposits, the margins and market prices; and similar administrative adjustments and details.

Section 15B(c)—Enforcement and inspection by the Commission and the bank agencies

Paragraph (1)—It would be unlawful for any broker, dealer or public securities dealer to effect any transaction in or induce or attempt to induce the purchase or sale of any public security in contravention of any rule of the Board.

Paragraph (2)—Commission Administrative Power to Sanction Public Securities Dealers.—This paragraph would grant to the Commission broad disciplinary authority over public securities dealers, persons associated with them and other persons in connection with violation of the act and rules and regulations thereunder by the Board or the Commission comparable to the Act. Accordingly, the Commission may, by order, after appropriate notice and opportunity for hearing on the record, censure, suspend (for a period not exceeding 12 months) or revoke the registration of any public securities dealer if such action is necessary to appropriate in the public interest and such broker, dealer or public securities dealer has committed or omitted any act enumerated in section 15(b)(4)(A-E) of the Exchange Act. In addition, the SEC may impose appropriate limitations on the activities, functions and operations of public securities dealers which it determines are in the public interest.

Paragraph (3)—Suspension of Registration, Withdrawal or Cancellation of Registration.—The Commission may suspend any registration pending a final determination as to whether registration shall be revoked. In addition, this paragraph would authorize the SEC to prescribe procedures governing the withdrawal of registration by public securities dealers and to cancel any pending registration or terminate any registration for public securities dealers who have ceased acting in such capacity.

Paragraph (4)—Commission Power to Sanction Persons Associated with Public Securities Dealers.—The Commission would have the authority, by order, to censure or impose appropriate limitations on the functions and activities, or bar or suspend (for a period not to exceed 12 months) any person from being associated with a public securities dealer if it finds, on the record following notice and opportunity for a hearing, that such persons has committed or omitted any act or omission enumerated in clauses (A), (D), (E), has been convicted of any offense specified in clause (B), or is enjoined from any action, conduct or practice specified in clause (C), or Section 15(b)(4).

Paragraph (5)—Bank Agency Enforcement Powers.—This paragraph would vest primary responsibility and authority with the bank agencies to enforce compliance with the requirements of paragraphs (2) and (4) and the rules of the Board by public securities dealers which are banks and persons associated with such dealers. Bank regulatory agencies may enforce compliance by such public securities dealer or any associated person with the provisions of sections 15B and 17 of the Exchange Act, the rules of the Board, and the rules of the Commission thereunder pertinent to the regulation of public securities dealers and transactions in public securities in accordance with Section 8 of the Federal Deposit Insurance Act. Any violation of the rules of the Board or of the Commission by any bank, or a wholly owned subsidiary or department or division of a bank registered as a public securities dealer, would constitute a violation of the Federal Deposit Insurance Act. This paragraph will in no way affect any existing powers vested in the banking agencies under other laws to take disciplinary action against public securities dealers which are banks or departments or divisions thereof or against persons associated with such public securities dealers.

Paragraph (6)—Consultation and Cooperation Among Federal Agencies.—This paragraph would require the Commission and the bank agencies to consult with each other prior to initiating any action against a public securities dealer which is a bank or a person associated with any such dealer bank, or for violations of any Commission rule promulgated under 15(c) (1) or (2) of the Act or of any Board rule. The Commission would be required to give notice to the appropriate bank regulatory agency of the entry of an order of investigation and the commencement of any action against any public securities dealer which is a bank or a department or division thereof or against any person associated with such a public securities dealer. The notice must include the identity of such dealer or associated person and the nature of and basis for the proposed action. The banking agencies would be required to give notice to the Commission in similar circumstances.

The agencies are expected to consult with each other in good faith concerning the effect of the proposed action both on sound banking practices and the protection of investors and the possibility and desirability of coordinating enforcement actions.

The Committee believes the ends of both the banking and securities laws can be achieved in this manner while minimizing the likelihood that public securities dealers will be subjected to unnecessary regulatory duplication or enforcement proceedings. The requirements of notice and consultation are intended to assure a coordinated and efficient regulatory structure and to facilitate fair, effective and evenhanded regulation of the public securities industry.

Other than the requirements of prior consultation, nothing in the bill would interfere with the use of any authority the Commission or the bank agency may have under the Exchange Act or any other law to conduct inspections or enforce compliance. Specifically, although the bank agency would have the primary responsibility to enforce applicable requirements with respect to banks which are registered public securities dealers, the Commission would retain its full authority under section 21 of the Act and elsewhere with respect to all violations or suspected violations by all brokers, dealers, or

public securities dealers. Under no circumstances would the requirements of notice and consultation confer any veto power on the banking agencies over Commission action.

Paragraph (7)—Allocation of Responsibility for Tests and Examinations.—Responsibility for the conduct of periodic examinations and for the administration of such entrance tests as the Board, may, by rule, establish would be assigned by this paragraph. Registered securities associations (e.g., the National Association of Securities Dealers, Inc. ("NASD")) and registered national securities exchanges would be delegated this duty with respect to public securities brokers and public securities dealers which are members, and the bank agencies in the case of public securities dealers which are banks or departments or divisions thereof. Reports and data resulting from an examination conducted by an association pursuant to section 15B(b)(2)(E) must be made and, on request, furnished to the Commission. The Board would be entitled to receive examination reports of public securities brokers and dealers prepared or furnished under this paragraph or section 17(c)(3), only upon request, and subject to any limitations which the Commission finds necessary or appropriate in the public interest.

Paragraph (8)—SEC Administrative Power to Sanction Members of the Board.—The Commission would be authorized to remove from office or censure, by order, any member, officer, or employee of the Board who is found, after notice and opportunity for a hearing on the record, to have willfully violated any provisions of the Exchange Act respecting public securities, any rule or regulation promulgated under the Act or any rule of the Board, or to have abused his authority.

Section 15B(d)—Pre-filing requirements for public issuers

The subsection would prohibit the Board or the Commission from promulgating any rules which would directly or indirectly impose any filing requirements on public issuers in connection with offerings of such securities. The bill does not affect in any way the existing exemption of any governments from the Securities Act of 1933, and this paragraph would ensure that de facto registration requirements are not inposed which would interfere with the governmental borrowings.

Section 111 contains a number of necessary conforming amendments to the Act. Paragraphs (a)–(f) amend the definition of exempted security in section 3(a)(12), self-regulatory organization in section 3(a)(26), municipal securities dealer in section 3(a)(30), person associated with a public securities dealer in section 3(a)(32), appropriate regulatory agency in section 3(a)(34) and statutory disqualification in section 3(a)(39). When used with respect to a public securities dealer, the "appropriate regulatory agency" means the Board of Governors of the Federal Reserve System with respect to a government securities dealer that is not a bank but that is monitored by and reports to the Federal Reserve Bank of New York.

Paragraph (g) amends section 3(a) of the Act to add certain necessary new definitions: public securities, public securities broker, public securities dealer, government securities, government securities broker, and government securities dealer.

Paragraph (h) clarifies the inapplicability of the Act to government entities unless specifically provided.

Section 112 amends paragraphs (1) and (6) of section 6(b) of the act to clarify enforcement of the rules of the Public Securities Rulemaking Board by national securities exchanges.

Section 113 amends Section 7 of the Securities Exchange Act concerning the establishment of deposit requirements by the Federal Reserve Board with respect to government securities.

Section 114 contains a number of additional conforming amendments concerning references to the Municipal Securities Rulemaking Board, references to municipal securities and municipal securities brokers and dealers, consultation by the Commission with the Federal Reserve and Treasury Department in rulemaking with respect to capital requirements for government securities dealers, rulemaking by registered securities associations, and transfer and access to documents.

TITLE II—TRANSITIONAL AND SAVINGS PROVISIONS

Sections 201–204 contain the necessary provisions for transfer and allocation of funds and personnel from the Municipal Securities Rulemaking Board to the Public Securities Rulemaking Board; termination of the Municipal Securities Rulemaking Board; savings provisions for the continued effect of rules, regulations, interpretations, contracts, policies, procedures and other actions; effect on pending administrative and judicial proceedings; nonabatement of proceedings; substitution of parties; and references in any other federal provisions.

TITLE III—EFFECTIVE DATE

Section 301 makes the general effective date 180 days after enactment. Section 302 provides special effective dates for appointment and rulemaking authority.

● Mr. WIRTH. Mr. Speaker, today, it is my privilege to join the distinguished chairman of the Committee on Energy and Commerce, JOHN DINGELL, in introducing legislation to address serious failures in the Government securities market.

Events of recent years have made this legislation critical to maintaining confidence in our financial system, to the conduct of the Nation's monetary policy and to the health of our national economy.

In 1982, the failure of Drysdale Government Securities, Inc. sent shock waves throughout the financial markets, when it was learned that Drysdale was unable to pay $270 million in interest due on Government bond transactions with Chase Manhattan Bank. Following Drysdale's default, Chase initially refused to pay that interest to about 30 of its securities firm customers, threatening widespread disruption of the markets through a domino effect of failures. Fortunately, Chase reconsidered and had the financial ability to step in to avert these serious consequences. Drysdale's problems were soon followed by the failure of yet another small Government securities dealer, Lombard-Wall, Inc.

The Government securities market consists of 36 primary dealers who deal directly with the Federal Reserve and also with the many "secondary" Government securities dealers—like Drysdale and Lombard-Wall—who make a market in Government securities for the public. These recent problems in the Government securities market have occurred with the wholly unregulated secondary dealers.

After the Drysdale failure, the Federal Reserve took steps to attempt to gain greater control over the Government securities market. Some of us in Congress believed those steps were not adequate, and, moreover, believed the Federal Reserve was not equipped, nor did it have the desire, to regulate small Government securities dealers not otherwise subject to its oversight.

Last spring, 2 years after the Drysdale collapse focused attention on the lack of controls over Government securities dealers, the failure of Lion Capital Group demonstrated that sufficient steps had not been taken by the Federal Reserve to improve those controls.

For that reason, Chairman DINGELL and I turned to the Securities and Exchange Commission requesting its views on methods to provide greater regulatory supervision over this important market. The SEC is an agency charged not only with the protection of investors but with ensuring the integrity of the markets as a whole. It is the Agency charged with picking up the pieces after a securities fraud. It is the Agency that has had the unfortunate task of unraveling the recent failure of ESM Government Securities and, just last week, Bevill, Bresler & Schulman Asset Management Corp.

These two most recent failures have demonstrated that after-the-fact enforcement cannot take the place of a regulatory apparatus that prevents fraud from occurring. This is especially true today as Federal borrowing needs have increased substantially and the Government securities market has expanded accordingly.

The failure of ESM caused a savings and loan panic in Ohio and resulted in millions of dollars of losses to cities and other investors throughout the country. Following the ESM collapse, with the resulting savings and loan closings in Ohio, foreign confidence in the U.S. financial system was temporarily shaken, with the dollar weakening considerably on foreign markets. Last week, it was reported that U.S. consumer spending had decreased in recent weeks, as a result of fears about the U.S. banking system.

It is estimated that the losses from the Bevill, Bresler & Schulman bankruptcy will exceed $200 million. Late last week, concerns were voiced that additional small Government securities dealers might fail as investors begin to demand delivery of collateral they previously left on deposit with firms.

Our financial markets are too interrelated, and too fragile, to permit a

small group of unregulated Government securities dealers to cause such chaos.

The Public Securities Act of 1985 is an attempt to prevent these disruptive events from occurring. It would accomplish this objective through the least intrusive means possible—industry self-regulation. The bill endorses and expands upon a concept that has worked well to put an end to problems in the municipal securities market. The bill would add to the authority of the Municipal Securities Rulemaking Board, giving the Board authority to set rules for Government securities dealers, and renaming the Board the Public Securities Rulemaking Board. The SEC, the National Association of Securities Dealers and the banking regulators would continue to have supervisory authority over institutions under their jurisdictions and would enforce the rules of the Public Securities Rulemaking Board.

In view of the serious problems in the Government securities markets in recent weeks and our concern that Federal regulators, after almost 3 years of discussions of these problems, have not moved quickly enough to plug the regulatory gaps that have permitted these problems, we believe it imperative to press forward with legislation at this time.

This bill is a starting point. It will be the subject of hearings in the Subcommittee on Telecommunications, Consumer Protection and Finance during the next 2 months, and I believe those of us sponsoring the legislation expect, and indeed welcome, the comments of affected industry participants, Federal regulators and the investor community.

I want to take this opportunity to commend Chairman DINGELL on his forceful leadership in developing the legislation and moving forward quickly to ensure the health of this vital and important segment of our markets. He has led a bipartisan effort, in which the distinguished ranking minority member of the Energy and Commerce Committee, JAMES BROYHILL, and my colleagues on the Subcommittee on Telecommunications, Consumer Protection and Finance—Representative THOMAS LUKEN, AL SWIFT, MATTHEW RINALDO, and MICHAEL OXLEY and others have participated during the past 2 weeks. I want to commend each of them, and I look forward to working with them and other Members during the coming months as we consider this important legislation.●

● Mr. LUKEN. Mr. Speaker, I join today with my distinguished colleagues, the chairman of the Committee on Energy and Commerce, Mr. DINGELL, the chairman of the Subcommittee on Telecommunications, Consumer Protection, and Finance, Mr. WIRTH, and others, in introducing legislation to protect investors and the American public against repercussions stemming from the failure of unregulated Government securities dealers.

The collapse March 1 of a Government securities dealer in Florida and the reverberations of that collapse have shaken the financial world, not only in this country but internationally. This crisis sent the price of gold soaring while the dollar suffered its largest single-day loss in 14 years.

And then just 1 week ago, on April 8, a second Government securities dealer, this one located in New Jersey, was shut down after it could not meet obligations to its customers.

The sudden shutdown of ESM last month resulted in the closure of the largest State-insured savings bank in Ohio, Home State Savings Bank, which happens to be in Cincinnati, my congressional district, because of Home State's dealing with ESM in the unregulated Government securities market.

The collapse of ESM also left more than half a million depositors in Cincinnati and other Ohio cities without access to their savings as a bank holiday was declared for 71 savings and loans in Ohio.

These half a million depositors depended upon the regulators to protect the sanctity of their deposits in American financial institutions. But instead of protection from State and Federal authorities, they found laxness, negligence and ultimately evasion of responsibility, or in common parlance, passing "the buck."

Although many of these financial institutions have reopened, at least for limited withdrawals of $750 per month, many of my constituents are still deprived of access to funds they need for the necessities of life, for food, medical care, rent, and yes, even to pay their income taxes. They are frustrated and they are angry.

Many have waited in long lines throughout the night. And they are demanding answers from a government that rushed to the aid of an improvident behemoth, Continental Illinois, but casts an indifferent glance at the little people in lines outside the savings and loans.

In short, Mr. Speaker, many Ohioans used to bank with complete confidence. Today, they can't bank on it any longer, and neither can any American. That's why the dollar has been shaken.

But the collapse of ESM has victimized as well. There are a number of cities all across this country that are ESM's creditors. And they too have lost millions of dollars of the taxpayers' funds.

The collapse of two Government securities dealers in the last month and a half, unfortunately, are not isolated instances. In 1982, we witnessed the collapse of Drysdale Government Securities, Inc., and Lombard-Wall, Inc., and just last year still another Government securities dealer—Lion Capital Group—failed.

With respect to ESM, in spite of all the warning signals that were raised and recognized, every Federal agency which is supposed to shore up our financial institutions—the Fed. SEC, and the Federal Home Loan Bank Board—had some knowledge but failed in the pinch.

For example, where was the SEC, which had been investigating ESM since 1977, and then dropped the ball 4 years later?

What did the Fed. do when the crisis was forcefully brought to its attention recently? Simple, the Fed. referred the S&L's to the Federal Home Loan Bank Board.

Where was the Federal Home Loan Bank Board, when the Federal Home Loan Bank in Chicago, learning of the troublesome transactions in 1981 between a financial institution called Unity Savings Association and ESM, ordered the association to end its repurchase agreements with ESM, but failed to alert any financial institutions or other regulatory bodies of their concerns?

In short, how did a securities firm, insolvent since 1980, for 4 years, at least, systematically replace its losses at the expense of the public, municipalities and depositors and in full view of the regulators?

I find it incredible that on February 28, the 11th largest accounting firm in the country, Alexander Grant, gave ESM an unqualified endorsement. And 4 days later, on March 4, ESM was placed in receivership.

How could the auditors and the SEC not have known that something was wrong when the ESM parent company and its subsidiaries in fact had been losing millions of dollars since 1977? If the SEC was powerless to act, though armed with the facts, why isn't the SEC clamoring for enabling legislation?

For some time now, the SEC has been sitting on its hands talking about the wonders of the free market and deregulation while ignoring its responsibilities to protect investors and assure the stability of our Nation's financial markets.

I recognize that the SEC does not have exclusive jurisdiction over the Government securities market and Government securities dealers. The Federal Reserve Board must share in the responsibility.

The more I think about it, the more I believe in the adage that where you have shared responsibility, you often have no accountability. Everyone wants to pass the buck. And I think that's exactly the situation we face with respect to Federal supervision of dealers in Government securities. There isn't any.

The SEC says to the Fed., "You have responsibility for the issuance of Government securities, so you do it. We don't have any authority to regulate Government securities dealers." And the Fed. says to the SEC, "You regulate other securities dealers, so you do it."

I submit, Mr. Speaker, that's exactly why we have the problems that we have right now in the Government securities market—problems that brought about the most extensive shutdown of financial institutions in the United States since President Roosevelt's bank holiday of 1933.

The SEC and the Fed. are passing the buck back and forth while savings and loans, communities, and hundreds of thousands of depositors are paying the price.

I might note parenthetically that the bank holiday declared by Roosevelt occurred on a March 5. ESM was placed in receivership on March 4, 1985—1 day of the 52d anniversary of that bank holiday.

This legislation would bring previously unregulated dealers in U.S. Treasury and Government agency securities under Federal surveillance by expanding the authority of an existing self-regulatory organization, the Municipal Securities Rulemaking Board, by renaming the MSRB the Public Securities Rulemaking Board, and by providing for the inspection of books and records of Government securities dealers. The National Association of Securities Dealers, the SEC and the Federal Bank regulatory agencies would be responsible for enforcement.

The legislation has the advantage of expanding the authority of existing agencies and organizations rather than creating a new regulatory structure.

Passage of this legislation will go a long way toward assuring the kind of protection that investors and the American public at large have a right to expect but have not received from the Federal Government. I ask for the support of my colleagues for this important measure.●

GENERAL LEAVE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise in continuation of the subject matter which had to do with my advice to the privileged orders in which I have stated on past occasions included my colleagues because we are part of the privileged orders of this country, both in a political sense as representatives of the people, as well as in economic power. A little better than one-third of the Senate is in the millionaire class and a comparable situation exists even here among us, so we are very privileged.

I am going to, by way of parenthesis, because of a combination of things, one the coming vote on the $35 million that the President is requesting in direct military aid to the Government of Guatemala, such as it is. It is an out-and-out military dictatorship. Certainly nobody can say there are any more freedoms there than in any other closed society, whether it is communistic totalitarian, fascistic totalitarian or oligarchic totalitarian, and the President is asking us to provide for the first time in several years direct military assistance to a government that is exterminating, committing genocide, among the poorest of the poor of the poor in the world, the Indian tribes up in the mountains and in between in Guatemala who have been forced at intervals to flee into the neighboring Provinces or States of Mexico and pursued by Guatemalan soldiers, and in the name of eliminating Marxist-Leninists have been ripping open the bellies of 6- and 7-month-old children, all with American-made material, every bit of it. There is none of it that is Communist originated. It is all 100-percent American bayonets and rifles and other implements of war.

After hearing the newspaper comments about the President's request for the $14 million, which is actually a deceptive amount because the President's discretionary budget in less than 2 years has increased exponentially 750 percent and, in fact, that incremental increase coincides with the Congress cutting off direct aid to the so-called Contras in Nicaragua which have been financed up to now, led up to now, by our CIA, which in turn has been conducting war. I call it Casey's war in Nicaragua and around.

What I rise, and what motivates my rising for is because of the imminent vote with respect to these two issues, and the fact that it looks to me as if the President once again through his ability, through the powerful intercession of very powerful groups, some of the most powerful in our country, will be able, I think, to have better than a 50–50 chance to get that money in a way that means his policy is irreversible and the consequences I do do not think have been realistically presented to my colleagues in Congress, despite the fact there are colleagues who have spoken against the aid, but the reasons they give and the reality of the situation, not only in Nicaragua but in the rest of that area, because let me advise my colleagues, we might think it is a simplistic thing because of our invasion of the tiny place of Grenada to concentrate and isolate Nicaragua, but let me tell my colleagues, you will never do that because the entire area will go up in flames, as it is already, certainly after an investment of about $2 billion in the smallest republic of all, El Salvador, in which 4 years ago this President and his then-Secretary of State drew the line. We are still back on square 1 there.

So obviously there is something wrong with the assessment of the problem there. What is wrong? Well, I think that in my opinion it has been reflected in the statement of those supporting the President in this request that we will get within 48 hours and those supporting him outside of the confines of the Congress that represent forces that can raise $6 million, for instance, which incidentally were found on the plane that went down in Texas and was headed for D'Aubuisson, the murderer of the Archbishop of El Salvador and the 4 American nuns and the 4 Scandinavian reporters and the countless 50,000 Salvadorans, the majority of whom have been murdered by the so-called death squads, or what D'Aubuission calls glory squads or escuadrones de gloria. D'Aubuisson came to the United States; in fact, he was wined and dined right here in Washington, DC, and $6 million in cash was headed down that way. Unfortunately, the plane landed where it should not have in Texas. Where the money is now, I do not know. The newspapers have not reported it. But that is just one. The countless millions that have left Miami, for instance, or Florida, are still to be accounted for, yet that was the main source of financing for these elements that are determined to keep the cloak and the suffocating mantle of oppression on the masses south of the border, and my colleagues, let me advise you, the day when we could do, and this President is invoking actions that we called gunboat diplomacy back when Calvin Coolidge sent the Marines to Nicaragua in 1929, and what was the reason he stated for sending the Marines there—in order to stop Mexican bolshevism from being exported. Today it looks hilarious, but it is no more hilarious than I know history will show some of the utterances we have heard on this House floor with respect to a misinterpretation, a misperception of what that world is south of us.

□ 1330

In the first place, we have never wanted much to pay attention. We are not going to maintain and create and

bring about a purity of ideology. We have got to make up our minds, what is our policy going to be? Is it going to be to strive for ideological purity? If that is the case, not only in Latin America but everywhere else in the world, we are going to have an eternal struggle that we cannot win.

You cannot bomb communism out of existence. The only way is through social justice. The people in these countries south of us and elsewhere would much rather have the help and the understanding of the United States. There still is a reservoir of good will among all of these that have been labeled as "Marxist-Leninists" simply because some members of the revolutionary factions who knocked out the most corrupt and most tyrannical regime of any in the history of the world happened to mouth the so-called dialectics of Marxism-Leninism. But even their recent election in Nicaragua is very eloquent in its results. Of all of the groups and parties vying for election, the one that received the least amount of votes, not even quite 6 percent, was the so-called Communist or the Marxist-Leninist group. In El Salvador, where you do not have one group but you have an aggregation of about five different rebel groups, the least numerous up to now and the one in the least position of power is the Marxist-Leninist component of those five rebel groups.

But the policy we have embarked upon under Ronald Reagan is one that will leave them no choice if we are trying to murder their leaders, as the CIA has for a couple of years, and if we are mining their harbors and blowing up their public facilities, as we have. We went before the World Court and lost the case. The World Court has found that the United States was guilty of acts of war by mining the harbors of Nicaragua.

What would we say if Nicaragua were to come and mine Chesapeake Bay? Certainly we would consider that an act of war.

So when my colleagues talk about Marxism-Leninism and the hypocrisy of Marxism-Leninism, let us keep the record straight. In Grenada, Bishop, who later was assassinated and his fate was doomed, told his story to anybody who cared to hear him when he came to the United States, and in vain he tried to talk to President Reagan, who would give him no audience. If you had bothered to talk to a man such as that, he would have told you that he would much prefer to have guided a course that would have been in coordination and not hostile with U.S. policy or interests.

The airstrip that the President justified for invasion, alleging it was being built by Communists, was actually under construction by a British construction firm, Plessey & Co. The Canadians, the British, and the French all had medical students on the island. They did not have to invade Grenada to get them out. They got them all out in good health, with no trouble whatsoever.

The truth is that the plans had been set for the invasion of Grenada to have taken place later than that month of October in 1983. But with the murderous assault and the death of 241 marines, all occasioned by the President's obtuseness and almost—in fact, I charge criminal neglect, criminal negligence, because everyone in the professional military that this Congress has raised moneys for, in order to have a professional military, including the Joint Chiefs of Staff, everyone to a man, had recommended against that; yet the Commander in Chief, willy-nilly and in obvious and callous disregard of the safety and well-being of those marines, allowed them to stay for 14 months, as we were constantly being told, and allowed them to be murdered, and he has escaped that responsibility. It is very much like I remember, when I was in school, the propaganda of Herr Goebbels, the "big lie." If you just tell it often enough, it is going to be sold. I never thought I would see it being performed so well and so successfully by American leaders such as the President, because the invasion of Grenada took place less than 48 hours after that catastrophe in Beirut.

Everybody in the world knows that the dateline of the invasion was hastended and moved up to take away not only the country's opinion but world mind from the catastrophe in Beirut.

But have we learned anything? Absolutely nothing. We are about to pursue an equally disastrous course of events, as I have been saying, now since April 1, 1980, and certainly at that date President Reagan was not President; it was President Jimmy Carter. My plea has been made, and in fact the only thing that could possibly save us would be an immediate reversal of policy and an approach on the true basis of a brotherhood of nations in the Western World such as we have given lip service to in the treaties of the OAS, in the Rio Pact, and in the Punta del Este Pact, all of which President Reagan violated in his invasion of Grenada.

This is what the American people have not been adequately told. There was not one country in the world, from England to West Germany, that has endorsed the U.S. invasion of Genada. The only countries that did—and in fact our Secretary of State as much as arm-twisted them—were five client states that depend absolutely economically on us for our handouts, and the State of Israel. These were the only ones that said anything favorable about the invasion.

The truth is that with that, the President destroyed any kind of ability for moral leadership in the New World. This is what they want.

If I had my way, what would I do? First, I would pull out every soldier we have south of the border right now, and instead of tanks, I would send water tanks, I would send doctors, I would send nurses, and I would let the missionaries who are so religiously dedicated to God be able to work there without getting assassinated by the goon squads that our conservatives are paying money to support.

Yes, that is what I would do. Instead of soldiers, I would send a doctor and a nurse. Instead of rifles, I would send grain and food and supplies. I would do the reverse of what the Secretary of State did just 2 weeks ago, and that was go before the Inter-American Development Bank and prohibit a line of credit to the Government of Nicaragua. War? We are at war. The President has committed acts of war. He is waging war. He has surrounded Nicaragua with 30,000 of our military. What more do we want? The paper last week said that an American had been reported killed. Well, that is just the 18th. We have already had 17. They have not been reported as such.

We have not had any accountability because we do not want any. This Congress has let organizations such as the CIA operate in such a way that they now have the power of war or peace. That responsibility that the Constitution places in this Congress, and only in this Congress, to declare war has not only been blithely but arrogantly ignored by the President who could just care less and snap his fingers at the very laws the Congress passed in 1974 such as the War Powers Limitation Act.

I have introduced a resolution. I think that I have put my actions where my mouth is, and many months ago, I introduced a resolution in which I am charging that the President is in direct violation of the War Powers Limitation Act.

□ 1340

I allege specificities, but even more, since September of last year when the Defense Department admitted at last that it had given an untold number of aircraft and other military material to the CIA for use against the Sandinista government in Nicaragua, where we have had servicemen, active duty servicemen, who have been asked to go on chores and missions that would be in direct violation of the War Power Limitations Act, so these men have been told, "If you get caught, we are going to disavow your membership in the armed services, and if you get killed, the same thing."

Now, what is different about that than when we started out in Vietnam? Nothing. It is identical.

I am saying to you, my colleagues, woe unto you if you ignore the obvious bankruptcy of what this President might still call a policy, but which is not a policy. If he is ideologically turned on and wants ideological purity in the countries south of us, then why does he not follow a consistent course when he goes to China? Certainly nobody in the world, including the Chinese themselves on the mainland say they are anything but a Socialist and Communist nation. Yet, Mr. President, what was the extent of your military secret agreement with China? Why have you not reported that to the Congress or to the American people? Why is it you can blink your eyes at those Communists?

If we follow the same line that we cannot abide some self-programmed and stylish Marxist-Leninist in the Government of Nicaragua, then why not invade France? France has two Communists in the French Government. Why do I not hear one of your colleagues getting up and reading secret documents about how the two French Communist cabinet members are plotting to take over France?

I will tell you why, my colleagues, because they have an outworn misperception, enough mischief, enough price in blood and treasure it has cost us. If we had had the right perception, would we have lost over 50,000 men in Vietnam? I do not think so.

Now, you might say, "You want to pull out every man that we have there and let the commies take over?" That is an absurd question.

If our soldiers, such as we have now, are the things that are holding back communism, then, my friends, you might as well stop now. You might as well then declare war; but you know you cannot and have the decent respect of mankind throughout the world.

We know and you know that we have been conducting war. You know and I know, or you should know, that the President's discretionary budget, what he does not have to account for, has grown 750 percent in less than 2 years. How much of that, Mr. President, have you sent down to the Contras through the CIA without accounting, since Congress directly shut off those funds?

I ask that, Mr. President, I want to know how you can come and have the nerve to ask us to cut out all of the farmers' home programs and yet in the name of trying to balance the budget and reduce the deficit while your own personal discretional budget has gone up 750 percent. I want to know that and I think, my colleagues, that is a question you yourselves ought to be asking. How can any of you join in this litany or chorus of saying, "Me, too," but not as much in the name of reducing the deficit that was created by the mischievous policies of not only this President, but the then Congress as well.

You cannot drain away the Treasury and not expect to have a deficit and when you reach the point as a result of the action this Congress sanctioned in 1981 and generally approved throughout the land and at the President's insistence, and he signed that tax bill, you now have—what? You have the richest of the rich paying not one penny of income taxes. You have the largest corporations not only not paying any such taxes, but getting as much as $300 million in tax credits from smaller corporations that they purchase them from. That is wrong. That is sinful, my colleagues.

I say woe to a lighthearted approach to the vote you will be asked for. This is an opportunity to review the whole mistaken course, the bankrupt nature of this President's approach to the problems that happen to lie to the south of us. If, indeed, and in fact what I hear from some of you and the President, you are more preoccupied with having ideological purity, then I say to you, you will soon be asked to pay a price that you do not now visualize, nor do I think soberly considering you would be willing to approve.

Why do I say this? Because every single professional military, not the political military, and remember, we have them, we have political generals, we have always had them. We had them during the Mexican war. We had them every time an occasion has risen and we have them today; but I am talking about the professional soldier. I am talking about such men as General Myers who retired about 2 years ago. What were his words, Mr. President? You are the Commander in Chief. I think they are worth looking up, because he will tell you that in order to engage in acts of war in which you will be calling the military to implement your falling and failing diplomacy, we do not go to war and nobody, no nation calls the military until they have failed diplomatically, and this is our confession of utter and abject diplomatic failure to the south of us, individually and collectively.

I say that the professional will tell you, in fact, one of the political generals has said already and he has been in a position of command in those areas, that the Contras or anybody else that you want and are even asking private groups in violation of the Logan Act, this just 3 weeks ago, Mr. President, you were saying, "Oh, you private people, you are doing right. Keep on sending money. If I can't get the Congress and the Congress won't give it to me, you do it." That is a violation of the Logan Act and that is, of course, a contemptuous attitude toward the Congress which I think adequately reveals the President's size-up of the Congress.

The professional military will tell you the Contras can't do it. You have got to go in direct.

I say and I will tell you this in all soberness, my colleagues, if we persist in what I think now is an irreversible course, you will soon see that the call will have to be for at least 100,000.

Now, let us ask some real questions. Let us ask some questions and let us look at what we have done already in Grenada.

Well, the President said then he was going in to save lives. He said this 24 hours after he invaded. He had to think of some international law he could seize and that we would be out of there before the week was out. Well, we still have the troops there.

□ 1350

And it was the only way we could have any kind of what we called an election. The American troops had to be there.

Well, what is Grenada? Grenada is about the size of the city I represent, San Antonio, in geography; in population, it is about one-tenth. The police force in Grenada could not even stand up to the police force or an invasion of the police force from San Antonio, TX. Yet we expect anything but ridicule from the rest of the world.

Now, in that tiny island, we had to come in, we had to take it over, we had to occupy it, and we had to supervise elections.

Now, you take a country like Nicaragua. We would have to go in. If you think, my colleagues, that the so-called Contras, over 85 percent of who are ex-Samosistas, hated to a man in the interior of Nicaragua, if you think they can govern Nicaragua, what an abysmal error you will be making. It will take the United States not only going in militarily taking possession of the country; it will require the United States ruling the country, remaining in possession of the country, stationing at least 100,000 troops in Nicaragua, at least, and then forever and a day facing sporadic guerrilla attempts.

The very name, Sandino, is taken with good cause down there. That name evokes the resistance to what they call the North American invasion of 1929 which Sandion was a hero resisting. And we had to stay in occupation of Nicaragua for almost 10 years.

Then we had to train what turned out to be the national guard of Nicaragua, and install the Somoza tyrannical regime, and then continue to uphold it through the years. It finally got so rotten it half fell out itself. But also because the people themselves finally got fed up.

But we have been imposing that type of regime all up and down from the Rio Grande to the Rio Platte.

I say, my colleagues, that that day is gone. It is another world. If we want

to think that this is going to be the approach in Nicaragua, what is it going to be when Guatemala blows up? And it is in the process of blowing up. Guatemala is even larger, and what is more, it is next to Mexico.

What are we doing about the 50-percent inflation and the 50-percent unemployment in Mexico, the consequent pressure, the fact that our policies in El Salvador alone where we talk about, and some of my colleagues talk as if the Communist takeover you will see a great mass exodus. We already have it. We have it now.

In my city and in my area, we have just as many Salvadoran refugees or illegals, depending on the point of view, as you have Mexican nationals. So who is addressing that issue? I hear no debate on that subject matter. I hear nobody talking about what is going on in Guatemala.

If suddenly we find that through our policies we give no alternative, absolutely no alternative, if I were in that government in Nicaragua, and the United States was trying to kill me off, bomb my harbors, bomb my public facilities, destroy the coffee crops on which I depend for some kind of minimal economic existence of the regime, and the Communists are the devil with pitchforks, horns on his head, tail on his back, who came and said, "I will help you," you bet your life I would take help, for self-preservation if nothing else.

This is the reality.

Now, the reality also is that we cannot expect ideological purity because countries south of us we look upon as sort of vassal states and then say, though, that we will accept ideological impurity, but let us see on a grander scale what it is we should be concentrating on. If we were true to this ideological business, why did not the President succeed with the Russians in stopping the Russian construction of the gas pipeline which is fully operational now into West Europe? Maybe the reason is that the very people that have supported him financially were the controlling interests financially speaking of the pipeline companies in which Mobil and Exxon have the controlling interest, and they in turn are controlled by the Chase Manhattan, the First City National Banks.

But now these are the banks that are so overstretched in bad loans to these very same countries, Nicaragua, Mexico—but not so much Nicaragua—but Mexico, Brazil, Argentina, that they were foolish enough to lend more than 100 percent of their capitalization structure. If your little bank in your city were to do that, it would have been declared illiquid or bankrupt by now.

Now, these are the forces that are controlling the policies of this administration under this President. These unseen, unaccountable, manufacturers of great corporate worth, they could care a tinker's hoot for the general interests of the American people who are being victimized now with extortionate rates of interest, which in turn has made it attractive for foreign capital now, fickle foreign capital, to determine such things as the fate of the Illinois Continental Bank which we have nationalized. If Mexico had done this to a private bank in Mexico, we would say it had nationalized the bank. We did it, but we call it "bailing it out."

Now, the President says that even if it took $5 billion plus to do that, it was all right. But $250 million to help communities take care of the homeless, most of whom are now homeless because of the direct policies that the President calls Reaganomics and with which the majority of the Congress here at critical moments have gone along, this is why I would say that realistically looking at it, when the vote comes up on the so-called aid to the Contras, you will be made to appear disloyal to the President—not the issue as to whether he is violating the War Powers Limitation Act. He is the one that ought to be here before us accounting; not us accounting to him.

Yet we live in such a day and time in which the American people have very little choice as to their discernment and their ability to evaluate if they are not provided the facts involved. If they are provided not white papers from the State Department, the same State Department that could see nothing wrong with calling the Marines "peacekeepers" while injecting them into one of the most explosive areas in a most unmilitary fashion, in a way that was calculated to bring about disaster. It is the same State Department that knows what is going on while it has a duly acknowledged Ambassador in Managua, meaning that we say to the world that we accept that regime. If the President wants us to wage war, he ought to come before the Congress.

My resolution says, "Mr. President, the Congress has not declared war, so you stop making war. You are proceeding illegally and you have proceeded illegally. And even though you have been encouraged by your ability to manipulate a pluralistic body such as the Congress"—after all, there are 535 individuals and it is not just one man and a cadre of six or seven strong men around him actually writing the script for his speeches.

□ 1400

The President is an actor that has to have a script. As I said even during the campaign in 1980, and I predicted then, my colleagues, not now, I predicted in 1980, except it sounded so farfetched, I was accused of being a bitter partisan; I told the people in my area, I said if Mr. Reagan happens to get elected, you are going to see your children fighting in the jungles of South America and Central America. How farfetched does it seem now? Well, maybe it still does. Maybe the President can sell you on the fact that it will not go beyond aiding Contras. But you should know and you are charged with knowledge; no Member of this body can say that he has no knowledge as to what the issue really is. And the issue, simply put, is this: Are we or are we not going to develop a policy on a national basis that will distinguish between these social upheavals that are purely indigenous, that are native civil wars, that have not come about because of external pressures be they Communist, be they what have you, and those that perhaps are; I say this is an important and a critical distinction we had better start making. The President obviously is not going to, so it is up to us in the Congress to do it. I urge everything—it is an ill wind that blows somebody no good—but the truth is that this discussion that will be brought about on the $14 million specifically and the $35 million for Guatemala, can give us an opportunity, if my colleagues see fit, to bring it into focus, to hold the President accountable, which you have not been willing to do.

The last time, which was the year before last, there was a meager discussion on the so-called War Powers Limitation Act, it did not turn out to be that at all. Rather the issue was: Are you loyal or are you disloyal to the President? And this is the way it will be again.

I was here at the time of the Gulf of Tonkin resolution and the same thing will happen. The scenario has been set. Let me tell you something else I said before this last election. I said this at home and I said it in six other States. I said: If it looks as if it will be a close election, you will see these headlines before the election. If it does not look as if it will be a close election, as soon as the elections are over with, you are going to see these headlines, "Migs in Nicaragua."

My friends, I ask you to tell me, is that not what happened? And what happened after that pronunciamento? They discovered they were not Migs. But we keep on going. And if Nicaragua gets Migs, I for one will not be surprised. I will not be surprised because we have been waging war and the law of self-preservation says you do everything in your power to stay alive. This is a basic law of life. As Khrushchev said when Gary Powers was shot down, "All living things want to keep on living." This is true. It is a universal truth.

And we must never forget that history, very immediate history, has given us ample opportunity to examine and reexamine, but we do not. We are

about to be asked to vote a massive increase in what is called a defense budget; to $315 billion. I say it is a war budget. Why do I say that? Because the basis upon which all of the debate, such as it has been on that issue, there is not even a mention of the changed nature of the world in Central Europe.

I think that the completion, after the attempt of President Reagan to try to stop it, of the natural gas pipeline from Siberia into Western Europe should give us reason to examine.

We ought to be a little bit more knowledgeable about what is going on in West Germany, in Middle Europe; even in England; because we are asking the American people to tax themselves 315 billion dollars' worth based on an assumption that is really, in my opinion, a misperception.

In Germany we have on the threshold of power a generation that does not remember World War II. In fact, the present German leader, Kohl, was 15 years of age. The Russian new leader was 15 years of age. They are contemporaries.

Yet, in reading what the President said, in hearing the debates from my colleagues, my conclusion is that the mindset is on a Europe of 1946-47.

My friends, that is a calamitous mistake. We have the same mindset. We have a President that says, "I am going to make them cry 'Uncle.'" When he came back from his trip, it will be 3 years this next autumn, from South America where he visited four or five countries down there, the first words he said after he got one place wrong, when he landed in California was, "Gee, I didn't know they were that different."

My friends, the luxurious days in which we could afford that incompetence in leadership are gone forever. And I am saying to you that we have set in motion forces that inevitably are going to suck you and your children and your grandchildren and your great-grandchildren and mine into an eternal hostility and enmity with the very people that fate says and decrees we shall share the future.

Do we want to make out of the New World another Balkan situation, another Europe with ancient hatreds still to be healed?

France, remember, is not a member of NATO. Why not? Why did France pull out? Nobody ever discusses that. The President says he will not visit the horrible camps of the Holocaust, Buchenwald, because it will hurt German feelings. But he is going to lay a wreath on the cemetery of the German soldiers that protected those incinerators, that fought against Americans and killed them; he is going to lay a wreath of flowers there.

What perversity have we reached? What is the big issue then upon which the assumption of $315 billion is based? I will tell you what it is. Among other things, the revival of those ancient hatreds and fears, what they call in France and in Russia, revanchism.

You have now in Germany strong movements of the Silesians there, that is from the province of Silesia, presently in Poland, they are demanding a return of that area to Germany. You do not read about that here; but why? Because we ignore the intricate, mixed-up history to which we have permitted ourselves to get drawn in, with the luxury of thinking that we can escape with no harm, with no sacrifice. And I say that one cause has brought about the other problem?

If you have the horrible situations which the masses south of us will no longer tolerate, and they have for 250, 300 years, they will no longer, my friends. It depends on how we want to meet it. Will we be on the side of those people whose aspirations no longer can or will be thwarted? Or do we want to continue and persist to defend the oppressors and the exploiters?

□ 1410

I think that given a clear, clear issue—to me it is clear—I would hope and I would pray that the decision would be: Yes, it would be uncomfortable to think that Ortega says he is a Leninist and we overlook the three priests, who obviously are not Marxist-Leninists, or whatever you want to call them in that same Government, but the people themselves, there is not a person, American or any other visitor from any other country that will tell you that that regime has undertaken an out-and-out Marxist-Leninist or socialist course.

Up to now, it is a mixture. But how long will we allow them, when we are trying to disrupt their economy; we are trying to reduce them, bring about hardship so that the people have become unhappy with that regime.

It is not going to happen. The Sandinistas are not going to roll over or cry "uncle"; they are going to fight. When our American soldiers invade, they are going to have to kill peasant women, children, grandmothers, and grandfathers. They will have to go into the barrios of Managua where the people have built barricades and sandbags and take every corner by corner.

The question is, my friends, so certainly we are against communism, but we are not going to bomb communism out of existence. I thought we would have learned that long ago. I thought we would have learned it in 1918 when we and France and England invaded Russia to try to put down the Russian Revolution—which they have not forgotten, and could not, and we have not in any other comparable instance, whether it was the Mexican Revolution or any other.

Coolidge gave the excuse for sending the Marines to Mexico because he said, "We don't want the sending out, the exportation of Mexican bolshevism"—that is what they called it then. They did not call it Marxist-Leninism; they called it bolshevism.

What happened? You had the then Mexican President, Elias Calles, who had up to then taken a sort of a disinterest, but with the American invasion, sending arms to the extent they could, to help Sandino.

We have invaded Nicaragua six times in the 20th century. My friends, maybe we have not noted it, but they have not forgotten it. When the same thing starts happening in Mexico, and we are headed that way for this reason: The CIA has been trying to destabilize the present Mexican President. What an egregious error.

Why do that? Because we think we can compel the Mexican President to join us a little bit in our mistaken course in Nicaragua. Well, you are not going to do it. Neither will the other Contadora nations do it. Some of them have gone as far as they can in denouncing the Communist influence, but they also recognize, as the President of Argentina came here last month and told us to our face, the integrity of the civil war as being indigenous and native and not one imposed or presently carried on by external forces.

There are no Russian soliders, and it would be quite a story.

Let us look at the course and see the mischievousness and the out-and-out prevarication. They call our President the great communicator. I say he is also the great prevaricator, and I will tell you why, on the record.

The reason first given this Congress for the moneys to the contras and others, advisers and training Salvadoran troops in Honduras, which is another abysmal error, there has been strains through history between those two countries; neither one of which has had 1 day of democracy in their couple of centuries of existence.

We are not in Honduras with the permission of the people through their representatives. We are occupying Honduras. But when the President first started out he said: We want to stop the shipment of arms that are emanating from Nicaragua and going to El Salvador.

Here is it, 3 years later, and there has not been one interception of one kind of cargo or another from Nicaragua to El Salvador. You know that if they had, that would have been headlines for 60 days. So that goes out the window. The President does not talk about that anymore. Now he is saying Oh, yes, the revolution started out indigenous.

But now it has been taken over by Communists, and we have just got to knock them out.

So that unless we remember this course of events, we will replicate the

other costly, now-considered to be errors. Costly in blood and in treasure; in my opinion unnecessarily.

The United States, as I have tried to say it was my advice to the privileged orders then, in 1980 to President Carter, was, "Look, the United States still has a little vestige of remaining leverage of leadership in the New World. Please use it. Before you decide to go unilaterally and especially militarily, try the other. You still have a reservoir."

That has been blown out of the water. I doubt that we have that, but I think that if we were to show first and honest and a policy of integrity, one that could be trusted, that we could pull out every single soldier that we have south of the border with no harmful effect.

I will tell you this, and I said this about the Vietnam war—and remember, the President then was a neighbor; certainly he was not of the opposite party, but I said it then. It antagonized him, but I did not go around here and I did not double up my fist and go around shouting the concatenation of noise: "Hey, hey, L.B.J., how many babies have you killed today" so that those latecomer protesters now are saying that I was prowar because I did not. They do not examine the record.

I was the one that introduced into the House of Representatives—not in 1967, not in 1968, 1969, but in 1965, the Senator Ernest Gruening resolution. He was a friend of mine. He had a resolution, I introduced it in the House and obtained 70 cosponsors.

What did that resolution say? It said, Mr. President, why don't you pull out and go under the aegis, like you did in Korea, of the United Nations?

Yes, I was criticized. It offended the President then, and many friends in Texas, but the record shows that that is what I did. I also was the only one, and continued to be the only one, except that right now it is not hot.

I will say this, that draft will be an issue if we persist in this course that we are following in Central America. You will be facing the possibility of draft calls; you certainly will see the Ready Reserve called. When you do that, if it is going to take 100,000 you are going to have to pull them.

Are you going to pull them from Korea? Are you going to pull them from Germany where we have 300,000? Are you going to pull them in from the Middle East? No. So you are going to get the Ready Reserve.

When you do that and the casualties start coming in, you will have draft calls. Let the record show, so that nobody can say that they were not charged with knowledge, at some future date—I do not think too far from now—I hope not; I pray to God I am dead wrong, as I have all along on some of the things I have felt impelled to come out and say.

But like that other issue that I raised in the sixties, the issue of conscripting an unwilling American into an undeclared war without a declaration of war.

□ 1420

I have maintained all along that not only was it unconstitutional but it was in direct violation of the original Draft Act of 1941. In fact, that passed by one vote, and the only reason it got that one vote was because they had to enact a clause saying that no person subject to that act would be compelled to serve outside the continental United States against his will unless a declaration of war by the Congress or otherwise specifically provided so by Congress.

But then through the course of events we all have been under the impression World War II is over with. Let me remind you, my colleagues, there has been no peace treaty. In fact, that is what the German leader Kohl told these groups protesting and wanting the reacquisition of Silesia. They said, "Wait until we have a peace treaty."

Well, how are you going to get a peace treaty if we cannot get together with the other war ally, Russia, as to what you are going to do about German reunification?

We are the ones who have rearmed Germany. We started. We are the ones who finally, after all of the bitter debates of the 1950's, when NATO was being formed and the question of the deployment of the bomb, never, they said, will we have the German finger. Now we do. This was the real issue. When have you debated it here? You thought you were voting on what? To allow the money so that Pershing II could be deployed? Well, there was more than that involved, and that is that for the first time we have the German finger on that trigger right there with ours.

Just like Maggie Thatcher. She may be a Tory, and what have you, but she knows her own national interests. And when we wanted the cruise missile deployed, she said, "Yes, if we have comanagement."

THE UNITED NATIONS IS A GOOD PLACE TO START CUTTING THE DEFICIT

The SPEAKER pro tempore [Mr. VISCLOSKY]. Under a previous order of the House, the gentleman from Arizona [Mr. RUDD] is recognized for 15 minutes.

Mr. RUDD. Mr. Speaker, I have asked for this special order today to call attention to the strong anti-American bias of the United Nations and to suggest that—as we look to cut the deficit—the United Nations is a good place to start.

Recently I introduced legislation, H.R. 1908, to cut our Nation's contribution to the United Nations to a level that is proportionate to the U.S. share of the professional staff employed there.

Since 1977, the total number of Americans working in key staff slots in the United Nations Secretariat has fallen—from 536 in 1977, to 501 in 1980, to 485 in 1983, and 477 in 1984. Our share of the total last year was only about 15.5 percent, despite our contribution of some 25 percent of the U.N. budget or more than $1 billion annually. Even U.N. Secretary General Javier Perez de Cuellar admits that the number of U.S. citizens in senior and policymaking positions is well below the "desirable" range and is falling.

An agency-by-agency breakdown of U.S. staffing and financial contributions for the United Nations, prepared by the Department of State, indicates how badly we have been shortchanged in our representation there. I insert the breakdown in the RECORD at this point:

NUMBER AND PERCENTAGE OF SELECTED PROFESSIONAL STAFF [1] IN THE SECRETARIATS OF THE U.N. SYSTEM (AS OF DECEMBER 1984) AND PERCENTAGE OF ASSESSED CONTRIBUTIONS TO THE REGULAR BUDGET [2]

Agency	Total staff	U.S. staff	Percent U.S. staff	Percent U.S. contribution
United Nations	3,078	477	15.50	25.00
Food and Agriculture Organization	867	76	8.77	25.00
International Civil Aviation Organization	178	16	9.04	25.00
International Labor Organization	544	48	8.82	25.00
International Maritime Organization	58	3	5.17	4.96
International Telecommunication Union	182	13	7.14	7.63
United Nations Educational, Scientific and Cultural Organization [3]	863	82	9.50	25.00
Universal Postal Union	58			4.70
World Health Organization	1,017	136	13.37	25.00
World Intellectual Property Organization	74	4	5.41	5.46
World Meteorological Organization	85	7	8.24	24.51
International Atomic Energy Agency	563	96	17.05	25.85

[1] Internationally recruited and financed from the agencies' regular budget.

[3] The United States withdrew from UNESCO on Dec. 31, 1984.
Source: Department of State.

Dr. Arkady Shevchenko of the Soviet Union, who was Under Secretary General for Political and Security Affairs until his defection in 1978, observed how very vital that a more prominent American presence be exercised at the U.N. Secretariat. He explained that the Secretariat is extremely important in setting the tone at the United Nations by drafting committee resolutions, setting up expert terms, preparing reports, and carrying on a wide variety of other tasks which affect the degree of politicization of the organization.

The Soviets are well aware that strategically placing its people in the U.N. bureaucracy can be of considerable use to its Government. Through years of

clever maneuvering, Moscow has captured key Secretariat posts, and along with them, access to personnel files—used by the KGB to recruit new agents—and the Department of Public Information—used for propaganda purposes.

According to Dr. Shevchenko, more than a third of all Communist bloc nationals in the Secretariat are officers of their respective secret police under the direct guidance of the KGB. Their activities range from direct recruitment of Secretariat employees, gathering information of a political nature from U.S. employees and diplomats, to using the United Nations for espionage activities throughout the United States.

The Soviets have also been more successful than the United States in the number of high level posts it has held. In 1977, 12.7 percent of the total posts held by the Soviets in the United Nations were high level, with 10.5 percent for the United States as a proportion of its total posts. By 1983, the number increased to 15 percent for the Soviets, but dropped to 9.7 percent for the United States.

The results of this maneuvering by the Soviets, and the importance of capturing key U.N. posts, can be seen in the U.N. work itself. While an unwritten but strictly observed rule at the United Nations ensures that the Soviet Union is never denounced by name in a U.N. resolution, the United States is often singled out for such attacks. In 1982, 14 separate resolutions denounced the United States by name; in 1983, the number rose to 16.

The United Nations could not even strongly condemn the Soviet Union's barbaric shooting down of Korean Air Lines flight 007 in 1983, The U.S. delegation only managed to muster a bare minimum of votes for a watered-down resolution requesting an investigation of the incident and criticizing the Soviets mainly by implication. Even that worthless resolution was later vetoed by the Soviets.

Another example is the annual U.N. resolution on the Afghan situation which carefully avoids mentioning the Soviet Union despite the presence of some 100,000 of its occupation troops there.

The General Assembly's voting habits, too, reveal the far-reaching anti-American bias of the organization. In 1981, the United States was in the minority on 77 percent of all recorded votes; on 84 percent of the votes in 1982; and on 81 percent of the votes in 1983. By contrast, the so-called nonaligned nations, which comprise a majority of the U.N. members, vote with the Soviet Union about 85 percent of the time on average. Only 25 percent of the time do they side with the United States.

The State Department, responsing to a request from the 98th Congress, recently issued a report on voting practices of member nations at the United Nations. We ought to keep the findings of this report in mind not only when reviewing out contributions to the United Nations, but also in conducting our relations with various nations and when granting foreign aid. The State Department information on voting practices of member nations follows:

Certainly other nations have the right to disagree with us, but such lopsided voting patterns, the disproportionate share of the burden borne by the U.S. taxpayers in financing the United Nations, and the lack of adequate representation in key staff slots raises simple questions of fairness. By any standard, we are being used and abused at the United Nations by the Soviets and Third World Nations.

The voting procedures of the United Nations may even be used to prevent the United States and its allies from voicing their opinions or promoting their policies at the United Nations. This was the case during the 38th General Assembly when it imposed a "gag rule" to prevent the United States and others from speaking in the debate on Grenada.

That the United Nations promotes peace and provides a forum for arms control is also a folly. Arms control accords are concluded between the United States and the Soviet Union outside the framework of the United Nations Assembly. Despite its basic mission to keep the peace, the organization has also failed to prevent some 140 military conflicts since 1945 in which up to 10 million people have died.

The United Nations has also managed to redefine the term "human rights" to emphasize economic rights rather than traditional concern for political and civil liberties. As a result, the United States and other Western nations are roundly denounced for causing problems confronting the Third World. The organization has attacked free enterprise, and endorsed the right of nations to nationalize foreign businesses. It has, through agencies such as UNESCO, challenged the freedom of the press.

It supports the self-determination of peoples and national liberation movements, but only when they are friendly to the Soviet Union or opposed to the West. The Palestine Liberation Organization and the South West African People's Organization are championed, while the freedom fighters in Nicaragua, fighting repression of basic human rights by the Sandinistas, are shunned.

Our national interest are not well-served by continuing to finance this organization without question. If we aren't willing to withdraw from the United Nations altogether—that is something we should seriously consider—we should at least make a substantial reduction in our contributions or ensure that we control key staff slots there. I urge my colleagues to join me in cosponsoring H.R. 1908 to make our contributions proportionate to our share of the professional staff at the United Nations. I hope we will seek reductions in U.N. funding when we consider state Department authorizations later this year.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. DINGELL, for 5 minutes, today.

Mr. RUDD, for 15 minutes, today.

(The following Members (at the request of Mr. SUNDQUIST) to revise and extend their remarks and include extraneous material:)

Mr. BEREUTER, for 60 minutes, April 17.

Mr. BEREUTER, for 60 minutes, April 18.

Mr. GINGRICH, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, April 16.

Mr. GINGRICH, for 60 minutes, April 17.

Mr. GINGRICH, for 60 minutes, April 18.

(The following Members (at the request of Mr. ALEXANDER) to revise and extend their remarks and include extraneous material:)

Mr. PEPPER, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.

Mr. GEPHARDT, for 60 minutes, April 16.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. ALEXANDER, for 5 minutes, April 16.

Mr. ALEXANDER, for 5 minutes, April 17.

Mr. ALEXANDER, for 5 minutes, April 18.

Mr. GAYDOS, for 30 minutes, April 16.

Mr. GAYDOS, for 30 minutes, April 17.

Mr. GONZALEZ, for 60 minutes, April 16.

Mr. GONZALEZ, for 60 minutes, April 17.

Mr. GONZALEZ, for 60 minutes, April 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend was granted to:

(The following Members (at the request of Mr. SUNDQUIST) and to include extraneous matter:)

Mr. BARTLETT.

Mr. GILMAN in two instances.

Mr. CHENEY.

Mr. ROTH.

Mr. RUDD in two instances.

(The following Members (at the request of Mr. ALEXANDER) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. GONZALEZ in 10 instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. FLORIO.

Mr. GUARINI in two instances.

Mr. WALGREN.

Mrs. SCHROEDER.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER pro tempore announcement his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 17. Joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 28, 1985, as "Jewish Heritage Week."

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 35 minute p.m.) the House adjourned until tomorrow, Tuesday, April 16, 1985, at 12 o'clock noon.

CONTRACTUAL ACTIONS, CALENDAR YEAR 1985, TO FACILITATE NATIONAL DEFENSE

The Clerk of the House of Representatives submits the following report for printing in the CONGRESSIONAL RECORD pursuant to section 4(b) of Public Law 85-804:

THE SECRETARY OF TRANSPORTATION,
Washington, DC, April 2, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, DC

DEAR MR. SPEAKER: In accordance with the notification requirements of 50 U.S.C. Section 1434 (Public Law 85-804, August 28, 1958, as amended by Public Law 93-155, No-

vember 16, 1973) as implemented by Executive Order Number 10789, November 14, 1958, I am pleased to report that there were no Federal Railroad Administration contractors or subcontractors indemnified during 1984.

Sincerely,

ELIZABETH HANFORD DOLE.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

984. A communication from the President of the United States, transmitting requests for supplemental appropriations for fiscal year 1985 and amendments to the request for appropriations for fiscal year 1986, pursuant to 31 U.S.C. 1107 (H. Doc. No. 99-52); to the Committee on Appropriations and ordered to be printed.

985. A letter from the Executive Associate Director for Budget and Legislation, Office of Management and Budget, transmitting a report that the appropriation to the Bureau of Alcohol, Tobacco and Firearms for salaries and expenses for the fiscal year 1985 has been reapportioned on a basis that indicates the necessity for a supplemental estimate of appropriation, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

986. A letter from the Executive Associate Director for Budget and Legislation, Office of Management and Budget, transmitting a report that the appropriations to the U.S. Customs Service for salaries and expenses for the fiscal year 1985 has been reapportioned on a basis that indicates the necessity for a supplemental estimate of appropriation, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

987. A letter from the Executive Associate Director for Budget and Legislation, Office of Management and Budget, transmitting a report that the appropriation to the U.S. Secret Service for salaries and expenses for the fiscal year 1985 has been reapportioned on a basis that indicates the necessity for a supplemental estimate of appropriation, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

988. A letter from the Director, Office of Management and Budget, transmitting a cumulative report on rescissions and deferrals as of April 1, 1985, pursuant to 2 U.S.C. 685(e) (H. Doc. No. 99-53); to the Committee on Appropriations and ordered to be printed.

989. A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting a report on the current major defense acquisition programs (Quarterly Selected Acquisition Report) for the quarter ending December 31, 1984, pursuant to 10 U.S.C. 139a(b)(1) and (f) (96 Stat. 740); to the Committee on Armed Services.

990. A letter from the Acting Director, Defense Security Assistance Agency, transmitting information concerning the Department of the Navy's proposed letter of offer of defense articles in excess of $50 million to the Federal Republic of Germany (Transmittal No. 85-23), pursuant to 10 U.S.C. 133b (96 Stat. 1288); to the Committee on Armed Services.

991. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice that the Marine Corp plans to study the conversion from inhouse operations to private contractor performance of various functions at different installations, pursuant to 10 U.S.C. 2304 nt. (Public Law 96-342, section 502(a) (96 Stat. 747)); to the Committee on Armed Services.

992. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a listing of contract award dates for the period May 1, 1985 to June 30, 1985, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

993. A letter from the Secretary of the Navy, transmitting the determination that the development of a modernized A-6F aircraft and the initiation of second source production of the Phoenix missile have exceeded unit cost baselines, by more than 25 and 15 percent, respectively, pursuant to 10 U.S.C. 139b(d)(3)(A); to the Committee on Armed Services.

994. A letter from the Deputy Assistant Secretary of Defense, transmitting report that the Defense Logistics Agency indicates the necessity to exclude the examination of records by the Comptroller General clause from a proposed contract with the Government of Somalia, pursuant to 10 U.S.C. 2313(c); to the Committee on Armed Services.

995. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to increase the rates of basic pay, basic allowance for quarters, and basic allowance for subsistence for members of the Armed Forces; to the Committee on Armed Services.

996. A letter from the Secretary of Defense, transmitting a report entitled: "Report on Arms Control Limitations on Deployed Nuclear-Armed SLCM's and Their Verification"; to the Committee on Armed Services.

997. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a report on loan, guarantee and insurance transactions to Communist countries during February 1985, pursuant to 12 U.S.C. 635(b)(2); to the Committee on Banking, Finance and Urban Affairs.

998. A letter from the Secretary of Education, transmitting a notice of final priorities for Innovative Programs for Severely Handicapped Children, pursuant to GEPA, section 431(d)(1) (88 Stat. 567; 90 Stat. 2231; 95 Stat. 453); to the Committee on Education and Labor.

999. A letter from the National Foundation on the Arts and Humanities, transmitting a draft of proposed legislation to amend the National Foundation on the Arts and the Humanities Act of 1965, as amended, and for other purposes; to the Committee on Education and Labor.

1000. A letter from the Under Secretary of Labor, transmitting a report entitled: "Study of the Unemployment, Poverty and Training Needs of American Samoans"; to the Committee on Education and Labor.

1001. A letter from the Secretary of Transportation, transmitting a report that there were no Federal Railroad Administration contractors or subcontractors indemnified during 1984, pursuant to Public Law 85-804, section 4; to the Committee on Energy and Commerce.

1002. A letter from the Secretary, Interstate Commerce Commission, transmitting the Commission's determination to extend the time period for acting on the appeal in No. 38188, *Westinghouse Electric Corp.* v. *Alton & Southern Railway Co., et al.*, pursuant to 49 U.S.C. 10327(k)(2); to the Committee on Energy and Commerce.

1003. A letter from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notification of intent to approve manufacturing licensing agreements in Japan, pursuant to 22 U.S.C. 2776(d); to the Committee on Foreign Affairs.

1004. A letter from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notice of intent to issue commercial export license for sale of certain major defense equipment to Greece (Transmittal No. MC-11-85), pursuant to 22 U.S.C. 2776(c); to the Committee on Foreign Affairs.

1005. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed letter of offer to the Federal Republic of Germany for defense articles and services Transmittal No. (85-23), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1006. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a) (92 Stat. 993); to the Committee on Foreign Affairs.

1007. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions by Sheldon J. Krys, Ambassador and Extraordinary and Plenipotentiary-elect, to the Republic of Trinidad and Tobago, and members of his family, pursuant to Public Law 96-465, section 304(b)(2); to the Committee on Foreign Affairs.

1008. A letter from the Assistant Secretary for Congressional and Intergovernmental Affairs, U.S. Department of Commerce, transmitting a copy of a report of the Office of Export Enforcement [OEE], "Commerce Enforcement of U.S. Export Controls: The Challenge and the Response"; to the Committee on Foreign Affairs.

1009. A letter from the Chairman, Federal Home Loan Bank Board, transmitting the Board's calendar year 1984 report of its activities under the Freedom of Information Act, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1010. A letter from the Chairman, U.S. Merit Systems Protection Board, transmitting the Board's 1984 annual report of its activities under the Freedom of Information Act, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1011. A letter from the Executive Officer, National Science Board, transmitting a report covering calendar years 1983 and 1984 regarding the Board's compliance with the requirements of the Government in the Sunshine Act, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

1012. A letter from the Secretary of Housing and Urban Development, transmitting the Department's 10th annual report of its activities under the Freedom of Information Act, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1013. A letter from the Assistant Secretary for Water and Science, Department of the Interior, transmitting a copy of an approved application submitted by the Elsinore Valley Municipal Water District, Riverside County, CA., for a loan and grant under the Small Reclamation Projects Act (70 Stat. 1044, as amended), pursuant to the act of August 6, 1956, chapter 972, section 4(c)

(71 Stat. 48); to the Committee on Interior and Insular Affairs.

1014. A letter from the Assistant Secretary of the Interior for Water and Science, transmitting notification that the Bureau of Reclamation has approved a deferment of the 1984 construction repayment installments due the United States from the Glosgow Irrigation District, Milk River Project, MT; to the Committee on Interior and Insular Affairs.

1015. A letter from the Secretary of Transporation, transmitting a draft of proposed legislation to authorize the Secretary of the department in which the Coast Guard is operating to establish fees for Coast Guard services and for other purposes; to the Committee on Merchant Marine and Fisheries.

1016. A letter from the Administrator, Federal Aviation Administration, transmitting the revised National Airspace System Plan, a third updated edition of the original version published in December 1981, pursuant to Public Law 97-248, section 504(b)(1); to the Committee on Public Works and Transportation.

1017. A letter from the Acting Administrator, General Services Administration, transmitting a draft of proposed legislation to authorize the Administrator of General Services to continue to collect contributions of money for the Nancy Hanks Center provided to him by private individuals or organizations; to the Committee on Public Works and Transportation.

1018. A letter from the Executive Secretary, Office of the Secretary of Defense, transmitting a report on Department of Defense procurement from small and other business firms for October 1984, pursuant to SBA, section 10(d); to the Committee on Small Business.

1019. A letter from the Deputy Administrator, Veterans' Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to authorize the Administrator to provide respite care to chronically ill service-connected disabled veterans on a 3-year pilot test basis; to the Committee on Veterans' Affairs.

1020. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend section 411(a) of title 38, United States Code, to increase the dependency and indemnity compensation for the surviving spouse of the commander of the Coast Guard; to the Committee on Veterans' Affairs.

1021. A letter from the U.S. Trade Representative, transmitting proposed amendments to the Trade Act of 1984; to the Committee on Ways and Means.

1022. A letter from the Secretary of Agriculture, transmitting the third quarterly commodity and country allocation table showing current programming plans for food assistance under title I/III of Public Law 480 for fiscal year 1985, pursuant to the act of July 10, 1954, chapter 469, section 408(b) (91 Stat. 552; 94 Stat. 2246; Executive Order 11963); jointly, to the Committees on Agriculture and Foreign Affairs.

1023. A letter from the Deputy Assistant Secretary of Defense for Administration, Department of Defense, transmitting the fiscal year 1984 annual report of NATO acquisition and cross-servicing agreements entered into by each military department, pursuant to 10 U.S.C. 2330 (94 Stat. 1018); jointly, to the Committees on Armed Services and Foreign Affairs.

1024. A letter from the Comptroller General, General Accounting Office, transmitting a report on the examination of financial statements of the Minority Printing Clerk, House of Representatives, for the years ended September 30, 1983 and 1982 (GAO/AFMD-85-33), pursuant to 40 U.S.C. 193m-1; jointly, to the Committees on Government Operations and House Administration.

1025. A letter from the Comptroller General, General Accounting Office, transmitting a report on the examination of financial statements of the Majority Printing Clerk, House of Representatives, for the years ended August 31, 1983 and 1982 (GAO/AFMD-85-23), pursuant to 40 U.S.C. 193m-1; jointly, to the Committees on Government Operations and House Administration.

1026. A letter from the Secretary of the Interior, transmitting the fiscal year 1984 annual report with respect to actions taken to recruit and train Indians to qualify them for positions subject to Indian preference, including actions taken to place non-Indians employed by the Bureau of Indian Affairs in other Federal agencies, pursuant to Public Law 96-135, section 2(d) and 2(e)(2); jointly, to the Committees on Interior and Insular Affairs and Post Office and Civil Service.

1027. A letter from the Acting General Counsel, Department of Energy, transmitting a draft of proposed legislation to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1986 and fiscal year 1987, and for other purposes; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House on April 4, 1985. the following reports were filed on April 11, 1985]

Mr. FASCELL: Committee on Foreign Affairs. H.R. 1555. A bill to amend the Foreign Assistance Act of 1961, the Arms Export Control Act, and the Agricultural Trade Development and Assistance Act of 1954, to authorize development and security assistance programs for fiscal year 1986, and for other purposes; with amendments (Rept. No. 99-39). Referred to the Committee of the Whole House on the State of the Union.

Mr. MICA: Committee on Foreign Affairs. H.R. 1931. A bill to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the United States Information Agency, the Board of International Broadcasting, and for other purposes; with an amendment (Rept. No. 99-40). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY (for himself, Mrs. KENNELLY, and Mr. ROWLAND of Connecticut):

H.R. 2028. A bill to render watches eligible for preferential treatment under title V of the Trade Act of 1974; to the Committee on Ways and Means.

H.R. 2029. A bill to amend the Tariff Schedules of the United States in order to eliminate the special marking requirements for imported watches and clocks and components thereof; to the Committee on Ways and Means.

By Mr. BARTLETT (for himself, Mr. FORD of Tennessee, Mr. CAMPBELL, Mr. JEFFORDS, Mr. JONES of Oklahoma, Mr. GRADISON, Mr. GOODLING, Mr. MURPHY, Mr. TAUKE, Mr. GUNDERSON, Mr. NIELSON of Utah, Mr. DUNCAN, and Mr. MCCAIN):

H.R. 2030. A bill to make permanent and improve the provisions of section 1619 of the Social Security Act which authorize the continued payment of SSI benefits to individuals who work despite severe medical impairment, to amend such act to require concurrent notification of eligibility for SSI and Medicaid benefits and notification to certain disabled SSI recipients of their potential eligibility for benefits under such section 1619, and to provide for a GAO study of the effects of such section's work incentive provisions; and to amend the Rehabilitation Act to establish demonstration grant programs for the employment of disabled workers; jointly, to the Committees on Ways and Means and Education and Labor.

By Mr. BIAGGI:

H.R. 2031. A bill to provide a one-time amnesty from criminal and civil tax penalties and 50 percent of the interest penalty owed for certain taxpayers who pay previous underpayments of Federal tax during the amnesty period, to amend the Internal Revenue Code of 1954 to increase by 50 percent all criminal and civil tax penalties, and for other purposes; to the Committee on Ways and Means.

By Mr. DINGELL (for himself, Mr. BROYHILL, Mr. WIRTH, Mr. RINALDO, Mr. LUKEN, Mr. SWIFT, Mr. COLLINS, Mr. BRYANT, and Mr. RODINO):

H.R. 2032. A bill to amend the Securities Exchange Act of 1934 to provide improved protection for investors in the Government securities market, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MARTINEZ:

H.R. 2033. A bill to amend the Solid Waste Disposal Act to reduce the risk to public health and the environment associated with gas leaks from landfills; to the Committee on Energy and Commerce.

H.R. 2034. A bill to amend the Solid Waste Disposal Act to reduce the risk to public health and the environment associated with gas leaks from landfills; to the Committee on Energy and Commerce.

By Mr. MICA:

H.R. 2035. A bill to amend title 38 of the United States Code to require the Administrator of Veterans' Administration to consider the number of veterans residing in each State, and the projected changes in the number of veterans residing in each State, in acquiring and operating medical facilities; to the Committee on Veterans' Affairs.

By Mr. MYERS of Indiana:

H.R. 2036. A bill to provide for the establishment of a commission to study revision of the Federal tax laws; to the Committee on Ways and Means.

By Mr. RINALDO:

H.R. 2037. A bill to amend the Communications Act of 1934 to protect commerce and competition in telephone terminal equip-

ment, and for other purposes; to the Committee on Energy and Commerce.

By Mr. ROYBAL (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. HOYER, Mr. COLEMAN of Texas, Mr. YATES, Mr. SKEEN, Mr. LOWERY of California, Mr. WOLF, Mr. BIAGGI, and Mr. LEWIS of Florida):

H.R. 2038. A bill to name the Federal building located at 1200 Pennsylvania Avenue Northwest, Washington, District of Columbia, as the "Ariel Rios Memorial Federal Building"; to the Committee on Public Works and Transportation.

By Mrs. SCHROEDER:

H.R. 2039. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the deductions allowed for personal exemptions; to the Committee on Ways and Means.

By Mr. UDALL (for himself and Mr. MARKEY):

H.R. 2040. A bill to authorize appropriations to the Department of Energy for fiscal years 1986 and 1987 for expenditures from the nuclear waste fund for activities under title I of the Nuclear Waste Policy Act of 1982; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

By Mr. UDALL (by request):

H.R. 2041. A bill to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1986 and fiscal year 1987, and for other purposes; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

By Mr. WALGREN:

H.R. 2042. A bill to direct the Federal Trade Commission to issue a trade regulation rule respecting unfair and deceptive acts and practices by life care homes, and to direct the Federal Trade Commission to conduct a study of unfair and deceptive acts and practices engaged in by nursing homes; to the Committee on Energy and Commerce.

By Mr. MICHEL (for himself, Mr. BROOMFIELD, Mr. MCDADE, and Mr. STUMP):

H.J. Res. 239. Joint resolution to approve the obligation of funds available under Public Law 98-473 for supporting military or paramilitary operations in Nicaragua; to the Committee on Appropriations.

By Mr. KANJORSKI:

H. Con. Res. 116. Concurrent resolution expressing the sense of the Congress that Social Security cost-of-living adjustments [COLA's] should not be reduced or eliminated; to the Committee on Ways and Means.

By Mr. GILMAN (for himself and Mr. RANGEL):

H. Res. 127. Resolution to express the sense of the House of Representatives concerning Solidarity Sunday for Soviet Jewry; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

70. By the SPEAKER: Memorial of the Legislature of the State of Indiana, relative to agricultural economic emergency; to the Committee on Agriculture.

71. Also, memorial of the House of Representatives of the State of Massachusetts, relative to farm workers; to the Committee on Education and Labor.

72. Also, memorial of the Senate of the State of Kansas, relative to Amtrak; to the Committee on Energy and Commerce.

73. Also, memorial of the Legislature of the Commonwealth of Pennsylvania, relative to the Consolidated Rail Corporation; to the Committee on Energy and Commerce.

74. Also, memorial of the Senate of the State of Illinois, relative to Americans missing in Southeast Asia; to the Committee on Foreign Affairs.

75. Also, memorial of the House of Representatives of the State of California, relative to the Kesterson Reservoir; to the Committee on Interior and Insular Affairs.

76. Also, memorial of the Legislature of the State of North Dakota, relative to Indian reservations; to the Committee on Interior and Insular Affairs.

77. Also, memorial of the Senate of the State of New York, relative to the Veterans' Administration budget; to the Committee on Veterans' Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII.

Mr. DYSON introduced a bill (H.R. 2043) for the relief of Nassim Yadgar and Linda Yadgar, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 75: Mr. KINDNESS, Mr. RUDD, Mr. FRANKLIN, Mr. BLILEY, and Mr. DUNCAN.

H.R. 76: Mr. KINDNESS, Mr. RUDD, Mr. FRANKLIN, Mr. BLILEY, Mr. YOUNG of Florida, and Mr. DUNCAN.

H.R. 97: Mr. ROBERT F. SMITH, Mr. RUDD, Mr. BLILEY, and Mr. DUNCAN.

H.R. 177: Mr. CHAPPELL.

H.R. 281: Mrs. BURTON, Mr. CARR, Mr. COELHO, Mr. FASCELL, Mr. GRAY of Pennsylvania, Mr. HOYER, Mr. RINALDO, Mrs. SCHNEIDER, Mr. FROST, Mr. BOLAND, Mr. BRYANT, Mr. CONYERS, Mr. CROCKETT, Mr. FAUNTROY, Mr. HAYES, Mr. MATSUI, Mr. RANGEL, Mr. SOLARZ, Mr. STOKES, and Mr. TOWNS.

H.R. 598: Mr. SOLARZ, Mr. BLAZ, Mr. HYDE, Mrs. LLOYD, Mr. HAWKINS, Mr. WEAVER, Ms. OAKAR, and Mr. WALGREN.

H.R. 708: Mr. SILJANDER.

H.R. 709: Mr. KOLBE.

H.R. 748: Mr. BADHAM, Mr. CHENEY, and Mr. MCCAIN.

H.R. 770: Mr. LOWRY of Washington, and Mr. HAYES.

H.R. 773: Mr. LEHMAN of California, Mr. SHUMWAY, and Mr. LEATH of Texas.

H.R. 777: Mr. GINGRICH, Mr. COURTER, Mrs. VUCANOVICH, Mr. RITTER, and Mr. LUNGREN.

H.R. 816: Mr. SPRATT.

H.R. 915: Mr. MRAZEK.

H.R. 951: Mr. WILSON.

H.R. 963: Mr. MARTINEZ.

H.R. 965: Mr. CARPER, and Mr. MARTINEZ.

H.R. 966: Mr. MARTINEZ.

H.R. 967: Mr. CARPER, and Mr. MARTINEZ.

H.R. 968: Mr. HAWKINS.

H.R. 1099: Mr. OWENS, Mr. LELAND, Mrs. COLLINS, Mr. CONYERS, Mr. ROE, Mr. WEISS, Mr. HAYES, Mr. ADDABBO, Mr. SAVAGE, Mr. DYMALLY, Mrs. BOXER, Mr. TOWNS, Mr. ROSE, and Mr. BERMAN.

H.R. 1123: Mr. BEILENSON, Mr. BEVILL, Mr. BROOMFIELD, Mr. CARR, Mr. DAUB, Mr. DAVIS, Mr. DIOGUARDI, Mr. HEFTEL, of Hawaii, Mr. HENRY, Ms. KAPTUR, Mr. KASICH, Mr. KEMP, Mr. MCKERNAN, Mr. MEYERS of Kansas, Mr. ROTH, Mrs. SCHROEDER, Mr. SMITH of New Jersey, Mr. SMITH of New Hampshire, Mr. TORRES, and Mr. WHITTAKER.

H.R. 1142: Mr. TAUKE.

H.R. 1245: Mr. HYDE.

H.R. 1294: Mr. TOWNS.

H.R. 1345: Mr. RUDD, Mr. FRANKLIN, Mr. BLILEY, Mr. YOUNG of Florida, and Mr. DUNCAN.

H.R. 1418: Mr. STRANG and Mr. SCHAEFER.

H.R. 1421: Mr. VALENTINE.

H.R. 1436: Mr. MATSUI.

H.R. 1449: Mr. MCGRATH and Mr. DENNY SMITH.

H.R. 1453: Mr. DIXON, Mr. OWENS, Mr. EVANS of Illinois, Mrs. COLLINS, Mr. SAVAGE, Mr. FRANK, and Mr. SEIBERLING.

H.R. 1454: Mr. OWENS, Mr. EVANS of Illinois, Mrs. COLLINS, Mr. SAVAGE, and Mr. SEIBERLING.

H.R. 1607: Mr. HOYER, Mr. CROCKETT, and Mrs. COLLINS.

H.R. 1771: Mr. GRAY of Illinois, Mr. MARTIN of New York, and Mr. WHITEHURST.

H.J. Res. 41: Mr. OLIN, Mr. THOMAS of Georgia, Mr. LEVIN of Michigan, Mr. SKELTON, Mr. FIELDS, and Mr. DWYER of New Jersey.

H.J. Res. 62: Mr. SKELTON, Mr. CROCKETT, Mr. STRANG, Mr. CONYERS, Mr. WORTLEY, Mr. VENTO, Mr. BUSTAMANTE, Mr. HANSEN, Mr. HARTNETT, Mr. KOLTER, Mrs. BENTLEY, Mr. SAVAGE, Mr. FISH, Mr. FAZIO, Mr. LAFALCE, Mr. DE LUGO, and Mr. SPRATT.

H.J. Res. 133: Mr. FASCELL, Mr. BENNETT, Mr. YOUNG of Florida, Mr. BONIOR of Michigan, and Mr. IRELAND.

H.J. Res. 233: Mr. SWINDALL.

H. Con. Res. 67: Mr. ORTIZ.

H. Res. 56: Mr. BADHAM, Mr. BARNARD, Mr. BERMAN, Mr. BIAGGI, Mr. BLILEY, Mr. BONER of Tennessee, Mr. BRYANT, Mr. CAMPBELL, Mr. DEWINE, Mr. DYMALLY, Mr. DYSON, Mr. FIELDS, Mr. FISH, Mr. FRANK, Mr. GAYDOS, Mr. GINGRICH, Mr. HOPKINS, Mr. HORTON, Mr. HOWARD, Mr. HOYER, Ms. KAPTUR, Mr. KOLTER, Mr. LELAND, Mr. LEVINE of California, Mr. LEWIS of California, Mr. LOWERY of California, Mr. LUNGREN, Mr. MCHUGH, Mrs. MARTIN of Illinois, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. ORTIZ, Mr. PANETTA, Mr. PARRIS, Mr. RICHARDSON, Mrs. SCHROEDER, Mr. SMITH of Florida, Mr. STANGELAND, Mr. STENHOLM, Mr. SWINDALL, Mr. TORRICELLI, Mr. WAXMAN, Mr. WEBER, Mr. WOLF, and Mr. WORTLEY.

H. J. Res. 104: Mr. CAMPBELL, Mr. ANDERSON, Mr. MARTIN of New York, Mr. MOLLOHAN, and Mr. WEBER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

81. By the SPEAKER: Petition of the Arden Hills City Council, MN, relative to the persecution of the Baha'i minority in Iran; to the Committee on Foreign Affairs.

82. Also, petition of the Somerville Board of Aldermen, MA, relative to Social Security and Medicare; jointly, to the Committees on Ways and Means and Energy and Commerce.

SENATE—*Monday, April 15, 1985*

The Senate met at 12 noon, and was called to order by the President pro tempore [Mr. THURMOND].

The PRESIDENT pro tempore. Our prayer today will be offered by Rabbi Max A. Shapiro, Temple Israel Synagogue, Minneapolis, MN. He is Senator RUDY BOSCHWITZ' rabbi.

PRAYER

Rabbi Max A. Shapiro, Temple Israel Synagogue, Minneapolis, MN, offered the following prayer:

It is written, "And the Lord said, 'I will bless you and make your name great and you shall be a blessing'."

Heavenly Father, we thank You that we have been so richly blessed—blessed with a land of plenty, blessed with a heritage of freedom and justice, blessed with a people creative and purposeful.

We thank You that our name has been made great—that ours is a haven that many seek, a hope to which many aspire, that ours is a strength for which others wish.

And we pray that this Nation will always be a blessing—a home for the homeless, a champion for righteousness, a defender of liberty—and that somehow, because of us, there will emerge a world untroubled by war, unvexed by fear, untrammeled by hunger, and unfettered by cruelty; a world where justice and freedom, compassion and opportunity, will always prevail.

Make it so, Lord. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the two leaders have 10 minutes each, followed by, unless reserved, a special order not to exceed 15 minutes for the distinguished Senator from Wisconsin, Senator PROXMIRE, and routine morning business not to extend beyond the hour of 1 p.m. with statements limited therein to 5 minutes each.

Following morning business, the Senate will turn to any of the following: S. 413, war risk insurance; Executive Calendar nominations, and Legislative Calendar items cleared by unanimous consent.

I would just indicate to my colleagues that for the week there are a number of committee resolutions from the Judiciary Committee which we believe are not controversial, as well as a number of Rules Committee resolutions. We hope we might dispose of those by unanimous consent today.

Tomorrow we had hoped to move to the nomination of John E. Krings, to be Director of Operational Test and Evaluation, Department of Defense. It is my understanding that Senator PRYOR wanted some discussion of that nomination and perhaps a record vote on that nomination. There are also other Executive Calendar nominations that we hope we can take up tomorrow.

There are about three or four minor measures from the Commerce Committee that will be ready for consideration on Wednesday, April 17, and hopefully they can be disposed of without a great deal of debate.

Then on Thursday we may take up any remaining Commerce Committee business not disposed of on Wednesday and any Executive Calendar nominations. I hope to make an announcement tomorrow on what we may be doing on Friday, April 19.

It is my understanding that if S. 413 is called up, it will be the subject of a number of amendments, including cargo preference. I will advise my colleague, Senator BYRD, of any action on that, obviously, before it is brought up. It may be that we cannot take it up today.

It is my intention next Monday that we will start on the budget resolution and interrupt that debate on Tuesday for action on the Contra aid proposal and then return to the budget matter on Wednesday of next week and stay on that until disposed of. It is very likely that we can expect next week, without much doubt, a Friday session. I am not certain about a Saturday session. It depends on how near completion we may be on the budget resolution.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. BOSCHWITZ). Under the previous order, the Democratic leader is recognized.

Mr. BYRD. Mr. President, I thank the distinguished majority leader for laying out the program for the week as well as he has done.

THE 20TH ANNIVERSARY OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

Mr. BYRD. Mr. President, 20 years ago last week, on April 11, 1965, President Lyndon Baines Johnson signed into law the historic Elementary and Secondary Education Act of 1965 [ESEA].

At the signing ceremony in his boyhood school in Johnson City, TX, President Johnson remarked that, "As President of the United States, I believe deeply no law I have signed or will ever sign means more to the future of America." In a White House ceremony 2 days later for Members of Congress, President Johnson enlarged on this theme. He said,

> Health is important. So is beautification, civil rights, agriculture, defense posture, but all of these are nothing if we do not have education.

He went on to say,

> I will never do anything in my entire life, now or in the future, that excites me more, or benefits the Nation I serve more, or makes the land and all its people better and wiser and stronger, or anything that I think means more to freedom and justice in the world than what we have done with this education bill.

Mr. President, I am well aware, as are many of my colleagues, of former President Johnson's aptness at turning a phrase. He was a master. But I know these remarks were a genuine reflection of what he and the extraordinary bipartisan group of congressional sponsors felt on that historic occasion.

I feel and believe in this sentiment today.

Education is the key to the future security and prosperity of our country. Because education is a national priority, so, too, should it receive a considerable Federal commitment. And this commitment must, of necessity, consist of dollars as well as desire.

The Federal Government, along with the State and local levels, where primary responsibility for education rightly belongs and should remain, together hold this key to our future. President Johnson and the Members of the 89th Congress understood this. Today, 20 years later, despite the views and recommendations of the Reagan administration, there still exists a bipartisan base of commitment to our critical Federal education programs.

These past 4 years, Republicans have joined Democrats in refusing the most onerous education budget cuts proposed by the administration. We have saved the core programs of the

original Elementary and Secondary Education Act for hundreds of thousands of children who would have suffered had the administration had its way. But still, despite our best efforts, there has been a significant diminution of Federal support.

And the administration's fiscal year 1986 spending proposal represents further slippage in the Federal Government's commitment in this area. According to the Committee for Education funding, in fiscal year 1980, the Federal Government spent 1.09 percent of its total authority on elementary and secondary education; in fiscal year 1986, the Federal Government would spend only 0.71 percent under the President's proposal. Furthermore, the proposal would represent a significant reduction from the level needed to maintain services at their present levels. Approximately $8.216 billion would be needed in fiscal year 1986 to maintain services at the fiscal year 1985 levels rather than the $7.481 billion that is requested. The difference, $735 million, represents a real cut of about 9 percent in fiscal year 1986, an amount sufficient to diminish the services of nearly 600,000 students nationwide.

One of the prime victims of the President's proposal for elementary and secondary education would be the chapter I program—the successor to the original title I program of the ESEA. The chapter I program is our major elementary and secondary program geared to help provide access to quality education for America's disadvantaged youth. School administrators tell me that roughly 90 percent of the chapter I money in their schools pays for teacher salaries. Thus, less chapter I money means fewer teachers, larger classes, and, poorer education.

These proposals for cuts have come, and continue to come, in the face of report after report telling us that our education system is in crisis. They tell us that our elementary and secondary education system fails to achieve excellence in the basics, graduating youth who are ill prepared for either work or further education. At the fourth grade elementary level, 40 percent of the average school day is estimated to be spent in nonacademic pursuits, and the time many teachers allocate to basic core courses is less than what experts recommend.

And, there is a critical lack of math and science skills in our students. Although the decline in scholastic aptitude test scores has generally halted, and these scores now look to be on the rise again, nonetheless the aggregate slide in verbal and math scores is dramatic. International comparisons of student achievement, completed a decade ago, reveal that on 19 academic tests American students were never first or second and, in comparison with other industrialized nations, were last seven times. This may not be as surprising as it first appears when one is made cognizant of the fact that the typical Japanese high school student takes 6 years of science and math, including a year of calculus; the average Russian takes twice as much. By contrast, fewer than half of American high school graduates take any math or science after the 10th grade.

Business and military leaders complain that they are required to spend millions of dollars on costly remedial education and training programs in such basic skills as reading, writing, spelling, and computation. And these remedial skills are not lacking in just secondary education level graduates, but are also found lacking in some students with higher education experience. Between 1975 and 1980, remedial mathematics courses at public 4-year colleges increased by 72 percent and now constitute one-quarter of all mathematics courses taught in those institutions.

The crisis in our education system is critical to the ability of our country to remain competitive in the international marketplace. By 1987, American colleges and universities will graduate less than half the 1987 projected nationwide demand for electrical engineers and computer scientists. The Japanese—with half our population—are graduating more engineers than the United States. Between 1955 and 1982, the number of bachelor's degrees awarded in engineering in Japan rose from 9,613 to 73,600, while in the United States, they rose from 22,589 to 67,400. During the same period, the number of doctoral degrees in engineering dropped in the United States. Almost half or 49 percent of these doctoral degrees awarded in engineering by American universities in 1981 went to citizens of other countries, people who will not stay in the United States after graduation.

These facts, from the numerous reports of the past 3 years, are staggering. The reports have called for major reforms and adequate spending for education to achieve these reforms. States and localities have responded—all around the country reforms have been enacted and spending levels for education have been raised.

The record to date in Washington has not been as innovative or supportive, for we have spent considerable time protecting existing Federal education programs from an administration committed to the proposition that cutting Federal education programs will improve education.

The 89th Congress did not believe this proposition when they enacted the landmark Elementary and Secondary Education Act of 1965. I have faith that the 99th Congress will also reject this approach. The ESEA was an expression of Federal commitment to each and every child in America. It is a commitment from which we in the Democratic Party will not quietly shrink.

AFGANISTAN'S AGONY

Mr. BYRD. Mr. President, on another subject according to a recent account by the Washington Post reporter Joanne Omang, just a month ago death visited the little village of Chinar in southern Afghanistan—death in the uniform of the Soviet Red Army.

Muhammad Gul, a 30-year-old Afghan refugee from chinar, recounted in Peshawar, Pakistan, that at 8 a.m. on March 17, Soviet troops attacked his village and perhaps 15 others, "killing every living thing" that could not escape. Gul said that, in one incident, 52 women and children tried to hide on a rooftop. Soviet troops spotted them, however, and set fire to the building, burning those 52 innocent civilians alive when the flames reached the roof.

Muhammad Gul's story is but one more tragic report of the Afghan agony. In a recent study prepared for the United Nations Human Rights Commission, Austrian law professor Felix Ermacora accused the Soviet Union of massacring Afghan civilians, executing guerrilla fighters, and, in some instances, using poison gases against them. When the Soviets attacked Ermacora's report as a CIA fake, the Austrian professor retorted, "Every word in it is true. And to anyone who says I am falsifying the record, I reply: if 4 million people leave their country Afghanistan, then there must be a good reason."

Unfortunately, we live in a century long on inhumanity and short on memory. In the hideous wars of our era, millions have lost their lives on battlefields. But other millions of noncombatants and innocent men, women, and childen have been slain in acts of official barbarism. Too often in reaction to such bloody deeds, the rest of the world has shrugged its shoulders.

One of our duties as civilized men and women is to brand the memory of Buchenwald, Dachau, and Auschwitz into history. "Never again!" should become part of democracy's creed.

Likewise, we cannot let Afghanistan become just another occasional continuing feature on the evening news. Real men and women are suffering and dying in the rugged mountains of Central Asia. Soviet bullets and bombs are mutilating Afghan children. Flesh-and-blood human beings are struggling there to save their country, their religion, their culture, their freedom, and their way of life. We cannot let Afghanistan become another victim of world apathy and historical amnesia.

We are fated to share this Earth with the Soviet Union, and the peace

and future of all mankind will be affected by the Soviet Union and the United States being able to avoid catastrophic clashes in the years ahead.

Currently, as intermittently since the death of Josef Stalin, the Soviet Union is settling in under a new leader. Each time that has happened, hopes, if not wishful thinking, have risen that perhaps the West can strike a better understanding with the Kremlin.

But whenever American diplomats go up to a "summit meeting" or sit down at a bargaining table with the Soviets, they should remember that in Afghanistan the Soviet Union is showing its real face. The bosses of the Soviet Union are not dedicated to the same values that we hold dear—unalienable rights, eternal truths, human dignity and freedom, the worth of individuals, or faith in God. The Soviet Union is a totalitarian system with worldwide, even universal, ambitions, and we should never delude ourselves into thinking that the Red army or those who give it orders have any more respect for the lives and traditions of Americans or Western Europeans than for those of Afghanistan.

In pursuit of hope, let America continue seeking accords with the Soviet Union to ease tensions and prolong peace. But in respect for reality, let Afghanistan serve as a warning of the ruthlessness of Soviet tactics and of the relentlessness with which Russia's new tsars are trying to enlarge the Soviet empire.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

WHY WE MUST RECOGNIZE THAT WE CAN NEVER RID THE WORLD OF NUCLEAR WEAPONS

Mr. PROXMIRE. Mr. President, to hear the statements of lifelong advocates of military strength—like President Reagan and Paul Nitze—that their ultimate purpose in arms negotiations is to see the end forever of nuclear weapons should be quite a shock. Andrei Gromyko, the hard line cold warrior of the Soviet Union, has announced that this is his fervent purpose too. As we all know, the Soviet Union is a collective body with an iron discipline, and a preeminent survivor like Gromyko of one ruthless Soviet dictator after another would not speak out on such an issue if he were not voicing the party line. So the Soviet Community Party line is to say they want to eliminate all nuclear weapons from the face of the Earth. Do you believe that? I do not.

Think about it. Does the most military minded and most conspicuously anti-Soviet American administration since the Soviets seized power in Russia in 1917 really favor the total abolition of all of this country's massive nuclear arms? And does the Soviet Union that continues to show its willingness to engage in aggression and violence wherever it can get away with it in the world honestly agree that the superpowers should ultimately push their agreements to remove nuclear weapons totally from the arsenals of all countries everywhere in the world?

The answer, Mr. President, is that when we hear the leaders of either country say they favor the elimination of all nuclear weapons everywhere we are being treated to the ultimate example of hypocrisy. The leaders of both superpowers fully understand that the fondest hopes and dreams of all people throughout the world is to see the peaceful end of this terrible nuclear nightmare. People throughout the world know that a nuclear sword of Damocles swings suspended by a fragile thread over their heads. What easier and cheaper way to appear to be on the side of the universal yearning for peace than to announce on the very eve of kicking off the most wildly expensive arms race in world history, that the purpose of this buildup is to eliminate nuclear arms from the face of the Earth?

So why should not the proponents of this appalling nuclear arms race say that they want a total end to nuclear arms? The astonishing fact is that they seem to be getting away with it. And they should not. The easy way for a hawkish administration to deal with the protests of those who make peace the highest priority is for the hawks to announce that they have exactly the same objective in mind—just a different way of achieving it. The President can tell the peace advocates when he pleads for billions more for the MX missile that would provide a hundred additional nuclear missiles and a thousand warheads: "Don't worry when we get these thousand new warheads in place, the Soviets will know we mean business so they will agree that both sides can reduce nuclear missiles." If you buy that you buy the notion that this administration—headed by a President who has opposed every arms control agreement this country has ever made—will take a step toward peace that no previous administration has every taken. In all the long history of arms control negotiations, neither side has ever—that is ever—agreed to give up an offensive nuclear missile as part of an arms control agreement. So do not hold your breath until the Soviets and the Reagan administration agree to do so.

Mr. President let us spend a minute or two examining the proposition that somehow, some way we can banish nuclear weapons from the face of the Earth. The first step in wisdom is to recognize and accept reality. The world would be a great deal better if we could banish all kinds of things from the Earth such as greed, selfishness, hatred. But we know we cannot even banish them from the smallest community in this most blessed land. How could we banish the secret of the atom and the almost infinite power that an atomic explosion provides? The answer is that we cannot. If MARK HATFIELD or Mahatma Ghandi or Martin Luther King or Jonathan Schell—the author of the great anti-nuclear weapon diatribe, "The Fate of the Earth"—were President of the United States and had 535 clones in the Congress of the United States, and we had a similarly dovish leadership in the Soviet Union, we still could not eliminate nuclear weapons from this world. At this moment, the United States and the Soviet Union have about 95 percent of all the strategic nuclear weapons on Earth. At least three other nations have nuclear weapons and three or four others probably have them.

Would nuclear weapons disappear if every country that had nuclear weapons agreed to destroy them? No way. Here is why: The secret of how to design and construct a nuclear weapon is known. It is not the province of a handful of scientific geniuses. College undergraduates have been able—starting from scratch—to put together a nuclear weapon that needed only plutonium to blow up a city. Could we deny any 1 of at least 50 sovereign nations that have the economic and scientific wherewithall the ability to buy enough plutonium to construct a nuclear arsenal that would give them a decisive military advantage in the event all present nuclear weapons were destroyed? Of course not. We can no more ban nuclear weapons than we can ban gun powder, TNT, or the bow and arrow. We have this monster. Our only course is to learn to live with it or die with it. That means we must have arms control, comprehensive arms control, including an effective, verified prohibition against testing of new nuclear weapons so technology will not sweep the arms race out of control and so that every arms control treaty in the future will not follow the course of the past—simply pushing ingenious scientists into developing new forms of nuclear weapon power that have not been reached by past agreements. And of course we need to prohibit and verify that prohibition against all future production and deployment of nuclear weapons. Will that make the world safe? No. The genie is out of the bottle and the world can never again be as safe as it was. But an honest, realistic confrontation of the grim truth that mankind is fated to live with nu-

clear weapons forever will give nuclear peace a fighting chance, and its only chance. The nuclear weapons policies proposed by President Reagan will not lead to the abolition of nuclear weapons forever, nor will the policies pursued or urged by anyone else. The first step in bringing this nuclear weapons threat under control is to realize that we must now live with nuclear weapons. They will never disappear. We must make and abide by the tough, hard rules of limitation, verification and insistence on abiding by the letter of nuclear arms control treaties and building on them for as long as mankind dwells on this planet.

THE REVEREND JAMES CLARK BROWN: RELIGION AND THE FEDERAL DEFICIT

Mr. PROXMIRE. Mr. President, since 1981 the Reverend Richard Halversen has opened almost every session of this body with a prayer that has often startled us with relevance of religious faith to the problems that face us as U.S. Senators.

Recently I discovered a sermon from another gifted minister, the Reverend James Clark Brown, that brilliantly applies the teachings of Christ to the most perplexing and bedeviling problem that confronts this Congress today: How do we reduce the appalling series of Federal deficits that confront our Federal Government and our Nation?

For a number of years Rev. Jim Brown served as the minister in a United Church of Christ in Cleveland Park that my family and I regularly attended. Reverend Brown was an important moral inspiration in our lives and the lives of our neighbors who belonged to his church. For several years since then this remarkable minister has served the First Congregational Church in San Francisco and lately served the Community Church of the Monterey Peninsula in Carmel, CA. On February 17 of this year he delivered a sermon that especially deserves a congressional audience. In the first part of that sermon he answered the message many Members of the Congress and the general public ask: Why should a minister get involved in politics? I challenge any Member of the Congress to read his answer and not agree that the clergy not only has a right but a duty to speak out on the political issues of the day.

In the second part of his sermon, he addresses the duty of those of us who serve in the Congress to find the political courage to face up to the politically unpopular spending cuts and revenue increases necessary to bring these monstrous deficits under control.

Mr. President, regardless of our religious faith the message of the Reverend James Clark Brown on deficit reduction is one we should take to heart.

And so I ask unanimous consent that the text of this remarkable sermon be printed at this point in the CONGRESSIONAL RECORD.

There being no objection, the sermon was ordered to be printed in the RECORD, as follows:

THE CASE FOR INTELLIGENT OPTIMISM

(A Sermon preached by The Rev. James Clark Brown, Minister, Community Church of the Monterey Peninsula, Carmel, California, February 17, 1985.)

Text: Deuteronomy 30:15-20; John 3:16-21; and Matthew 7:9-12

Poets, preachers, politicians; perhaps even you and I, have an almost irresistible impulse when giving our appraisal of some large, complex problem and of the people involved in it, to reduce the whole tangled issue to something unrealistically simple and so we say things like " . . . there are only two basic points of view regarding this matter".

How many times have you heard a politician say: "Those of us who are thinking clearly on this momentous issue are opposed by those whose thinking is not so clear." Simple as that. We divide some issue, almost every issue, by two: "us clear thinkers and others whose thinking is a bit fuzzy and fallible."

Now listen. Here comes a poet. What does she say?

There are two kinds of people on earth today,
Just two kinds of people. No more, I say.
Not the good and the bad, for tis well understood
The good are half bad and the bad are half good.
Not the happy and sad, for the swift flying years
Bring each man his laughter and each man his tears.
Not the rich and the poor, for to count a man's wealth
You must first know the state of his conscience and health.
Not the humble and proud, for in life's busy span
Who puts on vain airs is not counted a man.
No, the two kinds of people on earth I mean
Are the people who lift and the people who lean!
Where-ever you go you will find the world's masses
Are ever divided in just these two classes.
And strangely enough, you will find too, I ween
There is only one lifter to twenty who lean.
In which class are you? Are you easing the load
Of overtaxed lifters who toil down the road?
Or are you a leaner who lets others bear
Your portion of worry and labor and care?

—*Ella Wheeler Wilcox.*

There's obvious truth in the poet's words but also exaggerated simplicity: all of humanity reduced to two classes: the lifters and the leaners!

Many churches on Sunday morning, once the worship begins, contain captive congregations who are required to listen to oversimplified sermonic "solutions" of the world's problems reduced to "two basic points of view" served up in a three-point sermon with a concluding poem! So! Here we go again! Think with me this morning about optimist and pessimists. Yes, at the sermon's end I pray that you may be even somewhat more persuaded that there is a case for honest, intelligent optimism. But give me credit. I know, and so do you, that neither the world nor any signficant problem in it can be realistically dealt with simply by dividing it by two!

The case for intelligent optimism! The dictionary defines optimism as being: "a disposition or tendency to look on the more favorable side of happenings and to anticipate the most favorable result." Optimisim is the secular word for the Bible's word of "hope". And let me warn you! Do not go near the Bible, the God who inspired it, the people who triumphantly move through its pages as they moved through life unless you want to stand under a sky ablaze with hope, be challenged to live courageously with hope, to experience being lifted up on the power and love of the great God of Hope for this life and beyond death and for all eternity!

Listen to the psalmist: "Why are you cast down, O my soul, and why are you disquieted within me? *Hope in God, for I shall again praise him, my help and my God.*" And again: *"Thou, O Lord, art my hope, my trust, O Lord, from my youth.* Upon thee I have leaned from my birth; thou art he who took me from my mother's womb. My praise is continually of thee." The Apostle Peter, so enormously eager to share with us the good news of what God wants to give to us all, flags us down as we speed frantically along life's highway, holds up a huge sign which says, 'Stop! Listen! Receive! This is important!' What is important? And Peter says: *". . . brace up your minds, and, as men and women who know what they are doing, rest the full weight of your hopes on the grace that will be yours when Jesus Christ reveals himself."* (I Peter 1:13 J.B. Phillips tr.)

There is a case for intelligent optimism whenever we commit ourselves to Jesus Christ as Lord. We are given power to work miracles and indeed we, ourselves, become a sort of miracle. Do you remember the earliest creed of the Church? It contains but three words: "Jesus is Lord". Yet those three words represented the faith which energized all persons who lived in commitment to their truth. Those three words, "Jesus is Lord" became for the first followers of our Lord Jesus a magnificent window through which they saw their lives, their personal relationships with one another, their labor, their leisure, their politics, the way they made their money, the way they would spend it; all that they were and all that they did bowing down in adoration of Jesus as Lord!

O dear people! Our hope and optimism can never be higher than the level of what it is, or WHO it is that is the center of our life! If at the center of our life there is something or someone who is unworthy, or unreliable, or unredemptive then we are carrying a burden of heavy stones which makes slow and sad our journey through life. God has given us as the redemptive center for our lives—the joy of Jesus Christ! When life loses that center, life loses its sense and meaning! But

When Jesus is first in my life,
Joy is close upon our heels!

Consider with me now one specific involvement of our lives and let us endeavor to consider it in relation to Jesus Christ as Lord. That specific is "politics." Now the very mention of that word from most pulpits raises the anxiety level of many people in the pew. So let me endeavor to assure you at the outset: relax! Trust me that I would not indulge in any partisan ploy to suggest that any political party, Democratic or Republican has God "in its pocket". Our Lord

Jesus stands in transcendent judgement upon the best and surely upon the worst that is done by all political parties. Before we go any farther, let's say what we mean by "Politics". Politics is the exercise of power, influence through public policy that affects all our lives for good or ill. How can one love his neighbor, as Jesus commended us to do, without participating in politics which involves our prayers for world peace, providing the kind of public care given (or not given) to our elderly, our children through a good or bad school system, to the poor who through no fault of their own cannot find sufficient employment to put adequate food on the table or sufficient heat in the winter months for their house or clothes on the backs?

Whenever you are tempted to say, "The church shouldn't meddle in politics" you are sharing a conviction with the Communists and bringing joy to their hearts! The fierce struggle going on in much of the world today, in Poland with "Solidarity" vs. the State, in Latin America where priests, nuns and an archbishop along with many devout lay-people have been tortured and killed because their Christian commitment to a more just society required them to engage in political dissent against injustice and tyranny! Moreover, any church or churchpeople who, as a matter of policy, refrain from political involvement are engaged in politics; they are being silent when their voices should be heard; they are given quiescent consent to the status quo when often they should be challenging and contentesting it! In the parable of the Good Samaritan why did Jesus condemn the priest and levite who saw the robbed, wounded and needy man on the side of the road and nonetheless passed him by? Why? Because they chose to do nothing, to be uninvolved in a circumstance which cried out for compassionate human response!

But someone is thinking: are there not dangers in a church and church people becoming politically involved? Of course there are but they should be considered intelligently, not with insufficient thought. The most basic of these notions is the one that religion and politics are different spheres of human activity and should not be "mixed." The intelligent reply is that the Christian religion is "not one room of our human life but is the foundation of all the rooms of life and, therefore, related to all of them. Jesus is Lord!, not just of religion but of all of life.

"But religion is a private matter", someone says, "its concern is with the spiritual life, not with worldly affairs, it deals with individuals, not with institutions; it is concerned with saving souls, not with politics." The intelligent answer is: What these phrases represent is not the authentic faith that Jesus is Lord of all life and of all individuals and institutions. Such interpretations which emphasize only the "private" or "spiritual" dimension of our Lord's dominion distort the whole reign of God's rule as made known in Christ Jesus. They attempt to compartmentalize life; 'this is religious, something else is not'; as if not everything that we do, say, become or fail to become, lies subject to the Lordship of Christ. "The temporal world, including politics, is made more important, not less, by the doctrines of Christian faith, which affirm that God created the world, (not simply the church), that the Word became flesh, that God acts to reconcile the world to himself."

"But what of the Constitution?" says the objectors to the necessity of religion mixing with politics. It establishes the separation of church and state. So it does. But separating the institutions of church and state does not mean separating religious conscience from politics—that's something quite different, and a bad idea.

One other objection: "We must begin with the individuals and if we convert every individual, then social problems will take care of themselves. The intelligent answer is: "Suppose that the good Samaritan coming along the road, letting someone else be concerned with converting those evil robbers who had wounded the man by the side of the road. Let us suppose the Good Samaritan was so intent on his devotional prayers and Bible reading that he had not seen the wounded man in need. Now take another step. Suppose on a succession of 12 days travel on the Jericho road that the Good Samaritan had each of those twelve days encountered a wounded man and sought, individually, to minister to them. Would we not think that there was somethig deficient in his faith (and intelligence?) if eventually he never decided to see if he could not get a police patrol to more effectively monitor that dangerous roadway and prevent the frequency of robbery and attack? Intelligent Christian action often requires united effort by the community which no individual, however sincere and dedicated, can do alone.

We cannot here deal with every possible objection made by people to the necessity of mature, effective religion dealing with politics. Politics is the exercise of power, influence through public policy that affects all our lives for good or ill. Now let me raise one significant issue involving politics which I believe all persons who affirm the Lordship of Jesus will see both its relevance to what we have been saying and to need for immediate, corrective action. I refer to the crisis of our national deficit and particularly to the escalating payment of interest which affects all of us, the community of nations, and most particularly, it affects the welfare of our children and grandchildren.

"I didn't come to worship to hear the preacher talk about our national deficit and the run-away-escalation of our annual payment of interest on it" someone is thinking. To which I reply: Anyone who is actually listening to what this sermon is about is aware that its theme is the Lordship of Christ Jesus, under whose sovereign rule are all human activities, living responsibly or irresponsibly, the concern we have for what consequences our actions have upon others, particularly innocent others which includes children and grandchildren . . . is a profoundly moral, spiritual matter and the national deficit and our interest payments on it involve all these "spiritual" concerns.

The current national indebtedness of our country is now 1 trillion, 679 billion, 916 million dollars. Please hear me, loud and clear, when I say that such indebtedness is not the result of any single administration or of any single president. It is the result of an accumulated spending which has been the action of Democrats, Republicans. We have built up this mountain of debt (and here is the profoundly moral and spiritual implication of it all—namely, for all our American commitment to traditional family values we are not responsibly paying our debts, and even more reprehensibly, we are burdening our children and grandchildren with paying our debts along with the devastating interest payments on the debt!).

In 1979 interest payment on the deficit was $32 billion a year. In 1984 the interest payment had tripled to $111 billion a year. By 1989 President Reagan estimates that the interests payments will have quintupled in 10 years to $159 billion dollars!

If the cost of a weapons system, or welfare, or foreign economic assistance, or Federal highway funding, or any other federal spending program was so out of control that interest payments on it quintupled within five years, citizens and perhaps even a few brave, informed politicians would rise up and say: Enough is enough. Such a deficit and its interest payment requirements is like a legacy of leprosy which we bequeath to our children and grandchildren.

Governor Richard Lamm of Colorado is one of several distinguished public officials of both parties who has courageously sounded the alarm bell of the calamity we have brought upon ourselves. He has stated:

"I should like to tell you the parable of the prodigal parents. In the original Biblical parable, the prodigal son selfishly and thoughtlessly advanced his interests at the expense of this father. In my version of the parable, the prodigal father (and mother) advanced their interests at the expense of their children. The story is of our generation.

"The Democrats can't say no to social programs and the Republicans can't say no to the military. The debt bomb builds. Ronald Reagan has accumulated more debt in five years than all his predecessors did in 192 years. The pious word of the politican of both parties is "Blessed are the young, for they shall inherit the debt."

"Christmas is when kids tell Santa Clause what they want and adults will pay for it. Deficits are when adults tell the government what they want and their kids will pay for it. This is what we have done."

So concludes Governor Lamm. Let me now say that decent people throughout the country have recently been shocked and made furious with anger at the disclosure of the sexual molestation of children by trusted teachers and other adults. Sexual molestation of children is indefensible and its perpetrators must be removed from society by being either hospitalized or imprisoned. But, dear people, what justice awaits you and me who have assaulted our own children and grandchildren with a deficit so monstrous, its consequences so crippling, its savage limitations which will cling to them all their lives?

What will our children and grandchildren say to us as they bear the disfigurement of the deficit which we have bequeated to them? Now and then one sees a newspaper story which tells of a child who has mistakenly received notice by reason of a faulty computer and is called to serve on "jury duty." But such a story is never altogether an error. We adults stand in the defendant's place on trial and our judge and jury are the children and grandchildren who shall render an inescapable verdict upon the kind of world which we by our faithfulness, or lack of it, shall pass on to them. In the vivid phrase of my friend, Bill Coffin, we adults need always to remember that

"We have not so much inherited the world from our parents as we have borrowed it from our children."

Recall with me that lovely story our Lord Jesus told about how caring parents would give to their children that which would bless their lives:

"What father among you, if his son asks for a fish, will instead of a fish give him a serpent; or if he ask for an egg, will give him a scorpion"?—Luke 11:11-12.

But we, dear people, by the legacy of debt we are bequeathing to our children and grandchildren are doing diabolically the opposite of what Jesus said that loving parents

would do! Our children are entitled to ask of us a gift of fish and freedom and we are giving to them serpents of indebtedness; they have a right to expect from us a bequest of egg and somethings lovely and we are bequeathing to them scorpions of scandlous self-indulgence, the extravagance of which we cynically say, "let the kids pay for it"!

Thus far, we have sought to lift up the basic affirmation of any authentic follower of The Christ and say, "Jesus is Lord" of all things. How do we proceed from that affirmation to practical, political, spiritual action that shall lessen the danger and increase, realistically hope for ourselves and our children? If we are asking the right question with honest zeal to find its answer, God's Holy Spirit will guide us in the paths we should walk. Clearly we need a revival of the human spirit which embraces Democrats, Republicans, citizens of all parties and of none; a revival of the Spirit which enables us to live in response to the prayer:

O God, grant that I, and each of my fellow citizens may be willing to make any sacrifice, discipline my life-style, remembering children and grandchildren both living and yet to be born, and then to politically conduct myself in such a way that I ask not:

What can my God, my country, my children do for me? But rather, what can I and my fellow citizens do for You, O God, for our country, and our chilren?

That may well mean we clergy give up some of our valued tax exemptions; we tobacco farmers give up our costly subsidies and seek alternative crop productions, that we retired military, many of us drawing pensions after only 20 years of non-combat service, then adding to our income through additional job and pension, that we might see some patriotic and spiritual duty to reduce the $18 billion dollars in military pensions to be paid in 1986,[1] and that all of us be prepared to do what our many timid political leaders are afraid to ask us to do, to accept increased taxes. What is your proposed solution? Pray about it. Be concerned about it. There is reason for intelligent optimism, for hope, if we commit ourselves anew to the Lordship of Christ in all things and act on such faith while yet there is time. "I have set before you life and death, blessing and curse" sayeth the Lord. Then, with all the passion and prayer of God's love made known in Christ Jesus, God says in appeal: "Choose life"!—Deuteronomy 30:19.

MSHA WINS APRIL GOLDEN FLEECE AWARD

Mr. PROXMIRE. Mr. President, I am awarding my Golden Fleece of the Month Award for April to the Labor Department's Mine Safety and Health Administration [MSHA] for operating its mine equipment testing center in the hole for the past 3 years at a "coal-lossal" cost to the Government of more than $10 million.

Federal law requires the MSHA center to recover the entire cost of equipment testing by charging manufacturers a fee for performing this service. By not charging these manufacturers nearly enough, MSHA has been shifting the cost of mine product approvals from the manufacturer to the general taxpayer. What this amounts to is a hidden—and hefty—Government subsidy for a lot of large corporations.

The taxpayer really got raked over the coals this time, especially since the Labor Department's own auditors pointed out major cost overruns at the center as early as 1981. Now more than 3 years have passed and MSHA's fees continue to be so low that the facility still recovers from manufacturers less than 10 cents for every dollar it spends testing their equipment.

Could you or I keep a business running for years that was so far from being in the black? Hardly. Unlike us, though, MSHA doesn't have to take its lumps for such fiscal irresponsibility. It simply passes them right along to the taxpayer.

Think about it. Almost 20 years have gone by since MSHA last updated most of the fees it charges manufacturers for testing their equipment. Moreover, the Agency has not revised a single fee schedule to reflect current operating costs since Labor Department auditors urged it to do so in 1981. Result? The Government continues to lose about $300,000 each month.

MSHA officials apparently are not too upset about it either, since they do not intend to have a fee schedule revision take effect until next July at the earliest—at a cost to the Government of at least another $4 million!

The MSHA center also failed to maintain a strong quality assurance program to ensure that products it tested and approved continue to meet Federal safety requirements. In fact, in the last 4 fiscal years MSHA has post-evaluated less than 2 percent of the 25,000 pieces of equipment it previously had approved for use. This is especially troubling, since one out of every eight pieces of equipment the center did test has turned out to have critical or major deficiencies.

The mission of the MSHA testing center is a highly important one—ensuring that products used in our Nation's mines are safe. The center's failure to establish an effective quality assurance program probably means that every day U.S. miners are working with equipment that is defective and hazardous, even though it proudly bears the MSHA seal of approval.

The MSHA center tests equipment for all types of U.S. mines—metal and nonmetal, as well as coal. The fact that coal alone provides more than one-fifth of the energy consumed in the United States underscores how important it is that the center operate efficiently. And you cannot help wondering whether there is any connection between the center having such a lax quality assurance program and the number of U.S. coal mine deaths jumping 77 percent last year—from 70 in 1983 to a whopping 124!

In the past few months, MSHA has taken some faltering steps to bolster its quality assurance program, increasing its rate of evaluation to about 8 percent of all products tested. In such a critical area, though, this comes as too little too late.

Is it not ironic, too, that MSHA probably could acquire sufficient funds to stoke up its quality assurance efforts simply by charging manufacturers realistic fees for equipment testing?

April might be too early to give MSHA coal in its stocking for this pitiful performance, but it is a grand time for awarding it the Golden Fleece.

SUPPRESSION IN BULGARIA

Mr. PROXMIRE. Mr. President, on Tuesday, the Washington Post ran an article which further underscores the crucial need to ratify the Genocide Convention. The article, "Suppression in Bulgaria is Reported," details a systematic program by the Bulgarian Government against its Turkish-speaking population.

Genocide can be either cultural, involving the suppression of a language or religion, or physical, involving the actual destruction of a group. This news report raises the specter that incidents in Bulgaria involve elements of both types of genocide. Hundreds of deaths have occurred and the United States should be in the forefront of the effort to bring this heinous action to a halt.

Yet Bulgaria has ratified the Genocide Convention, while the United States has not. Bulgaria claims that the Turkish affair is an internal matter. Under the Genocide Convention, there is a mechanism for requiring Bulgaria to explain its actions. Unfortunately, we do not have that right, for we have not ratified this important treaty.

Mr. President, genocide is not simply a matter for the past—it occurs today, and as in Bulgaria, the prospect of genocide is all too often lurking in the wings. It is an issue that must be dealt with now. The Foreign Relations Committee has expeditiously scheduled a mark up for the treaty on April 23. This body should be equally prompt when this treaty reaches the floor. The Senate may be able to wait—but can the Turks of Bulgaria? Let us ratify the Genocide Convention now.

I ask unanimous consent that the article from Tuesday's Washington Post be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[1] An illuminating assist in helping us to understand better what "a billion" of anything represents is found in Dr. Thomas H. Ainsworth, M.D. exciting book, "Live or Die". He tells us "If you spend a dollar a second, it will take thirty-two years—until the year 2017—to spend a billion dollars. It has been only one billion minutes since the birth of Christ; and one billion hours ago, there was no human life on earth."—Live Or Die, MacMillian, p. 11.

SUPPRESSION IN BULGARIA IS REPORTED

DRIVE AGAINST TURKS SAID TO HAVE CAUSED "NUMEROUS DEATHS"

(By Don Oberdorfer)

A Bulgarian government program of obliterating the special identity of that country's Turkish minority has led to "numerous deaths" among the population and reports of some deaths among government security agents, State Department officials said yesterday.

Reports of the Bulgarian campaign have prompted large-scale street demonstrations among angry Turks in Istanbul and brought at least two offical protests to Bulgaria from the Turkish government.

A statement on the subject yesterday by Assistant Secretary of State Elliott Abrams, the first U.S. public declaration on what he called Bulgaria's "gunpoint program," reflected growing concern here.

The statement came in response to a Washington Post inquiry as Turkish Prime Minister Turgut Ozal arrived here last night on an official visit.

"We have reason to believe that several hundred members of the Turkish minority have been killed and more wounded" in the course of the campaign that began last year and reached a peak early this year, a State Department official said. "We also have reports that some security personnel have been killed and wounded, but we don't have specific numbers," he added.

Abrams, the State Department's senior human rights official, said in a statement that "the government of Bulgaria appears determined to denationalize ethnic and cultural distinctions of the 1-million-strong Turkish-speaking population inside its borders."

He said Bulgarian police and military have sought to coerce members of the Turkish minority "voluntarily" to give up their Turkish identity and adopt Slavic names.

"In some cases, troops supported by tanks, have surrounded entire villages, transporting the inhabitants to central administrative centers for renaming. There are also reliable reports that some resisters have been summarily shot," Abrams said.

He added that all Bulgarian-supported Turkish-language radio broadcasts have ceased and that Turkish language newspapers are no longer published in the country.

The Bulgarian Embassy, in written comments provided to The Post, rejected reports of forced changes of names by "so-called Bulgarian Turks," calling the accounts "fabricated and ungrounded."

A statement originally issued in Sofia said that every citizen has the right to choose or change his name under Bulgarian law and that "voluntary change of names" does not damage lives or rights of those concerned.

Turkish Foreign Ministry spokesman Yalim Eralp said last week that Bulgaria has rejected both diplomatic notes about the treatment of Bulgarian Turks. Responding to the Bulgarian position, Eralp said his government's protest is "completely humanitarian" and "has nothing to do with intervening in another country's internal affairs."

He added, "These people, while they are Bulgarians, have the same blood as Turks. They are our kinsmen."

Some reports circulating in Moscow, which could not be confirmed here, indicated that at least 40 Bulgarian soldiers were killed in recent serious clashes with members of the Turkish minority. One report said two Bulgarian Politburo members had been called to the Soviet capital to discuss suppression of the Turks.

In mid-March, Turkish Prime Minister Ozal said Turkey was ready to accept all of the ethnic Turks residing in Bulgaria rather than have them face continued persecution.

Shortly thereafter, Dimitur Stanishev, secretary of the central committee of the ruling Bulgarian Communist Party, was quoted as saying, "There will be no emigration of Bulgarian citizens in Turkey."

Stanishev went on to say "we shall have no talks with any country about this" because Bulgarian citizens should not become "a bargaining chip" during "any negotiations and dealings."

State Department officials said the United States has raised the fate of the Turkish minority with Bulgaria on several occasions, without satisfaction from Sofia.

"The government of Bulgaria considers this denationalization campaign to be strictly an internal matter," Abrams said. "We cannot agree. Bulgaria's actions constitute a violation of the basic human rights of the Turkish minority."

Abrams said the administration would continue to discuss the matter with Bulgaria in bilateral contacts and seek to focus international attention on "this serious problem."

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., with statements therein limited to 5 minutes each.

BILL READ SECOND TIME AND PLACED ON CALENDAR—S. 776

The PRESIDING OFFICER. The clerk will state S. 776 for the second time.

The assistant legislative clerk read as follows:

A bill (S. 776) to advance a portion of Commodity Credit Corporation loans to eligible producers, to support the 1985 planting season operation, and for other purposes.

Mr. BYRD. Mr. President, I object to any further proceedings on this measure.

The PRESIDING OFFICER. The bill will be placed on the calendar.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER [Mr. CHAFEE]. Without objection, it is so ordered.

RETURN FROM MONTANA

Mr. MELCHER. Mr. President, I had the pleasure of spending the past 10 days in the Big Sky State of Montana. I spent the past 10 days meeting with the folks that are usually described as the "salt of the Earth."

Montanans these spring days are tough and enduring, but also feeling salty. They expect more from this Congress and this administration than what they see happening. Specifically, they want a chance to make a profit in their business, whether it is agriculture, mining, forest products, or small business. They want a chance for a job or, if they have a job, the assurance that the job will continue.

They almost universally say we are spending too much for military weapons and foreign meddling. They do not rate Nicaragua a priority. They think Montana alone has many more problems than Nicaragua and the rest of Central America.

Montanans wish we would cut the budget and get interest rates down. Defense and foreign aid, they strongly believe, should be cut. They do not believe war is imminent, but do believe further economic decline is a real pressing problem. They believe our trade policy is ruinous and demand immediate correction on the trade imbalance with Japan, livestock and lumber imports from Canada, subsidized farm commodity sales from the Common Market, and the lack of a consistent U.S. trade policy of correct or compete with these trade encroachments are all on Montana minds.

The Republican proposed budget cuts to sacrifice Social Security, Medicare, education, research and conservation in order to preserve added Pentagon spending or to increase foreign spending cause an especially emphatic Montana reaction. They reject the increase in the Pentagon and foreign spending and believe a freeze is fair on most programs except Social Security.

There is much more Montanans believe needs to be done, but for the coming weeks they are watching closely the action Congress takes on the budget and interest rates, trade policy and the new farm bill, and a return to putting the needs of the country on a higher priority than foreign spending.

I believe they are on the right track, and I believe they expect actions, not words.

As I said, Montanans are in a "salty" mood.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(Mr. ANDREWS assumed the chair.)

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FEDERAL DEFICIT AND OUR TRADE IMBALANCE

Mr. CHAFEE. Mr. President, the restrictive trade practices of the Government of Japan have compelled forceful action by the United States in recent weeks to open Japanese markets to American products.

Sometimes I think the problems with Japan are misstated. The problems with Japan are not that we have a trade deficit with Japan. If Japan builds a better mousetrap or a better automobile or a better camera or better hi-fi equipment, I think we should be glad, because our consumers benefit. But what we object to is the lack of access of American products to Japanese markets.

So, Mr. President, I have joined in an effort to open those markets by introducing legislation to permit full access for American-made telecommunications equipment in Japan.

Japan's hostility toward American imports has justified a strong response by the United States. However, it is important for us to remember that the long-term remedy for our growing trade imbalance with most foreign nations is not retaliation, but a reversal of the economic patterns which imperil American exports. And this means reducing our Nation's staggering budget deficits.

Federal deficits are having a devastating effect on the ability of American industries to compete in world markets—not only American industries but American agricultural products as well. High interest rates brought about by the deficits that have led to an extremely strong dollar, causing our exports to be expensive and imports to be cheap. It is a double loser. Our products cost more abroad; their products cost less in our country. This poses damaging consequences for our export-oriented industries, not just now but in the long term as well.

We cannot restore our balance of trade only by retaliating against restrictive foreign trade practices. The most significant action we can take to help American manufacturers compete in the international marketplace is to reduce Government borrowing, bring down interest rates, and lower the dollar's value abroad. To do this, we must work to reduce the deficit now.

An editorial in yesterday's edition of the New York Times points out that Federal deficits, not foreign trade practices, are the chief cause of our export problems. Mr. President, I ask unanimous consent that the text of this editorial be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CHAFEE. Mr. President, I particularly stress in this editorial the comments made by Special Trade Representative for the United States, Ambassador William Brock, who is shortly to become Secretary of Labor. Mr. Brock, who is knowledgeable in this area as anybody in the United States has said that two-thirds to three-quarters—66 percent to 75 percent—of America's trade deficit with Japan is our own responsibility because of the strength of the dollar which results from our Federal deficit.

Mr. President, it is the duty of Congress, it is the duty of the Senate, and it is the duty of each of us, as we start on this subject next Monday, to do all we can to bring down the deficits which the Federal Government of the United States is running.

EXHIBIT 1

[From the New York Times, Apr. 14, 1985]

A CRISIS MADE IN U.S.A.

Bravely, Prime Minister Nakasone of Japan last week implored his people to buy something American. He warned that Japan's large trade surplus with the United States had stirred so much passion that America's reaction could "affect the life and death of our country."

If the Japanese now dig deep to appease their former conquerors, they might reduce the difference between their American exports and imports from $37 billion to perhaps $35 billion a year. And it is certainly in America's interest to give Mr. Nakasone's further effort to reduce trade impediments a chance. But as the numbers suggest, the anger being vented on Japan is a sideshow. Americans simply have to recognize that any palatable solution to our export problems requires above all a reduction in our own Government's huge budget deficit.

Congress's resentment against Japan needs to be taken seriously. Japan's reluctance to admit imports that compete with its most favored domestic products—from lumber to communications equipment—is well documented and has been tensely challenged for years. But this conflict has to be balanced against a broader American interest, even economic interest. For the only alternative to even sluggish progress at the bargaining table is a trade war, which would raise consumer prices and dislocate industry on both sides of the Pacific.

What has aggravated Congress's annoyance is not any new action by Japan but the coming home of domestic chickens: the steep rise in the value of the dollar, threatening many export industries with collapse. Thus companies like Motorola, once defenders of open trade, now think they have little to lose by protecting home markets. And in alliance with traditional opponents of open trade, such as steel, autos and apparel, they have forged a formidable bloc in Washington.

Prime Minister Nakasone recognizes the danger and is surely trying to achieve some import reforms. President Reagan, too, seems alert to the risks. Having for a time encouraged the Japanese bashers to strengthen his negotiators in Tokyo, he is now cautioning against protectionist retaliation. As Bill Brock, his former trade negotiator, observed, "two-thirds to three-quarters" of America's trade deficit with Japan "is our responsibility."

No unique Japanese action explains America's declining trade balance. Our deficit with Canada and the Common Market has similiarly increased. Even if Japan were to open all its markets to foreign competition—something that we would never do for others—its trade surplus with America would still be around $30 billion a year.

The main culprit is the 30 percent increase in the exchange value of the dollar since 1981. That has raised the price of American products abroad by 30 percent while lowering the price of foreign goods to Americans by the same amount. America has been flooded with bargain imports and its traditional exports—machinery, chemicals, electronics, grain—have lost their competitive edge.

The best way to bring down the dollar's value and reverse these trade fortunes is to bring down America's interest rates by sharply reducing the Federal deficit. Some economists want to hasten the correction by heavily taxing foreign earnings in America. That would help, but Americans would not like the consequences. For so long as Federal deficits exceed $200 billion, they absorb most of the money that Americans save. If foreign investments decline before the deficit is reduced, little money would remain to finance our housing, cars and industrial investment. Interest rates would skyrocket and a recession would probably follow:

Even deficit reduction might not itself redress America's trade balance. But any approach that tolerates these deficits will only turn the trade crisis into a credit crisis. Forget Pearl Harbor. The enemy is us.

COMMEMORATING THE TWENTIETH ANNIVERSARY OF THE HEAD START PROGRAM

Mr. CHAFEE. Mr. President, I am pleased to join as a cosponsor of Senate Concurrent Resolution 28, a resolution commemorating May 18 as the 20th anniversary of the Head Start Program. This resolution reaffirms congressional support for a program which has, in its 20 years, compiled an impressive track record.

Head Start provides educational, medical, and nutritional services to more than 450,000 lower income preschoolers, in order to eliminate the gap between disadvantaged children and their more fortunate peers. It has been widely recognized as one of our most cost-effective and successful programs, due in part to its unique approach stressing parent involvement and strong community support.

Head Start is a program that works. Its effectiveness has been documented again and again, in numerous independent evaluations. Head Start children score higher than nonparticipants on standardized tests of intelligence, school readiness, math, language, vocabulary, and perceptual skills. Studies have found that they perform better in school and are less likely to require special education. Head starters are more likely, in later years, to hold after-school jobs and are less likely to show signs of delinquent behavior.

Children receiving Head Start's medical services generally improve in physical development and motor skills, relative to other children. and they are more likely to be of normal height

and weight, to have fewer absences from school, and to perform better on physical tests.

Children are not the only ones who have benefited from Head Start, thanks to its consistent emphasis on parent and community involvement. For every 15 children in Head Start, 10 parents volunteer their services to the program. Clearly, the program reinforces parents' commitment to their children's well-being, with results that last a lifetime.

All these factors account for the most impressive compelling statistic of all: It has been estimated that, taking into account the cost of special and remedial education that Head Start makes unnecessary, the program's benefits outweigh its costs by 236 percent.

Head Start enriches the lives of thousands of Rhode Island children and their families, with eight programs currently in operation, serving communities in Cranston, Newport, North Providence, North Scituate, South County, Providence, Riverside, Warren, Bristol, Warwick, and Woonsocket. The outstanding efforts of talented and dedicated Head Start staff members have earned the respect and admiration of parents and community leaders. These efforts have contributed greatly to the success of the Head Start Program.

Head Start has proven to be well worth all we have invested in it. This is a program that has more than fulfilled its promise, and I urge the Senate to affirm its continued strong support by acting favorably on this resolution.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on April 5, 1985, during the adjournment of the Senate, received a message from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received on April 5, 1985 are printed at the end of the Senate proceedings.)

FISCAL YEAR 1986 BUDGET OF THE DISTRICT OF COLUMBIA—MESSAGE FROM THE PRESIDENT—PM 35

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with the District of Columbia Self-Government and Governmental Reorganization Act, I am transmitting the fiscal year 1986 Budget of the District of Columbia.

The proposal for the Federal payment to the District of Columbia reflected in this document is consistent with that included in the fiscal year 1986 Federal Budget submitted to Congress on February 4, 1985.

RONALD REAGAN.

THE WHITE HOUSE, *April 15, 1985.*

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that he had approved and signed the following enrolled joint resolutions:

On April 4, 1985:

S.J. Res. 50. Joint resolution to designate the week of April 1, 1985, through April 7, 1985, as "World Health Week", and to designate April 7, 1985, as "World Health Day";

S.J. Res. 62. Joint resolution commemorating the 25th anniversary of U.S. weather satellites;

S.J. Res. 71. Joint resolution to approve the obligation of funds made available by Public Law 98-473 for the procurement of MX missiles, subject to the enactment of a second joint resolution; and

S.J. Res. 79. Joint resolution to designate April 1985, as "Fair Housing Month,"

On April 14, 1985:

S.J. Res. 35. Joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 27, 1985, as "National Organ Donation Awareness Week."

ENROLLED BILLS SIGNED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of January 3, 1985, the President pro tempore (Mr. THURMOND) announced that he had signed the following enrolled bills, on April 4, 1985, during the adjournment of the Senate, which had previously been signed by the Speaker of the House of Representatives:

H.R. 730. An act to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, Arizona;

H.R. 1847. An act to amend title 28, United States Code, with respect to the U.S. Sentencing Commission; and

H.R. 1866. An act to phase out the Federal Supplemental Compensation Program.

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTION SIGNED

At 2:41 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 17. Joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 28, 1985, as "Jewish Heritage Week."

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURES REFERRED

The following bill, which has been reported from the Committee on Environment and Public Works was ordered referred to the Committee on Finance for the purpose of considering title II of the bill and any provisions relating to revenues for the Hazardous Substance Response Fund:

S. 51. A bill to extend and amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes.

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

S. 776. A bill to advance a portion of Commodity Credit Corporation loans to eligible producers, to support the 1985 planting season operation, and for other purposes.

REPORTS OF COMMITTEES SUBMITTED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of April 3, 1985, the following reports of commitees were submited on April 10, 1985:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 597. A bill to amend subtitle II of title 46, United States Code, "Shipping", making technical and conforming changes, and for other purposes (Rept. No. 98-26).

By Mr. GOLDWATER, from the Committee on Armed Services, without amendment:

S. Res. 132. An original resolution authorizing expenditures by the Committee on Armed Services; referred to the Committee on Rules and Administration.

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 661. A bill entitled the "George Milligan Control Tower."

REPORTS OF COMMITTEES

The following reports of commitees were submited:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 903. An original bill to authorize appropriations for the National Science Foundation for fiscal year 1986, and for other purposes (Rept. No. 99-27).

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 813. A bill to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1986 and 1987, and for other purposes (Rept. No. 99-28).

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, with an amendment:

S. 817. A bill to authorize appropriations under the Earthquake Hazards Reduction Act of 1977 for fiscal years 1986 and 1987, and for other purposes (Rept. No. 99-29).

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 818. A bill to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974 (Rept. No. 99-30).

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-151. A resolution adopted by Senate of the State of Hawaii; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE RESOLUTION No. 27

"Requesting Congress to Include a Sugar Price Support Program in the 1985 Farm Bill.

"Whereas, Hawaii's sugar industry is a vital component of the State's economy and has provided gainful employment and income for many of the State's residents; and

"Whereas, Hawaii's sugar producers are among the most productive, innovative, and efficient sugar producers worldwide; and

"Whereas, sugar is a widely produced commodity and almost every producing nation has highly protective market mechanisms to support its domestic sugar industry; and

"Whereas, United States' sugar producers cannot economically compete in a world market wherein better than 80 percent of the sugar is either controlled, pre-purchased or subsidized; and

"Whereas, despite the imposition of sugar import quotas, significant amounts of foreign surplus sugar are dumped in the United States which has contributed to depressed sugar prices; and

"Whereas, the sugar price support provisions of the 1981 Farm Bill have enabled U.S. domestic sugar producers to continue operations and have proven to be acceptable to nearly everyone; and

"Whereas, the sugar program has operated without cost to the government, given stability to domestic sugar prices, and assured consumers an adequate supply of sugar at reasonable prices; and

"Whereas, the price supports provided domestic sugar in the Farm Bill as well as the import quotas set by the U.S. Department of Agriculture will expire in 1986; and

"Whereas, the Farm Bill has worked well in the past and is in the best interests of agricultural producers and consumers throughout the United States as well as in Hawaii; now, therefore,

"Be it resolved by the Senate of the Thirteenth Legislature of the State of Hawaii, Regular Session of 1985, that the Congress of the United States is requested to include sugar price support provisions within its 1985 Farm Bill; and

Be it further resolved that certified copies of this Resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, the Secretary of the United States Department of Agriculture, and to each member of Hawaii's Congressional delegation."

POM-152. Concurrent resolution adopted by the legislature of the State of Hawaii; to the Committee on Agriculture, Nutrition, and Forestry.

"HOUSE CONCURRENT RESOLUTION No. 6

"Whereas, Hawaii's sugar industry is a vital component of the State's economy and has provided gainful employment and income for many of the State's residents; and

"Whereas, Hawaii's sugar producers are among the most productive, innovative, and efficient sugar producers worldwide; and

"Whereas, sugar is a widely produced commodity and almost every producing nation has highly protective market mechanisms to support its domestic sugar industry; and

"Whereas, United States' sugar producers cannot economically compete in a world market wherein better than 80 percent of the sugar is either controlled, pre-purchased or subsidized; and

"Whereas, despite the imposition of sugar import quotas, significant amounts of foreign surplus sugar are dumped in the United States which has contributed to depressed sugar prices;

"Whereas, the sugar price support provisions of the 1981 Farm Bill have enabled U.S. domestic sugar producers to continue operations and have proven to be acceptable to nearly everyone; and

"Whereas, the sugar program has operated without cost to the government, given stability to domestic sugar prices, and assured consumers an adequate supply of sugar at reasonable prices; and

"Whereas, the price supports provided domestic sugar in the Farm Bill as well as the import quotas set by the U.S. Department of Agriculture will expire in 1986; and

"Whereas, the Farm Bill has worked well in the past and is in the best interests of agricultural producers and consumers throughout the United States as well as in Hawaii; now, therefore,

"Be it resolved by the House of Representatives of the Thirteenth Legislature of the State of Hawaii, Regular Session of 1985, the Senate concurring, that the Congress of the United States is requested to include sugar price support provisions within its 1985 Farm Bill; and

"Be it further resolved that certified copies of this Concurrent Resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, the Secretary of the United States Department of Agriculture, and to each member of Hawaii's Congressional delegation."

POM-153. A resolution adopted by the City Council of South Gate, California urging Congress to support the award of a construction contract for the United States Navy's Arleigh-Burke class (DDG 51) Guided Missile Destroyer to the Todd Pacific Shipyards Corporation; to the Committee on Armed Services.

POM-154. A resolution adopted by the Greater Augusta Advertising Club, Inc. opposing any legislation prohibiting or limiting advertising in any medium of any product which is legal to produce, legal to sell, and legal to use; to the Committee on Commerce, Science, and Transportation.

POM-155. A resolution adopted by the Senate of the State of Georgia; to the Committee on Commerce, Science, and Transportation.

"RESOLUTION 187

"Whereas, the public health, safety and environment of the citizens of this state are of paramount importance to all Georgians; and

"Whereas, there is increasing concern about the amount of hazardous materials being transported on the nation's highways, rail systems, and waterways; and

"Whereas, transportation accidents which involve hazardous materials, create the potential for releases of such materials to the air, water, and land of Georgia and the nation and thereby pose a real and substantial threat to the health and well-being of this state and the nation; and

"Whereas, current federal laws limit and restrict the various states' authority to regulate the transportatioon of hazardous materials; and

"Whereas, current federal laws pertaining to the packaging and transportation of hazardous materials are not strong enough to ensure the most effective protection of public health and safety.

"Now, therefore, be it resolved by the Senate that the Congress of the United States is urged to strengthen the federal laws by:

(1) Requiring the training of truck drivers, train engineers, and boat captains in emergency response procedures to be followed in the event of accidents involving hazardous materials;

(2) Requiring that vehicles carrying less than 1,000 pounds of hazardous materials be placarded on the outside of the vehicle to identify the presence of hazardous materials;

(3) Establishing a funding mechanism for assisting state and local governments to maintain emergency response resources;

(4) Providing for the delegation of enforcement authority to states to enforce the federal laws pertaining to the packaging and transportation of hazardous materials, as well as enabling state and local governments to establish routes and times for movement of certain hazardous materials; and

(5) Establishing an effective public information and education program to inform the public about procedures for ensuring public health and safety.

"Be it further resolved that the Secretary of the Senate is authorized and directed to transmit a certified copy of this resolution to the President of the United States Senate and the Speaker of the United States House of Representatives."

POM-156. A joint resolution adopted by the Legislature of the State of Nevada; to the Committee on Energy and Natural Resources.

"SENATE JOINT RESOLUTION No. 9

"Whereas, The Nevada Research and Development Center of the Nevada Test Site is among the foremost facilities for the development and testing of nuclear power systems for use in space; and

"Whereas, The United States Department of Energy is about to select a location for the development and testing of a new nuclear power system for use in space designated the SP-100 Space Reactor Program; and

"Whereas, The location of this program in Nevada would take advantage of the excellent facilities that already exist at the site and would also create additional jobs and income for Nevadans and further the economic growth of the state; and

"Whereas, The location of such research projects will encourage the enlargement and diversification of the engineering programs offered by the University of Nevada System by fostering the demand for qualified engineering graduates throughout Nevada; now, therefore, be it

"Resolved by the Senate and the Assembly of the State of Nevada, jointly, That the legislature hereby urges the Secretary of the Department of Energy to select the Navada Test Site as the location for the SP-100 Space Reactor Program and any resulting programs for similar purposes; and be it further

"Resolved, That copies of this resolution be immediately transmitted by the legislative counsel to the President of the United States, the Vice President of the United States as the presiding officer of the Senate, the Speaker of the House of Representatives, the Secretary of the Department of Energy and each member of the Nevada congressional delegation; and be it further

"Resolved, That this resolution becomes effective upon passage and approval."

POM-157. A resolution adopted by the House of Representatives of the Commonwealth of Pennsylvania; to the Committee on Finance.

HOUSE RESOLUTION No. 15

"Whereas, The Reagan administration is proposing to eliminate revenue sharing for local communities as part of its budgetcutting efforts; and

"Whereas, Such elimination would have a very serious impact on political subdivisions within Pennsylvania, the curtailment of vitally needed municipal and social services, and possible bankruptcy in certain cases; therefore be it

"Resolved, That the House of Representatives of the Commonwealth of Pennsylvania memorialize the President and Congress of the United States to maintain the revenue sharing program for local communities at no less than current levels; and be it further

"Resolved, That copies of this resolution be transmitted to the President of the United States, presiding officers of each house of Congress and to each member of Congress from Pennsylvania."

POM-158. A resolution adopted by the Senate of the State of Georgia; to Committee on Finance.

"RESOLUTION 229

"Whereas, Georgia certainly supports efforts to reduce the federal budget deficit, but programs such as Medicaid which provide essential "safety net" services to low-income citizens should not be further reduced; and

"Whereas, Georgia's Medicaid program, as a result of major modifications between 1982 and 1984, has been reduced by over $100 million; and

"Whereas, under the President's proposal, Georgia would lose an additional $90 million in federal funds in Federal Fiscal Year 1986; and

"Whereas, by basing future growth on expenditures in 1984, the proposal discriminates against states, like Georgia, which have been the most cautious in expanding their programs and which have demonstrated prudent management; and

"Whereas, the proposal particularly punishes those 18 states, including Georgia, which conscientiously constrained program costs in order to comply with the provisions of the Omnibus Budget Reconciliation Act of 1981 encouraging states to limit the growth of Medicaid expenditures; and

"Whereas, services, eligibility standards, and reimbursement levels already are limited to the extent that further reductions would seriously impair the state's ability to meet the health-care needs of the medically indigent.

"Now, Therefore, be it *resolved by the Senate* that the members of this body urge the Congress of the United States to reject the President's Federal Fiscal Year 1986 budget proposal to cap the growth of federal Medicaid expenditures and to distribute funds based on a state's proportional share in 1984.

"Be it further *resolved* that the Secretary of the Senate is authorized and directed to transmit an appropriate copy of this resolution to the President of the United States Senate and the Speaker of the United States House of Representatives."

POM-159. Concurrent resolution adopted by the Legislature of the State of Utah; to the Committee on Finance.

"H. C. R. No. 25

"Be it resolved by the Legislature of the state of Utah, the Governor concurring therein:

"Whereas, the generally accepted accounting methods in common use by foreign taxpayers incorporated and doing business outside the United States and any state or political subdivision thereof materially differ from accounting methods used by taxpayers doing business in the United States;

"Whereas, financial statements prepared under foreign accounting standards are not readily convertible into financial statements necessary to comply with the corporate franchise tax laws of Utah;

"Whereas, many unresolved problems have arisen in attempting to convert such foreign financial statements, to reconcile incompatible systems of accounting, and to account for changes in foreign exchange rates, for purposes of determining the income and apportionment factors of foreign taxpayers on a basis consistent with that used to determine income earned in Utah by United States taxpayers;

"Whereas, the cost burden of converting financial statements of foreign taxpayers to financial statements more comparable to those of United States taxpayers is often substantially greater than any resulting tax on income considered to be earned in Utah;

"Whereas, the inclusion of foreign income in determining the tax liability of multinational taxpayers (whether based in the United States or in a foreign country) wishing to invest in Utah has frequently resulted in unfair taxation of taxpayers owning or controlling, or owned or controlled by foreign corporations and has consequently acted as an impairment to investment in Utah by such taxpayers, and has hindered the creation of new opportunities for employment and the diversification of the economic base of this state.

"Now, therefore, be it *resolved* that the Legislature and the Governor accept the State Tax Commission's recommendation that no positive recommendation for any legislation altering the State Tax Commission's authority to utilize the unitary method of determining income earned in Utah and subject to its corporate franchise tax come from this Legislature.

"Be it further *resolved* that the Legislature and the Governor endorse the State Tax Commission's recommendation that it adopt via its rulemaking authority taxpayer's option for a water's edge unitary method and that any such rule become effective upon adoption by the commission and become operative upon adoption by the federal government of legislation or regulations to fulfill its responsibility for increased administrative assistance and cooperation to promote full taxpayer disclosure and accountability.

"Be it further *resolved* that the Legislature urge the United States Congress to adopt such legislation or regulation, and that a copy of this resolution be forwarded to the Congress for this purpose.

"Be it further *resolved* that the State Tax Commission report in detail to the next General Session of the Legislature and to the Governor its regulatory policy on the "water's edge" unitary method."

POM-160. A resolution adopted by the House of Representatives of the State of New Mexico; to the Select Committee on Indian Affairs.

"A MEMORIAL RELATING TO THE NATIONAL INDIAN AGING POLICY

"Whereas, the United States government has a legal and moral responsibility to ensure that the Indian elderly in this country are entitled to all benefits and services available, and that these services and benefits should be provided in a manner that preserves and restores their dignity, self respect and cultural identity; and

"Whereas, the Indian elderly (those aged sixty or over according to the 1980 United States bureau of census) of this country are:

"A. increasing in population from sixty-four thousand in 1970 to one hundred nine thousand in 1980 with projections of an increase to two hundred thousand by 1990;

"B. unemployed at a rate exceeding eighty percent;

"C. living in poverty at a rate of seventy percent;

"D. living ten years less than the general population in terms of life expectancy;

"E. impacted by the lack of Indian nursing homes and Indian area agencies on aging;

"F. living in substandard and overcrowded housing;

"G. receiving less than adequate health care; and

"H. excluded from benefiting from social security which affects an estimated fifty-seven percent of the nation's Indian elderly population;

"Now, Therefore, be it resolved by the House of Representatives of the State of New Mexico that it respectfully requests the congress and the president of the United States to ensure that the following policy directives be implemented in order to meet the physical and mental health needs of the Indian elderly, their spiritual well-being, their continued involvement and roles within society:

"A. economic security;

"B. long-term health care;

"C. readily available health services and facilities;

"D. social well-being to receive supportive services which will enable the Indian elderly to remain in their own homes and communities, thus maintaining their culture, dignity and independence; and

"E. spiritual well-being to ensure that the Indian elderly continue to exercise their inherent right to believe and practice their native religion which enables them to live in harmony with their creator; and

"Be it further resolved that copies of this memorial be sent to the president of the United States, the president pro tempore of the United States senate, the speaker of the United States house of representatives and to each member of the New Mexico congressional delegation."

POM-161. A resolution adopted by the House of Representatives of the Common-

wealth of Massachusetts; to the Committee on the Judiciary.

"RESOLUTIONS MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO ENSURE THAT ONLY THE FEDERAL CONSTITUTION AND THE CONSTITUTION OF THE FIFTY STATES BE RECOGNIZED AS THE SUPREME LAW OF THE LAND

"Whereas, the proud people of the United States of America have enjoyed more than two centuries of cherished independence; and

"Whereas, throughout this historic period Americans have striven to preserve our American heritage and unprecedented tradition of freedom of speech, press, assembly and religious freedom as free men and women in this great Nation under God; and

"Whereas, It is fitting that contemporary Americans reaffirm the independent spirit that animated and inspired the Founding Fathers to proclaim their right to be free; Therefore be it

"*Resolved*, That the Massachusetts House of Representatives hereby urges the President and the Congress of the United States to exercise their best offices to ensure that only the Constitution of the United States of America and the constitutions of our own fifty States shall be recognized as the supreme law of our great country and that at no time shall the United Nations Charter or any treaty with foreign states overrule or supersede the Constitution of the United States of America or the constitutions of our fifty States; and be it further

"*Resolved*, That copies of these resolutions be sent by the clerk of the House of Representatives to the President of the United States, the presiding officer of each branch of Congress and to the members thereof from this commonwealth."

POM-162. A resolution adopted by the Senate of the State of Illinois; to the Committee on Foreign Relations.

"SENATE RESOLUTION No. 39

"Whereas, On January 27, 1973, the United States and North Vietnam signed the Paris Peace Accords, providing for the return of nearly 600 American war prisoners held in Vietnam but ignoring the 566 servicemen lost in Loas, which did not participate in the agreement; and

"Whereas, Hundreds of recent refugee reports describe similar scenes of American servicemen held virtually as slaves in caves and remote villages, guarded Vietnamese and Laotian soldiers, at times forced to repair American weapons and electronic equipment left over from the war; and

"Whereas, The conscience of every American citizen should be troubled on behalf of the families of those prisoners of war still held in Loas, who for 12 years have been subjected to unrelenting mental anguish and a sense of futility in their quest for information about their loved ones; and

"Whereas, Hanoi's policy is to do nothing to attempt to find these prisoners of war until the United States government stops supporting Peking, opens full diplomatic relations with Hanoi and makes good on past promises, including a multibillion dollar reconstruction program involving medical, educational and other nonmilitary humanitarian aid to the people of Southeast Asia; and

"Whereas, It is the United States government's moral and legal responsibility to ensure the return of all prisoners of war and to secure an accounting of missing personnel and the repatriation of remains of those who perished serving our Nation; therefore, be it

"*Resolved*, by the Senate of the Eighty-Fourth General Assembly of the State of Illinois, that we urge the President and the Congress of the United States to renew our government's efforts to facilitate the accounting for and return of all American prisoners of war still being held captive in Southeast Asia, especially the 566 known missing in Laos; and be it further

"*Resolved*, Whereas, That a suitable copy of this preamble and resolution be delivered to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives and each member of the Illinois Congressional Delegation."

POM-163. A resolution adopted by the House of Representatives of the State of Kansas; to the Committee on Labor and Human Resources.

"HOUSE RESOLUTION No. 6080

"Whereas, Suicide is currently the third leading cause of death among American youth 15–24 years old and the second leading cause of death among Kansas youth in the same age group; and

"Whereas, At a rate that has increased by more than 300% since 1955, adolescent suicide now claims more young lives than cancer; and

"Whereas, The actual number of suicides may be as great as four times the number reported, but are often classified as accidents or homicides; and

"Whereas, There is an emergent need for the compilation of a comprehensive body of information and guidelines detailing methods for addressing this public health concern: Now, therefore,

"*Be it resolved by the House of Representatives of the State of Kansas:* That we urge the Congress of the United States to create a Federal Commission on Youth Suicide Prevention; and

"*Be it further resolved:* That the Federal Commission on Youth Suicide Prevention be charged with a broad mandate to:

"(1) Amass a national data based on youth suicide;

"(2) research and analyze the underlying causes of youth suicide in our society;

"(3) formulate policy and legislative recommendations for the President and Congress of the United States; and

"(4) provide guidance to state and local governments and school systems in the development of suicide prevention and related programs; and

"*Be it further resolved:* That the Chief Clerk of the House of Representatives be directed to send enrolled copies of this resolution to the President of the United States; the President of the United States Senate; the Speaker of the United States House of Representatives; each member of the Kansas Congressional Delegation; Dr. Stella Pigano, Suite 835, Lieutenant Governor's Office, 230 Park Avenue, New York, New York 10169; Charlotte Ross, Suicide Prevention and Crisis Center of San Mateo County, 1811 Trousdale, Burlingame, California 94010; Julie Perlman, Director, American Association of Suicidology, 2459 S. Ash, Denver, Colorado 80222; and Elizabeth A. Tillman, Sheldon Education Center, 1155 Seabrook, Topeka, Kansas 66604."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

S. 903: An original bill to authorize appropriations for the National Science Foundation for fiscal year 1986, and for other purposes; placed on the calendar.

By Mr. DECONCINI (for himself, Mr. DURENBERGER, Mr. MOYNIHAN, Mr. HEINZ, Mr. MATSUNAGA, AND Mr. ABDNOR):

S. 904. A bill to establish a water research foundation, to include a water research planning center and a water information clearinghouse, to promote water research and to disseminate information relating to water resources; to the Committee on Governmental Affairs.

By Mr. BURDICK (for himself and Mr. ANDREWS):

S. 905. A bill to amend title 38, United States Code, to provide a service pension of $150 per month for veterans of World War I and a pension of $100 per month for certain surviving spouses of such veterans; to the Committee on Veterans' Affairs.

By Mr. DOLE (for Mr. THURMOND (for himself, Mr. BIDEN, Mr. LAXALT, Mr. HEINZ, Mr. GRASSLEY, Mr. DENTON, Mr. SPECTER, Mr. ABDNOR, Mr. KENNEDY, Mr. BAUCUS, Mrs. HAWKINS, Mr. COCHRAN, Mr. BURDICK, Mr. ZORINSKY, Mr. HATCH, Mr. HEFLIN, Mr. WARNER, Mr. KERRY, Mr. BOSCHWITZ, Mr. MCCLURE, Mr. NUNN, Mr. PRYOR, Mr. HUMPHREY, Mr. INOUYE, Mr. WILSON, Mr. LEVIN, Mr. SASSER, Mr. STEVENS, Mr. SYMMS, Mr. JOHNSTON, Mr. MATSUNAGA, Mr. MATHIAS, Mr. DECONCINI, Mr. METZENBAUM, Mr. MCCONNELL, Mr. LAUTENBERG, Mr. BOREN, Mr. EAST, and Mr. TRIBLE):

S.J. Res. 109. A joint resolution to designate the week of April 14, 1985, as "Crime Victims Week"; considered and passed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE (for himself and Mr. BYRD):

S. Res. 133. A resolution to direct the Senate Legal Counsel to represent Max Barber in "The Christian Broadcasting Network, Inc. versus Carol Ann Kadushin, d/b/a Capital Broadcast News," Civil Action No. 84-1821; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DECONCINI (for himself, Mr. DURENBERGER, Mr. MOYNIHAN, Mr. HEINZ, Mr. MATSUNAGA, and Mr. ABDNOR):

S. 904. A bill to establish a Water Research Foundation, to include a Water Research planning Center and a Water Information Clearinghouse, to promote water research and to disseminate information relating to water

resources; to the Committee on Governmental Affairs.

WATER RESEARCH FOUNDATION ACT

● Mr. DECONCINI. Mr. President, along with DAVE DURENBERGER and my other Senate colleagues, I am introducing legislation today entitled, the Water Research Foundation Act of 1985, to establish the Water Research Foundation.

Mr. President, our Nation's water resources are steadily and very rapidly becoming inadequate and unusable. This alarming reality is due not to any inherent deficiency in nature: We are blessed with plentiful resources. But it is due to a very complex mix of social, economic, and physical conditions resulting from too much change and too little planning.

The prosperity of America in the 20th Century, Mr. President, is often laid at the feet of the free enterprise system. But, it has been the mining of our most valuable resource, knowledge, an exclusively human resource—that has lifted this Nation to the pinnacle of social and economic wealth. The foundations of this wealth are rooted in the Constitution and the process of democracy.

In other lands, and in other times, education was the dominion of a privileged few. Policy was made by those who controlled and dictated to the masses. Information was a very scarce and precious resource to be parceled out in meager amounts for the purposes of the managers, to serve their narrowly conceived and, therefore, limited options.

In America, and in every society in which education is considered to be not only every individual's right, but obligation, we have management by the many. This guarantees policy by the majority.

These revolutionary principles have given us the most dramatic, and at times traumatic gains in the history of the world. In agriculture, for example, our greatest threat is producing too much. With the mass production of inexpensive goods, even the impoverished live more comfortably than kings of previous centuries. And the explosion of technology advances in this century have demonstrated the awesome power of knowledge and human imagination. There are many persons still alive today, in the space age, who rode to school on horseback and once considered human flights to be a romantic dream.

At the midpoint of this century, we looked ahead and became to fully realize the depth and potential of this technological and scientific Renaissance. We established the National Science Foundation [NSF]. The purpose of the NSF was not to dictate scientific policy but instead to support the basic research and related studies that were considered necessary by the scientific community, not the Government. The NSF is an independent agency which does not conduct its own in-house research but supports, financially and systematically, the innovations of independent institutions. It supplements Federal agency programs and gives cohesion to the many fragments of basic scientific study.

The Water Research Foundation, which we propose today, is similar in structure and purpose.

Mr. President, if there is going to be anything more important than water from now on, it is going to be information about water. Not just data, but useful information. But look at what we are doing. Federal support for water-related study has declined by 30 percent over the past few years. And yet we are obligated to pass legislation providing many billions of dollars to clean up so-called Superfund sites that are more the result of ignorance than malice. We are also faced with the need to spend billions of dollars to protect the quality of our surface water, to replace deteriorating water delivery systems, to modernize our harbors and waterways, and to deal with the cyclical problems of drought and floods. But we are stymied because we cannot answer some very basic questions about who should pay, what the standards should be, who is liable to whom, and how we can assure safe and reliable water supplies through a complex maze of local political and planning entities. We need to know how the great sweep of technological and social changes, including population shifts, are going to affect the demands on our already overstressed water resources in the coming decades. The economic and social consequences of inadequate management, because of insufficient knowledge, could be catastrophic.

Mr. President, in the last Congress, after looking at the recommendations from the Office of Technology Assessment, the General Accounting Office, and other such entities that usually give us good advice, I came to the conclusion that we as a country needed to coordinate and more fully support our water research efforts. I offered an amendment to an appropriations bill, now Public Law 98-181, to direct the President's Council on Environmental Quality to "consider and define" a National Center for Water Resources Research and to "define and plan" a National Clearinghouse to disseminate water-related information.

That 1-year study has been completed and submitted to Congress. The CEQ report includes three basic options on the two proposed centers. Concering the three research options, the CEQ states:

The options proposed are not mutually exclusive. Each research center meets a prescribed need, and thus sufficient justification exists for all three to be established simultaneously. Research and information functions could also be combined within a single organizational entity.

The legislation we proposed today is close to the CEQ option 2, but also includes elements of options 1 and 3. It provides a structure capable of linking research efforts, planning for long- and short-term research and information needs, and providing research support in conjunction with State and private entities.

The Foundation incorporates two separate but coordinated centers: the Water Research Planning Center and a Water Information Clearinghouse. The research planning center is designed to promote and support the water research activities already initiated within the various States and make recommendations for additional short- and long-term water research needs.

The clearinghouse is established to make credible information available not only to water professionals but to Government officials, businesses, academic institutions, the public media and interested citizens. It could also support educational programs from scholarly symposia to public information publications. It encourages State and local participation with combined financing to establish State information clearinghouses which would deal with topics of local importance.

The independent Foundation will not duplicate Federal agency, or other research efforts but will engage national problems and issues not otherwise allocated by the Federal agency mission-oriented research. It is governed by a board of directors.

The CEQ has estimated the startup costs for the Foundation at approximately $2 million for fiscal year 1986 and approximately $8 million a year thereafter. There is a separate authorization of $300 million a year for research grants. The focus for extramural financial support will be primarily interregional and interdisciplinary, and will involve institutional, social, and legal issues, as well as science and technology.

Mr. President, I would like to commend the Council on Environmental Quality and their contract study group, the Chesapeake Research Consortium, for presenting a very usable set of options within a very short period of time.

I would also like to commend the National Water Alliance for devoting a great deal of time and resources to studying this important national topic and developing the legislative summary which is the backbone of this bill. Additionally, there are a large number of individuals and organizations which have directly contributed to this process.

We hope that they continue to make their considerable resources and expertise available to the committees

and to the whole Senate as it deliberates on this legislative proposal.

Mr. President, in closing I would like to say that if we do not commit ourselves to more knowlegeable planning in the future, we condemn ourselves to the very costly and even more disastrous mistakes of the past.

I ask unanimous consent that the complete text of the bill be printed in the RECORD at this point. I urge my colleagues to take immediate action on this measure.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 904

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Water Research Foundation Act of 1985".

ESTABLISHMENT OF WATER RESEARCH FOUNDATION

SEC. 2. (a) ESTABLISHMENT.—There is established in the executive branch of the Government the Water Research Foundation (hereinafter in this Act referred to as the "Foundation"). The Foundation shall include a Water Research Planning Center (as established in section 3) and a Water Information Clearinghouse (as established in section 4).

(b) PURPOSES.—The Foundation is authorized and directed to—

(1) promote and support water research and related study activities within the States and territories of the United States;

(2) survey and link and supplement as required the appropriate existing water research and information dissemination efforts and capabilities within the States;

(3) determine and make public, recommendations of additional water resources study needs;

(4) assist in the determination of the long term national priorities for the study of basic and applied studies related to scientific, social, and legal concerns linked to the preservation, protection, and use of the Nation's water resources;

(5) support scientific and social research by making contracts or other arrangements including grants for the conduct of such study and to appraise the impact of such studies; and

(6) foster the interchange of water resource information within the United States and between the United States and foreign countries.

(7) Encourage the establishment of nongovernmental water research programs by water utilities and others and work in cooperation with such efforts to further promote research on water issues.

(c) ORGANIZATION.—(1) The Foundation will be governed by a Board of Directors (hereinafter in this Act referred to as the "Board"), which shall be composed of eleven members to be appointed by the President, with the advice and consent of the Senate. The Board shall exercise the authority granted to the Foundation by this Act.

(2) The persons nominated for appointment as members shall be—

(A) eminent in the fields of education, engineering, environmental study, hydrology, water management, agriculture, basic and applied sciences, computer technology, finance, public policy, and other fields which impact water-related issues;

(B) selected on a nonpartisan basis solely on the basis of established records of distinguished service; and

(C) selected in a manner that provides representation of the views of water leaders in all areas of the United States.

(3) The President is requested, in making the nominations of persons for appointment as members, to give due consideration to any recommendations for nomination which may be submitted to him by organizations representing, or engaged in, fields of endeavor referred to in paragraph (2).

(4) The term of office of each voting member of the Board shall be four years except that—

(A) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

(B) the terms of office of the members first taking office after the date of the enactment of this Act shall expire as designated by the President at the time of appointment, five at the end of two years, and six at the end of four years, after the date of enactment of this Act.

Any person who has been a member of the Board for four consecutive years shall thereafter be ineligible for appointment during the two-year period following the expiration of the fourth year.

(5) The President shall call the first meeting of the Board, at which the first order of business shall be the election of a Chairperson. The Board shall meet no less than twice during each calendar year. Six members of the Board shall constitute a quorum.

(6) Members of the Board shall serve without pay, expect that they shall receive per diem and travel expenses in accordance with section 5703 of title 5, United States Code.

(7) Within one year of its appointment, the Board shall—

(1) hire a director for the Water Research Planning Center and a director for the Water Information Clearinghouse;

(2) determine the location, type of facilities, and other logistical requirements for the Center and the Clearinghouse; and

(3) determine programs and submit a budget request and justification to the Congress for fiscal year 1986.

(d) GENERAL AUTHORITY.—(1) In order to carry out the provisions of this Act, the Board shall have the authority to—

(A) prescribe such rules and regulations as it deems necessary governing the manner of its operations and its organization and personnel;

(B) make such expenditures as may be necessary for administering the provisions of this Act;

(C) enter into contracts or other arrangements with organizations or individuals in the United States and foreign countries, including other government agencies of the United States and of foreign countries, for study and dissemination activities as the Board deems necessary to carry out the purposes of this Act;

(D) acquire by purchase, lease, loan or gift, and to hold and dispose of by sale, lease, or loan, real and personal property of all kinds necessary for, or resulting from, the exercise of authority granted by this Act;

(E) receive and use funds donated by others, if such funds are donated without restriction other than that they be used in furtherance of one or more of the general purposes of the Council;

(F) publish or arrange for the publication of appropriate information so as to further the full disseminaton of such information;

(G) accept and utilize the services of voluntary and uncompensated personnel and to provide transportation and subsistence as authorized by section 5703 of title 5, United States Code, for persons serving without compensation; and

(H) prescribe, with the approval of the Comptroller General of the United States, the extent to which vouchers for funds expended under contracts for water resource research and information dissemination shall be subject to itemization or substantiation prior to payment, without regard to the limitations of others laws relating to the expenditures and accounting of public funds.

(2) In the administration of this Act, no department, agency, officer, or employee of the United States shall exercise any direction, supervision, or control over the policy determinations, personnel, or curriculum, or the administration or operation of any State, local, or private school, agency, institution, organization, or association.

WATER RESEARCH PLANNING CENTER

SEC. 3. (a) ESTABLISHMENT.—There is established within the Water Research Foundation, a Water Research Planning Center (hereinafter in this Act referred to as the "Center").

(b) PURPOSES.—(1) The Center is authorized and directed to—

(A) support a broad range of studies in cooperation with other institutions, universities, and Federal and non-Federal agencies;

(B) correlate and link, as appropriate, Federal, State, academic, private sector, and other water related studies;

(C) determine additional research needs to make recommendations to the Congress and the President and to others;

(D) identify and recommend on a continuous basis long term research priorities to include those interrelated scientific, social, and legal concerns which affect water resources management and planning; and

(E) provide funding and other support for basic and applied research and related study efforts as approved by the Board, with emphasis on inter-disciplinary and interregional research for the enhancement of water quality, water quantity and supply, and the natural environment.

(2) The Center shall coordinate its activities with existing research efforts, both public and private, and the Clearinghouse in order to avoid the wasteful duplication of research and related study efforts. The Center may contract for required expertise and other capabilities with approval from the Board.

(c) DIRECTOR.—(1) The Center shall have a director who shall be appointed by the Board and shall be paid at a rate not to exceed the rate of basic pay payable to level V of the Executive Schedule.

(2) The Center may appoint and fix the pay of such additional personnel as the Center considers appropriate.

(3) The director and staff of the Center may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service and may be made without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates. Any Federal employee subject to the civil service laws and regulations who may

be employed by the Center shall retain civil service status without interruption or loss of status or privilege. In no event shall any employee of the Center other than the director receive as compensation an amount in excess of the maximum rate of basic pay payable for GS-18 of the General Schedule.

(4) Subject to the limitations of the following sentence and in accordance with the policies established by the Board, the director shall be responsible for implementing the purposes of the Center described in subsection (b), together with the performance of such other duties as may be delegated to him by the Board. No final action shall be taken by the director in the exercise of his authority under this Act unless the Board has reviewed and approved the proposed action.

(5) The director, with the advice of the Board, is authorized to establish and carry out a program of grants-in-aid to groups or, in appropriate cases, to individuals engaged in or concerned with water research and related studies for the purpose of enabling them to support the purposes of the Board described in subsection (b).

WATER INFORMATION CLEARINGHOUSE

SEC. 4. (a) ESTABLISHMENT.—There is established within the Water Research Foundation, a Water Information Clearinghouse (hereinafter referred to in this Act as the "Clearinghouse").

(b) PURPOSES.—(1) The Clearinghouse is authorized and directed to—

(A) identify and provide information in a timely manner to various user groups including academic institutions, engineers, scientists, business people, State government officials, Federal Government officials, public interest groups, members of the public media, trade associations, and other interested parties;

(B) analyze and synthesize water resource information from a large range of sources and provide references to additional sources of information;

(C) develop an information retrieval system to direct staff and clients to appropriate sources of information on water resources;

(D) evaluate the need, and establish as necessary, a system of regional and State organizations to serve as an integrated clearinghouse system; and

(E) carry out all other functions the Board deems appropriate to enhance its goal of providing a useful and continuous system for the dissemination of information on water-related topics.

(2) The Clearinghouse may support programs with educational purposes ranging from in-depth scholarly symposia, to activities for the employment and identification of individuals of all age groups who are interested in learning about water. These educational programs shall include information presentations at conferences and seminars, the development of publications on various water resource topics, and the development of other information to be made available to the general public.

(3) The Clearinghouse shall, from time to time, reevaluate the adequacy of its national information systems and make improvements as may be appropriate.

(c) DIRECTOR.—(1) The Clearinghouse shall have a director who shall be appointed by the Board and shall be paid at a rate not to exceed the rate of basic pay payable to level V of the Executive Schedule.

(2) The Clearinghouse may appoint and fix the pay of such additional personnel as the Clearinghouse considers appropriate.

(3) The director and staff of the Clearinghouse may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service and may be made without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates. Any Federal employee subject to the civil service laws and regulations who may be employed by the Clearinghouse shall retain civil service status without interruption or loss of status or privilege. In no event shall any employee of the Clearinghouse other than the director receive as compensation an amount in excess of the maximum rate of basic pay payable for GS-18 of the General Schedule.

(4) Subject to the limitations provided in the following sentence and in accordance with the policies established by the Board, the director shall be responsible for implementing the purposes of the Clearinghouse described in subsection (b), together with the performance of such other duties as may be delegated to him by the Board. No final action shall be taken by the director in the exercise of his authority under this Act unless the Board has reviewed and approved the proposed action.

(5) The director, with the advice of the Board, is authorized to establish and carry out a program of grants-in-aid to groups or, in appropriate cases, to individuals engaged in or concerned with water research and related studies for the purpose of enabling them to support the purposes of the Clearinghouse described in subsection (b).

REPORT

SEC. 6. Five years after the appointment of the Board, the Foundation shall report to Congress concerning—

(1) the activities and programs conducted by the Foundation in the first five years;

(2) the expenditures made by the Foundation during such period with an analysis of the impact of such expenditures; and

(3) whether the Congress should continue or terminate the Foundation with a justification for such continuation or termination.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. (a) GENERAL AUTHORIZATION.—There are hereby authorized to be appropriated—

(1) $2,000,000 for the fiscal year 1986 for the establishment of the Water Research Foundation, the Water Research Planning Center, and the Water Information Clearinghouse;

(2) $10,000,000 for each of the fiscal years 1987, 1988, 1989, and 1990 for operation of the Water Research Foundation, the Water Research Planning Center, and the Water Information Clearinghouse; and

(3) $300,000,000 for each of the fiscal years 1987, 1988, 1989, and 1990 for scientific and social research grants to carry out the purposes of this Act.

(b) PRIVATE DONATIONS.—In addition to the support provided by Federal appropriations, the Council may receive private donated funds to expand and enrich its programs. A report detailing the amount and sources of all donated funds shall be submitted to the Office of Management and Budget on an annual basis.

(c) OTHER FEDERAL AGENCIES.—The Council may receive federal grants and contracts from federal agencies and departments for special projects which can be conducted through the Center because of its ability to respond to specific water-related study on information dissemination needs.●

ADDITIONAL COSPONSORS

S. 49

At the request of Mr. MCCLURE, the names of the Senator from Missouri [Mr. EAGLETON], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Alaska [Mr. STEVENS], and the Senator from New Mexico [Mr. DOMENICI] were added as cosponsors of S. 49, a bill to protect firearm owners' constitutional rights, civil liberties, and rights to privacy.

S. 58

At the request of Mr. DANFORTH, the names of the Senator from Iowa [Mr. HARKIN] and the Senator from North Dakota [Mr. ANDREWS] were added as cosponsors of S. 58, a bill to amend the Internal Revenue Code of 1954 to increase research activities, to foster university research and scientific training, and to encourage the contribution of scientific equipment to institutions of higher education.

S. 361

At the request of Mr. MOYNIHAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 361, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 408

At the request of Mr. WEICKER, the names of the Senator from Pennsylvania [Mr. SPECTER] and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of S. 408, a bill to amend the Small Business Act to provide program levels, salary and expense levels, and authorizations for the Small Business Administration's programs for fiscal years 1986, 1987, and 1988, and for other purposes.

S. 524

At the request of Mr. ARMSTRONG, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 524, a bill to recognize the organization known as The Retired Enlisted Association, Inc.

S. 536

At the request of Mr. HART, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 536, a bill to establish a select commission to examine the issues associated with national service.

S. 554

At the request of Mr. ROTH, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 554, a bill to amend title 18, United States Code, to include the transportation of males under the Mann Act, to eliminate the lewd and commercial requirements in the prosecution of child pornography cases, and for other purposes.

S. 558

At the request of Mr. MOYNIHAN, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of S. 558, a bill to amend the Internal Revenue Code of 1954 to permanently exclude educational assistance programs from gross income, and for other purposes.

S. 614

At the request of Mr. BUMPERS, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 614, a bill to amend section 3505 of title 44, United States Code, to further reduce the Federal paperwork burden on small businesses.

S. 653

At the request of Mr. ABDNOR, the names of the Senator from Arizona [Mr. DECONCINI] and the Senator from Nevada [Mr. LAXALT] were added as cosponsors of S. 653, a bill to name the Federal Building located at 1200 Pennsylvania Avenue NW., Washington, DC, as the "Ariel Rios Memorial Federal Building".

S. 729

At the request of Mr. DURENBERGER, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 729, a bill to amend the Internal Revenue Code of 1954 to make permanent the rules relating to imputed interest and assumption of loans, and for other purposes.

S. 736

At the request of Mr. BUMPERS, the name of the Senator from Nebraska [Mr. ZORINSKY] was added as a cosponsor of S. 736, a bill to amend the Bank Holding Company Act of 1956 to provide for the safe and sound operation of depository institutions.

S. 739

At the request of Mr. DIXON, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of S. 739, a bill to establish a National Endowment for the Homeless.

S. 746

At the request of Mr. CHILES, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 746, a bill to require the National Drug Enforcement Policy Board to provide a comprehensive assessment of the designer drug problem and make recommendations to Congress for necessary legislation.

S. 850

At the request of Mr. THURMOND, the names of the Senator from Maryland [Mr. MATHIAS] and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of S. 850, a bill to create a Federal criminal offense for operating or directing the operation of a common carrier while intoxicated or under the influence of drugs.

S. 879

At the request of Mr. PROXMIRE, the names of the Senator from Vermont [Mr. LEAHY] and the Senator from Illinois [Mr. SIMON] were added as cosponsors of S. 879, a bill to authorize funds for research, development, test, and evaluation in connection with Strategic Defense Initiative programs and advanced strategic missile systems for fiscal year 1986, and for other purposes.

S. 881

At the request of Mr. KENNEDY, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Michigan [Mr. RIEGLE], the Senator from Arizona [Mr. DECONCINI], the Senator from Michigan [Mr. LEVIN], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of S. 881, a bill to extend title X of the Public Health Service Act for 3 years.

SENATE JOINT RESOLUTION 10

At the request of Mr. KENNEDY, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of Senate Joint Resolution 10, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for women and men.

SENATE JOINT RESOLUTION 29

At the request of Mr. GLENN, the name of the Senator from Nebraska [Mr. ZORINSKY] was added as a cosponsor of Senate Joint Resolution 29, a joint resolution to designate the week of November 11, 1985, through November 17, 1985, as "National Reye's Syndrome Week."

SENATE JOINT RESOLUTION 45

At the request of Mrs. HAWKINS, the names of the Senator from South Dakota [Mr. ABDNOR], the Senator from North Dakota [Mr. ANDREWS], the Senator from Delaware [Mr. BIDEN], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Alabama [Mr. DENTON], the Senator from Kansas [Mr. DOLE], the Senator from North Carolina [Mr. EAST], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Hawaii [Mr. INOUYE], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Nevada [Mr. LAXALT], the Senator from Michigan [Mr. LEVIN], the Senator from Idaho [Mr. MCCLURE], the Senator from Maryland [Mr. MATHIAS], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Georgia [Mr. MATTINGLY], the Senator from Ohio [Mr. METZENBAUM], the Senator from Georgia [Mr. NUNN], the Senator from Alaska [Mr. STEVENS], the Senator from South Carolina [Mr. THURMOND], the Senator from Texas [Mr. GRAMM], the Senator from Virginia [Mr. WARNER], and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of Senate Joint Resolution 45, a joint resolution to designate "National Child Safety Week."

SENATE JOINT RESOLUTION 59

At the request of Mr. HATCH, the names of the Senator from New York [Mr. D'AMATO], the Senator from Utah [Mr. GARN], the Senator from Ohio [Mr. GLENN], the Senator from Massachusetts [Mr. KERRY], the Senator from Nevada [Mr. LAXALT], and the Senator from Oklahoma [Mr. NICKLES] were added as cosponsors of Senate Joint Resolution 59, a joint resolution to designate "National Science Week."

SENATE JOINT RESOLUTION 83

At the request of Mr. DOLE, the names of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from South Carolina [Mr. THURMOND], and the Senator from Mississippi [Mr. STENNIS] were added as cosponsors of Senate Joint Resolution 83, a joint resolution designating the week beginning on May 5, 1985, as "National Asthma and Allergy Awareness Week."

SENATE JOINT RESOLUTION 86

At the request of Mr. WILSON, the names of the Senator from North Dakota [Mr. ANDREWS], the Senator from Ohio [Mr. METZENBAUM], the Senator from South Carolina [Mr. THURMOND], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Nevada [Mr. LAXALT], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of Senate Joint Resolution 86, a joint resolution designate the week of July 25, 1985, through July 31, 1985, as "National Disability in Entertainment Week".

SENATE JOINT RESOLUTION 87

At the request of Mr. MURKOWSKI, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of Senate Joint Resolution 87, a joint resolution to provide for the designation of July 19, 1985, as "National P.O.W./M.I.A Recognition Day".

SENATE JOINT RESOLUTION 104

At the request of Mr. DENTON, the names of the Senator from Georgia [Mr. MATTINGLY], the Senator from South Dakota [Mr. ABDNOR], the Senator from Maine [Mr. COHEN], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 104, a joint resolution to proclaim October 23, 1985, as "A time of remembrance" for all victims of terrorism throughout the world.

SENATE CONCURRENT RESOLUTION 28

At the request of Mr. CRANSTON, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of Senate Concurrent Resolution 28, a concurrent resolution expressing the sense of the Congress that May 18, 1985, should be commemorated as the

20th anniversary of the establishment of the Head Start Program and reaffirming congressional support for the Head Start Program.

SENATE CONCURRENT RESOLUTION 36

At the request of Mr. PROXMIRE, the names of the Senator from Illinois [Mr. SIMON] and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of Senate Concurrent Resolution 36, a concurrent resolution expressing the sense of the Congress regarding the establishment of a joint commission between the United States and the Soviet Union to study the concept of "nuclear winter" and its impact for the national security of both nations.

SENATE RESOLUTION 81

At the request of Mr. ARMSTRONG, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of Senator Resolution 81, a resolution to establish regulations to implement television and radio coverage of proceedings of the Senate.

SENATE RESOLUTION 130

At the request of Mr. WALLOP, the names of the Senator from Idaho [Mr. SYMMS], the Senator from Nevada [Mr. HECHT,] the Senator from Idaho [Mr. MCCLURE], the Senator from Kentucky [Mr. FORD], the Senator from Arkansas [Mr. PRYOR], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Maine [Mr. COHEN], the Senator from Florida [Mr. CHILES], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Oklahoma [Mr. BOREN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Arkansas [Mr. BUMPERS], the Senator from Missouri [Mr. EAGLETON], the Senator from Connecticut [Mr. DODD], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Maryland [Mr. SARBANES], the Senator from South Dakota [Mr. ABDNOR], the Senator from Colorado [Mr. ARMSTRONG], the Senator from West Virginia [Mr. BYRD], the Senator from Alaska [Mr. STEVENS], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Mississippi [Mr. STENNIS], the Senator from Montana [Mr. MELCHER], the Senator from Maine [Mr. MITCHELL], the Senator from Virginia [Mr. WARNER], the Senator from Wisconsin [Mr. KASTEN], the Senator from Massachusetts [Mr. KERRY], the Senator from Vermont [Mr. LEAHY], the Senator from Oregon [Mr. PACKWOOD], the Senator from Louisiana [Mr. LONG], the Senator from New York [Mr. D'AMATO], the Senator from New Mexico [Mr. BINGAMAN], the Senator from Florida [Mrs. HAWKINS], the Senator from Tennessee [Mr. SASSER], the Senator from Texas [Mr. BENTSEN], the Senator from North Dakota [Mr. ANDREWS], the Senator from Arizona [Mr. DECONCINI], the Senator from Maryland [Mr. MATHIAS], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Resolution 130, a resolution relative to the Sport Fish Restoration Trust Fund.

SENATE RESOLUTION 133—DIRECTING REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 133

Whereas, the case of *The Christian Broadcasting Network, Inc. v. Carol Ann Kadushin, d/b/a Capital Broadcast News,* Civil Action No. 84-1821, is pending in the United States District Court for the District of Columbia;

Whereas, defendant has served a trial subpoena for testimony and documents on Max Barber, Superintendent of the Senate Radio and Television Gallery;

Whereas, pursuant to section 703(a) and 704(a) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a) (1982), the Senate may direct its counsel to represent members and employees of the Senate in civil actions relating to their official responsibilities;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of an employee of the Senate is needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistently with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Max Barber in the case of *The Christian Broadcasting Network, Inc. v. Carol Ann Kadushin, d/b/a Capital Broadcast News.*

SEC. 2. That Max Barber is authorized to testify and to produce subpoenaed documents in the case of *The Christian Broadcasting Network, Inc. v. Carol Ann Kadushin, d/b/a Capital Broadcast News* except concerning matters that the Senate Legal Counsel or his representative determine are privileged from disclosure.

NOTICES OF HEARINGS

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. COHEN. Mr. President, I wish to announce that the Senate Oversight of Government Management Subcommittee will hold a hearing on Oversight of the Office of Government Ethics on Wednesday, April 24, at 9:30 a.m., in room 342 of the Dirksen Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. COHEN. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Monday, April 15, to hold a hearing on conservation and research and extension.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON HOUSING AND URBAN AFFAIRS

Mr. COHEN. Mr. President, I ask unanimous consent that the Subcommittee on Housing and Urban Affairs of the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Monday, April 15, to hold a hearing on fiscal year 1986 authorization for HUD and Rural Housing and Mass Transit Authority.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

BUDGET STATUS REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1985 pursuant to section 311 of the Congressional Budget Act.

Since my last report, the Congress has cleared the Federal Supplemental Compensation Phaseout Act, H.R. 1866, for the President's signature.

The report follows:

REPORT NO. 85-5: REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 280—REFLECTING COMPLETED ACTION AS OF APR. 3, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Budget resolution level	1,021,350	932,050	750,000
Current level	1,015,973	933,364	750,739
Amount remaining	5,377	0	0

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $5,377 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 280 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 280 to be exceeded.

REVENUES

Any measure that would result in revenue loss exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 280.●

NATIONAL CHILD SAFETY WEEK

● Mr. D'AMATO. Mr. President, I am pleased today to join as a cosponsor of Senate Joint Resolution 45, which designates September 8 through 14 as National Child Safety Week. Child safety is something we should be concerned about not just during the month of September, but throughout the year as well. Children are our most precious resource, they are the innocent future of this great country.

Both children and parents must know that America is a safe place for them. They deserve nothing less. Therefore, I have introduced legislation, the National Child Protection Act (S. 142), to prevent the sexual abuse, exploitation, and molestation of our children. This legislation can provide us with the needed information to detect and deter the abuse of our children. Every opportunity that I get, I will make certain that child molesters know that we will not tolerate their abnormal behavior. Our children will be protected. The safety of our children is our responsibility.

This resolution increases public awareness of the needs of our youth and their families. Increased awareness of the etiology and prevention of child sexual abuse will help us stop this despicable crime. We must begin to focus attention on methods of preventing harm to the most vulnerable. Mr. President, I firmly believe that this resolution will help toward this effort. It promotes child safety and protection. Child molesters, and others who prey on young innocent lives, must know that we will not stop fighting for the safety of our children. I will continue my fight to save our children until all of them are safe.

Mr. President, I urge my colleagues to join me in cosponsoring this resolution. It heightens awareness of the crimes our children face and asserts that we will not tolerate such crimes. Children are our concern during National Child Safety Week and every other week throughout the year.●

LET'S CONTINUE THE WORK OF ARC

● Mr. SASSER. Mr. President, I am pleased to join with my colleagues, Messrs. ROCKEFELLER, BYRD, SARBANES, HEINZ, STENNIS, HOLLINGS, MOYNIHAN, METZENBAUM, GLENN, HEFLIN, PRYOR, SPECTER, GORE, and BUMPERS in sponsoring S. 847, the Appalachian Regional Development Act Amendments of 1985. This is critical and much needed legislation. The work of the Appalachian Regional Commission has brought progress and promise to this economically depressed region of the country. Enactment of S. 847 will help Appalachia to finish the job.

The economic prosperity of this region is a shared concern of the several States. For far too many years now, indeed, decades, Appalachia has languished on the fringes of our Nation's economic growth. The Appalachian Regional Commission, for two decades, has been the driving force in the effort to correct this inequity. Because of ARC, people from Ohio to New York to Tennessee and Mississippi have witnessed a positive change in the quality of their lives. Appalachia has come a long way. America can help Appalachia to finish the job.

The Reagan administration has been repeatedly remiss in its responsibilities toward Appalachia. For years now, this administration has sought the elimination of ARC and this year is no different. If enacted, the Reagan administration's fiscal year 1986 budget for ARC would pull the plug on two decades of critical economic development. Through its fiscal year 1986 budget, the Reagan administration essentially turns its back on Appalachia.

But ARC has meant too much to too many people in the 397 counties of the 13-State Appalachian region. Now is not the time to call it quits on Appalachia. Rather, now is the time to strengthen our resolve to see the job completed.

Mr. President, because of ARC, Appalachia is no longer physically isolated from the rest of the Nation. The ARC highway program has opened up this region for development. The highway system, some 2,471 miles proposed, has helped provide easier access to schools, medical facilities, and housing.

Over $335.7 million has been invested by ARC in vocational education programs. By 1980, the number of Appalachians with 4 or more years of high school increased 75 percent from the 1960 level of 32.8 percent.

Mr. President, education is not a luxury. It is a basic right to which all Americans should have equal access and opportunity.

Through its community building program, ARC has helped Appalachia America to help itself. Grant assistance moneys, totaling some $464.6 million, have helped to provide basic public services such as safe drinking water, sanitary waste disposal, and recreation facilities.

Also, Mr. President, not the least of ARC's 20-year achievements is its work in providing critical health and child development programs. Since 1965, ARC has funded 1,771 health and 533 child development programs with $605.8 million in ARC funds, $240.3 million from other agencies, and $704.5 million in State and local funds. The work of ARC has been a shared Federal, State, and local commitment to improvement.

Because of ARC, the Appalachia region has turned the tide on an alarming rate of infant mortality, which, in some counties, still reaches a staggering 50 percent higher than the national average.

S. 847 provides a critical means to continue assistance efforts to Appalachia. This legislation is an important means by which we can continue to combat illiteracy, infant mortality, isolation, and economic despair. Enactment of S. 847 would continue the ARC highway program through 1992. This would enable some 470 additional highways to be constructed. S. 847 would also extend the important economic development programs of ARC through 1988.

The Appalachian Regional Commission is as relevant today as it was in 1965. Through the years, it has taken a shared National, State, and local effort to make ARC work. ARC is a prime example of federalism that works. ARC works for Appalachia and America. I urge my colleagues to join me in supporting the continuation of the Appalachian Regional Commission.●

NATIONAL SCIENCE WEEK

● Mr. D'AMATO. Mr. President, I am pleased today to join as a cosponsor of this resolution, Senate Joint Resolution 59, which designates May 12-18, 1985, as National Science Week. We should not only be concerned about science during May, but throughout the year as well. This resolution calls attention to the importance of science for all of America.

National Science Week celebrates past scientific achievements and inspires future advancement. It is essential that we continue to heighten public awareness and commitment to technologies that make this country strong and prosperous. Our children must be provided with scientific information to enhance their understanding of the complexities with which we live. They need to know the basics to help them solve future problems. Our children are the scientists of tomorrow.

We need programs that stimulate student interest in science and mathematics, which is vital for continued U.S. technological strength and development. Therefore, I am pleased that the National Science Foundation has joined with four U.S. corporations in promoting National Science Week. The four companies are: Dupont, IBM, Eastman Kodak, and General Electric. During this special week of events, television and radio programs, museum exhibits, open houses at research facilities, and other events will draw

public attention to this fascinating subject. This national effort, from diverse groups and organizations, will have a dual approach to the study of science; it will show how science is both challenging and fun.

Mr. President, this resolution provides a unique opportunity to focus public attention on the importance of science and technology. This resolution is part of our continuing effort to make certain that science has every opportunity to continue to advance and that our children are advanced in science. Therefore, Mr. President, I urge my colleagues to join me in cosponsoring National Science Week.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. Any portion which is classified information has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room SD-423.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, March 27, 1985.

In reply refer to I-01111/85ct
Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate,
Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 85-19, concerning the Department of the Air Force's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $77 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

[TRANSMITTAL NO. 85-19]

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Saudi Arabia

(ii) Total estimated value:

	Million
Major defense equipment [1]	$0
Other	77
Total	77

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Cooperative logistics supply support arrangement (CLSSA) under a foreign military sales order II (FMSO II) blanket order requisition for spare parts and supplies to support U.S. origin equipment now in Saudi Arabia's inventory.

(iv) Military Department: Air Force (KBZ).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending 31 March 1984.

(viii) Date report delivered to Congress: 27 March 1985.

POLICY JUSTIFICATION

SAUDI ARABIA-COOPERATIVE LOGISTICS SUPPLY SUPPORT

The Government of Saudi Arabia has requested the purchase of a cooperative logistics supply support arrangement (CLSSA) under a foreign military sales order II (FMSO II) blanket order requisition for spare parts and supplies to support U.S. origin equipment now in Saudi Arabia's inventory at an estimated cost of $77 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own self-defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of the Saudi Armed Forces. In addition, enhancement of the defensive capabilities of Saudi Arabia in a regional context will also contribute to overall Middle East peace.

This sale will provide the CLSSA FMSO II for spare parts and supplies necessary for Saudi Arabia to maintain its U.S. origin Air Force equipment.

The sale of this equipment and support will not affect the basic military balance in the region.

Procurement of these items and services will be from private contractors.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC., April 1, 1985.

In reply refer to I-01291/85ct
Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 85-20 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Air Force's proposed Letter of Offer to Thailand for defense articles and services estimated to cost $360 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

GLENN A. RUDD,
Acting Director.

[TRANSMITTAL NO. 85-20]

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Thailand.

(ii) Total estimated value:

	Millions
Major defense equipment [1]	$200
Other	160
Total	360

[1] As defined in sec. 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: A quantity of 12 F-16A/B aircraft with government-furnished aeronautical equipment for installation during production, aircraft spares, support equipment, and training.

(iv) Military department: Air Force (SKA).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid:

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.

(vii) Section 28 report: Case not included in sec. 28 report.

(viii) Date report delivered to Congress; April 1, 1985.

POLICY JUSTIFICATION

THAILAND—F-16 AIRCRAFT

The Government of Thailand has requested the purchase of a quantity of 12 F-16A/B aircraft with government-furnished aeronautical equipment for installation during production, aircraft spares, support equipment, and training at an estimated cost of $360 million.

This sale will contribute to the foreign policy and national security objectives of the United States by helping to improve the security of Thailand, an ally which is an important force for peace and regional stability in Southeast Asia. This sale will also contribute to maintaining the current balance within the region.

Sale of the F-16A/B aircraft to Thailand will strengthen Thai air defenses enabling Thailand to provide for its own security and thus reduce the likelihood of armed aggression against Thailand. With the recent deployment of MIG-23 aircraft to Vietnam and increased Vietnamese activities along the Thai-Kampuchean border, it is important to honor the Thai request for F-16A/B aircraft to provide the capability to respond to the increased threat.

The sale of this equipment and support, will not affect the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Forth Worth, Texas.

Implementation of this sale will require the assignment of one additional U.S. Government representative to Thailand for one year; and, 30 additional contractor representatives will be required in-country for 24 months.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,

Washington, DC., March 27, 1985.
In reply refer to I-15443/84ct
Hon. RICHARD G. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN. Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 85-21 and under separate cover the classified annex thereto. This transmittal concerns the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $65 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 85-21

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Pakistan.
(ii) Total estimated value:

	Millions
Major defense equipment[1]	$53
Other	12
Total	65

[1] As defined in sec. 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: A quantity of 15 AN/TPQ-36 radars and related support.
(iv) Military department: Army (VDV).
(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.
(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.
(vii) Section 28 report: Included in report for quarter ending 30 September 1984.
(viii) Date report delivered to Congress: 27 March 1985.

POLICY JUSTIFICATION

PAKISTAN—AN TPQ-36 RADARS

The Government of Pakistan has requested the purchase of a quantity of 15 AN/TPQ-36 radars and related support at an estimated cost of $65 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan. Pakistan plays an increasingly greater role as a stabilizing force in the Indian Ocean region. It is strategically important in the defense of sea lines of communication in the Arabian Sea and approaches to the Persian Gulf.

The Government of Pakistan requires these weapon-locating radar systems as a primary means of countering hostile mortar fire. This sale is a part of Pakistan's overall force modernization plan.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Hughes Aircraft Corporation of Fullerton, California.

Implementation of this sale will require the assignment of four additional U.S. Government personnel for one month and one contractor representative for 12 months to Pakistan.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, March 28, 1985.
In reply refer to I-00557/85ct
Hon. RICHARD G. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 85-22 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Navy's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $50 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

GLENN A. RUDD,
Acting Director.

TRANSMITTAL No. 85-22

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Pakistan.
(ii) Total Estimated Value:

	Millions
Major defense equipment [1]	$43
Other	7
Total	50

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles of services offered: A quantity of 500 AIM-9L air-to-air missiles with related support equipment, spare parts, training, and technical assistance.
(iv) Military department: Navy (ABU).
(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.
(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See annex under separate cover.
(vii) Section 28 report: Case not included in sec. 28 report.
(viii) Date report delivered to Congress: March 28, 1985.

POLICY JUSTIFICATION

PAKISTAN-AIM-9L MISSILES

The Government of Pakistan has requested the purchase of a quantity of 500 AIM-9L air-to-air missiles with related support equipment, spare parts, training, and technical assistance at an estimated cost of $50 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan. Pakistan plays an increasingly greater role as a stabilizing force in the Indian Ocean region. It is strategically important in the defense of sea lines of communication in the Arabian Sea and approaches to the Persian Gulf.

The Government of Pakistan needs these AIM-9L missiles to improve its air defense posture. Acquisition of these AIM-9L's will give Pakistan an all-aspect air-to-air missile which will enhance the capability to deter and defend against persistent air incursions from Afghanistan. The Pakistan Air Force is qualified to absorb these missiles.

Pakistan Air Force's best fighter aircraft, the F-16's are handicapped in countering the air threat from Afghanistan by the absence of an air-to-air missile with a forward hemisphere intercept capability. Purchase of the AIM-9L will help rectify this deficiency.

The sale of this equipment and support will not affect the basic military balance among the regional states.

The prime contractors will be the Raytheon Corporation of Lowell, Massachusetts and the Ford Aerospace Corporation of Newport Beach, California.

Implementation of this sale will require the assignment of three additional U.S. Government personnel for one month and four contractor representatives for one month to Pakistan.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

WEAPON SYSTEMS

● Mr. QUAYLE. Mr. President, there appears in the March issue of Air Force magazine, which is published by the Air Force Association, an excellent article by Lt. Gen. Robert D. Russ, Deputy Chief of Staff for Research, Development, and Acquisition, explaining the emphasis which the Air Force is placing on reliability and maintainability of weapon systems. I think all Senators will find General Russ' discussion of this important subject interesting, and I ask that the article be printed in the RECORD.

The article follows:

FOURTH WHEEL ON THE ACQUISITION WAGON

(By Lt. Gen. Robert D. Russ, USAF)

Historically, cost, schedule, and performance have been the dominant management wheels in the acquisition process. To move forward, a system had to fit the acquisition budget, join the force when it was needed, and perform as advertised. A fourth and vital wheel—reliability and maintainability, or R&M—while not ignored, clearly received less emphasis than the other three. Because of this, many of our acquisition wagons didn't roll as well as they should have. The time has come to give that fourth wheel the same priority and emphasis that have been accorded the other three.

The desirability of reliable and maintainable systems has long been recognized, but persuit of such reliability has been erratic. Life-cycle costs, which are strongly driven by R&M, have often assumed a secondary role in the effort to produce system performance within budgeted front-end costs. Given the options to pay now or pay later, the choice was almost always the latter. That practice is no longer acceptable.

To understand why the Air Force is so keenly interested in R&M, three factors that strongly affect Air Force capability must be considered. These are manpower, both in numbers and skills, the rising cost for maintaining large inventories of spare parts, and, most important of all, the need to get more combat effectiveness from each weapon system.

CONSTRAINTS ON MANPOWER

To generate sorties, many highly skilled technicians are required. Of the some 490,000 enlisted personnel in the Air Force today, one in three is involved in maintaining aircraft. As we add new capabilities to

the force structure (with GLCM, for example) and as we increase the size of the force structure (as with the C-5B), we cannot expect large increases in our authorized strength. Even if we had the congressional authorizations and could afford the price for training and salaries, there is no assurance that larger numbers of high-quality people will be available. The future recruiting picture is less favorable than that of today because of demographic trends, private-sector competition, and changing attitudes.

The manpower question is not just one of numbers; it's also one of skills. A smaller manpower pool with substantially better prospects for employment in the civilian sector means not only a tougher time in recruiting the number of personnel needed, but also an increased difficulty in obtaining personnel with the ability to master highly technical skills. Therefore, our new systems must be designed so they break less often and are easier to repair when they do break. Such systems will provide more capability through increased availability and reliability. Further, they will require fewer people and lesser skills to maintain the force structure.

We have made some significant improvements in recent years, and current systems are more reliable and maintainable than the systems they replaced. The F-15, our air-superiority fighter, needs one-third fewer maintenance man-hours per flying hour than the F-4. The F-16 requires only about half as many maintenance man-hours per flying hour as the F-4. Our newer systems will continue this emphasis on reduced manpower. The C-17 will require about a third of the C-5's maintenance man-hours.

However, we need to reduce manpower at an even faster rate, and the opportunities to do so are clearly available. Currently, an F-16 wing with seventy-two aircraft requires 206 people providing "hands-on maintenance" for the fire-control systems and engines. If we were able to improve the reliability of these systems twofold, we could reduce this group by forty percent. That means we could free eighty-two men and women to help support other needs of the Air Force.

The recent Alternate Fighter Engine competition resulted in a significant achievement in reliability and maintainability. Through an eminently successful competition between the two major engine contractors, the Air Force is now obtaining engines for the F-15 and F-16 aircraft that will save the government between $2 billion and $3 billion in support costs over the twenty-year life cycle. The overhaul period for the cores of these engines has been extended to more than eight years of operational use, compared to the approximately four-year overhaul interval for today's F-15 and F-16 engines. Benefits gained from the engine competition will continue to accrue through the use of comprehensive warranties. They contain positive and negative incentives that ensure that the contractors will deliver engines that continue to perform to specification levels in extended field use.

SPARES AND READINESS

Increasing system reliability also drives down life-cycle costs by reducing the number of spares required. And spare parts are big business. The Air Force manages some 835,000 different types, and the parts inventory is worth more than $38 billion. In Fiscal Year 1985, the budget contained more than $6 billion for spares. Management of spare parts involves a huge, complex system that employs hundreds of thousands of people.

The higher the reliability of our systems, the lower the requirement for spare parts, transportation assets, repair facilities, and storage locations. But better reliability means more than solving manpower and spare-parts problems. Its impact is on readiness and system effectiveness—in short, on our ability to fight.

Today's F-15 is quite a different aircraft from the F-15 delivered ten years ago. Configuration changes have improved the performance capability of the fire-control and electronic warfare systems. The plane's range is greater. Reliability of F-15 subsystems has improved to the point where the aircraft today can fly two and a half times longer between corrective maintenance actions than it could a decade ago.

Mission-capable rates are also affected by maintainability improvements. If systems can be designed to ease troubleshooting and repair, more sorties can be generated. The F-15 force in 1984 flew fifty percent more missions per month per aircraft than its counterpart in 1975.

A one percent increase in the mission-capable rate for a force of 700 F-15s is the equivalent of adding seven more F-15s to the inventory.

The F-15E will be even more capable than today's F-15, and with better field reliability. The aircraft will be equipped with a ring-laser gyro inertial navigation system that has the potential for a tenfold improvement in reliability. Another example of improved reliability and maintainability can be found in the F-15E engine monitor display. It deletes twenty cockpit instruments and puts the same information in one display. It improves flight operations by improving the pilot's visibility while saving nine pounds in aircraft weight. But, most important, the Mean Time Between Failure (MTBF) rates are projected to climb from a cumulative eighty-four hours for the twenty-instrument system to 1,000 hours with the new system, illustrating that intelligent application of modern technology allows us to improve both reliability and performance.

R&M AND THE B-1B

The new B-1B strategic bomber also provides some excellent examples of what can be done when proper emphasis is placed on R&M. As the Air Force begins taking possession of new B-1B this year, the benefits of R&M planning will become evident. Examples of subsystem improvements range from a complex oxygen-generating system to simple light bulbs.

The aircraft uses a new Molecular Sieve Oxygen Generating System that makes its own oxygen during flight. It will replace the old liquid-oxygen systems that required extensive ground equipment to replace the oxygen prior to each flight. This one improvement is anticipated to net the Air Force a savings of more than $17 million.

The B-1B also has a new built-in Central Integrated Test Subsystem, which can test and check out avionics systems while the aircraft is in flight or on the ground. In the ground mode, the integral subsystem eliminates the need for almost all flight-line, subsystem, and specialized test and support equipment. The result is a savings of more than a half billion dollars and a sixty percent reduction in specialized maintenance personnel.

An electronically steerable phased-array antenna will improve antenna system reliability on the B-1B by a factor of three. The rotary launcher, which will accommodate multiple weapons, is designed to be a common strategic system carrier. The commonality standardizes loading procedures, reduces training, and requires fewer spares and support equipment.

Even the light bulbs on the B-1B will be more reliable. With new push-button switches and dual high-reliability integral lamps, we expect life-cycle cost savings of more than $6 million in light bulbs alone. The lamps are so reliable that the control panels themselves will fail and require maintenance long before both bulbs in any one switch fail.

The limits on system reliability are often those limits we impose unknowingly on ourselves. We have seen in a number of subsystems that a concerted effort to build for reliability has yielded Mean Time Between Failure rates that are far better than expected. There is no reason we cannot double the maintenance interval rates on every system we have. Some could be improved manyfold.

EARLY EXPERIENCE WITH MINUTEMAN

Our experience with the Minuteman strategic missile is an example of what can be accomplished when a concerted effort is made to improve the reliability of a system.

When the Minuteman I was first deployed, the guidance system failed about every 600 hours. The guidance can was removed some fifteen times a year per missile. Moreover, maintenance people took seven days to remove, reinstall, calibrate, and warm up the guidance system and put it back on line. The average out-of-commission rate was 105 days a year.

In 1963, $150 million was invested to improve Minuteman reliability. As a result, Mean Time Between Failures of the guidance system rose to 9,000 hours. Less than one removal per year per silo became the norm for the fleet, and missile availability rose significantly. We saved $1.5 billion with that $150 million investment. Today's Minuteman guidance system has been further improved. It enjoys more than 10,000 hours Mean Time Between Failure.

At Vandenberg AFB, Calif., on October 17, 1984, the seventy-second Minuteman I missile ever built was launched in a research experiment. It was the first time that a twenty-year-old Minuteman had ever been launched. All three missile stages and the guidance set, built in 1964, performed exactly to orginal specifications.

Last September, the Secretary of the Air Force and the Chief of Staff of the Air Force issued a policy memorandum to all major commands that outlined the Air Force commitment to institutionalizing reliability and maintainability in all weapon systems. Two things were of special importance in this commitment. First, it related improved R&M directly to the need to lower manpower requirements, improve operational effectiveness, and reduce life-cycle costs. Secondly, it required development of an Air Force action plan to ensure that these important objectives were met.

Since issuance of the memorandum, an action plan has been developed to ensure that R&M will be a primary program objective throughout the acquisition of production and use.

Reliability and maintainability are not new subjects for the Air Force. In developing the plan, a wealth of information—including a thorough review of prior successes and failures—was examined. Existing policies came under close scrutiny, particularly

those policies that might create "disincentives" or roadblocks. This review reaffirmed that R&M must be designed into new systems as well as into existing systems through modifications and the replacement of subsystems.

LIST OF NEEDED ACTIONS

The action plan is aimed at accelerating R&M improvements. To ensure that this vital fourth wheel on the acquisition wagon continues to receive proper emphasis, a list of needed actions was developed.

First, Air Force objectives will be identified and established. By objectives, I refer to resource goals set at Headquarters Air Force level that relate directly to mobility, manpower, and life-cycle cost requirements. These objectives will be translated into firm program requirements at the major commands. These requirements will be monitored across the Air Force. To ensure that the Air Force stays on track, doctrine and policy will be updated to tie R&M to operational requirements.

Second, organizational changes are being made to establish focus and accountability for R&M. Reliability and maintainability advocacy will offer a combination of technical expertise, improved program coordination, and greater R&M exposure.

Third, a system to ensure integrated R&M planning throughout the Air Force is being created. Major commands will be responsible for R&M planning within their operations, and the planning will involve all weapon systems. In addition, planning will cover other areas, such as personnel levels. It will include technology roadmaps to ensure that new capabilities bring reliability and maintainability with them.

Fourth, a long-range program for communicating our concerns and motivating our people about R&M must be part of this institutionalization process. We will explain our actions to Air Force people and to industry to ensure that there are no lingering doubts as to the Air Force commitment to R&M.

The fifth area involves accountability and feedback. To ensure that R&M is being given consideration at least equal to that given the other acquisition wheels of cost, schedule, and performance, program reviews of reliability and maintainability factors will be scrutinized at all levels. Emphasis from the Inspector General and from the R&M staffs will be increased. Independent review teams will examine the weapon system R&M programs in detail. If R&M is to be an equal wheel, we must give it the same emphasis now provided cost, schedule, and performance. We will tract, measure, and review R&M from cradle to grave, as it were.

INFLUENCING CONTRACTORS

Finally, it is the contractor who designs and builds R&M into the systems. Therefore, we will influence the contractor's R&M performance directly. Addressing reliability and maintainability at conferences and in articles is useful, but we expect to gain industry's undivided attention to R&M through strong contractual incentives, both positive and negative. By raising the consideration level of R&M in source selection, increasing R&M incentives during development, insisting on warranties in production, and extending the contractor's participation and responsibility beyong the factory and into the field, we will be able to bring about the improvement that is desired.

This nation is fortunate to have been endowed with brilliant scientists and engineers who have developed and applied advanced technology that is the envy of the world. The capabilities of our systems have been our strong suit in the balance of power, enabling us to maintain credible deterrence in the face of superior numbers.

However, an equation based on the balance of cost, schedule, and performance pervades our acquisition system today from the drawing board through the assembly plant to the flight line. It has provided us with highly capable systems. But the price we have paid for manpower and training, for spare parts, for support equipment, for out-of-commission rates, and for mobility restraints is too high and can no longer be allowed to continue. We must strengthen this equation by including R&M as a prime management parameter. The technology—with the dedicated people who developed and applied that technology—can create reliability and maintainability.

The Air Force is committed to an acquisition wagon with four equal wheels, a wagon that runs smoothly and efficiently because R&M has been given proper emphasis from beginning to end.●

ETHNIC AMERICAN DAY

● Mr. D'AMATO. Mr. President, I rise today to cosponsor legislation introduced by my good friend and colleague from South Dakota. This legislation, Senate Joint Resolution 32, would make September 15, 1985, "Ethnic American Day" and would illuminate the contributions to the United States of all American citizens, who, like myself, have roots in other nations around the world.

As the land of opportunity, the United States has offered immigrants from all over the globe the ability to better themselves in a way their own country would or could not. In turn, these immigrants have created a social and cultural diversity which truly cannot be appreciated by any other country in the world. For example, New York City boasts the most diverse melting pot in the world; places such as Chinatown, Little Italy, and Harlem provide the city with a truly unique and very special identity.

Ethnic Americans have given of their lives in defending the United States and they have made significant contributions to the United States in the arts, sciences, medicine, business, and government. Ethnic Americans have played a role in developing the greatest society in the world today.

I am proud to cosponsor Ethnic American Day for it will recognize and celebrate the tremendous value of ethnic Americans to the United States. September 15, 1985, will be a day for all of America to celebrate.●

BIRTH CONTROL: A GRIM GAME OF NUMBERS

● Mr. HUMPHREY. Mr. President, I know we have all reacted with horror to the reports coming out of the People's Republic of China which tell of forced abortions, forced sterilizations, and female infanticide. This is wreaking havoc with the population. Chinese who feel they must have a boy are driven to female infanticide under the "one couple, one child" policy. This stringent "one child" policy has resulted in a serious disproportion of sexes in some areas where infant boys are found to outnumber girls 5 to 1, according to the Washington Post.

In reviewing the eyewitness accounts of this tragedy given by anthropologist Steven W. Mosher, I am outraged by the cruel and unrelenting enforcement of the Chinese coerced abortion program. The reported incidents are appalling and poignant beyond words. We must be fully aware of these heinous crimes against women and families, and respond without equivocation.

Mr. President, I ask that the entire chapter entitled "Birth Control: A Grim Game of Numbers" from Mr. Mosher's book, "Broken Earth, the Rural Chinese," be printed in the RECORD.

The chapter follows:

BIRTH CONTROL: A GRIM GAME OF NUMBERS

(By Steven W. Mosher)

(Birth control is a way of slaughtering the Chinese people without drawing blood.—People's Daily editorial, 1952)

(Socialism should make it possible to regulate the reproduction of human beings.—Vice Premier Chen Muhua, 1979)

The Chinese government, it turns out, is deadly serious about birth control. That is not what you would think from the sheer mass of the Chinese population, numbering over 1 billion, or one-fifth of the world's population, at last count. And that is not the way it seems when you enter the main gate of the Yuexiu Park in the northern section of Guangzhou City on any day of the week to be confronted with a 1-million-square-meter carpet of people of all ages. Nor is that the impression left by walking through the narrow alleyways of a Chinese village and encountering band after band of little urchins playing in front of their high-walled brick homes. But it is what I found when I attended a family-planning meeting at Equality Commune.

Family-planning meetings, which all women who were pregnant with their third or later child were required to attend, or who had had their first child within the last four years, had already been in progress for four days in each of the commune's twenty brigades, and over 300 women had agreed to terminate their pregnancies under urging from local cadres. An equal number of village women had not acceded to the cadres' demand, however, and the commune revolutionary committee had decided to move the meetings to the commune headquarters, where their progress could be more carefully monitored and senior cadres placed in charge. The sessions continued to be segregated by brigade and led by high-ranking cadres, usually the Party secretary or assistant Party secretary of the brigade in question, but now a member of the commune revolutionary committee was present as well. Their goal was to implement the directive issued by the Guangdong provincial revolutionary committee restricting couples to no more than two children, thus holding

down the rate of population increase in the commune to the prescribed 1.0 percent.

From Sandhead Brigade there were eighteen women, all from five to nine months pregnant, and many red-eyed from lack of sleep and crying. They sat listlessly on short plank benches arranged in a semicircle about the front of the room, where He Kaifeng, a commune cadre and Communist Party member of many years' standing, explained the purpose of the meeting in no uncertain terms. "You are here because you have yet to 'think clear' about birth control, and you will remain here until you do." He spoke to the women with an ease that bespoke many years of experience in mass meetings, but his message to the women was anything but reassuring. "China must develop, and we will gradually develop China into a strong socialist state," he continued, "But whether or not we develop depends on controlling our population."

Then he began to reason with the women about their concerns. "We know that you want a son in order to be secure in your old age. But remember that you are still young. As the country develops, it will create welfare programs. By the time you are old, you will not have to worry about who is going to support you. The government will support you." Speaking directly to the several women present who had brought along their girl children, he said, "You must remember that some girls can be as filial as boys. And you can always call in a son-in-law. I know one in Sandhead Brigade who treats his mother- and father-in-law as if they were his own parents. I hope that everyone will think more clearly about this problem, discuss this problem with relatives, and agree to an abortion."

Up to this point he had spoken in a persuasive, not unfriendly fashion, but then he heard one of the women mutter something about the Communist Party to her neighbor, and his voice became loud and hard. "Don't say anything against the Communist Party," he warned sternly. "It is very concerned about you. The Party is not saying that you are not allowed to have children, just that two children are enough, and that it is best to have just one child."

The sudden edge in his voice surprised me. He Kaifeng was of medium height, with close-cropped gray hair and a benevolent, grandfatherly expression. He kept his Mao jacket open at the neck, and he wore sandals, unlike most of the other ranking commune cadres, who wore leather shoes. He had originally been a peasant, and still had something of the folksy, downhome manner of the villager. But at the meeting he was official and distant, all propaganda and Party line.

I was even more taken aback by his next remark. Looking coldly around the room, he said slowly and deliberately, "None of you has any choice in this matter. You must realize that your pregnancy affects everyone in the commune, and indeed affects everyone in the country." Then, visually calculating how far along the women in the room were, he went on to add, "The two of you who are eight or nine months pregnant will have a caesarean; the rest of you will have a shot which will cause you to abort." Several of the women were crying by this point, and Comrade He Kaifeng apparently decided that his words had the proper impact, for he went back to the table at the end of the room and took his seat with the other cadres.

There matters were left for a half an hour or so, in order, He Kaifeng told me afterwards, to allow the women time to think about what he had said. "They must be made to realize the seriousness of this matter before they will think clear about abortion," he explained. At the end of this intermission, Chen Shunkui, the assistant Party secretary of Sandhead Brigade, strode to the center of the room and began to talk to the women. In contrast to He Kaifeng, who had been stern and authoritarian, even threatening the women, Chen Shunkui was relaxed and easygoing, and joked with the women at several points. He was a slender man of medium height, with a sort of awkward pleasantness about him. Although a cadre, he was called by his first name by his fellow villagers, and he was even more informal with them, often using their nicknames.

"We aren't forcing you to abort," he said, taking the edge off of He Kaifeng's concluding remark. "The decision to undergo an abortion has to be made by you yourselves. But in making this decision, you have to consider not only yourselves but the country and the collective as well. Obviously the country needs to control its population for the sake of the Four Modernizations. The collective, as well, needs to limit its population."

This was, as I knew, perfectly correct. At the time of the 1952 land reform Sandhead Brigade had had only 3,480 residents all told. The 1979 annual census registered a total of 8,010 brigade members, for an increase of 130 percent in twenty-seven years. Like most other collectives, Sandhead had already brought all available land under cultivation, and further population expansion would only lower per capita resources to even more marginal levels.

"There is already only one-sixth of an acre for each person in the village," he continued. "Having more children is only going to make it more difficult for all of us to make a living."

Chen Shunkui spoke in a light and rather matter-of-fact fashion, befitting the fact that he was talking with friends and neighbors. "The commune Party committee is quite concerned about you. They have even"—here his tone brightened even further—"arranged to have cars pick you up and take you to the commune clinic for the operation and back to the village when it is over." Several of the women laughed out loud at the outrageous thought of riding in a car, a Cinderella-like fantasy for peasant women, some of whom have never even ridden on a bus. The laughter broke the ice, and one woman, voicing a concern of many, called out, "What about safety?" Chen Shunkui had a ready answer. "The commune has arranged for two doctors from the Red Wind People's Liberation Army Hospital in Guangzhou to take charge of the operations. The abortions will be done properly. You will be safe and secure. The doctors are experts." Chen Shunkui paused momentarily to gain the women's full attention before contining with his line. "Mosquito nets have even been brought over from the commune reception center [a kind of hotel used by visiting cadres] for your use while you are in the clinic."

This the women found amusing as well, but their bemused chatter stopped as Chen Shunkui brought the meeting back to its main point with a question. His query, "Who would like to undergo an abortion?" was greeted with silence. After a pause, a woman flanked by two young daughters raised a question that was on all of their minds. "Will we be allowed to go home tonight? If not, then we have to go home to fetch our blankets." The women had been told during the earlier round of brigade meetings that once the commune meetings began, they would have to stay in a commune dormitory until they agreed to an abortion. Hoping to have an excuse to go home at least briefly on the evening of the first day, they had agreed among themselves not to bring bedding. The atmosphere grew tense as the women waited for Chen's answer.

"Well, we aren't going to make everyone stay here," he began in conciliatory fashion, but he quickly went on to make clear what the price of going home was going to be. "We will allow you to go home, but only to convince your husbands, mothers-in-law, or fathers-in-law, or others at home that it is best that you have an abortion. You must first tell me that you agree to an abortion and are going home to convince others. If not, then you must stay here tonight." He ended on this note, stepping back to the table and taking a seat. Again the women were left to mull over his remarks among themselves.

Except for a break for lunch, the meeting continued in this fashion throughout the day, with Comrade He Kaifeng, Chen Shunkui, and Sandhead Brigade's woman's work cadre taking the floor in turn. The commune cadre would usually take a hard line, while the two brigade cadres just as often took a more amiable approach. Although the atmosphere of the meeting was less tense when the brigade cadres were speaking—they were, after all, fellow villagers—the gist of their argument was identical to that of the commune cadre: the women must agree to an abortion. After each cadre spoke, there would follow a half-hour break to allow the women to consider what had been said.

Finally, late in the afternoon, Chen Shunkui strode again to the center of the semicircle of benches and announced that it was time for the women to decide whether to stay overnight at the commune or go home. Taking out a small notebook, he began to read out the names of the women one by one.

"Lin Xinlan," he called out. Everyone in the room swung around to regard the woman flanked by two small daughters who had earlier raised the question about going home. Her face remained expressionless. "Do you want to go home?" Chen Shunkui pressed, deliberately avoiding the use of the word "abortion." The woman's control suddenly broke, and she cried out that she would "never abort."

Ignoring her outburst, Chen Shunkui smoothly read out the next name on his list. "Su Shaobing." A very young and very pregnant woman replied in a small, hesitant voice that she wanted to go home. "Good," the cadre said quickly. "Go home and convince your parents-in-law that you should have an abortion. Remember that you have already agreed."

Chen Shunkui continued down the list, reading one name after another, noting each woman's reply to the question "Do you want to go home?" Although one other woman, whose only child, a lad of two and a half, was severely retarded, shouted out that she was going to bear her child regardless of the consequences, the rest of the women responded quietly and fatalistically. Of the twenty-four women whose names were read out, three agreed to abortions, all of which were scheduled for the following day, five agreed to go home to convince

their families that they should abort, and ten refused an abortion. Six of the twenty-four who had been instructed to attend that day were not present, and would each have 2 rmb deducted from their family's income, a fine that would continue to be levied each day they did not attend.

Overall, that first meeting brought jarringly home to me certain realities of China's effort to control its population growth. Although the program is officially described as planning births, it might more appropriately be entitled "restricting births," for its goal is to limit births to the lowest number possible. The technique of reeducation in public meetings adopted to achieve this goal is similar to that used in China's numerous earlier sociopolitical movements. Alternately threatening and cajoling, persuading and reasoning, the cadres explain over and over why it is necessary to follow the Party line, applying a steady psychological pressure that deadens reason and gradually erodes the will to resist. Experience has taught the Chinese that arguing back at authority will only make matters worse, and so they listen passively and finally come to agree to whatever is being demanded of them. The whole process is reminiscent of the Chinese proverb "Water drops can pierce a rock."

But a more appropriate metaphor for the birth control meeting that I attended would be "like a hot knife through butter." The easily cowed, inarticulate young village women, whose sex, age, and social position combined to place them at the opposite end of the rural hierarchy of status and power from the senior male cadres who ran the meeting, were particularly easy for these cadres to convert to the proper way of thinking, even though the issue was something as near and dear to them as their bodies and their babies. What I observed that day was nothing more—or less—than a mild but still very effective form of the process that has become known in the West as brainwashing.

If China is applying an irresistible force to the solution of its population problem, then that population itself, if not quite an immovable object, has in its massiveness a vast, lead-like inertia accreted over millennia. China's population was already 60 million at the time of the birth of Christ and reached ever-greater peaks during later dynasties—80 million in the ninth-century Tang Dynasty, 110 million in the twelfth-century Sung, 200 million in the sixteenth-century Ming, and 425 million in the nineteenth-century Ching. In the century preceding the Communist conquest of the mainland, however, the Malthusian checks of war, famine, and disease kept the death rate hovering near the birth rate, and the population remained under 500 million. With the end of the civil war in 1949, China's population took off on an upward trajectory that added nearly 20 million new citizens every year for the next decade to the newly founded People's Republic, a number equal to the total population of East Germany or California.

As self-evident as the need to control China's population growth already seemed to many in the early years of the PRC, Chairman Mao did not see it that way. Rather he took the standard Marxist position on overpopulation, diagnosing it as just one more symptom of the disease of capitalism. Once disorganized capitalist society has been replaced by a smoothly regimented socialist one, in which wealth is distributed equally and all are engaged in productive work, the doctrine went, then the nightmare of overpopulation will simply disappear in the dawn of the socialist millennium. Not only did he overrule Malthus's dismal theorem, which held that population constantly tended to exceed the food supply, he went so far as to take the opposite position. He regarded a large and growing population as an asset, an important element of national power, vital for economic progress. Mao argued, with typical exuberance of language, that "every stomach comes with two hands attached," by which epigram he meant to emphasize man's role as a producer of wealth over his role as a consumer. Not only was family planning unnecessary, it was a positive evil, a sort of genocide. In 1952 the *People's Daily* condemned birth control as "a way of slaughtering the Chinese people without drawing blood . . . [The people are] the most precious of all categories of capital."

The census of 1953, which revealed a population near 600 million, apparently shocked certain members of the ruling circle into reconsidering the issue, and public discussion on the advantages and disadvantages of family planning was allowed. Professor Ma Yinchu, president of Beijing University, Professor Chen Ta, a well-known economist, and others wrote articles warning of the dangers of uncontrolled population growth. As a result, some efforts were made in 1956–57 to promote birth control in urban areas, although little was done in the countryside, where energies were directed at making collectivization work. With the coming of the Great Leap Forward, however, those who had come out in favor of birth control were denounced as rightists who were carrying out political intrigues in the name of the population problem. The purge that followed ended all discussion of birth control for several years.

But it was perhaps just the catastrophe called the Great Leap Forward and its aftermath, "the three difficult years," that finally roused Mao from his dogmatic complacency about overpopulation. During the three years from 1959 to 1961 China's population overtook its resources. A combination of bureaucratic mismanagement and natural disasters caused tens of millions of deaths from disease and famine. Properly chastised by reality for ignoring it, Mao went through a reluctant conversion on the issue of birth control from a doctrinaire Marxism to a more pragmatic policy of population planning. Beginning in the early sixties and continuing to the present day, China has pursued a consistent and ever more stringent policy of birth control.

The gathering momentum of the program has nevertheless been twice deflected by political movements, the first time during the Cultural Revolution from 1966 to 1968 and more recently during the period following the overthrow of the Gang of Four. During both periods the local powers that be were preoccupied simply staying afloat in the sometimes violent political currents of the times, and birth rates bounded. The reverses of the period following the downfall of the Gang were described to me by the woman's work cadre to a brigade located down the West River from Guangzhou. "We performed 168 tubal ligations in our brigade during 1976," this woman said. "Then late that year the Gang of Four was overthrown. Throughout 1977 all of our meetings at the brigade and commune level and all of the directives from the county and the province concerned criticizing the Gang of Four and rooting out their influence. For over a year we held no birth control 'high tides' [short, intense campaigns] because we had no instructions to do so. Only twelve women had tubal ligations performed in 1977 and only two in 1978." Left to themselves, the villagers let nature take its course, and nine months later the birth rate began an upward swing that took it from 1.69 percent in 1977 to 2.17 percent in 1978 and 2.61 percent in 1979, a ten-year high.

These two stutter steps aside, the campaign continued to move forward throughout the sixties and seventies and scored early successes in China's cities, where conditions encouraged smaller families. Shanghai, the largest of China's cities, has consistently reported rates of population growth under 1 percent a year for the last decade, and other cities are not far behind. One of the axioms of modern demography is that urban areas have significantly lower birth rates than rural, and this is especially true in China, where couples live in cramped quarters and most women hold down full-time jobs, making it difficult to manage more than one child. And these pressures have grown more intense over time. In the 1950s each Chinese had an average of 5.4 square yards of housing. But the building of apartment houses has not been given high priority in the program of socialist construction, and a gradually expanding urban population has mostly been crowded into thirty-year-old flats. By 1977 there were only 4.3 square yards of living space per person. In the early 1950s only a minority of women were employed outside of the home. For the last two decades nearly all women have worked. Another factor is that many couples, especially those in which the husband and wife are college or technical school graduates, have been given work assignments which keep them apart for all but a few weeks out of the year. This makes it difficult for such working "single" mothers to take care of even one child, and it is sometimes difficult to conceive that child as well in a marriage that consists of a series of relatively brief conjugal liaisons each followed by a long period of separation.

Financial considerations tends to inhibit large families as well. Many urban couples simply cannot afford to have more than one or two children. At the senior middle school of Rongqi Town in southeastern Guangdong, Guo Fangxu, a tall, handsome teacher with a university degree in Chinese literature, told me how he and his wife, a doctor stationed in a commune clinic 25 miles away from Rongqi, were just able to support themselves and their two children, a boy of 9 and a girl of 6, on their combined salary of 99 rmb [$66] a month. "My income of 54 rmb is only sufficient to provide for my boy and myself," he complained. "I pay 10 rmb a month for my apartment and over 30 rmb a month for food. The rest goes for miscellaneous expenses like cloth, shoes, electricity, and so on. My wife is a little better off, because she lives in a free commune dormitory, and because the commune day care center that our daughter attends is only 3 rmb a month. We would be totally unable to make ends meet if we had a third child, though."

Yet it is not just Chinese urban life-styles, with their lack of space, time, and money, that have reduced the size of urban families; it also is the enforcement of strict birth quotas from the early seventies onward. Each year all urban residence committees and production units are given quotas of children that their residents and workers will be allowed to bear. Pressure is applied

on headstrong couples from three directions at once—through their neighborhood residence committee, through the husband's work unit, and through the wife's work unit. Chen Taitai, the stout, middle-aged head of a local residence committee in the Yuexiu District of Guangzhou, explained how the system was enforced in her ward of 2,100 people. "Every woman who has yet to have a tubal ligation is given a gynecological examination once every three months by the clinic at her place of work, and any woman who is discovered to be pregnant is ordered to attend birth control meetings. Her husband's work unit and the residence committee where the couple lives will also be notified so that they can help with the 'thought work.' The heaviest responsibility for averting over-quota births belongs to the woman's work cadre at the pregnant woman's place of work, but she will be assisted by the residence committee of the woman's neighborhood, who will visit the woman at home in the evenings. The husband will be approached at his place of work and encouraged to put pressure on his wife to agree to an abortion. The system is quite effective. Last year only fifteen babies were born in my ward, only one over the quota of fourteen." [1]

Thought work is not just a matter of appealing to pregnant women to terminate their pregnancies for the sake of China's future, much stronger arguments are available. Entering the birth of an over-quota baby in the household registers maintained by the local police station can take a year or more, during which time the infant is not eligible for rice, cloth, or other rations, all of which his parents have to purchase at high prices on the black market. If a child is to be a couple's third, 10 percent is deducted from their wages beginning from the fourth month of pregnancy as an inducement to abortion and to cover increased community costs after birth. But the ultimate recourse of the work unit against an intractable mother-to-be is dismissal. This is a break with Marxist orthodoxy, for job security is one of the ten commandments of socialism, and work assignments in China have customarily been for life. Women fired from positions in the industrial and service sectors, which offer relatively high salaries and generous retirement benefits, have no choice but to seek low-paying jobs in neighborhood cooperatives or as short-term laborers. Staying unemployed is almost always out of the question, for few families could afford to live on only one salary, especially with another mouth to feed.

China can win the battle against births on the urban front and still lose the war in the vastness of her countryside, where over 80 percent of the population live. Certainly the birth control program made little headway in the early sixties, when free contraceptive devices were first made available in rural collectives and the advantages of having fewer children were suggested to skeptical peasants. These early efforts had little effect on the number of births in the villages, in part because many couples had lost children during the "three difficult years"; women continued to have four or more children each.

But the infant and child mortality rate declined steadily after that time as rural health care improved, and peasant women came to realize that it was no longer necessary to bear three or four sons in order to have an odds-on chance of raising two to maturity. Moreover, female participation in field labor was mandated after the formation of the communes, tying up rural women in the same work-home double bind that urban women were in. As a result of such pressures, the rural birth rate started downward, dropping from 3.8 percent in 1963 to 2.9 percent in 1970 in one prosperous Guangdong county that I visited. Later, in the early seventies, the first monetary incentives were introduced. In one Pearl River commune women were paid a cash reward of $4 (roughly equal to a week's wages), and $3 worth of pork and fish ration coupons if they agreed to a tubal ligation. This smallish inducement led most women who had already borne two or more sons to accept sterilization, and the birth rate may have been levered downward slightly as a consequence, but it was too modest a measure to persuade those women who did not yet have as many sons as they desired to begin contraception.

Since 1974 the principal method of encouraging smaller families has been to hold annual or biannual family planning "high tides." At meetings and during home visits, women are barraged with all kinds of propaganda, from the reading of family-planning regulations and directives about rewards and sanctions for those who accept and reject birth control, to arguments advanced by cadres against having large families and against simply letting nature take its course.

Women are not paid their regular work points for the days that they are in meetings. This amounts to an enforced idling of, in most cases, one-half of the family work force and acts as a strong prod toward the alacritous acceptance of family planning. "It seems harsh," a local brigade cadre admitted to me, referring to the meetings-without-pay principle, "but the collective had no choice. If we were to continue to give them work points for not working, they would never 'think clear' about contraception." What keeps the women in the meetings and out of the fields is that women who miss meetings are fined 2 rmb a day for each day they are absent, an amount equivalent to more than a day's wages.

Chinese peasant women have never been given to vague, romantic statements about fulfillment through motherhood and the like. They were led during the course of family-planning "high tides" to rethink their reasons for wanting children in an even more hardheaded way, and the younger women that I spoke with no longer gave the continuation of the family line as the primary reason for having children. Mencius may have believed that "there is no behavior more unfilial than to have no male descendants," but young rural Chinese women are no longer so sure. "Though my mother-in-law says that you have to have a son to carry on the family name and lineage, I really don't think that this is a very good reason," one young woman, pregnant with her third child, told me. "I have already agreed to have a tubal ligation performed immediately following delivery, regardless of the sex of the child." She paused momentarily and then added with a wan smile, "I hope it is a boy."

Many women now say that they would be satisfied with two children, that this would be their ideal number of children, but only if both turned out to be boys. Otherwise they would continue to bear children until they reached this number of sons, even if it meant having a string of girls in the process. "Many sons mean a happy and prosperous household" and "Boys are precious, girls worthless." are among the traditional proverbs that rural women for hard, practical reasons, still quote when cadres are not around. Jwang Yaguan, the secure mother of two teenaged boys, told me that "a woman needs a manchild because without one she will be poor and picked on in her old age. Families with only girls have little voice in village affairs. Everyone knows that the girls will sooner or later marry out. A son will stay by your side until you pass away."

Sons are the only social security system known to peasant parents, for the vast majority of rural collectives are too poor to provide for the welfare of the elderly. Neither can daughters render long-term assistance, for in the countryside custom decrees that they take up residence with their husband's family upon marriage and sever all economic ties with their natal family. Only sons continue to live at home after marriage, the sole support of aging parents.

Unlike Americans, who see old age as a grim and dreary finale to life, Chinese look forward to it as a relaxed time of leisure and high status. The "entering the ancestral hall" ceremoney at age 60 celebrates a man's release from the backbreaking slog of field labor. Thereafter he spends his days in the courtyards of the village ancestral halls, smoking and chatting with the other old men of the village. But whether he actually retires at this point depends on having one son, or better yet two, to slog in his place. I remember seeing a grizzled old peasant at work on a private plot some distance from the village on a dreary winter's day, his hoe rising and falling in a slow, tired rhythm. In his tattered black cotton trousers and coat of coarse burlap, shoeless despite the cold, he made a pathetic figure alone in the fields. I judged him to be nearly 70, and asked my companion in surprise what such an elderly man was doing in the fields. "That's Old Man Wang," he replied. "His wife died several years ago, and his daughters have all married out. He lives alone." Then, after we had gone a few steps farther, he grimly observed, "You see, that is what happens when you have no sons." Wang, dirt-poor and pitied by his neighbors, has no choice but to continue toiling in the fields until he dies. For the Chinese villager there remains no greater misfortune in life than to have no sons to "inherit the ancestral estate and pass along the generations." To his government this is feudal nonsense which hinders the program to bring reproduction under state control, and thus threatens the success of the all-important modernization program.

To counter the argument that only one's sons can provide support in old age, the cadres advocate "the boy's going to live with the girl's family." The problem is that brides have traditionally resided with their husbands' families after marriage, and in contemporary rural China this custom continues. The claim that one can call in a good son-in-law as easily as a daughter-in-law runs counter to local experience. He Kaifeng's claim that he knows a son-in-law in Sandhead Brigade who treats his parents-in-law very well was scoffed at by the women. "Why shouldn't he treat his parents-in-law well? They practically support him," one young woman who had attended the meeting said to me privately afterwards. "He is a lazy good-for-nothing," she continued, "and he is the only son-in-law in the entire village who lives with his wife's family." As she spoke, she grew more impassioned. "Listen to me. People are having fewer children

[1] Beginning in 1981, this same quota system was implemented in the Guangdong countryside.

nowadays. If everybody has only one boy and I have two girls, who is going to give me their son? I'll tell you who: Nobody! Sons are becoming more and more valuable." She also rejected the argument that she could go and live with her daughter after she married into another family. "My son-in-law will have parents of his own to support," she countered. "He certainy won't welcome me. I would be worse off than if I stayed in my own village, where at least I have friends and other relatives."

The village women I spoke with were more receptive of the idea of a pension program, though many doubted that their own brigades would be able to afford one anytime in the near future. Cheng Binglan, one of the holdouts against abortion in Sandhead Brigade, echoed the appeal of the brigade's plans to eventually establish a pension for the elderly. "As things stand now," she said, "a person without a son has nothing to lean on in old age, but I would agree to a tubal ligation if the brigade would guarantee my support when I can no longer work."

Despite these reservations on the part of village women, much progress has been made in recent years. Consider, for example, the extent of contraceptive use in Sandhead Brigade at the end of 1979. Of the 892 women in the child-bearing years, defined as all married women 36 and under, 699 were contracepting. The most common method of contraception was female sterilization, with 417 brigade women having undergone tubal ligations by September 1979. The next common method was I.U.D. implantation, used by 234 women, most of whom had only borne one child to date and were waiting four years to have a second. Other methods in use were birth control pills (fifteen women), prophylactics (sixteen couples), and vasectomies (seventeen men). Of the 193 then not practicing contraception, 129 had yet to bear their first child, or had born their first child more than four years ago, and under the 1979 regulations were free to reproduce.

Nationwide, over 170 million birth control operations were carried out from 1971 to 1978. This figure represents the total number of abortions, tubal ligations, and vasetomies—euphemistically referred to in the Chinese press as the "three operations"—carried out during this period, and is truly a staggering number. Although vasectomies are easier to perform surgically than tubal ligations, the procedure remains uncommon in the Chinese countryside, where most men equate the operation with castration. And though tubal ligations were once more common than abortions with the intensification of the program in the mid- to late seventies the reverse became true. Even if just half of the above total represented abortions, it would mean that nationwide an average of over 10 million abortions were performed annually throughout most of the seventies. Though this figure is impossible to confirm, I did obtain accurate figures for smaller rural units. On a visit to one prosperous Guangdong commune of 60,000 people in the spring of 1980, I was informed by the cadre responsibile that 743 of the "three operations" had been performed there in the first quarter of that year alone. "We have been performing about two abortions for every sterilization," she told me. "We have performed 247 sterilizations, all but sixteen on women, and 496 abortions.

As a result of such overwhelming efforts, the rate at which China's population has been increasing has come down considerably in the last fifteen years. As late as 1971 it stood at 2.3 percent, a rate that would double the population, and impoverish the countryside, in just thirty-one years. By 1979 it had fallen to 1.2 percent, a rate at which the population would take a much more leisurely fifty-nine years to double, and one coming close to the 1 percent former Chairman Hua Guofeng set as the target for 1980.

In contrast with many underdeveloped countries, China's birth rate seems hardly catastrophic. The population of Bangladesh, for example, continues to expand at a rate of nearly 3 percent, and many regions are burgeoning at even greater rates. Yet Beijing has ample reason for concern. The population of China has more than doubled in the thirty years since the revolution, and was disclosed to have exceeded 1 billion in 1981. With such a large base, even birth rates that are low by the standards of the Third World produce a bumper crop of babies. At the modest 1.2 percent rate reported for 1979, the population still increased by 12 million, a number equal to the entire population of Australia. Not all Western experts are convinced that China has accurate census information; some estimate that the birth and death rates reported may represent underenumerations of 10 percent and 15 percent, respectively. Another reason for concern is that China's baby-boom generation of the fifties is coming of marriageable age, and Beijing's birth planners expect them to produce a baby boom of their own in the early eighties. All this will hinder the achievement of the next stage in China's struggle against overpopulation, a reduction of the rate of natural increase to 0.5 percent by 1985.

Whether this ambitious goal, or the even more far-out one of zero population growth by the year 2000, will be met depends in part on how the local population responds to the system of rewards and punishments designed by national, provincial, and local governments to force down the birth rate. A new national family-planning law came into effect in late 1980, after being circulated in draft form for nearly a year, and most of China's twenty-seven provinces, self-governing cities, and "autonomous regions" have added additional provisions depending on the severity of the local population problem. And at least in Guangdong, the new and extensive provincial regulations have been further supplemented by county and commune planned-birth "procedures."

For most rural families the national measure with the most bite is the deduction of 10 percent of a family's salary for each child after the second. Over the past thirty years, significant gains have been made in rural health care, education, and welfare, in programs paid for out of community coffers. As a result, parents have been partly insulated from the rising costs of raising children. The income deduction will change all this, effectively shifting the burden of community costs to the consumer. For added effect the deductions will begin from the fourth month of pregnancy, presumably because there is still then time for the family to reconsider its finances and terminate the pregnancy.

Another Beijing provision designed to put an economic crunch on overproducing families concerns private plots. These carefully tended gardens, which produce approximately 25 percent of household income in Sandhead, will not grow along with the family as they did formerly. Instead, collectives have been instructed to allocate plots on the basis of a two-child family. A couple with three children will have to provide vegetables for the family dinner table from the same-sized parcel that a family with only one child will till. Such a couple will also be forced to purchase oil, cloth, and other rationed goods, even grain in areas which grow primarily commercial crops, since ration tickets will be denied the extra mouths. It is this sanction that will cost parents the most, since current free-market food prices run from 50 to 200 percent higher than those charged under the government subsidy program. Together, the above measures will more than double the cost of raising a child in rural China, from birth to age 16, from $900 to over $2,000.

Beijing is also encouraging rural collectives to establish social security programs. By providing the elderly an economic alternative to total dependence on their offspring, such programs will have a certain, though not immediate, effect on fertility. A problem is that any communes in the hinterlands remain too poor to fund an adequate program. Even in one relatively prosperous commune I visited, only one of twenty brigades has been able to institute pensions, though cadres from other brigades say they are definitely interested, not least because the brigade which pioneered the program also happens to have the lowest birth rate in the commune.

The national program also decrees rewards for having only one child. In addition to receiving an extra share of private plot land, rural families will receive from 300 to 400 extra work points a year, providing approximately 10 percent in extra income. Despite such inducements, peasants in many areas remain unresponsive.

The economic value of children to their parents remains high in rural China. By their middle teens they already produce more than they consume, and they still constitute the only social security system known to peasant parents. To bring its birth rate down and hold it down over the long run, Beijing is banking on making children too expensive for rural Chinese to afford more than one or two. The main obstacle to the success of the program is that the best investment and, in China's socialist economy, the only investment that many Chinese ever make is their children. The government understands this, and has been emphasizing the need for lower-level units to take even more drastic steps to curb births when necessary.

"In order to control population increase, achieve the planning of births, and thoroughly implement the policy of 'few births, late marriages, and late births,'" and more specifically to aid the success of the March 1980 family-planning "high tide," one rural commune in Guangdong rewarded cooperating couples in three ways. First, all women who underwent an abortion during the "high tide" received 10 or 20 rmb, 10 rmb if the abortion could be accomplished by the scraping technique and 20 rmb if the pregnancy was in its later stages and a caesarean was necessary. Second, for each year after marriage that couples postponed conceiving their first child they were to receive 10 rmb. Revealing the commune cadres' lack of faith in the long-term efficacy of this bonus, the directive went on to add that if no conception had occurred by the fourth year of marriage then the couple were to present themselves to the commune clinic for a medical examination. If one of them was discovered to be infertile, the bonus would stop.

The third local provision, as well as its fate, was even more symptomatic of the problems that plague the birth control program. It declared that those couples who agreed to sterilization after the birth of their first child were to be awarded 500 rmb. Unlike the rewards for undergoing an abortion or postponing starting a family, which were too stingy to have any real impact on fertility behavior, the one-child bonus gave peasants pause, for 500 rmb was more than double the local annual income for a field hand. In the six months following its announcement, this sum proved sufficient to induce two dozen couples to pledge that their first child would also be their last. But the program proved too much of a strain on commune resources to be continued indefinitely. By September 1980 12,000 rmb had been paid out to contracepting couples from the rapidly diminishing general welfare fund, and the bonus paid to one-child families was abruptly dropped to 100 rmb. Not surprisingly, peasant applicants dropped to zero.

The commune authorities found themselves in a typical Chinese predicament: they could not afford politically to let the peasants have as many children as they wanted, nor could they afford to pay them enough to bring them into line. As in past movements, they proceeded instead to what one of the local brigade Party secretaries termed "a too easy recourse to force." On the surface, the pressure came in the form of economic sanctions. The three rewards above led off the commune directive but were followed by no less than twelve different sanctions to be levied on those who violated the principle of "few births, late marriages, and late births," all in addition to those in force nationwide. The most trenchant of these provisions, designed to "eliminate" all third births, stated that couples were to be subject to a one-time fine of 300 rmb upon the birth of their third child, were to pay a 20-rmb-a-month fine from the fourth month of pregnancy until the child was 14 years of age, and were to pay double the normal amount to participate in their brigade's collective medical program. These same fines were also levied on couples who did not wait at least four years from the birth of their first child to have a second and couples who had a child before receiving official permission to marry, although they ceased when these requirements were satisfied. Even in the rich Pearl River Delta, where average annual per capita income from the collective is double that of the national average of 83 rmb, these are hefty fines.

In an unusually frank conversation a brigade cadre, a short, powerfully built man in his thirties, revealed the inside assessment of these regulations. "There is no doubt that they will prove impossible to implement," he stated flatly. "They will sooner or later have to be revised." He paused and took a drag on his cigarette, then continued. "In fact the process of revision has already started. The 'procedures' state that all third babies must be delivered in the commune clinic."

"The commune regulations go on to add ominously that the clinic will not be held responsible for any mishaps that occur during the births of these 'excess' babies," I interjected. Cadre Huang looked significantly at me before continuing.

"Originally, the commune announced that a fine of 30 rmb would be levied against any midwife who delivered such a child at home, thinking that this would force women to go to the clinic," he said, adding in reference to my comment, "even though they are afraid to. Only afterwards did it occur to the commune revolutionary committee members," he said with deliberate irony, "that there may be problems with their policy. Labor often comes suddenly, and there may not be time for the woman to be taken to the commune clinic. What if it is a difficult birth such a breech birth? Is the brigade midwife still not to help? What if a woman dies during delivery? Who is responsible? Because of such considerations the 30-rmb penalty has just been revoked only two weeks after it was announced. And this is only one example. The real problem with the new procedures is that the fines are too severe. They don't leave a family with enough money for food."

Putting out his cigarette, he took my pen and notebook in hand to illustrate what he meant. "Take a family in which there are two laborers, a husband and a wife, who make a total of 800 work points a month. After the 10 percent deduction of work points required by national policy, they would have 720 work points left," he said, writing down the figures as he spoke. "Now in our brigade a work point is worth an average of only 0.05 rmb, so that their 720 work points translates into a total of 36 rmb per month. From this subtract the 20 rmb-a-month penalty assessed by the commune and the extra 3 rmb a month in collective medicine fees. The family has only 13 rmb left." He circled the net income of 13 rmb for emphasis, adding, "And this is it. The private plot of land of the family will not increase with the birth of the third child, and the family may not have enough vegetables for their own table as their children get older. A farm family that has to buy vegetables is in a sorry state. Even if they manage to grow enough for themselves, they won't have any left over to sell in the free market, cutting off this source of income. Nor will they have any extra grain to raise pigs or even chickens. They also cannot work in brigade enterprises where they could earn more, for the procedures have forbidden the employment of 'violators.' Unless they have help from other relatives, this 13 rmb is it," he said, pointing to the bottom line, "and it is not enough. A family of five needs to eat at least 100 catties of rice a month. Even if they could purchase rice at the rationed price of 14 rmb a month, they would still be in trouble. The revolutionary committee has gone even further, however, saying that not only the third child but its parents as well will have to purchase rice at the market price, which is currently 27 rmb per 100 catties. It will be impossible for them to stay alive," he concluded forcefully. "When people starve, they won't go to the commune with their complaints, but will come to us at the brigade for help."

"How could the commune cadres even consider implementing regulations of such severity?" I asked. "Surely they understand the economics of peasant families."

"In part it is because there is an activist in charge of our prefecture of thirteen counties, who has told the leading cadres here to take a hard line against 'excess births,'" he answered. "The procedures were drawn up by the commune's birth-planning group following suggestions made by county-level family-planning cadres. When the procedures were presented to the commune revolutionary committee, they met with no enthusiasm but also with no serious objections. Everyone knew that this was what the county and prefecture wanted, and so discussion was very limited. They were passed quickly."

"Didn't anyone object?" I pressed.

"I understand that one brigade Party secretary did," my informant said with a grin. "He told the commune Party secretary that he couldn't participate in the 'high tide' that was to begin in a few days—all brigade Party secretaries had just been instructed to attend—because he had"—here my informant paused to milk what was obviously a punch line—"qi guan yen." In the delta Cantonese that I knew, qi guan yen meant throat infection. This seemed a strange excuse to use for not participating in an event still a week hence, strange but hardly humorous. Seeing my perplexity, Huang explained that the term was also a homophone (these abound in Chinese) for "controlling too strictly," and that the sense given by the juxtaposition of meanings was that the whole plan, procedures, meetings, and all, "stuck in his throat." "You see," he concluded, "he was telling the leader of the commune to his face that he didn't agree with the plan."

"Economic sanctions in themselves are not objectionable," I said, "as long as they are reasonable. But the commune regulations don't seem designed to be implemented at all. One pregnant woman from your brigade said to me, 'The regulations are just used to scare us into accepting abortions.'"

He nodded immediately, in full agreement with the point. "The regulations really worry the women," he said. "Except for a few who have regular remittances from Hong Kong or Singapore, the women know that their families will 'eat bitterness' if they don't agree to an abortion. So they agree. The procedures are nothing more than a plan to force the women to abort."

It would be wrong to leave the impression that women throughout China are being brutally pressured into abortions and sterilizations that they are opposed to. I don't know this to be the case. There are areas which have done considerably better than Guangdong, most notably the western province of Sichuan, whose 100-million-strong population was reported to have increased by only 0.6 percent in 1978; but it is not clear by what means this has been achieved. It is certainly true that most areas of China are too poor to be able to reward peasants into giving up their second and later born, and there is not enough time given the current blistering pace of birth control to allow reasonable economic sanctions to take effect. At least in Guangdong and perhaps elsewhere, the real work of birth control in the villages is accomplished at nonstop "Think clear" meetings held during spring and fall abortion campaigns. Here the objective is not just to familiarize women with the penalties they will face if they have a second or third child, but to use "100 strategies and 1,000 tactics," the Chinese equivalent of "by hook or by crook," to convince already pregnant women that they have no alternative to abortion and sterilization.

Such hard-nosed, callous efforts at the local level are a coarsened but still recognizable version of the uncompromising resolve at the national level on the issue of population control. Vice Premier Chen Muhua, the female head of China's Family Planning Board, put it bluntly. "Socialism should make it possible to regulate the reproduction of human beings so that population growth keeps in step with the growth of material production," she said in 1979.

It is no accident that her statement reads more like an order than an argument. Thus

far the identifying characteristic of China's demographic transition from high to low birth rates has been the fact that it was created and is maintained through the liberal use of political power. This makes it historically unique. With the exception of India's ill-fated sterilization campaigns of the early 1970s, one looks in vain for parallels. The decline of birth rates in the West, recognized only after it was well underway, was a passive response to the forces of modernization, industrialization, and urbanization. Governments remained largely indifferent. And the current programs of other Third World nations, which make do with persuasion, posters, and part-time workers, have had little or no demonstrable effect. Beijing, not content with half measures, is determined to lower its birth rate in advance of, and to facilitate, modernization.

Clearly implied in Vice Premier Chen's statement was that the state was going to assume regulatory power over reproduction, formerly an unquestioned human right. This puts the program beyond the pale, not only of conventional morality but also of demographic theory, the first of which assumes that a husband and wife should be, and the second that they in fact are, free to have children. If they desire more children for reasons of love, custom, or money, or if they want fewer children because they have other interests, concerns, or responsibilities, they are free to act on their preferences.

This assumption is no longer totally valid for China. The peasants are no longer independent actors in the endless drama of procreation and birth, but are increasingly acting under the duress and direction of bureaucratic forces. This came out clearly when I asked women how many children they wanted. "What does it matter?" one woman echoed by others responded. "The government has said that we can have only two." Chinese peasants are nothing if not realistic. What does it matter, indeed, how many children you would like to have in the face of a government decree specifying how many children you or your collective will be permitted to have, a decree enforced by the impressive organizational skills and human resources of the Chinese Communist Party and the government bureaucracy?

China brings a powerful troika of human and bureaucractic strengths to bear on the regulation of the reproduction of human beings. With a rural administration extending down to the grass roots, mass organizations with cells in every hamlet throughout the country, and a cadre of rural officials trained in social control, it is in a formidable position to press forward with birth control.

With the establishment of collective agriculture in the mid-fifties, rural China was swept into the tight embrace of the expanding Chinese bureaucracy. Townships became communes, villages production brigades, and hamlets production teams, and these newly forged administrative units were the lower rungs in a ladder of command and control that reached upward to Beijing. Rural dwellers became susceptible in an unprecedented way to the direct influence and control of the Chinese state. This three-tiered system of rural collectivization and administration—the communes, brigades, and teams—has proved invaluable in implementing birth planning. It is through this system that the household registers are maintained and annual population reports are compiled. And it is this organization that allows the efficient organization and execution of the "high tides" and the ready enforcement of the new birth control regulations.

Reinforcing this omnipresent administration is the Women's Federation. Established to subordinate women to the Party's social, economic, and political line, in recent years it has been entirely coopted for the purpose of implementing the birth control program. Like all organizations in China, the Women's Federation is organized hierarchically and is headed by Beijing officials, who direct the activities of over 5 million local federation officials, one in each of the country's million production brigades and teams. These cadres are responsible for the legwork of the program at the team and brigade level. They educate peasant women about population policy and maintain records on contraception use and fertility. They are further charged with detecting pregnancies and accompanying women to the health clinic for abortions and sterilizations.

Finally, Beijing can rely on a vast phalanx of rural cadres, Communist Party members, and activists to advocate and advance the official line in the countryside. Especially cadres at the brigade and commune level, who occupy important positions in the rural administrative structure, possess redoubtable persuasive power, honed to a scintillating sharpness in the dozens of political movements of the Mao decades. With their authority and communications skills, they are especially effective in group settings. Alternately threatening and persuading, cajoling and reasoning, they are more than a match for the inarticulate young village women, who are further inhibited by their fear of giving offense. They are only too aware that it is invariably those peasants who bend to the cadre's wishes who are allowed to go to work in brigade or commune factories, who are given much-prized home sites, or who receive smaller but still important favors such as the loan of 1,000 bricks for the construction of a pig sty or a travel permit to journey outside the county limits or to stay overnight outside the brigade.

The specific organizations responsible for Beijing's past success in birth control—the collectives, the cadres, and the Women's Federation—are in one sense merely different facets of China's bureaucratic totalitarian form of government. With a centralized bureaucracy, a totalitarian political apparatus, a largely state-run economy, and close supervision of all social groups, Beijing is able to carry out programs that would topple less firmly seated governments with little fear of popular unrest. Few countries so thoroughly enmesh their people in a web of economic, political, and social controls, and fewer still presume a right to dictate not only behavioral norms but also personal values. The Chinese success in reducing the birth rate, as in controlling dissent and preventing immigration to urban areas, is the direct result of this power to subordinate individual preferences to state goals. Beijing's birth control program will be exportable only to countries whose citizens do not have inalienable rights vis-a-vis their government.

One manifestation of the government's power—the primary precondition of the program's success—is its ability to pass costs along to the producer rather than pay for them from central government funds. The cost of sending all women who threaten to exceed their fertility quotas to meetings for months on end would be prohibitive if the costs were borne by anyone except the peasants themselves. In one brigade of 4,000 members the income lost by the involuntary peasant participants in the 1979 spring and fall "high tides" totaled approximately $6,000, no mean sum in a collective where a year's labor only earns a peasant between $100 and $200. With semiannual family-planning campaigns occurring nationwide, China probably "spent" over a billion dollars of peasant and cadre labor in 1979 alone. Meeting participants receive no compensation for the time lost during meetings, and agricultural production may have suffered slightly as part of the work force was kept out of the fields in meetings. Another burden on the rural collective is that Women's Federation cadres at both the team and brigade level, as well as other brigade cadres who became involved in the movement, continue to draw their regular salaries from collective funds during the course of the meetings. The state does pay the salaries of commune and higher-level cadres engaged in birth control work, but these expenditures account for but a fraction of the true economic cost of the program.

The second precondition of China's success on the population front is program stability. There can be little doubt of the government's current commitment to setting and adhering to strict birth quotas. Recently promulgated documents have directed cadres to "with one hand grasp production, and with the other birth control," placing birth control on a par with the perennial problem of feeding China's masses. Birth quotas have been given to counties and communes, and demotion and dismissal await cadres whose units exceed their alloted number of babies. (It is not surprising that cadres whose careers are threatened in this way commit excesses in the name of population control.) Birth control is written into China's 1978 Constitution, and a new set of birth control regulations came into effect in 1980.

But will Beijing continue to be unsparing in its demand for the regulation of the reproduction of the fifth of humanity that it controls? Past Pendulum shifts in policy as party factions vied for power would seem to call into question Beijing's ability to sustain a program over the long course. The lesson from the Guangdong countryside is that by the mid-seventies leftists and rightists seemed to have reached a consensus on the necessity for birth control. Though the leftists formerly opposed family planning, rationalizing uncontrolled population growth with such short-sighted slogans as "Every stomach comes with two hands attached," during the last years of their tenure in power (1973–76) mass sterilizations were vigorously pushed, and regular family-planning "high tides" were held. Should the leftists recover their former preeminence, there is no reason to expect birth control to go aground on the shoals of shifting policy. On the contrary, they seem certain to keep the program on the same basic course. At worst, birth control would be becalmed during the period of political transition, as it was for the two years following the fall of the Gang. Future leftists would probably continue to rationalize their policy somewhat differently from the so-called pragmatists, stressing the social and familial benefits of family planning to be gained, rather than the purely economic advantages.

This apparent consensus of the right and left is critical, for the population program will indeed have to be continued over the long run. China's population increase rate was lowered from 2.3 percent in 1971 to 1.2 percent in 1978 by direct, consciously applied pressure from Beijing, not by seren-

dipitous social and economic change. Should the program be discontinued tomorrow, there would be a baby boom in the Chinese countryside that would make America's postwar boom seem in retrospect more like a whimper. For left to themselves, as they were during 1977 and much of 1978, the peasants would have as many children as necessary to reach their two-boy ideal. Population increase rates would return to levels last seen a decade ago, reaching 2.5 percent a year or more. To curb its population, China's birth control program will have to remain in force for decades; to reduce it will require restrictions on fertility for generations to come. The consensus that has emerged is a guarantee of the stability and continuity vital to the program's ultimate success.

With the revolutionary vision that has become their trademark, China's leaders have not been loath to look ahead. Beijing has targeted 2000 as the year by which the plateau of zero population growth should have been reached. Even more distant goals are emerging: the merits of gradually reducing China's population to levels more in concert with natural resources have been debated in newspaper articles. How such awesome social engineering is to be accomplished is already apparent: couples are to have just one child. In June 1979 Hua Guofeng told delegates to the Fifth People's Congress that families which limit themselves to one child should be suitably rewarded. Within a few months the line had hardended appreciably. The major conclusion of a national conference on the population problem held in Sichuan Province in December 1979 was that the primary task of birth control work is to universalize the one-child family. At the beginning of 1980 all of China's major newspapers simultaneously published a report on a series of population projections based on varying assumptions regarding average number of children per family made by researchers of the Chinese Academy of Social Sciences. Only if, they reported, all couples have only one child after 1985 will zero population growth be possible around the turn of the century. According to their estimates, China's population would then peak in the year 2004 at 1.054 billion, thereafter gradually decreasing to 960 million in 2028, 613 million in 2060, and a mere 370 million in 2080.

In the spring of 1980 the assistant mayor of Shanghai, Yang Kai, described his city's birth control goal for that year in terms of the universalization of the one-child family. "We must exert ourselves to the utmost to raise the percentage on only children, which should reach 90 percent of the urban area and approximately 75 percent in the suburban area," he said. "We must severely limit second births, and absolutely halt third births, in order to restrict population growth to 0.6 percent or less." By the end of 1980, the same phrases had percolated down to rural communes in Guangdong and Guangxi, indicating that the drive for yihaihua, or "single-infant-ization," was on nationwide. In Guangdong it was announced in 1981 that all state employees, over whom the government exercises an obvious leverage, would henceforth be permitted only one child; 70 percent of the residents of cities and towns were to follow suit, as were 50 percent of the peasants. The plan is to continously push up the percentage of single-child families in the towns and villages, with the goal of reaching 100 percent by 1985.

How this will be accomplished is diabolically simple. "The licensing of first births" was how one birth control worker privately described it to me. "Every brigade will be given an annual quota of babies," she explained. "Newlyweds who wish to have a child must apply to the commune family-planning office for a birth permit. To receive this, they must meet two conditions: they must fall within their brigade's yearly quota, and they must agree to have only one child. If they go ahead and have the child without a permit, they will be violating the birth control regulations. Their baby will be a 'black market person,' no grain, oil, cloth, or other ration coupons will be issued, and the parents will have to pay a monthly fine of 20 rmb." Couples who conceive a child without first obtaining a birth permit will be ordered to attend birth control meetings, at which they will be pressured to accept the one-child limit and sterilization. "And all, sterilization is better than abortion," the cadre concluded.[2]

Population is no longer taken as a given in the Chinese jigsaw puzzle of prosperity, but is being shaped by the state for the good of the greater collective. It somehow seems a logical, even inevitable extension of the Chinese state's already formidable powers that it should arrogate to itself control over the reproduction of its citizens. After the fashion of bureaucratic socialist states, Beijing ministries already closely control the output, distribution, and consumption of material goods and foodstuffs. Children, too, have long been regarded as the property of the state, which oversees their education and later assigns them work. Controlling the production of what might be called raw humanity further facilitates the rational, socialist planning of China's command economy. Looked at from this perspective, Beijing's move is a natural step, completing its cradle-to-grave embrace of the Chinese people.

Surprising though it may seem, given the enormity of the problem to be contended with, controlling China's population may turn out to be one of the simpler tasks of the modernization program. Instead of relying on costly imported technology or difficult-to-master business management techniques, it draws upon skills of directed social change and control through mass movements long in use in revolutionary China. This social calculus is a home-grown specialty, developed by Mao to a high, if Machiavellian, art during the four decades of his rule. The cadres, organizations, and administrative infrastructure required for the successful implementation of the birth control program are already in place and operating in the Chinese countryside. Birth rates, already reduced to impressively low levels for a developing country, continue to be eroded away by wave after wave of "high tides." Though the timing may require some adjustment, it is not premature to predict that China will achieve its goal of zero population growth.

China hands of an earlier generation were fond of remarking that the teeming masses of China could never pass entirely through an archway, for they would multiply faster than they could advance. Beijing has set out to prove them false. The fifth of humanity that it commands has been organized, regimented, and given its marching orders. By dint of will and organization, it appears that the Chinese people, four abreast and in lockstep, will ultimately be marched through to the last man, woman, and child. One can only hope that the drive does not turn into a stampede.

The birth control plan is quintessential Chinese socialism: the state setting forth a far-reaching blueprint to reengineer society. The people are expected to fall uncomplainingly into line despite the shortcomings of the state plan. The plan in operation exacts from the population a heavy toll to which the state remains largely obvious.

Though I had gained glimpses of the human costs of birth planning Chinese Communist style while attending meetings and interviewing cadres, I only apprehended the full dimensions of the sacrifice being demanded of Chinese women during a visit to a commune clinic during the 1980 "high tide." I found that this facility had been transformed into an abortion clinic for the duration of the campaign, an impression confirmed by Dr. Chen Buozhen, one of four clinic codirectors (and the only one of the four with any medical training). "At this early stage in the high tide we have been giving priority to abortions over sterilizations," he explained as we sipped tea in the clinic office. "Our seventy beds are currently all occupied with women undergoing abortions, our surgical staff has been organized into special abortion teams, and our two operating theaters are in use throughout the day performing caesarean sections and induced abortions. We have even called up four barefoot doctor midwives from the brigades to help with the patient load."

Despite the concentration of all available medical resources, the clinic had averaged only a dozen abortions a day the first four days of the "high tide," and the waiting list of 170 women was growing longer with each day of meetings. One reason for the slow pace was a lack of space: as a concession to the women's fears, they were accompanied by family or cadres during their three-to-four-day stay in the hospital. But the main reason, Director Chen confided, was that the commune cadres, worried lest premature births spoil their drive for 100 percent compliance, had directed that all pregnancies of seven or more months be terminated first. "On a woman seven or eight months pregnant, performing an abortion is a complex and time-consuming procedure," Chen pointed out. "We begin by injecting Rivalor, an abortifacient, into the uterus to destroy the fetus and cause birth contractions to begin. The fetus usually expires within twenty-four hours, and is expelled on the second day. In the cases where expulsion does not follow within forty hours, we have no choice but to perform a caesarean." "And if the fetus has not yet expired?" I asked, wondering what the clinic staff would do when faced with the awkward problem of how to dispose of a live baby delivered by caesarean. "We always wait until the fetus expires," he answered finally.[3] While pass-

[2] Sonless peasants do not always agree. On my frequent trips to Hong Kong, after leaving China, I began to hear reports of female infanticide from Chinese friends who had made trips back to Pearl River Delta Commune. That the "one child per family" policy is responsible for this brutal practice there can be no doubt. Sandhead residents had earlier heatedly denied to me that girl babies had ever been put to death in the village, even during Qing times. "Ours is a 'land of fish and rice,'" one wrinkled old midwife told me. "Everyone has always been able to raise their daughters."

[3] But I did uncover cases in which women very close to term were given injections only after their labor pains had already begun naturally, a method used by officials to overcome the women's fear of a caesarean. In such cases the baby either is born dead or dies shortly after birth.

ing quickly for the harried clinic staff, this death watch can seem interminable to the women themselves, I found out later that day when I visited the patient wards.

Alongside the entrance to each of the small wards a slip of red paper with the characters yinchan sushe (literally, abortion dormitory) had been posted. This was, I realized, an imitation of the traditional Chinese lunar New Year practice of festooning homes, especially doorframes, with slips of red paper on which have been brushed happy and auspicious sayings. Under the present circumstances, however, which were as unhappy as they were inauspicious, the slips of red paper seemed a grotesque touch. None of the wards had doors, so I simply selected one at random and stepped inside. The room was a 10-by-10-foot square of raw concrete slap crowded with three plank beds placed against the walls so that the head of one was against the foot of another. Two of the beds were occupied by young women who lay covered by thick cotton comforters. On the third, alongside a neatly folded stack of bedding, a fiftyish woman sat erectly. I advanced and introduced myself to her.

As I had sensed from her age and some subtle nuance of authority, she was a woman's work cadre. She explained that she and her young roommates were all from the No. 8 Production Team of Southhead Brigade, and that it was her responsibility to stay with them during their confinement. The young women were here, the cadre went on, because they did not have permission to give birth. "She is seven months pregnant with her second baby," she said, pointing with her chin the way the Chinese do at the woman in the far bed. "But it came too soon, only two years after her first. She won't have a quota [renwu] for two more years." Nodding at the nearer bed, she added, "Ah Hui here doesn't have a quota because she is only 22 and is not yet officially married." The girl in the middle bed the cadre had called Ah Hui had levered herself up into a half-sitting position as we were talking and now interjected, "My husband and I had a wedding feast in the village last November"—apparently after she discovered herself to be pregnant—"but the commune wouldn't let us register our marriage because I was not yet 23. In three months I will turn 23, so I was hoping that I could keep this baby, but the cadres told me that I will not be allowed to have a baby until nine months after registration." She lay back down, and her voice became more subdued as she told me that she had agreed to an abortion the day before because, after a week of holding out, she was sick of day after day of endless meetings. Besides, she added with rather more spirit, she was young and would have another opportunity to give birth, perhaps next year.

This plucky young woman, already looking beyond a present in which she had been given an injection of what she called "poison" (the peasants, not interested in the niceties of names, called the abortifacient what it in fact was, poison, and the injection a du zhen, or "poison shot"), seemed under the circumstances to be bearing up amazingly well. The woman in the far bed was clearly in much worse shape. Her swollen and blood-flecked eyes had regarded me briefly when I entered the room, but soon moved listlessly away. Thereafter she took no notice of my presence, lying inert under the mantle of her blanket, seemingly unaware of her surroundings. I had thought at first that she was under medication for pain, but the woman's work cadre informed me that, aside from the "poison shot," she had received no medicine. (According to Dr. Chen, none of the women received pain pills, tranquilizers, or sleeping pills.) Nevertheless, the cadre hastened to add, the woman was not in any pain.

Not in any physical pain perhaps, I mentally corrected her as I moved over to the woman's side, intending to ask her how she felt. But before I could get the question out, she turned away from me to face the wall and pulled her heavy quilt up over her head as a further shield. I could see her body compact itself under the quilt as she curled up in a ball around her dead fetus. I heard the cadre say from behind me that she was scheduled for an abortion later that afternoon. The final step for this woman and the others in the abortion dormitory was a trip to the operating room, and it was there that I concluded my visit to the clinic.

The operating room was constructed of the same gray concrete as the rest of the hospital but was better lit, with large windows in each wall. The low operating table in the center of the room was already occupied by a short, stocky peasant woman in her late twenties. She lay midriff unclothed on her back as a nurse busily painted her exposed, swollen stomach with a yellow antiseptic solution. An occasional curious face appeared surreally at the windows, only to be quickly driven away each time by the shouts of the nurse. When she had completed her work, a doctor swiftly made a series of injections of local anesthetic in the woman's abdomen. As he waited for the shots to take effect, he explained to me that the woman had been given an injection of Rivalor early the previous day, that it had been determined this morning that the fetus had died, but there was still no sign of uterine contractions. Now, he went on, oblivious to the woman lying underneath his gesticulating gloved hands, the fetus would have to be removed, thus and thus. The woman for her part stared fixedly at the ceiling throughout his verbal dissection, her body immobile. Only her laboring, calloused hands, clenching tightly at the edge of the operating table, gave a hint as to her state of mind. I left the operating room unbidden as the doctor made the first incision.

I came away from that clinic visit appalled at the physical and mental anguish of the women I had seen, but even more puzzled by the absence of opposition to it, not only from the women themselves, but from any segment of Chinese society. In contrast to America, the question of abortion, even when involuntary and performed late in term, has not flared into a public issue in China. In part this may be because the state-controlled media impose an almost total blackout on any kind of criticism of current government policy. But even through the rural grapevine I heard no reports of fiery confrontations between placard-carrying marchers and the authorities, of "pro-life" crusaders staging sit-ins at clinics and hospitals protesting the late abortions, of "pro-choice" advocates crashing the birth control meetings to demand that women be free to make individual decisions on abortion privately and without pressure. Little or none of the explosive moral and political drama that has surrounded this issue in the U.S. has disrupted PRC efforts at population control.

One reason for the damping of this issue is that in China there are not many who would risk confrontation with the establishment over abstract questions of human rights raised by birth control excesses. Then, too, while the worst excesses of the birth control campaign are occurring in the countryside, China's few dissidents are concentrated in the cities, where their attention is held by other issues. Moral outrage is limited as well by the sometimes "nasty, brutish, and short" character of life in overpopulated, famine-prone China, and by a lack of a religious tradition grounded in the sanctity of human life. Man is not made in god's image in China. Confucious never said, "Thou shalt not kill."

What moral indignation there is over the program in the Chinese countryside is kept in close check by the juggernaut of state power, the implicit threat of which so cows most people that they attend closely to the state's desires and behave accordingly. Not that the PRC is above making open threats when necessary, as in the 1978 fertility-planning regulations of Guangdong Province, whose section on rewards and punishments contains a chilling warning to those who, for whatever reason, oppose the provincial government's will: "Those who attempt to defeat the fertility plan by engaging in rumormongering, distorting the truth, attacking and harming fertility-planning workers and activists, and generally breaking the law and running amuck must be dealt with severely. If they have actually obstructed the implementation of the fertility plan, they must be brought before the law for punishment. Those enemies of the people who attempt to defeat the fertility plan must be exposed immediately and resolutely attacked." [4]

In view of the state's uncompromising attitude, those among the cadres inducing the women to abort and the doctors actually carrying out the abortions who are conscientiously opposed to the program dare not make any public expression of disapproval or opposition. The only instance I came across where the program was openly challenged by those who were charged with its enforcement involved the Party secretary of a brigade in Hetang Commune, Xinhui County, Guangdong, who, supported by several of his fellow brigade cadres, refused to implement the birth control procedures handed down by the county in the spring 1980 campaign. The reaction of the commune revolutionary committee to this insubordination was immediate and devastating. With the approval of the county, a work team was sent to the brigade to organize mass criticism meetings against the offending cadres, the predictable outcome of which was the removal of the mutinous Party secretary and his supporters from office. The work team then stayed on to ensure the full compliance of the brigade members during the remainder of the "high tide."

Most cadres are to canny and cautious to openly buck the system, and keep their complaints about this issue very muted and private. One brigade cadre, who was distressed by what he saw as excessive pressure on women to abort, burst out to me, "If Liu Shaoqi"—the moderate former Chairman of the People's Republic who perished during the Cultural Revolution—"had stayed in power, we would never have seen this day. The problem of population growth would

[4] Guangdong Provincial Revolutionary Committee, Implementation Regulations Governing Certain Problems in the Area of Guangdong Provincial Fertility Planning Work (Guangdong: Fertility Planning Office of the Guangdong Provincial Revolutionary Committee, December, 1978), section 8, article 26, last paragraph.

have been taken care of by gradualism." A doctor told me that many of his colleagues were very upset about the abortions on seven- or eight-months-pregnant women, but that no one had considered protesting publicly by refusing to perform such operations. "The consequences would be very serious. There would be criticism, transfer, demotion, struggle, perhaps even labor reform," he told me. "No doctor that I know is prepared to take that risk."

Although it is the peasants whose security, privacy, and family continuity are most threatened by the program, they are for the most part politically inarticulate and naive about matters beyond their own rice bowl. Even the young peasant women themselves, who stand to lose the most, mount only individual and passive resistance to the program. They keep their pregnancies secret, telling only their families, and avoid prenatal physicals, knowing the brigade midwife will report their condition to the authorities. They continue to work in the fields as usual, binding up their abdomens under their baggy pants and blouses from the fourth month on so that they will not show. Many in this way avoid detection until they are only two or three months from term, thinking that they have a shorter gauntlet of meetings to run. Those who can afford to pay the fines go away to the hills or to the home of a relative, coming back only after their infant is born. Those women who attended the meetings I witnessed were largely silent, less defiant than resigned, less rebelious than fatalistic, each enduring on her own. On the one occasion when a woman unexpectedly railed bitterly against the cadres, I saw the other women self-consciously look away, distancing themselves from the protester. They seemed as helplessly isolated as their unborn babies, incapable of uniting in even verbal opposition to a policy that each one of them privately opposed. Neither did their husbands or other family members back in the village work to undermine or circumvent the program, or even go so far as to criticize it publicly. To be sure, men grumbled and cursed that the program was taking away their sons and grandsons, but only within their family gates and only to family members and trusted friends.

Yet I did witness several spontaneous outbursts by individuals against the policy, the most striking of which came during the course of a birth control meeting. One of the young mothers present, who had two girls but no boys, had started talking during an interlude about how she had managed to keep her pregnancy a secret until just a few days previous when "they" became suspicious and ordered her to undergo a physical. "They are so strict now," she continued, tears welling up, "I just want to have this one more baby, and then I'll be glad to have a tubal ligation. In the village there is no way to survive when you are old if you don't have a son. Sons are like heavy cotton quilts in the winter; if you don't have one, you will freeze to death."

She was sobbing heavily by this time, and, thinking it best to end the conversation, I stood up to go.

"They won't let me have my baby," she burst out. "I will agree to anything they want if they only let me have my baby."

I was anxious to shut off her torrent of words, but was carried along by her intensity.

"If I talk to you like this, is it illegal?" she asked suddenly, eyeing the two cadres present who had sat with faces averted during our conversation.

"No, it isn't," I answered with an assuredness that I definitely did not feel.

"I don't care if it is," she went on without really listening to my reply. "Vice Premier Deng says that we are to 'tell it like it is.' All I am doing is telling you the truth."

I nodded, noting apprehensively that the cadres were casting glowering sidelong glances at the woman.

But she was not to be cowed. Looking directly at the two cadres, she cried, "They are forcing us to have abortions!"

Occasionally, protest has gone beyond the merely vocal and become violent as well, as happened in a village in the Pearl River Delta where the birth control campaign was pushed with special vigor by a young, ambitious brigade Party secretary. Finally all but one of the village women pregnant with an over-quota child had reluctantly gone to the commune clinic for an abortion. The lone holdout was a woman whose husband, himself an only son, was desperate for a son to continue the family line. They held out against the cadre's harassment and veiled threats for several weeks more before finally caving in. When the woman's seven-month pregnancy was aborted, she was found to have been carrying twin boys. In the eyes of rural Chinese, who prize sons above all else, this was a monstrous tragedy, and word of it quickly spread beyond hospital walls to the woman's horrified husband. This man went into a black fury and, shreiking that his two sons had been murdered, tore wildly to the Party secretary's home. Seizing the man's two sons, aged 8 and 10, he heaved them into the courtyard well and then leaped in himself. All three drowned.

This household-shattering double murder and suicide, as tragically poignant as it was, touched me less deeply than a quiet ritual I observed, which better exemplified the passive Chinese acceptance of acts of gods, fate, and the state. During the early April Qing Ming Jie, the "bright and clear" festival on which Chinese remember their ancestors, I visited a neighbor woman who had gone through a late abortion a month earlier and found her just completing the domestic portion of the memorial ritual. Eight sticks of incense were smoldering on the high mantle before the family's ancestral tablet, clothing, money, and ingots made of paper were being transsubstantiated by fire into the nether world for the use of the ancestors, and she was chanting prayers for the peace and prosperity of the household members, both living and departed. But instead of ending the rite at that point as customary, she lit a final length of incense in a corner of the room and briefly stood crooning before it. It was, she explained to me afterwards, for "the unborn one."●

AMERICAN HEROES; NOT HUCKSTERS

● Mr. D'AMATO. Mr. President, on April 18, 1775, Paul Revere left Boston on a borrowed horse bound for Concord via Lexington. Under the cloak of night, Revere raced furiously across the countryside to warn of a British militia heading toward Concord with orders to break up "mobs," destroy supplies, and arrest John Adams and John Hancock, two of the major architects of our emerging democracy. Although Revere was captured between Lexington and Concord, William Dawes and Dr. Samuel Prescott escaped and Dr. Prescott managed to complete the journey. Their heroic efforts ensured that when the Tory militia arrived in Concord on April 19, Adams and Hancock were safely out of reach and that there was an appropriate committee of American minutemen.

Mr. President, I rise today not only to call attention to the 210th anniversary of this altruistic undertaking, but to suggest reverence as the appropriate attitude for honoring great American heroes and their efforts, rather than the irreverent use of American leaders in tasteless, demeaning advertisements for any and every product known to the market. Is one to expect that we will be reminded of this historic occasion by a Paul Revere character riding into a local retailer crying "One by land; Two for the price of One"? I feel compelled to ask if advertisers can find no better way in which to use their talents than by dressing such American heroes as Revere, Abraham Lincoln, and George Washington as clowns?

Let me affirm in crystalline language my unwavering support for freedom of speech. I in no way intend for my remarks to become the basis for any action that encroaches upon the liberties provided in our Bill of Rights or within the spirit of our Constitution. However, I do believe that, if the 210th anniversary of Revere's famous ride should be heralded in as the signal for yet another all-night or day-long sale, then our Nation runs the risk of total failure in its struggle to preserve its glorious heritage for generations yet to come.

Furthermore, I implore every merchant and advertiser to consider if they would choose to have their children recalling George Washington, not as the "Father of our Country," but as the excited gentleman whom they recognize as announcing the greatest sale on Earth? I beseech each merchant, advertiser, and salesperson to consider the individual role they play in preserving our national heritage.●

CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR SOVIET JEWRY

● Mr. BOREN. Mr. President, I rise today to again speak as a participant in the congressional call to conscience vigil for Soviet Jewry. While it is always a privilege to speak here on the floor, I believe that those of us who are a part of this ongoing effort on behalf of those in the Soviet Union who are denied the right to emigrate feel this as a tremendous responsibility as well. Here in this country we often take our freedom for granted. However, the problems confronting many people in the Soviet Union cause

me to pause and to realize that the Congress and the people of the United States must do everything possible to assist those who are not afforded such freedoms.

Today I would like to speak particularly about some friends of mine. These friends live in the Soviet Union. While I was traveling in that country a few years ago, I met Naum and Fiana Kogen and learned of their desire to leave the Soviet Union.

There are many Soviet citizens who share this desire but, in my view, there are fewer people who have the striking need that the Kogens do for leaving that country. Both Naum and Fiana are in very poor health. I feel certain that their conditions could be treated more appropriately outside of the Soviet Union. Unfortunately, although they have followed all of the lengthy proscribed procedures for emigrating, they continue to be denied permission to leave the Soviet Union.

Despite the apparently dismal prospects for their departure, Naum and Fiana remain hopeful that someday they will be allowed to join other members of their family outside the Soviet Union, including their children who now live in Michigan. It would have been particularly special for the Kogens to be allowed to leave the Soviet Union in time to join their grandson Michel on May 31 of this year on the occasion of his bar mitzvah.

These family members, and many other friends, continue to work to hasten the day when they can be reunited. In Oklahoma City, the Kogens have been adopted by the Jewish community, and correspondence continues to be sent to President Reagan and other U.S. officials, as well as to officials of the Soviet Union. We must continue to believe that these efforts will eventually be successful.

Mr. President, it is with a renewed sense of hope that I speak about the Kogens and others in similar situations today. We all realize that over the past decades there have been fluctuations in the emigration policies of the Soviet Government. Often these fluctuations have coincided with changes in relations between the Governments of the Soviet Union and the United States. I am hopeful that now that arms negotiations are again underway in Geneva, and that Mr. Reagan and Mr. Gorbachev appear to be anxious to work toward better relations between our two countries, that emigration from the Soviet Union will again increase.

In addition, I call upon those who represent the United States in Geneva and in all contacts with Soviet officials to make it clear to them that the United States—its Government and its people—continue to be vitally concerned about Soviet emigration policy and about the treatment of Jews, Christians, and all ethnic minorities within the Soviet Union. Mr. Gorbachev has stated that he believes this to be strictly an internal matter, and that no other Government should attempt to influence its policies in these areas. Mr. President, I believe that we not only have the right to speak of these matters, but we have an obligation to do so. For there are some values which supersede national boundaries and governmental authority. There are some values and rights which I believe to be universal and applicable to all people regardless of their country of birth. Mr. President, one of those rights is the right to live in the place of one's own choosing. I will continue to speak about this right in whatever forum is available to me, and I call upon my colleagues to do the same.●

SOUTH AFRICA

● Mr. SYMMS. Mr. President, I have made previous statements on the floor of this body about the disingenuousness of the divestment advocates. It is evident from all the information available that divestment would hurt the very people the divestment proponents claim they want to help. The only logical conclusion, consequently, is that the divestment movement is propagated by those who have little real concern about South Africa's blacks but, instead, are motivated by domestic political considerations. I ask that an article entitled, appropriately, "Eating People Is Wrong," be printed in the RECORD.

The article follows:

[From Barron's, Mar. 4, 1985]

EATING PEOPLE IS WRONG

(By Peter Brimelow)

Any student of financial markets can tell at a glance that the current agitation against South Africa has reached the political equivalent of the hysterical or "blow-off" stage. It now constitutes an extraordinarily popular delusion on the scale of the Mississippi Scheme, the South Sea Bubble or the Great Tulip-bulb Mania in 17th century Holland. In such situations, facts are irrelevant—temporarily. But it is well to remember how far from reality we have strayed.

South Africa does not remotely threaten American geopolitical interests. Unlike the Soviet Union, it is not a relentlessly hostile superpower with thousands of nuclear warheads trained on the U.S. It has not systematically sought to subvert the American political process, nor even to assassinate a pope. It has, in fact, been a consistent and valuable friend to the United States. And it is not conquering Afghanistan. Right now, as you read this, Soviet troops are killing Afghan men, women, and children—already over a million out of a total population of some 17 million, with a further three million driven into exile. There is no parallel to such savagery anywhere in the world—except perhaps in Ethiopia, where another Soviet-backed regime is exacerbating a famine to starve into submission its secessionary northern provinces.

When President Reagan tried to keep U.S. firms from building the Soviets' Siberian pipeline, American liberals claimed that such sanctions were ineffective, counterproductive and a threat to peace. Yet, astonishingly, the very same voices are now calling for some sort of ban on U.S. corporations doing business with South Africa—divestment. This is a catch-all for proposals ranging from the prohibition of the sale of Krugerrands to the liquidation of all investments in South Africa, the sale of stock in companies doing business with South Africa, and even the banning of all trade relations between the two countries. There is a grave possibility that Congress will comply. By the time this speculative bubble bursts, however, the price may well have been paid not by its instigators but by innocent bystanders everywhere.

The practical objections to "divestment" are overwhelming. It will pose no problem that the South African economy cannot overcome. Since U.S. corporations could hardly pick up their factories and leave, their South African assets would be bought at fire-sale prices by local investors, who are not short of capital. Trade or technology bottlenecks can be circumvented by an able and enterprising elite, as the utter failure of sanctions against Rhodesia made plain. Moreover, the primary victims of any economic slowdown in South Africa would be its marginal workers, mostly black, and the neighboring black states, which are wholly dependent on it. Marxist Mozambique's main source of foreign exchange, for example, is a levy on the wages of its migrant workers in South Africa, which the latter's government obligingly collects and hands over.

This state of affairs explains why South African black leaders like the Zulu Chief Gatsha Buthelezi, backed by their followers in numerous surveys, have opposed divestment. Apartheid is expensive. The South African business class in general and U.S. corporations in particular have been pioneers in its steady dismantling. But even more urgently, South African blacks have a vital material interest in the continued health of the South African economy. Already they are by far the wealthiest blacks in Africa; by the end of 1985, they will own more private automobiles than the entire population of the Soviet Union. It is not insignificant that the 1976 Soweto riots subsided after migrant Zulu mineworkers, enraged at the burning of their hostels and the blow to their earnings, began to attack student demonstrators and beat them to death.

The secondary victims of divestment could well be American. In a study of the legal and economic implications recently published in Georgetown University's Law and Policy in International Business Journal, John H. Chettle of the Washington-based South Africa Foundation presents evidence that exports to South Africa directly employ over 100,000 Americans. President Kennedy's 1962 unilateral embargo on arms sales to South Africa, and the discouragement of one nuclear power deal alone, have already cost the U.S. $14 billion in exports and 750,000 jobs. Additionally, corporations with business links to South Africa make up over half the capitalizaiton of the S&P 500. Money managers could not shun them without incurring significant increases in risk and declines in return, to say nothing of the one-time transaction costs of purifying their portfolios. This would be a clear violation of their fiduciary duty.

U.S. advocates of divestment dismiss as purely cosmetic the reforms being pushed

by P.W. Botha's Nationalist Party government; the steady expansion of social integration, the heavy expenditures on black health and education, the legalization of trades unions, the constitutional changes including the election of Coloured and Indian representatives, the effort to reach agreement with Marxist juntas in Angola and Mozambique. But this is emphatically not the view of Dr. Andries Treurnicht, the former leader of the Transvaal Nationalists. Viewing all these developments as foolish attempts to appease the unappeasable, he has quit the governing party to form, with a solid bloc of legislators, his own oppostion Conservative Party. Power in white African politics has invariably gravitated to the hardliners. The threat to Botha is particularly acute because his policies have produced exactly the wave of unrest that right-wing critics forecast. Rejection by America could finish him completely.

Beyond these practical reasons why divestment will not help reshape South Africa to American tastes, there lies the more profound question of why this country should seek to interfere in its internal affairs at all. South Africa's Afrikaner rulers may not wear charming tribal robes. They may appear dour and even authoritarian. But the fact is that by comparison with other African governments, they are as innocent as newborn lambs, as pure as the driven snow. At least 30 African countries are ranked in the respected Freedom House organization's new yearbook as decisively less free than South Africa. And this by standards so hostile to South Africa's blend of First and Third World cultures that it counts as less free than Uganda, which is currently divided between warring factions and where a foreign arms of occupation reversed the result of the last election.

The suffering in Africa since independence has just not penetrated America's consciousness. Millions have died in civil strife, whole economies have collapsed, and diseases like malaria that were suppressed in the colonial era once again rage unchecked. The situation can be compressed into a symbolic tale of four African heads of state: While their delegations were voting on world affairs in the United Nations, the rulers of Benin and Equatorial Guinea each murdered their foreign ministers with their own hands; the rulers of Uganda and the Central African Republic both not merely tyrannized their subjects but actually ate them. In these circumstances, to insist on one man, one vote in South Africa is to demand that the white community commit suicide.

There is an acid test of any country's internal policies: Are people trying to get in or out? With over a million illegal immigrants, South Africa passes that test. It also has no difficulty whatever in recruiting blacks for its Defense Force and police. It has achieved this basic measure of legitimacy because it offers something more elemental than the vote, which Americans blithely take for granted: order, amid Africa's chaos. Outsiders can only guess how long the Afrikaners can continue their perilous trek through African history, now in its fourth century. But their recent success in allying with the black guerrilla movements that have paralyzed Angola and Mozambique suggest that their grasp of power and politics in the African context still remains firm.

Not even the emotional view that racism is the supreme evil can explain anti-South African agitation. According to The Netherlands' Institute for the Study of Plural Societies, more than 60 countries practice some kind of racial discrimination, sometimes in spectacularly gross forms, such as Malaysia's dispossession of its Chinese and Indian majority. For that matter, there is no apartheid in the "national states" of Venda, Bophuthatswana, the Ciskei and the Transkei, which remain internationally unrecognized, although at least at independent as U.N. member states like Mongolia, Byelorussia or the Ukraine.

Ultimately the agitation has no more to do with South Africa than speculative frenzies have to do with intrinsic values. White South Africa is simply a convenient outlet for purely domestic American political pressures: racial antagonisms; the left's need for a cause to rally round; the professional politicans' need for something to feed to the civilrights lobby that will not impinge upon their constituents. The poet Byron once described a dying gladiator as "butcher'd to make a Roman holiday." The peoples of South Africa, it appears, are to be sacrificed for a few points in the opinion polls. Yet as two social satirists, in "Beyond the Fringe," pointed out a couple of decades ago: "Eating people is wrong." ●

CONDITIONS IN AFGHANISTAN

● Mr. HUMPHREY. Mr. President, on April 3—just prior to the Easter recess—I discussed the first installment of an article written by Dr. Claude Malhuret on the conditions which exist inside Afghanistan. At this time I would like to present for the RECORD the second and final section from that article, written over a year ago, but just as compelling a report and just as strong an indictment of Soviet terror in that country as ever.

Dr. Malhuret's "Report from Afghanistan" possesses a special quality of reliability and authenticity for two reasons. First, the organization which he directs, Medecins sans Frontieres, is an eyewitness to the horrors which have been perpetrated upon the Afghan people by Soviet forces. When he speaks of the war in Afghanistan as a war fought against small children, it is because the M.S.F. physicians there have had to treat the ghastly wounds inflicted by the explosion of booby-trapped toys. When he writes of the mass proportions of starvation which exist—the result of deliberate Soviet policy to starve the populace into submission—it is because M.S.F. medical personnel have been exposed first-hand to the many epidemics of disease which have erupted as a byproduct.

The authenticity of Dr. Malhuret's report is reinforced by the strictly apolitical role which Medecins sans Frontieres has played. This rapid-deployment medical organization has sent teams to conflict areas in Southeast Asia, Africa, Lebanon, Central America and Iran—often despite the opposition of host governments. Clearly their purpose is not to advocate a political position or to influence policy, but rather their mission is a humanitarian one, to relieve just a fraction of the human suffering engendered by the brutal consequences of war. In the case of Afghanistan, where the genocidal actions of the Soviet occupation and their quisling Afghan "hosts" have resulted in the loss of 1 million Afghan lives and a refugee population of 4 million, the need for just such humantarian assistance could not be more crucial.

Mr. President, I ask that the second installment of Dr. Malhuret's "Report From Afghanistan" be printed in the RECORD.

The material follows:

REPORT FROM AFGHANISTAN

Before coming to the last issue, which concerns the final outcome of the tactics just discussed, a word must be said about one of the conditions needed for this strategy to be a success: secrecy.

International public opinion would never accept such enormities if it were informed daily on the developments in Afghanistan. The need for secrecy explains why borders are systematically closed and why journalists are not allowed to enter the country. Of course, some journalists disregard this, but they are so few in number that their reports draw little attention. Compare, for instance, the amount of coverage on Afghanistan with that given for several years on the war in Vietnam.

The French physicians who have been on permanent duty in Afghanistan for the last four years have become key eyewitnesses, and in spite of their lack of experience in journalism, they have been able to make up somewhat for the negligence of news reporting. I use the "negligence" because, if a small organization like ours can succeed in maintaining more than 20 physicians on permanent duty in four provinces in Afghanistan, despite government acts of violence against them, the news media could do likewise. The Russians cannot tolerate the fact that we are there to witness what is happening, and we have therefore become their target. In 1980 and 1981, four MSF hospitals were deliberately destroyed by MI-24 helicopters. Two other hospitals in the region of Panjshir, which are operated by another French organization, Aide Medicale Internationale, were destroyed in the same way. May I add that one of the hospitals had a big red cross clearly visible on its roof.

Also, on several occasions, the physicians themselves have been pursued by Soviet soldiers who had in their possession photos of the doctors that they showed to the people they questioned. All the doctors have managed to get away except one, Dr. Philippe Augoyard, who was captured in January 1983. But we do not think that the Russians will try that type of operation again, as it proved disastrous for their image in Europe—especially of course in France. Rather than discouraging new recruits, which was probably the goal, the Augoyard case let physicians in other countries know about our work. Such incidents result in a bad press that affects the Soviets in other spheres. At the present time, only 50 percent of our medical teams are French; the remainder are Dutch, English, Belgian, Swiss, Scandinavian, and other nationalities. If, for example, a Dutch doctor were arrested in Afghanistan, the anti-Soviet publicity would certainly influence the ongoing debate over the installation of American missiles in Europe.

Now we come to the question of the final outcome of the Soviet strategy. The examples given above concerned Kampuchea and Ethiopia. The reason for this is that Afghanistan is not a very good example to illustrate Soviet anti-guerrilla warfare, precisely because the results have so far been unsuccessful. The towns of Afghanistan, the main bases for Soviet intervention, are poorly controlled. Not a week goes by without word of an attack against the government or against communist-bloc embassies in Kabul. In response, the heavily commercial districts in big cities such as Herat and Kandahar were reportedly severely bombed and nearly destroyed by planes because they had gone over to the resistance—just another example of the Soviet terror strategy and massive destruction, which can be contrasted with the house-by-house taking of the Algiers Casbah by the French army in 1970, with little loss to property or human life. The Soviet strongholds of Bamiyan, Ghazni, Gardez, and Khost are completely encircled by the Mujahedeen. In Bamiyan, for example, a garrison composed of 200 Russians and 200 Afghans has its post high up on a peak; supplies reach the garrison by helicopter. Helicopters are therefore gaining in importance for the Soviets as a means of transport between towns because communication links are not at all under control, although efforts have recently been made to improve them.

The puppet government of President Babrak Karmal has also attempted psychological warfare, by trying to play on local antagonisms among the Pushtun tribes. But the government has not been very successful at this, particularly since the death in 1981 of Faiz Mohammed, Minister for Tribal Affairs, who was killed by a group he was trying to bribe.

The cease-fire agreements that have been made have worked as much in favor of the resistance fighters as they have in favor of the government leaders, and they are based more on a balance of power than on a successful psychological warfare strategy. This is currently the case in Panjshir.

The number of armored vehicles that have been destroyed by resistance forces is incredibly large, considering their outdated weaponry and suicidal tactics (such as leaping onto tanks with homemade gasoline bombs). We counted more than 600 vehicles destroyed in the areas where we work, which, when extrapolated, comes to a total figure of some three or four thousand for the entire country. This figure is generally found to be so unbelievable that, whenever I mention it, I never fail to have with me a set of slides to document what I am saying.

The economic blockade has also not succeeded. The border areas are as easily accessible as they were before it was imposed; our medical teams need only three days to reach the central province of Hazarajat. Our movement is not restricted, as people generally think; we travel by car or truck, and only during the day.

Setting fire to crops and storage shelters is another anti-guerrilla tactic, but its effect is limited because less than half the amount of food that was needed before the war is needed now due to the diminished population. In addition, caravans going to and from Pakistan continue to bring fresh produce. Another striking—and ironic—example of the ambiguous effect on the economy, also from Hazarajat, is the need in Kabul for firewood, which has forced the government to deal with the resistance. The resistance fighters bring wood to government outposts and exchange it for salt or sugar from Kabul.

Despite the attempts to restrict the food supply, trends in local market prices indicate that the blockade is not working. Some prices have actually dropped since the Soviet invasion. At Jaghori, for instance, a gallon of gasoline that cost 200 to 300 Afghanis (AFS) in 1979 costs 160 AFS today. A pack of cigarettes that cost 60 AFS in 1979 now costs 28 AFS. These figures suggest that supplies are adequate to keep prices from rising. Other prices have risen, but less rapidly than those in many Third World countries, even countries that are not at war: a ser (15 pounds) of flour cost 70 AFS in 1978; it rose to 160 AFS in 1979; today it costs 180 AFS. The price of a ser of tea doubled between 1978 and 1979, from 960 to 1,920 AFS; since then it has only risen to a current price of 2,500 (less than one-third of the 1978-79 rate of increase), and even this price rise may be largely attributable to inflation.

The examples illustrating the poor short-term effect of Soviet strategy suggest a rather optimistic trend with regard to the Afghan resistance movement, but my conclusion is much less so. Everything I have said about the current situation shows that the war in Afghanistan is one in which the balance of power has not changed in four years, in spite of the fact that the two adversaries are unequally matched—on one side the world's biggest army, on the other a handful of people standing tall against the invader. There is no sign of any change soon in this state of affairs, and I do not believe that the Afghans can be beaten in the short or medium term. But Soviet strategy involves two aspects that may make the outcome in Afghanistan differ from the Western experience; one, already mentioned, is the use of mass terror, completely unlike any of the more moderate types of intervention. The second is that the Soviets can afford a protracted war in the short term for the sake of a long-term victory.

The Russians do not need smashing victories to announce to their citizenry, as Soviet public opinion does not influence Soviet policy. Catastrophes, such as that in the Salang tunnel were several hundred Soviet and communist-regime troops (and civilians) were killed, do not incite an outcry in Moscow for Soviet "boys" to come home. The Soviet army can wait it out as long as it did for the Basmachi revolt to end—and it waited for that for 20 years. It can wait even longer if necessary. The Afghan resistance will hold out for a long time, but in the end it will probably be beaten. It might not be beaten, however, if in the coming years there is a profound change in the international balance of power and in the reactions of Westerners to Soviet totalitarianism. It is not impossible that this change could take place, but only a very wise person would dare to predict the future of Afghanistan.●

THE CALENDAR

Mr. DOLE. Mr. President, I inquire of the minority leader if he is prepared to do any of the following legislative items: Calendar Nos. 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, and 74.

Mr. BYRD. Mr. President, I have no objection from this side with respect to any or all of the calendar orders numbered from 55 through 69 and in addition thereto 74 as enumerated by the distinguished majority leader.

Mr. DOLE. Mr. President, I thank the distinguished minority leader.

I ask unanimous consent that the calendar items just identified be considered en bloc and agreed to en bloc, that all amendments, preambles, and amendments to titles be considered and agreed to.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

NATIONAL WOMEN VETERANS RECOGNITION WEEK

The joint resolution (S.J. Res. 47) designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week," was considered.

Mr. CRANSTON. Mr. President, as the ranking minority member of the Committee on Veterans' Affairs and the author of this resolution, I rise in strong support of Senate Joint Resolution 47, a measure I introduced on February 7 to designate the week beginning November 10, 1985, as National Women Veterans Recognition Week. Joining with me as original cosponsors of this measure were the chairman of the Veterans' Affairs Committee, my colleague from Alaska [Mr. MURKOWSKI], as well as Senators SIMPSON, DECONCINI, SPECTER, and LEAHY,

The response to this initiative has been very gratifying. Currently joining with us as cosponsors are the following: Senators PELL, SARBANES, STENNIS, DOMENICI, HOLLINGS, CHAFEE, SIMON, HAWKINS, BURDICK, THURMOND, KASSEBAUM, BRADLEY, NICKLES, MCCONNELL, INOUYE, BOSCHWITZ, METZENBAUM, GORE, LEVIN, COCHRAN, WARNER, PRESSLER, and ANDREWS. In particular, I want to thank the chairman and ranking minority member of the Judiciary Committee, Senator THURMOND and Senator BIDEN, for their support and assistance in bringing this measure through the Judiciary Committee from which it was reported on April 4, and before the Senate so quickly.

Mr. President, this measure is very similar to a measure I authored in the last Congress, Senate Joint Resolution 227, which was enacted into law as Public Law 98-438. Pursuant to that law, the week of November 11 of last year was designated as "National Women Veterans Recognition Week."

Mr. President, as I noted when I introduced this resolution, last year's effort made a very good start in creating greater public awareness and recognition of the contributions of women veterans; many activities were carried out across the Nation honoring women veterans. Designating such a week again this year will reflect, appropriately, the view that much re-

mains to be done to make the public more aware of the many contributions of women veterans over the years so as to gain for them the recognition they so richly deserve and to make the women veterans themselves aware of the many benefits available to them because of their service.

Mr. President, with reference to this second goal—of making women veterans themselves more aware of the benefits that relate to their status as veterans—it has become clear, beginning with a 1982 General Accounting Office report, then through the work of the VA Advisory Committee on Women Veterans, and, most recently, through a September 1984 VA Report, that far too many women veterans are not aware of the implications of their status as veterans. For example, the recent VA report, entitled "Data on Female Veterans, Fiscal Year 1983," found that women veterans accounted for only 2.1 percent of the population in VA medical centers on "census day" in June 1983 and for only 1.8 percent of the total VA hospital discharges in fiscal year 1983 even though women veterans then constituted 4.1 percent of the overall veteran population.

The VA Advisory Committee on Women Veterans was first established administratively but later, in November 1983, given statutory permanance by virtue of the enactment of legislation I initiated in the Congress. In its first report, issued in July 1984, the advisory committee made the following points:

Two fundamental problems cut across the issues discussed by the committee. First, many women veterans are not aware of their entitlement to the benefits administered by the VA and other women who may be aware of their entitlements are reluctant to initiate claims for their benefits. Second, VA information materials, brochures, and outreach programs designed to inform veterans of their rights and benefits have been aimed at a male constituency. In part, this is merely a reflection of a traditional societal mindset that a veteran is, almost by definition, male.

I concur fully with these concerns of the advisory committee and believe that this measure is one concrete response to those concerns.

Mr. President, the VA has recently issued two directives—a February 8, 1985, circular and a February 12, 1985, chief medical director's letter—which respond directly to some of the recommendations of the advisory committee concerning health care for women veterans. Both of these documents demonstrate genuine progress by the VA in meeting the needs of women veterans, and I congratulate the members of the advisory committee for the success of their efforts. I ask unanimous consent that these two VA documents be printed in the RECORD at the conclusion of my remarks. For further information on the advisory committee, I refer my colleagues and others with an interest in this subject to page 2206 of the CONGRESSIONAL RECORD for February 7, 1985, where, as part of my introductory remarks on the pending measure, I inserted the full text of the advisory committee's first report, which included all the committee's recommedations.

Mr. President, I am delighted by the warm reception and rapid consideration that Senate Joint Resolution 47 has received in the Senate. I hope that our colleagues in the other body will again, as they did last year, take timely action so as to ensure enactment of this measure in time to allow advance publicity of the week it would proclaim.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VETERANS' ADMINISTRATION, DEPARTMENT OF MEDICINE AND SURGERY,
Washington, DC, February 8, 1985.

To: Regional Directors; Directors, VA Medical Center Activities, Domiciliary, Outpatient Clinics, and Regional Offices with Outpatient Clinics.

Subj: Health Care for Female Veterans, RCS 10-0649.

1. This circular is a revision of Circular 10-84-8, dated January 4, 1984, and contains significant changes.

2. Planning for and providing comprehensive health services to female veterans continues to be a priority goal of the Department of Medicine and Surgery, which is committed to providing equitable care to all veterans, male and female. Written plans for the care of female veterans should be reviewed and updated as needed. Their implementation will be evaluated by SERP teams during regularly scheduled SERP surveys. All facility plans must address at a minimum four crucial elements in providing adequate care for female veterans:

a. It is DM&S policy that a complete physical examination for a female patient include both a pelvic examination and a breast examination.

b. Gynecologic services must be available for all hospitalized female veterans as well as those in VA nursing homes and domiciliaries.

c. Female veterans must be able to receive ambulatory care for gender-related conditions on a par with the care male veterans receive for their gender-related ailments. Therefore, each VA medical center and outpatient clinic must provide outpatient gynecologic services by at least one mechanism in addition to fee basis care.

d. Referral procedures so that female veterans can receive necessary services currently unavailable at the medical center because of privacy considerations must be in place.

3. The correction of physical barriers which limit the access of females to care in VA medical centers is an ongoing process.

4. Each medical center director will appoint a person to serve as coordinator for women veterans. This person should be sensitive to the needs of women in VA health care facilities and capable of working with both care givers and patients to achieve a positive environment for equitable care. The name, location and telephone number of the coordinator should be posted and appropriately publicized. A discussion of the role of the coordinator may be found in IL 10-85-6 dated February 12, 1985, entitled "Update on the Provision of Health Care for Female Veterans."

5. A list of Coordinators for women veterans will be maintained in VA Central Office. Please provide the name, title, and telephone number (commercial and FTS) of the coordinator at your facility by March 1, 1985 to Dr. Susan Mather, 10BA/111. Subsequent coordinator changes should be reported to 10BA/111 within 10 workdays of the redesignation.

JOHN A. GRONVALL, M.D.,
Deputy Chief Medical Director.

VETERANS' ADMINISTRATION, DEPARTMENT OF MEDICINE AND SURGERY,
Washington, DC, February 12, 1985.

CHIEF MEDICAL DIRECTOR'S LETTER

To: Regional Directors; Directors, VA Medical Center Activities, Domiciliary, Outpatient Clinics, and Regional Offices with Outpatient Clinics.

Subj: Update on the Provision of Health Care for Female Veterans.

1. The past year has seen significant strides in improving the access of female veterans to care in the VA system. The plans for the care of female veterans appear to have been implemented smoothly in all VA medical centers. Twenty-eight medical centers have been identified as having significant physical barriers which might limit access to care by female veterans in some areas. Specific projects have been identified and/or are currently in the design or construction phases in 25 facilities. Three others have projects under review.

2. Much more statistical information has become available. You should be aware of three reports from the Office of Information Management and Statistics, Research Division (711), "The Female Veteran Population," RSM 70-84-1, November 1983, "Data on Female Veterans Fiscal Year 1983," and "Women Veterans Usage of VA Hospitalization," Biometrics Monograph No. 19.

3. The VA Advisory Committee on Women has met three times since it was chartered by the Administrator. P.L. 98-160 authorized it as a Congressionally mandated committee and required a semiannual report to Congress. The first report was submitted July 1, 1984 and copies have been sent to each medical center. It contained a number of areas of concern for DM&S, some of which will be covered in this letter.

4. The Advisory Committee continues to place emphasis on a women veterans' coordinator as a way of dispelling the perception on the part of the women veterans that they are unwelcome in a male-oriented facility. This role was encouraged in IL 10-83-43 as one way of making VA facilities more accessible and more sensitive to the growing number of female veterans. Where it has been instituted, it is so successful that it is being included in the new circular on Health Care for Female Veterans, Circular 10-85-16.

a. Medical District 12 has a well organized program of counselors or coordinators. These 11 counselors met in Tampa on December 5, 1983 and have since maintained communication through conference calls. The counselors are submitting quarterly reports to their hospital directors on problems

reported to them as well as steps taken to improve the care of female patients.

b. Other VA medical centers have appointed coordinators and some have established position descriptions. Nurses, social workers, physicians and physicians' assistants are among the health professions represented by coordinators. These coordinators visit hospitalized female veterans, serve as a liasion between women and needed services within the VA, monitor the implementation of plans for the care of female veterans, help to identify unmet needs and generally function as an ombudsman for women veterans. In some facilities, they chair or serve on a committee set up to address issues involving female patients.

5. It is important that each medical center maintain appropriate supplies for women patients, both medical and personal, such as shampoo boards, hair dryers, mirrors, sanitary supplies and various sized specula for gynecologic examinations.

6. Each facility director should establish procedures for timely local purchases of pharmaceuticals for common gynecologic diseases if it is not practical to stock these items. This is especially important for local antimicrobial preparations used in treating gynecologic infections.

7. Veterans Administration medical centers must continue efforts to assure that women veterans have equal access to health care and that the care provided to them is on a par with that provided to men.

JOHN W. DITZLER, M.D.,
Chief Medical Director.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 47

Whereas there are more than one million one hundred and sixty thousand women veterans in this country, representing 4.1 per centum of the total veteran population;

Whereas the number and proportion of women veterans will continue to grow as the number and proportion of women serving in the Armed Forces continue to increase;

Whereas women veterans through honorable military service often involving hardship and danger have contributed greatly to our national security;

Whereas the contributions and sacrifices of women veterans on behalf of this Nation deserve greater public recognition and appreciation;

Whereas the special needs of women veterans, especially in the area of health care, have often been overlooked or inadequately addressed by the Federal Government;

Whereas this lack of attention to the special needs of women veterans has discouraged or prevented women veterans from taking full advantage of the benefits and services to which they are entitled as veterans of the United States Armed Forces; and

Whereas recognition of women veterans by the Congress and the President through enactment of legislation declaring the week beginning on November 10, 1985, as "National Women Veterans Recognition Week" would serve to create greater public awareness and recognition of the contributions of women veterans, to express the Nation's appreciation for their service, to inspire more responsive care and services for women veterans and to continue and reinforce important gains made in this regard last year as a result of the designation of the first National Womens Veterans Recognition Week during the week of November 11, 1984: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on November 10, 1985, is designated "National Women Veterans Recognition Week". The President is requested to issue a proclamation calling upon all citizens, community leaders, interested organizations, and Government officials to observe that week with appropriate programs, ceremonies, and activities.

NATIONAL SCHOOL LIBRARY MONTH

The joint resolution (S.J. Res. 52) to designate the month of April 1985 as "National School Library Month," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 52

Whereas school libraries serve a critical function in American education and provide an information center for students at all levels of study;

Whereas elementary and secondary school libraries provide young people with their first exposure to books, and can instill a lifelong love of reading;

Whereas university and college libraries are the cornerstone of scholarly research, and house information and resources to be used for the improvement of all society;

Whereas school libraries at all educational levels provide a full range of media resources, including audio-visual aids, computers, works of art, and materials for the blind and handicapped;

Whereas school libraries, with their extensive collections, serve as an important link in interdisciplinary education;

Whereas school libraries rely on the dedication and talents of well-trained, well-read librarians and other support staff;

Whereas school libraries should be encouraged and assisted in efforts to expand and diversify collections to meet the changing needs of patrons; and

Whereas the special role school libraries play relative to American libraries in general and in American society warrants special recognition; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of April 1985 is designated "National School Library Month" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate programs, ceremonies, and activities.

NATIONAL DES AWARENESS WEEK

The joint resolution (S.J. Res. 63) to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week," was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 63

Whereas Diethylstibestrol (DES), a powerful synthetic hormone was given to over three million pregnant women in the United States from 1941 to 1971 for the purpose of reducing miscarriages, despite reports as early as the 1950's that the drug was ineffective;

Whereas it is estimated that over three million "DES daughters and sons" were also exposed in utero;

Whereas mothers who have been exposed to DES have been demonstrated to have a higher incidence of breast cancer with that risk becoming increasingly more pronounced with age;

Whereas approximately one out of one-thousand DES daughters will develop a rare cancer of the cervix and vagina known as Clear-Cell Adenocarcinoma;

Whereas these cancer victims are subject to hysterectomies, vaginectomies and lymphotomies with a 25 percent possibility of death as a result of such exposure;

Whereas a second type of cervical and vaginal cancer known as cervical dysplasia (precancerous) and carcinoma in situ (CIS) has been shown to have a higher incidence in DES daughters affecting more than eighty-thousand women with at least five-thousand developing the actual cancer;

Whereas problems with pregnancies have been reported to affect a large proportion of DES daughters including ectopic pregnancies, miscarriages, infertility and premature deliveries;

Whereas DES sons have shown a higher incidence of maldescent of the tests, a known risk factor for testicular cancer; and

Whereas identification, appropriate evaluation, and treatment of individuals exposed to DES is dependent upon a greater public awareness: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of April 21, 1985, through April 27, 1985, is designated as "National DES Awareness Week" and the President is requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate activities.

MENTAL ILLNESS AWARENESS WEEK

The joint resolution (S.J. Res. 67) to designate the week of October 6, 1985, through October 12, 1985, as "Mental Illness Awareness Week," was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 67

Whereas mental illness is a problem of grave concern and consequence in American society, though one widely but unnecessarily feared and misunderstood;

Whereas thirty-one to forty-one million Americans annually suffer from clearly diagnosable mental disorders involving significant disability with respect to employment, attendance at school, or independent living;

Whereas alcohol, drug, and mental disorders affect almost 19 per centum of American adults in any six-month period;

51-059 O-86-27 (Pt. 6)

Whereas mental illness in at least twelve million children interferes with vital developmental and maturational processes;

Whereas mental disorder-related deaths are estimated to be thirty-three thousand with combined suicide accounting for at least twenty-nine thousand, although the real number is thought to be at least three times higher;

Whereas our growing population of the elderly is particularly vulnerable to mental illness;

Whereas mental disorders result in staggering costs to society, totaling an estimated $87,000,000,000 in direct treatment and support, and indirect costs to society, including lost productivity;

Whereas mental illness is increasingly a treatable disability with excellent prospects for amelioration and recovery when properly recognized;

Whereas in recent years there have been unprecedented major research developments bringing new methods and technology to the sophisticated and objective study of the functioning of the brain and its linkages to both normal and abnormal behavior;

Whereas research in recent decades has led to a wide array of new and more effective modalities of treatment (pharmacological, behavioral, psychosocial) for some of the most incapacitating forms of mental illness (including schizophrenia, major effective disorders, phobias, and panic disorders);

Whereas appropriate treatment of mental illness has been demonstrated to be cost effective in terms of restored productivity, reduced utilization of other health services, and lessened social dependence; and

Whereas recent and unparalleled growth in scientific knowledge about mental illness has generated the current emergence of a new threshold of opportunity for future research advances and fruitful application to specific clinical problems: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on October 6, 1985, is hereby designated as "Mental Illness Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

SEVENTY-FIFTH ANNIVERSARY OF THE BOY SCOUTS OF AMERICA

The joint resolution (S.J. Res. 90) commemorating the 75th anniversary of the Boy Scouts of America was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 90

Whereas the Boy Scouts of America is our Nation's largest organization for young people and has served our Nation's youth since the founding of the organization in 1910;

Whereas more than seventy million people have benefited from membership in this highly regarded youth organization, and millions more have benefited from the service, inspiration, and leadership provided by the Boy Scouts;

Whereas Scouting builds character and fitness, teaches good citizenship skills, and provides leadership development opportunities for all young people regardless of their race, religion, or socio-economic background;

Whereas the Boy Scouts encourage conservation of natural resources through environmental awareness;

Whereas the Boy Scouts has remained true to its original values and purposes as outlined in its Federal charter, while also demonstrating its ability to be innovative;

Whereas the Scout Oath, Scout Law, Scout Slogan, and Scout Motto, which express the essential principles of Scouting, are the same now as they were in 1910;

Whereas Scouting is supported by religious, civic, educational, fraternal, and community organizations, and is encouraged by the continued commitment of such organizations to its values, ideals, and traditions;

Whereas the Boy Scouts of America is moving into the future with even greater emphasis on personal ethics, values, and the importance of the family;

Whereas many Members of Congress have participated in the Boy Scouts, including some who have become Eagle Scouts; and

Whereas the seventy-fifth anniversary of the founding of the Boy Scouts of America provides an opportunity to recognize the contribution of the organization to the improvement of our Nation's youth and to congratulate and commend the volunteer adult leaders who make the Boy Scouts possible: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the year 1985 is designated as the "Seventy-fifth Anniversary of the Boy Scouts of America", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such year with appropriate ceremonies and activities.

NATIONAL DIGESTIVE DISEASES AWARENESS WEEK

The joint resolution (S.J. Res. 94) to designate the week beginning May 12, 1985, as "National Digestive Diseases Awareness Week," was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 94

Whereas digestive diseases represent one of the most serious health problems of the Nation in terms of human discomfort and pain, mortality, personal expenditures for treatment, and working hours lost;

Whereas digestive diseases rank among other forms of illness as the third largest burden on the economy of the Nation;

Whereas 20,000,000 Americans suffer from chronic digestive diseases and disorders, and more than 14,000,000 cases of acute digestive diseases are treated in the Nation each year;

Whereas digestive diseases account for one-third of all malignant growths and for some of the most common acute infections;

Whereas more Americans are hospitalized with digestive diseases than with any other form of illness;

Whereas digestive diseases account for 25 percent of all surgical operations and comprise one of the most common causes of disability in the working force;

Whereas digestive diseases represent more than $17,000,000,000 annually in direct health care costs and represent a total economic burden of almost $50,000,000,000 annually;

Whereas more than 200 deaths annually are caused by each of at least 100 different diseases and disorders of the gastrointestinal tract;

Whereas the people of the Nation should be concerned with research into the causes, cures, prevention, and clinical treatment of digestive diseases and related nutrition problems and should recognize prevention and treatment of digestive diseases as a major health priority;

Whereas national lay and professional digestive diseases organizations, individually and through the Coalition of Digestive Diseases Organizations and the Federation of Digestive Diseases Societies, are committed to promoting awareness and understanding, among members of the general public and the health care community, of digestive tract disorders;

Whereas the National Digestive Diseases Advisory Board, and the National Institutes of Health through its National Digestive Diseases Education and Information Clearinghouse, are committed to encourage and coordinate these educational efforts;

Whereas the National Digestive Diseases Education Program is a coordinated effort to educate the public and the health care community as to the seriousness of digestive diseases and to provide information on treatment, prevention, and control; and

Whereas the 2nd anniversary of the National Digestive Diseases Education Program occurs during the week beginning May 12, 1985: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning May 12, 1985, hereby is designated "National Digestive Diseases Awareness Week", and the President of the United States is authorized and requested to issue a proclamation calling upon all public officials and the people of the United States to observe such week with appropriate programs and activities.

PRINTING OF THE REPORT ENTITLED "DEVELOPMENTS IN AGING: 1984"

The resolution (S. Res. 30) to authorize the printing for committee use of the report entitled "Developments in Aging: 1984" was considered, and agreed to, as follows:

S. RES. 30

Resolved, That there shall be printed for the use of the Special Committee on Aging the maximum number of copies of volume 1 of its annual report to the Senate, entitled "Developments in Aging: 1984", which may be printed at a cost not to exceed $1,200.

TO PAY A GRATUITY TO MAUREEN S. McROY

The resolution (S. Res. 117) to pay a gratuity to Maureen S. McRoy was considered, and agreed to, as follows:

S. RES. 117

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Maureen S. McRoy, widow of

Robert T. McRoy, an employee of the Senate at the time of his death, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO VICTOR, NATALI, LENA BARDELLI, MAFALDA REVETTA, AMERICO NATALI, EDITH SERRA, ELMO NATALI, AND ELSIE DelMASTRO

The resolution (S. Res. 118) to pay a gratuity to Victor Natali, Lena Bardelli, Mafalda Revetta, Americo Natali, Edith Serra, Elmo Natali, and Elsie DelMastro, was considered, and agreed to, as follows:

S. RES. 118

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Victor Natali; Americo Natali; Elmo Natali, brothers of Lewis A. Natali and Lena Bardelli; Mafalda Revetta; Edith Serra; Elsie DelMastro, sisters of Lewis A. Natali, an employee of the Senate at the time of his death, a sum to each equal to one-seventh of one years' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO RAY K. LARKIN

The resolution (S. Res. 119) to pay a gratuity to Ray K. Larkin was considered, and agreed to, as follows:

S. RES. 119

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Ray K. Larkin, widower of Virginia L. Larkin, and employee of the Senate at the time of her death, a sum equal to nine months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO ANDRE WHITNEY

The resolution (S. Res. 120) to pay a gratuity to Andre Whitney was considered, and agreed to, as follows:

S. RES. 120

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Andre Whitney, widower of Maxine M. Whitney, an employee of the Senate at the time of her death, a sum equal to six months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO BONITA B. BASS

The resolution (S. Res. 121) to pay a gratuity to Bonita B. Bass was considered, and agreed to, as follows:

S. RES. 121

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Bonita B. Bass, widow of Charles G. Bass, an employee of the Senate at the time of his death, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO AQUILLA H. ROSS

The resolution (S. Res. 122) to pay a gratuity to Aquilla H. Ross was considered, and agreed to, as follows:

S. RES. 122

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Aquilla H. Ross, widow of Henry L. Ross, Jr., an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO ALENE J. AYERS

The resolution (S. Res. 123) to pay a gratuity to Alene J. Ayers was considered, and agreed to, as follows:

S. Res. 123

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Alene J. Ayers, widow of Bernard M. Ayers, an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GRATUITY TO ALBERT C. JOHNSON, EARL M. JOHNSON, STEPHEN LESLIE JOHNSON, CHRISTY JOHNSON MAGUSCHAK, PAULA JOHNSON MICHALEK

The resolution (S. Res. 124) to pay a gratuity to Albert C. Johnson, Earl M. Johnson, Stephen Leslie Johnson, Christy Johnson Maguschak, and Paula Johnson Michalek was considered, and agreed to; as follows:

S. RES. 124

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Albert C. Johnson and Earl M. Johnson, sons of Helen O. Kane, an employee of the Architect of the Capitol assigned to duty on the Senate side at the time of her death, a sum to each equal to one-third of six months' compensation at the rate she was receiving by law at the time of her death, and to Stephen Leslie Johnson, Christy Johnson Maguschak and Paula Johnson Michalek, grandchildren of Helen O. Kane, a sum to each equal one-ninth of six months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

GEORGE MILLIGAN CONTROL TOWER

The Senate proceeded to consider the bill (S. 661) entitled the "George Milligan Control Tower."

Mr. PACKWOOD. Mr. President, as the Senate considers S. 661, the George Milligan Control Tower, I wanted to provide some very brief legislative history on the measure.

I introduced S. 661 on March 14, 1985. I did so to honor the memory of George Milligan, a pilot who served the population of southern Oregon through a nonprofit air ambulance and emergency air service for many years. George was killed when his plane suffered mechanical failure and crashed on approach to the Medford airport, while transporting a patient for emergency medical service.

S. 661 was referred to the Committee on Commerce, Science and Transportation. On April 2, 1985, the committee voted unanimously to report the measure, without amendment. On April 10, 1985, the bill was reported by the committee's chairman, Mr. DANFORTH. Because of the noncontroversial and straightforward nature of the measure, it was deemed unnecessary to file the bill with a written report.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 661

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the air traffic control tower at the Medford-Jackson County Airport is designated and shall hereafter be known as the "George Milligan Control Tower". Any reference in a law, map, regulation, document, or other paper of the United States to such control tower shall be held and considered to refer to the "George Milligan Control Tower".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the measures were passed or agreed to.

Mr. BYRD. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

SUPERFUND IMPROVEMENT ACT OF 1985

Mr. DOLE. Mr. President, I ask unanimous consent that S. 51, the Superfund Improvement Act of 1985, as reported from the Committee on Environment and Public Works, be sequentially referred to the Committee on Finance for the purpose of considering title II of the bill and any provisions relating to revenues for the hazardous substance response fund.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. DOLE. Mr. President, I ask unanimous consent the Senate go into executive session to consider nominations on the Executive Calendar.

Mr. BYRD. Mr. President, will the distinguished majority leader indicate before he puts that request what items thereon he would like to pass?

Mr. DOLE. Yes. Calendar Order No. 56 and Calendar Order No. 87, Calendar Order No. 101 through 106, and all nominations placed on the Secretary's Desk.

Mr. BYRD. Mr. President, on this side, I have no objection to proceeding as the distinguished majority leader has outlined, with the exception of Calendar No. 106 on page 3. I hope that could be excepted for the time being.

Mr. DOLE. Mr. President, I revise my request for unanimous consent to go into executive session to consider the following nominations on the executive calendar: Calendar Nos. 56, 87, 101, 102, 103, 104, 105, and all nominations placed on the Secretary's desk.

Mr. BYRD. Mr. President, I thank the distinguished majority leader. I remove my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the nominations referred to be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

INTER-AMERICAN FOUNDATION

Lynda Anne Barness, of Pennsylvania, to be a member of the board of directors of the Inter-American Foundation for a term expiring October 6, 1990.

THE JUDICIARY

R. Allan Edgar, of Tennessee, to be U.S. district judge for the eastern district of Tennessee.

[NEW REPORTS]

IN THE AIR FORCE

The following-named officer under the provisions of Title 10, United States Code, Section 601, to be assigned to a position of importance and responsibility designated by the President under Title 10, United States Code, Section 601:

To be lieutenant general

Maj. Gen. Alfred G. Hansen, xxx-xx-... FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of Title 10, United States Code, Section 1370:

To be lieutenant general

Lt. Gen. Walter F. Ulmer, Jr., xxx-xx-... (Age 55), United States Army.

The following-named officer under the provisions of Title 10, United States Code, Section 601, to be assigned to a position of importance and responsibility designated by the President under Title 10, United States Code, Section 601:

To be lieutenant general

Maj. Gen. Crosbie E. Saint, xxx-xx-xxxx, United States Army.

IN THE NAVY

The following-named officer to be placed on retired list in the grade indicated under the provisions of Title 10, United States Code, Section 1370.

To be admiral

Adm. Steven A. White, xxx-xx-xxxx/1120, United States Navy.

The following named officer, under the provisions of Title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under Title 10, United States Code, section 601:

To be vice admiral

Rear Adm. George W. Davis, Jr., xxx-xx-.../1110, U.S. Navy.

The following named officer, under the provisions of Title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under Title 10, United States Code, section 601:

To be vice admiral

Rear Adm. James E. Service, xxx-xx-xxxx/1310, U.S. Navy.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, MARINE CORPS, NAVY

Air Force nominations beginning Donald D. Fate, and ending Forrest C. Yancey, Jr., which nominations were received by the Senate on March 29, 1985, and appeared in the CONGRESSIONAL RECORD of April 1, 1985.

Air Force nominations beginning Raymond L. Brewer, and ending Paul E. Wright, which nominations were received by the Senate on March 29, 1985, and appeared in the CONGRESSIONAL RECORD of April 1, 1985.

Army nomination of Colonel Pierce A. Rushton, Jr., which was received by the Senate on March 29, 1985, and appeared in the CONGRESSIONAL RECORD of March 28, 1985.

Army nominations beginning Ricardo Alba, and ending Robert T. Anderson, which nominations were received by the Senate on March 29, 1985, and appeared in the CONGRESSIONAL RECORD of April 1, 1985.

Army nominations beginning Harald K. Abbenhaus, and ending Randal J. Zimmerman, which nominations were received by the Senate on March 29, 1985, and appeared in the CONGRESSIONAL RECORD of April 1, 1985.

Marine Corps nominations beginning Mark D. Abelson, and ending Ronald A. Zaleski, which nominations were received by the Senate on April 1, 1985, and appeared in the CONGRESSIONAL RECORD of April 2, 1985.

Navy nominations beginning James L. Abbot, III, and ending Marshall Pope Waters, III, which nominations were received by the Senate on April 1, 1985, and appeared in the CONGRESSIONAL RECORD of April 2, 1985.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now resume the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

CRIME VICTIMS WEEK

Mr. DOLE. Mr. President, I send to the desk a joint resolution on behalf of Senator THURMOND, and I ask for its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 109) to designate the week of April 14, 1985, as "Crime Victims Week."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution, which was introduced by Mr. THURMOND, for himself and Mr. BIDEN, Mr. LAXALT, Mr. HEINZ, Mr. GRASSLEY, Mr. DENTON, Mr. SPECTER, Mr. ABDNOR, Mr. KENNEDY, Mr. BAUCUS, Mr. HAWKINS, Mr. COCHRAN, Mr. BURDICK, Mr. ZORINSKY, Mr. HATCH, Mr. HEFLIN, Mr. WARNER, Mr. KERRY, Mr. BOSCHWITZ, Mr. MCCLURE, Mr. NUNN, Mr. PRYOR, Mr. HUMPHREY, Mr. INOUYE, Mr. WILSON, Mr. LEVIN, Mr. SASSER, Mr. STEVENS, Mr. SYMMS, Mr. JOHNSTON, Mr. MATSUNAGA, Mr. MATHIAS, Mr. DECONCINI, Mr. METZENBAUM, Mr. MCCONNELL, Mr. LAUTENBERG, Mr. BOREN, Mr. EAST, and Mr. TRIBLE.

Mr. THURMOND. Mr. President, I am pleased to introduce today legislation which would designate the week of April 14, 1985, as "Crime Victims Week."

In recent years, a national movement has developed to address the plight of crime victims in this country. The crime rate is intolerably high. In its wake, it leaves millions of victims, who have suffered emotional and physical injury, financial loss, strains on their families, and disruption of their lives. All too frequently, our criminal justice system focuses on the rights of the accused, to the exclusion of the needs of the victims. The national victims movement has been an effort to provide more compassionate and just treatment for victims of crime. Although there has been considerable success in this area, particularly in many State and local jurisidictions because of the assistance of devoted volunteers groups, much remains to be done.

On the Federal level, both the Congress and the executive branch have taken steps to assist crime victims. The Victim and Witness Protection Act of 1982 authorized Federal courts to order restitution to crime victims and mandated the establishment of Federal Guidelines for the Fair Treatment of Crime Victims, which are currently being implemented. The Victims of Crime Act of 1984, Chapter XIV of the Comprehensive Crime Control Act, created a Victims Compensation Fund in the U.S. Treasury, comprised primarily of criminal fine payments, to finance aid to the States for victims compensation and assistance programs. The President appointed a Task Force on Victims of Crime and the Department of Justice has established an Office for Victims of Crime.

I am hopeful that Crime Victims Week will serve as an opportunity for Federal, State, and local government officials, representatives in the private sector, and the general public to focus their attention on the problems of crime victims and possible solutions to those problems. I urge my colleagues to support this measure and to join in activities which will further the cause of crime victims.

The joint resolution was agreed to.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 109

Whereas crime often inflicts considerable physical and emotional pain and financial hardship upon its victims, disrupting their lives, and placing great strains upon their families;

Whereas our criminal justice system has often failed to provide the victims of crime with the compassionate treatment they deserve;

Whereas it is the fundamental obligation of government to protect its citizens from the criminal element;

Whereas there is a national movement in support of more just and compassionate treatment of victims of crime;

Whereas the establishment of the President's Task Force on Victims of Crime and an Office for Victims of Crime in the Department of Justice, and enactment of the Victim and Witness Protection Act of 1982 and the Victims of Crime Act of 1984 evidence the Federal government's increased awareness of the plight of crime victims; and

Whereas further efforts are needed, at all levels of government and in the private sector, to help ease the trauma suffered by crime victims: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating April 14 through April 20, 1985, as "Crime Victims Week" and calling upon the people of the United States, State and local government agencies, and interested organizations to observe that week with appropriate ceremonies, activities, and programs.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY FOR SENATE LEGAL COUNSEL TO REPRESENT MAX BARBER

Mr. DOLE. Mr. President, I send to the desk a resolution, on behalf of Senator BYRD and myself, relating to the authority of the Senate legal counsel and testimony by a Senate employee, and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read as follows:

A resolution (S. Res. 133) to direct the Senate Legal Counsel to represent Max Barber in *The Christian Broadcasting Network, Inc.* v. *Carol Ann Kadushin, d/b/a/ Capital Broadcast News,* Civil Action No. 84-1821.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, this resolution would direct the Senate legal counsel to provide representation for Max Barber, superintendent of the Senate Radio and Television Gallery, in response to a subpoena from the defendant in the case of the Christian Broadcasting Network, Inc. versus Carol Ann Kadushin, d/b/a Capital Broadcast News. This case is pending in the U.S. District Court for the District of Columbia and concerns claims over the use of the trademark CBN, which are the initials of both the plaintiff and defendant organizations. The subpoena seeks both documents and testimony concerning the utilization of this mark in the accreditation of the two organizations by the Senate Radio and Television Gallery. The resolution authorizes Mr. Barber to testify and produce the documents in response to the subpoena and directs the Senate legal counsel to represent him and to assert any Senate privileges.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 133

Whereas, the case of *The Christian Broadcasting Network, Inc.* v. *Carol Ann Kadushin, d/b/a Capital Broadcast News,* Civil Action No. 84-1821, is pending in the United States District Court for the District of Columbia;

Whereas defendent has served a trial subpoena for testimony and documents on Max Barber, Superintendent of the Senate Radio and Television Gallery;

Whereas, pursuant to section 703(a) and 704(a) of the Ethics in Government Act of 1978, 2 U.S.C. 288(a) and 288c(a)(1982), the Senate may direct its counsel to represent members and employees of the Senate in civil actions relating to their official responsibilities;

Whereas by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of an employee of the Senate is needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistently with the privileges and rights of the Senate: Now therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Max Barber in the case of *The Christian Broadcasting Network, Inc.* v. *Carol Ann Kadushin, d/b/a Capital Broadcast News.*

SEC. 2. That Max Barber is authorized to testify and to produce subpoenaed documents in the case of *The Christian Broadcasting Network, Inc.* v. *Carol Ann Kadushin, d/b/a Capital Broadcast News* except concerning matters that the Senate Legal Counsel or his representative determine are privileged from disclosure.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ACTION ON HOUSE JOINT RESOLUTION 188 VITIATED

Mr. DOLE. Mr. President, I ask unanimous consent that action taken on House Joint Resolution 188 be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 5 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the RECORD remain open until 5 p.m. today, for the introduction of bills, resolutions, and submission of statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—NOMINATION OF JOHN E. KRINGS

Mr. DOLE. Mr. President, as in executive session, I ask unanimous consent that at 2 p.m. on Tuesday, April 16, the Senate go into executive session to consider the nomination of John E. Krings to be director of Operational Test and Evaluation, Department of Defense and that it be considered under the following time agreement:

Four hours on the nomination, to be equally divided between the chairman of the Armed Services Committee and the ranking minority member, or their designees; that no motions, appeals, or points of order be in order; and that the agreement be in the usual form.

I further ask unanimous consent that following the conclusion or yielding back of time, the Senate proceed immediately to vote on the confirmation of the nomination of Mr. Krings.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that it be in order now to order the yeas and nays on the nomination of John E. Krings.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 11 a.m. on Tuesday, April 16, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order on tomorrow there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD OF TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that following the Proxmire special order there be a period for the transaction of routine morning business not to extend beyond the hour of 12 noon with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS BETWEEN 12 NOON AND 2 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate stand in recess between the hours of 12 noon and 2 p.m. on Tuesday, April 16, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, at 2 p.m. tomorrow by unanimous consent the Senate will go into executive session to consider the nomination of John E. Krings to be the Director of Operational Test and Evaluation, Department of Defense, under a 4-hour time limitation. A rollcall vote will occur on the confirmation of Mr. Krings.

Also during the tomorrow session the Senate could turn to any other Legislative or Executive Calendar items cleared for action.

RECESS UNTIL TOMORROW AT 11 A.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess, in accordance with the previous order, until 11 a.m. on Tuesday, April 16, 1985.

The motion was agreed to; and at 3:16 p.m., the Senate recessed until Tuesday, April 16, 1985, at 11 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate April 5, 1985, under authority of the order of the Senate of January 3, 1985:

DEPARTMENT OF STATE

Sheldon J. Krys, of Maryland, a career member of the Senior Foreign Service, class of minister-counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Trinidad and Tobago.

DEPARTMENT OF JUSTICE

John C. Lawn, of Virginia, to be Administrator of Drug Enforcement, vice Francis M. Mullen, Jr., resigned.

THE JUDICIARY

John P. Moore, of Colorado, to be U.S. circuit judge for the 10th circuit, vice Robert H. McWilliams, Jr., retired.

Stanley Sporkin, of Maryland, to be U.S. district judge for the District of Columbia, vice June L. Green, retired.

DEPARTMENT OF JUSTICE

Herbert M. Rutherford III, of Virginia, to be U.S. Marshal for the District of Columbia for the term of 4 years, vice James O. Golden.

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

Edward A. Curran, of Maryland, to be Chairman of the National Endowment for the Humanities for a term of 4 years, vice William J. Bennett.

IN THE AIR FORCE

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard K. Saxer, [redacted] FR, U.S. Air Force.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 15, 1985:

INTER-AMERICAN FOUNDATION

Lynda Anne Barness, of Pennsylvania, to be a Member of the Board of Directors of the Inter-American Foundation for a term expiring October 6, 1990.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

R. Allan Edgar, of Tennessee, to be U.S. district judge for the eastern district of Tennessee.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Alfred G. Hansen, [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Walter F. Ulmer, Jr., [redacted], (age 55), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Crosbie E. Saint, [redacted], U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be admiral

Adm. Steven A. White, [redacted]/1120, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. George W. Davis, Jr., [redacted]/1110. U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. James E. Service, [redacted] 1310, U.S. Navy.

IN THE AIR FORCE

Air Force nominations beginning Donald D. Fate, and ending Forrest C. Yancey, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 1, 1985.

Air Force nominations beginning Raymond L. Brewer, and ending Paul E. Wright, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 1, 1985.

IN THE ARMY

The following-named officers for appointment as Director of Admissions, U.S. Military Academy, in accordance with the appropriate provisions of title 10, United States Code, section 4333:

To be Director of Admissions, U.S. Military Academy

Col. Pierce A. Rushton, Jr., [redacted]

Army nominations beginning Ricardo Alba, and ending Robert T. Anderson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 1, 1985.

Army nominations beginning Harald K. Abbenhaus, and ending Randal J. Zimmerman, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 1, 1985.

IN THE MARINE CORPS

Marine Corps nominations beginning Mark D. Abelson, and ending Ronald A. Zaleski, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 2, 1985.

IN THE NAVY

Navy nominations beginning James L. Abbot III, and ending Marshall Pope Waters III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 2, 1985.

EXTENSION OF REMARKS

HEALTH RESEARCH GRANT REDUCTIONS: MISPLACED PRIORITIES

HON. DOUG WALGREN
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. WALGREN. Mr. Speaker, the Office of Management and Budget is now blatantly and indefensibly circumventing the intent of Congress in directing the National Institutes of Health to award only 5,000 research grants, instead of 6,500 as funded by Congress. I am an original cosponsor of House Joint Resolution 136 which would require the administration to comply with the law, as passed by the Congress and signed by the President, and award all 6,500 grants in fiscal 1985.

There was no ambiguity whatsoever in the law passed by the Congress last year. When we considered the fiscal 1985 appropriations for NIH, both the House and Senate provided the funds for 6,500 grants. Their intent was spelled out in report language accompanying the bill as it was signed by the President.

This long overdue increase in support for health research was designed to improve our chances for finding cures to diseases like cancer, diabetes, heart disease, and others that cause so much personal pain and suffering—and ultimately cost us tremendously in lost dollars of productivity and medical treatment.

Congress knew what it was doing then when it authorized and appropriated these sums—and so did the President when he signed the legislation shortly before the election last fall.

Now we find the White House, through its own version of "creative budgeting," disowning the President's own signature in an effort to arbitrarily reduce the number of these research grants to 5,000.

Administration efforts to justify their actions as a dollar-saving measure make no sense when you consider that this Nation's entire health research budget—$5 billion—is less than the increase they seek in military research this year—an increase of $8 billion to a record $39 billion for Pentagon research.

The administration's arbitrary reduction of research grants is not just a question of dollars. Over the past few weeks I have heard from 107 doctors, researchers, and scientists from the Pittsburgh area outlining the consequences of loss of funding for vital research projects. The University of Pittsburgh School of Medicine has 87 scientists whose work is supported by NIH grants. Carnegie-Mellon University has 60 active NIH grants, most of which involve biological sciences. All of this work is put in jeopardy by this major cut in medical research. Pittsburgh's Children's Hospital—an institution which has earned a worldwide reputation for life-saving organ transplants—will also be affected.

Because of OMB's action, an important research effort to understand the cause of middle-ear infection in children is threatened. Ear infections are the most common problem treated by health care professionals who care for children in this country. As any parent of small children can attest, the pain and suffering caused by earaches is extreme.

The insertion of plastic tubes into eardrums, and related medical treatment now costs approximately $2 billion each year, involving 30 million outpatient visits. The work at Children's Hospital could ultimately save us millions of dollars. But not if OMB has anything to say about it.

Although the NIH reviewing team enthusiastically recommended continued funding for this research at Children's Hospital, OMB's action will cut 83 percent of the funds beginning September 1.

Currently only one-third of the research proposals that are recommended by reviewing scientists are funded. Two out of every three research proposals go unfunded and their promise is lost.

OMB argues that we have had too many "hills and valleys" in health research funding in recent years and that we must stabilize funding. In my view, this is a simple misrepresentation to cover the fact that, in their world, they place little priority on public funding for medical research. I can find no valleys in funding except one, and that valley was dug by OMB in preventing the award of these grants.

OMB may not value health research, but I believe the people do. As a member of the House Health Subcommittee, I will do all I can to see that OMB's action is reversed. When only one-third of approved health research proposals are funded and the administration can find enough money to buy $600 toilet seats for the Pentagon, I simply do not understand why we cannot give adequate support to one of the Federal Government's most important missions.●

DEATH PENALTY FOR SERIOUS DRUG OFFENSES

HON. ELDON RUDD
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. RUDD. Mr. Speaker, I have asked for this time today to discuss legislation I recently introduced to provide for the imposition of the death penalty for those convicted of serious drug offenses.

A little over a month ago, on the weekend of March 3 here in our Nation's Capital, we witnessed a shocking outbreak of nine fatal overdoses across the city all caused by either a highly potent or contaminated batch of heroin. The drug dealer who supplied that heroin is as guilty of murder as if he had taken a gun to each of the victim's heads. Indeed, detectives in the District said that if a single source of the heroin could be found, they would try to charge those responsible with homicide.

But despite the tough attitude and beefed-up efforts of police in the District of Columbia, the death rate from overdoses keeps right on climbing. In 1980, there were 82; by the end of fiscal year 1984, there were 185 heroin overdose deaths in the Washington area. D.C. police officers are seizing heroin of 7 percent purity today, compared to an average of 1.8 percent purity in 1978.

Those who produce and push these dangerous drugs are not experts, chemists, or doctors, and are obviously not concerned with the safety of their products. They are looking only to turn a quick profit regardless of all the death and illness they cause, and all of the families they tear apart.

Though this frightening incident took place in the Nation's Capital, the drug problem is by no means unique to the Washington area. It is a problem across the Nation. About 12,500 heroin- and morphine-related hospital emergencies were reported across the country in 1983, including about 600 deaths.

Every year, drug traffickers smuggle into the United States as much as 4.4 U.S. tons of heroin, 77 tons of cocaine, and 16,530 tons of marijuana. But, despite our best efforts, we have been able to intercept only a small portion of these illegal drug imports. In 1983, the quantity of combined seizures of marijuana amounted to only about 13.4 U.S. tons of the estimated 15,000

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

tons demanded in the country that year.

According to Government estimates, some 25 million Americans have tried cocaine, and 5 to 10 million use it at least once a month. Dr. Arnold Washton, cofounder of a national cocaine hotline, has suggested that even those estimates are quite low and that another 5,000 Americans try cocaine for the first time every day.

This use has had its devastating impact. Cocaine-related hospital emergencies reached almost 6,900 in 1983; during the year, there were 280 cocaine-related deaths.

Some 5,500 marijuana-related hospital emergencies occurred in 1983.

All this death and destruction caused by the illegal drug trade requires that the strictest penalties be imposed. Last year, in the Comprehensive Crime Control Act, we increased maximum fines for the most serious drug offenses from $25,000 to $125,000 for individuals. For trafficking in large quantities of illegal drugs, we set the maximum fine at $250,000 and a maximum prison term at 20 years, up from the current 15. We increased first-offense penalties for illegally distributing or making certain drugs from a maximum of 5 to 15 years.

Heavier fines and penalties were clearly in order. Almost half of all defendants convicted were sentenced to 5 years or less through December 31, 1984. Another 20 percent of those convicted were not sentenced to prison at all, but were granted parole or given suspended sentences.

The heavier penalties in last year's legislation were a step in the right direction, but for repeat offenders and the kingpins behind these operations, the death penalty ought to be imposed.

With profits running into the billions of dollars, dangerous drug dealers put little value on human life, whether the life of the addict whom he is killing quietly or the law enforcement official whom he is out to kill with a vengeance.

Drug Enforcement Administration [DEA] Agent Enrique Camarena Salazar was tortured and brutally murdered by drug traffickers in Mexico bent on revenge. Camarena Salazar had taken part in an investigation which had already resulted in the seizure of 3,600 pounds of cocaine and $20 million.

Drug lords in Colombia have vowed to kill leaders of that country, from the President on down. We have heard the reports that they have offered $350,000 to anyone who will kidnap U.S. drug enforcement officials and deliver them, dead or alive.

In Bolivia, intelligence agents discovered that Colombian and Bolivian cocaine traffickers had paid a gunman $500,000 to murder U.S. Ambassador Edwin Corr. Fortunately the Ambassador is still safe, but must carefully vary his routine daily.

In Peru, 19 crop eradication workers were murdered on the orders of a local drug czar.

They murder, they conspire with Communist countries and terrorists, they put thousands in the hospitals each year and put the very security of our Nation at risk.

Drug trafficking is serious business. We can only put a dent in it if we give our law enforcement officials every tool they need to combat it. The death penalty for those who threaten the lives and health of our citizens ought to be imposed, and I hope my colleagues will join me in supporting legislation to this end.●

BIAGGI SPONSORS TAX AMNESTY/DEFICIT REDUCTION ACT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation which I hope will get serious consideration as we work for ways to reduce our Federal deficit—clearly, the major domestic issue in our Nation. My legislation would establish a 6-month national tax amnesty program which would provide those Americans who have failed to pay their Federal tax obligations an opportunity to do so without being assessed any civil or criminal penalties; those persons would also be forgiven 50 percent of any interest penalty which would normally be assessed. I would point out that my bill is modeled after legislation introduced earlier this year by the distinguished Senator from Illinois [Mr. DIXON.]

The Treasury Department estimates that for the tax year which ends today, the Government will be cheated out of between $89 and $92 billion under what is called the tax gap. This simply is the difference between what the Government is owed in taxes versus what it will actually collect from taxpayers, whether individuals or corporations. We have seen an alarming increase in the tax gap in this Nation over the past 12 years. In fact, the gap more than tripled between 1973 and 1981 when it reached $81 billion. In addition to this direct loss, the Government also stands to suffer a further loss of revenues from the estimated $250 billion in income that will go unreported by Americans this year, some of which is also taxable.

It is obvious that we must take some steps to recoup these losses. I propose as one practical approach a short-term one-time opportunity for delinquent taxpayers to come forth and pay these taxes and, in doing so, make a meaningful contribution to reducing the Federal deficit. Estimates point to the fact that such an amnesty program could reduce the Federal deficit by as much as $20 billion.

Specifically under my proposal the amnesty period would begin on or around July 1, 1985, and would continue for 6 months. During that time taxpayers could pay their delinquent taxes and be provided with amnesty for the aforementioned penalties. The amnesty would cover all tax years from 1977 to 1983—the 7-year period that is still subject to IRS collection efforts.

The amnesty proposal is not all inclusive. It bars from participation those persons who are involved with the IRS in administrative and/or judicial proceedings before the amnesty period begins, those under criminal investigation by the IRS, or those persons who make false or fraudulent representations in attempting to take advantage of the amnesty.

One additional point. The amnesty I am proposing would only apply to taxes owed on legal sources of income.

I offer this legislation in light of the successful experience which 12 States in our Nation have had in establishing their own amnesty programs. According to the Library of Congress these 12 States have collected over $345 million in new State revenues as a direct result of these tax amnesty programs. The States that have implemented tax amnesty programs are Alabama, Arizona, California, Idaho, Illinois, Kansas, Massachusetts, Minnesota, Missouri, North Dakota, Oklahoma, and Texas. One only has to assume that a tax amnesty program at the national level would also be successful in recovering a substantial portion of the $90 billion in delinquent Federal taxes.

We realize that the idea of tax amnesty, pure and simple, might concern those millions of Americans who have honored their obligation and paid their taxes in a timely fashion. However, there is much more to this bill than the amnesty provisions. Included in this bill are two other provisions offering a "carrot and stick" approach to this problem. One would increase all tax-related civil and criminal penalties, including money fines and prison sentences for future tax cheaters. The second would authorize the hiring of more than 3,000 new permanent IRS agents to improve existing enforcement of tax laws.

In my judgment this is the time to propose a tax amnesty program. A recent nationwide IRS survey on taxpayer attitudes toward taxes found that 19 percent of the public admitted to having cheated on their taxes at some time or another by overstating deductions, understating income, or both. Of that 19 percent, approximately two-thirds said they did it once or

twice, about one-fourth did so three times or more, and the remainder said they did not remember. For those who overstated deductions, the amounts were by $100 or less. Those who did so by underreporting income did so by more than $100.

Further, the IRS reports that the compliance rate for individuals in terms of paying their full Federal tax obligations is falling by 0.2 percent a year. This can translate into hundreds of millions of dollars in lost revenues each year. In specific categories we see similar trends. For example, in 1973 more than 90 percent of all dividends were reported. By 1981 that figure had fallen to 83 percent. There has also been a 15-percent drop in capital gain taxes paid between 1973 and 1981.

The idea of tax amnesty is not unprecedented at the national level. There have been two previous examples of a limited form of amnesty tried by the Federal Government. Between the years 1919 and 1952, the then Bureau of Internal Revenue did maintain a policy of providing immunity from criminal prosecution to tax evaders who voluntarily disclosed. Then, in 1945, Treasury Secretary Morgenthau made a specific amnesty offer as it related to black marketeers. In the 18 months following this amnesty offer, $500 million of some $3 billion collected from tax evaders came from those making voluntary disclosures.

I introduce this legislation today both to coincide with the date that Americans are obligated to pay their taxes before late penalties are assessed, but also to coincide with the return of Congress from the Easter district work period and our serious work on the fiscal year 1986 budget. As all of us know, we are laboring under a record Federal deficit of somewhere near $185 billion. There are only two ways to reduce the deficit—reduce spending or increase revenue by raising taxes. It appears likely that the only route we will consider will be spending reductions. The latest budget proposal being considered would call for serious sacrifices on the part of many needy people to accommodate deficit reduction.

I offer tax amnesty as one relatively painless way to reduce the deficit through increasing revenue, but not by increasing actual tax obligations. There are few, if any, proposals being considered at the present time that can make the same claim.

I am aware of the fact that this legislation is being offered at a time when the IRS is under fire for their processing of tax returns already filed by millions of Americans. I consider this to be a most unfortunate problem which I hope will lend itself to a prompt and equitable solution.

Benjamin Franklin once observed that nothing in life was certain but death and taxes. However, with a $90 billion tax gap caused by people not paying their taxes, it appears that the certainty of taxes is anything but that for millions in this Nation. Tax amnesty can both right a wrong and help solve a larger problem facing all Americans—reducing our national deficit without raising taxes.●

LEGISLATION TO PROTECT ELDERLY RESIDENTS OF LIFE CARE HOMES

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. WALGREN. Mr. Speaker, today I have introduced a bill with the goal of providing some protection to people who put their resources—and their lives—in the hands of life care homes. My bill would direct the Federal Trade Commission to conduct a rulemaking on the life care industry that would establish some protections for those people now and in the future who choose life care homes as the way to live their retirement years.

WHAT IS LIFE CARE?

Life care, also known as continuing care, is a contractual arrangement under which a person or couple pays an entry or endowment fee and a monthly service fee in return for a place to live, health care, and other services for the duration of the individual's life. Residents receive housing, meals, services such as cleaning, recreation, and health care, including nursing home care. These services are usually provided in a single complex containing a range of living units.

Sixty percent of people retiring in the United States could probably afford life care; 73 percent of the elderly own their own home and 80 percent of these have paid off their mortgages. The average value of their homes is $46,000.

Life care residents are generally people over age 65 who have sold their own homes and have paid an entrance fee ranging from $20,000 to $120,000—the average is $40,000—and who pay monthly fees from $300 to $1,200 per individual. Today there are approximately 600 life care communities or homes and 100,000 residents. Pennsylvania, my home State, has the third largest number, following California and Florida. It is a rapidly growing industry, with $2.5 billion in revenues, according to Forbes magazine.

Life care is attractive to many people for several reasons: In the words of one elderly resident: "When you get to be our age—74 and 79—you have the feeling that something could happen at any time. Here we know we could be taken care of immediately." As the former Social Security Commissioner Robert M. Ball put it:

> In a life-care community, the fear of someday being a burden on relatives and friends, or finding oneself helpless among uncaring strangers, is effectively removed.

In essence, the guarantee of lifetime health care and comfortable living arrangements among companions is very appealing.

THE ECONOMICS OF LIFE CARE: A CASE OF GOOD AND BAD

For the individual, life care offers congregate living and shared expenses. Life care distributes the costs among residents which can be particularly economical in providing health care needs which are more expensive among the elderly. For many, life care may enable people to purchase higher quality care which they perhaps could not afford individually.

But along with the economic pluses there have been some economic minuses for elderly residents, people who have put their entire lifetime resources into the hands of life-care home operators. The April 1985 issue of Money magazine, an article entitled "The Broken Promise of Life Care Communities," lays out the problem this way:

> The personal and financial welfare of an unknown but significant number of residents of life-care communities is at risk. They face the loss of thousands of dollars. They confront a serious erosion of their sense of security. They are victims of an industry that on the surface brims with promise but in reality is deep in distress, plagued by financially unsound enterprises and sometimes beset by criminally unscrupulous operators.

POOR FINANCIAL PLANNING

What are the problems? They are a combination of unscrupulous business dealings and innocent miscalculations. Many homes have gone bankrupt from faulty planning, leaving residents high and dry. Money magazine identified 40 life-care communities that since the mid-1970's have gone bankrupt or have experienced severe financial difficulties. One analyst who follows the industry, says that of 50 financed with tax-exempt bonds since 1980, 10 percent have defaulted on their debts and another 14 percent are failing to meet occupancy rates initially projected.

Financial management problems include the failure to pay mortgage or other obligations and then using entrance fees—which residents presume are in reserves—to pay off debts; borrowing for capital expansion and improvements without the ability to repay loans; engaging in speculative investments instead of reserving funds; failing to establish reserve funds to cover services specified in contracts.

These problems have been caused in part by poor planning. Large reserves must be developed at the outset by preselling homes and monthly costs must be met with predictable revenues. Operators have also underesti-

mated inflation rates, health care needs, and life expectancies, and turnover rates. Ironically, cash shortfalls and miscalculations have clashed with increased life expectancies—and higher finances. If turnover rates are lower than anticipated, fewer infusions of cash—$50,000 entrance fees—come in.

The tragic result of this poor planning is that the resident, who has sold his or her home and put all resources into life care, has sometimes been left with virtually nothing: No cash, no refund, no equity, no home.

MISREPRESENTATION

Misrepresentation of a home's services and stability has occurred in contracts, in advertising and promotional materials. There have been many cases of vague, incomplete or highly technical contracts. People are led to think they are contracting for a certain service such as doctor's care on the premises to later learn that the doctor is only available on call. Some contracts have stated that buyers are facing no financial risk. Some contracts fail to mention that monthly fees will increase. Some contracts have implied that a portion of residents' funds are being held in reserves.

In advertising and promotional materials, companies have suggested, implied or promised outright things that just do not materialize. Sadly, some homes have misrepresented their affiliation with religious organizations, giving the impression of an affiliation with a religious organization or church, and even worse implying that the religious institution is responsible—and will be responsible, no matter what happens. Some use religious-sounding names like Christian Care or Good Neighbor Fellowship. Some homes have been vague about who exactly is legally responsible for the community's debt, implying that payment of the debt will be guaranteed by the sponsoring entity or some other party. Some homes have misrepresented how entrance fees will be used, implying they will be there for future care or emergencies. Some have misrepresented how much of the entrance fee will be refunded if a resident terminates the contract or dies. Some operators have not been upfront about monthly fees and increases in those fees over the coming years. Some residents are led to believe that increases will not exceed Social Security benefit increases, but later learned to find them higher. There have been instances of operators suggesting there is nursing home care when in reality there is no nursing home. Some have promised, for example, to paint residence every 5 years at no charge to the resident, and then failed to do so.

Many, and probably most, life-care proprietors are reputable, honest, responsible businesspeople. But some are not and some terrible mistakes have been made. Some unfortunate misunderstandings have resulted from the vagueness of contract and promotion, whether that vagueness was intentional or not. We have laws to protect the consumer from unfair and deceptive commercial acts in most transactions of our lives. In my view, we need to do more to protect these people who turn over the life's savings and all their assets in exchange for a promise of security. We have to make sure that promise is real.

One of the hardest decisions one has to make in life is how to insure that one has adequate housing and health care in old age. Most of us fear that increased longevity and increased health problems will combine—maybe conspire—to destroy our independence, leaving us alone, dependent, sick, and poor. For those able to plan for their needs of their later years, we need to guarantee that they are dealt with fairly and squarely, that they actually get what they pay for.

LIFE CARE PROTECTION LEGISLATION

The bill I am introducing today would direct the Federal Trade Commission to conduct a rulemaking on unfair and deceptive acts and practices by life-care homes. The bill does not require any particular practices nor prohibit any, but it does require the FTC to examine certain areas. The thrust of my bill is to require complete, understandable disclosure to the prospective resident of the company's financial health and services offered, so that the purchaser will have complete knowledge for deciding whether to buy a life-care contract. It does not require contracts to have any particular provisions nor prohibit any. Its goal is to give to the purchaser complete information so that the purchaser can make an informed decision, knowing all the risks and benefits involved.

The bill has several provisions. Basically, it would require the Federal Trade Commission to conduct a rulemaking addressing unfair and deceptive practices by life-care homes. The FTC is directed to consider including in a rule certain specified requirements relating to disclosure to prospective and current residents; prohibition of unfair and deceptive advertising practices; and requirements for writing contracts in clear, understandable terminology.

In the area of disclosure, the FTC would have to consider the merit of providing to prospective residents the following information: The maintenance of reserve and escrow accounts; the use of revenues derived from entrance fees for ventures not directly related to life care; an audited, annual financial statement; a development budget for the home in the planning and expansion stage; the financial obligations of a resident; the complete terms of contracts, including the home's duties; rights to terminate the contract; conditions for refunds; conditions for increasing fees; disposition of residents' funds and possessions upon death; legal actions pending against the home.

Finally, the bill directs the FTC to do a study of commercial practices in nursing homes and to report to Congress on the desirability of a rule in this area.

NURSING HOME TRANSACTIONS QUESTIONED

Several years ago a Senate committee surveyed nursing homes and found evidence of consumer fraud and abuse. That report, from the Senate Special Committee on Aging, found:

> Abuses in nursing homes have been well publicized during the last decade. . . . Most of the concern that has been generated has focused on the quality of care issues and indications of medicaid fraud. Because the government, as the purchaser of services, is so evidently defrauded by these activities, we have often lost sight of the fact that the seniors are often also defrauded. They may be conned into paying an "admission" fee to purchase a place in a medicaid facility, overcharged for specific services, defrauded out of personal maintenance funds, and forced to pay for specific services and supplies that should be included in the home's per diem rate.

There have been reported cases of inadequate cost disclosures and billing practices, misappropriation of residents' funds, arbitrary discharge policies, inadequate protection of resident property, and deceptive contract provisions.

It would be very helpful to the Congress to have more information on nursing home business transactions. The consumers themselves are exceedingly vulnerable and may in fact need more protection of their economic interests than other consumers. My bill directs the FTC to do a study of nursing home commercial practices within 6 months from enactment to report to Congress on any problems that may be occurring in nursing home transactions and to recommend the need for an FTC regulation. I understand that the FTC is now doing some work in this area. My bill would ask them to send a report to Congress by a date certain.

NEED FOR LEGISLATION

Why do we need legislation? First, there is the nature of the life-care or nursing home care transaction. This purchase does not fit into the traditional free market or health care model. Under the free market approach, in a competitive environment consumers are able to protect themselves and can choose from many products on their merits. In purchasing health care, consumers have limited choices and are not able to do comparison shopping to get the best product or service. The very reasons that lead people to seek life care and nursing home care make them among the

most vulnerable people in the marketplace. They are probably less able, and sometimes more desperate, to protect themselves.

Commendably, 11 States, including my own, have enacted consumer protection laws in this area, yet in the view of many, these State laws may not be adequate and they are laxly enforced. Proprietors also operate across State lines in interstate commerce. It would no doubt be easier for them to have a uniform standard, rather than a variety of laws. In the words of a University of Pennsylvania Law Review article in 1980:

Federal inattention to continuing care has had a neutral impact; at worst, it has actually contributed to the problems of continuing care.

FULL DISCLOSURE GOOD FOR ALL

Basically, I believe that by requiring full disclosure before a purchase will be the best insurance of good business practices. Openness is the best deterrent. Sunlight is the best disinfectant. Full disclosure is especially critical in life care, a transaction that must be unique because of the magnitude of the investment and the magnitude of the contracted promise. People give over everything in exchange for everything. The homes that have good practices will get good results—people waiting at the door. Money magazine cites several homes which have undergone actuarial reviews and have excellent reputations. They have waiting lists of applications.

The Federal Trade Commission has done some work in this area, but I believe more needs to be done. In trying to help the elderly live their "golden years" in peace and security, we can hardly do enough.

SUMMARY OF THE WALGREN LIFE CARE RESIDENTS PROTECTION BILL, APRIL 15, 1985

LIFE CARE HOME PROVISIONS

The bill would require the Federal Trade Commission to conduct a rulemaking addressing unfair and deceptive practices by life care homes. The FTC is directed to consider including in a rule certain specified requirements relating to disclosure to prospective and current residents; prohibition of unfair and deceptive advertising practices; and requirements for writing contracts in clear, understandable terminology.

In the area of disclosure, the FTC would have to consider the merit of providing to prospective residents the following information: the maintenance and operation of reserve funds, escrow accounts, trusts, and other reserves to insure the financial ability of homes to perform their contractual obligations; the interests of the life care home in other businesses which provide services to the home; the use of revenues derived from entrance fees for ventures not directly related to life care; an audited, annual financial statement certified by an independent certified public accountant; a development budget for the home in a planning and expansion stage; the financial obligations of a resident, including initial and monthly payments; the complete terms of contracts, including the home's duties; rights to terminate the contract; conditions for refunds; conditions for increasing fees; disposition of residents' funds and possessions upon death; legal actions pending against the home.

The bill would require the FTC to consider defining specific advertising practices which are unfair and deceptive.

The bill would direct the FTC to consider requiring the use of readily understandable terms in life care contracts (a "plain English" requirement).

"Life care home" is defined as "a facility or facilities occupied or planned to be occupied, by residents or prospective residents where a provider undertakes to provide living accommodations and services pursuant to a life care contract."

"Life care contract" means "a contract between a resident and a provider to provide the resident, for the duration of such resident's life, living accommodations and related services in a life care home, including nursing care services, medical services, and other health-related services, which is conditioned upon the transfer of an entrance fee to the provider and which may be further conditioned upon the payment of periodic services fees."

NURSING HOME PROVISIONS

The bill would require the Federal Trade Commission to send to Congress within six months of enactment of the bill a study of unfair and deceptive acts and practices engaged in by nursing homes, including a recommendation on the desirability of issuing trade regulations.

"Nursing home" is defined as "a residential facility that provides convalescent or chronic nursing care, or both, for persons unable to care for themselves."●

SOLIDARITY SUNDAY FOR SOVIET JEWRY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. GILMAN. Mr. Speaker, today I call upon my colleagues to join Congressman RANGEL, and myself in reaffirming congressional commitment to liberty and religious freedom by expressing their support for "Solidarity Sunday for Soviet Jewry." Today we are proud to introduce this supportive measure of the House of Representatives for this most important event.

Each year, the Coalition to Free Soviet Jewry—formerly the Greater New York Conference on Soviet Jewry—sponsors a massive rally at the United Nations in New York City. During the course of its existence, this outcry has become the preeminent gathering for expressing solidarity for Soviet Jews. In addition, this event has served as a model for communities across the country to sponsor similar supportive events on the same day.

This year the 14th Annual Solidarity Sunday will be held on May 5, 1985. More that 100,000 people are expected to gather for this occasion at Dag Hammarskjold Plaza opposite the United Nations building. In this international setting, these participants will express as one voice their message of hope and solidarity for the almost 3 million Soviet Jews who are denied their rightful freedoms.

Since 1979, the number of Jewish citizens granted emigration rights has plummeted almost 98 percent, from a peak of 51,320 to a low of 896 last year. The figures for this year are even grimmer, especially in light of new Soviet regulations making the emigration process more complicated. In addition, the Soviet government has, in the past year, stepped up its official anti-Semitism campaign by arresting Jewish Hebrew teachers and cultural activists on fabricated criminal charges.

The list of Soviet Jews who long to practice their religious and cultural beliefs in the open is mounting daily. There are currently more than 20,000 Soviet Jews who have become refusniks, among them some who have been refused emigration vizovs for 15 years. In addition, 400,000 others have begun the lengthy application process to emigrate but have not yet received final word. These people await in anguish and frustration for permission to live in a country free from religious oppression.

We in the United States, as the symbol of freedom for the rest of the world, cannot ignore the determination and courage of these people. We must take every opportunity to ally ourselves with them and to give them strength when their own wanes.

Congressman RANGEL and I hope that our colleagues will add their strength to this worthy cause by joining us as cosponsors of this measure and by urging participation in this event. In supporting this resolution for Solidarity Sunday, we will help to keep the spirit of freedom alive in the hearts and minds of Soviet Jews and at the same time send a clear signal to the Soviet Government that we will not be silent until their Jewish citizens are free.

Mr. Speaker, I insert the full text of this resolution in support of Solidarity Sunday at this point in the RECORD:

H. RES. 127

Resolution to express the sense of the House of Representatives concerning Solidarity Sunday for Soviet Jewry

Whereas, on May 5, 1985, the eighty-five constituent agencies of the Coalition to Free Soviet Jewry (formerly the Greater New York Conference on Soviet Jewry) will sponsor "Solidarity Sunday" to reaffirm the resolve to secure freedom for Soviet Jews and beleaguered people everywhere;

Whereas Americans of all faiths and from all regions of the country will join with the Coalition on that day in activities expressing the solidarity of our people with the almost three million Jews in the Soviet Union;

Whereas the right to emigrate freely and to be reunited with families abroad is being denied Soviet Jews and others, in clear violation of the Universial Declaration of Human Rights, the Helsinki Final Act of

1975 and the Final Document of the Madrid Conference, signed in 1983;

Whereas Soviet Jewish emigration has dropped alarmingly from a high of fifty-one thousand three hundred and twenty in 1979 to just eight hundred and ninety six in all of 1984;

Whereas the Government of the Soviet Union has implemented new emigration restrictions designed to make the process of obtaining a visa even more arduous;

Whereas those Soviet Jews and other persons who have applied to leave the Soviet Union have been subjected to expulsion from jobs and schools, exile from major Soviet cities and constant surveillance and harassment;

Whereas the Government of the Soviet Union is denying all its Jewish citizens even those rights and privileges accorded other recognized religions in the Soviet Union;

Whereas the Government of the Soviet Union has sharply increased its discrimination against Jewish culture and religion by arresting Hebrew teachers on false criminal charges, attacking Hebrew teaching circles as "subversive," and promoting anti-Semitic ideology under the cloak of "anti-Zionism;"

Whereas the Government of the Soviet Union will not succeed in isolating Soviet Jews from friends in the West so long as those who cherish liberty and human rights continue to speak out on behalf of beleaguered people everywhere;

Whereas the recent appointment of Mikhail Gorbachev as General Secretary of the Communist Party of the Soviet Union renews hope for a US-USSR dialogue concerning liberalization of Soviet policies regarding Soviet Jews and other minorities;

Whereas "Solidarity Sunday for Soviet Jewry" will serve as an expression of our determination to continue efforts to obtain freedom for Soviet Jewish Prisoners of Conscience, to have exit visas granted to veteran refuseniks who have sought permission to emigate for up to fifteen years, and to secure the free exercise of religious beliefs and cultural expression for all minorities: Now, therefore, be it

Resolved, That the House of Representatives supports "Solidarity Sunday for Soviet Jewry" on May 5, 1985.●

NATIONAL LEGION OF VALOR DAY

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. RUDD. Mr. Speaker, on January 3d, I introduced House Joint Resolution 41 to set aside August 4, 1985, as "National Legion of Valor Day" in honor of the distinguished men and women of the Legion of Valor. To date, 91 of my colleagues have joined me in this tribute to veterans who have received our Nation's highest decorations for valor.

It was therefore with great remorse that I learned that one of the outstanding members of the Legion of Valor, Nurse Helen Grace McClelland, passed away on December 20, 1984, at University Hospital in Columbus, OH before this legislation could be passed. She was 97.

Nurse McClelland had earned the Army's distinguished Service Cross in World War I for extraordinary heroism while under fire at British casualty clearing station No. 61 on the German front lines.

The Legion of Valor recently paid tribute to Nurse McClelland in the organization's newsletter, General Orders. I ask that this tribute be reprinted in the RECORD at this point:

[From General Orders, January-February 1985]

IN MEMORIAM: MISS HELEN GRACE MCCLELLAND, DSC, 1887-1984

Miss Helen Grace McClelland, Companion of the Legion of Valor, World War I nurse, holder of the Distinguished Service Cross, died on 20 December 1984 at University Hospital, Columbus, Ohio. She was 97.

Miss McClelland, known to many of her students as "H.G." when she was director of nursing at Philadelphia's Pennsylvania Hospital, entered war-time nursing when she went to France in 1915 for duty with the American Hospital at Neuilly, Paris. Volunteering for field service, she also served at a casualty station just behind the lines at Ypres. At the declaration of war by the United States in 1917, Miss McClelland joined Pennsylvania Base Hospital No. 10, a unit formed by her alma mater, the Pennsylvania Hospital. It was assigned to the U.S. II Army Corps, an element that also included British forces. Because of her previous experience, she was a member of a surgical team at British Casualty Clearing Station No. 61. This unit was frequently under German artillery fire and on 17 August 1917 because the target of a German aerial bombardment. For her extraordinary heroism on that occasion, Miss McClelland received the Army's Distinguished Service Cross. She was also cited in dispatches by the British and received the Royal Red Cross from His Majesty, King George V.

Miss McClelland became a member of the Legion of Valor over 50 years ago, a status held by only three other women in the history of the organization. All four, all Army nurses during World War I, received the Distinguished Service Cross for extraordinary heroism under enemy fire.

After World War I, Miss McClelland became superintendent of nurses at Protestant Hospital in Norfolk, VA but returned to her Pennsylvania Hospital in a similar position in 1926. She remained there till her retirement in 1956, with time out for helping to organize the Army's 53rd Evacuation Hospital being readied for service in the Pacific during World War II.

Upon retiring from her nursing career, Miss McClelland worked an 83-acre farm in Pennsylvania where she was able to exercise her skills as gardener, fisher, and hunter. She was known to hit a woodchuck in the eye at 75 yards with her .22 rifle.

When she was well into her 80's, Miss McClelland withdrew to her native Ohio where she maintained an active correspondence till her death on 20 December, 1984. Although burial services were private, Past National Commander Robert W. Smith, DSC, of Orrville, Ohio was invited to represent the Legion of Valor and to read her favorite poem, "In Flanders Fields", written by Lt. Col. John McCrae, Canadian Expeditionary Force doctor and poet who died in action in 1918.

The Legion of Valor has suffered a great loss with the passing of Helen Grace McClelland. We will long remember her warmth and friendship shown to us at many of our conventions and her membership on the Board of Directors.

May her Soul rest in Peace of our Lord.

Brig. Gen. ROBERT M. GAYNOR, DSC,
National Historian.●

UDAG: SOME FACTS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. GARCIA. Mr. Speaker, you would think that any Federal program that has generated 479,000 permanent jobs, as many construction jobs and retained over 120,000 jobs in economically distressed areas while generating over $500 million in new revenues with numerous spin-off opportunities would receive better treatment than it has received from the White House and the Senate Budget Committee. It seems that no matter how successful, how useful, and how economically efficient the UDAG program is, there are those who simply want to eliminate it. In an effort to show just how important the UDAG program is, I would like to include in the RECORD an article written by Robert Maffin, executive director of the National Association of Housing and Redevelopment Officials entitled "Why terminating UDAG would be a step in the wrong direction." In addition, I have included a factsheet on the UDAG program for my colleagues to consider.

WHY TERMINATING UDAG WOULD BE A STEP IN THE WRONG DIRECTION

(By Robert W. Maffin)

(Mr. Maffin is Executive Director of the National Association of Housing and Redevelopment Officials)

President Reagan's proposal to terminate the Urban Development Action Grant program in order to help reduce federal budget deficits is a step in the wrong direction that would be counterproductive and a devastating blow to the physical and economic revitalization efforts of distressed cities.

In the seven years since the program began, UDAG has awarded $3,678,184,000 to 1,084 distressed cities for 2,410 development projects that, when completed, will have generated 479,000 new permanent jobs and 467,000 construction jobs while enabling the distressed cities to retain 120,000 jobs that would otherwise have been lost. Each UDAG dollar has leveraged approximately $6 in additional investment. Projects approved to date will generate a total of $521 million a year in new property taxes and other tax revenues for distressed cities. In addition, a Reagan Administration study has found that 48 percent of all UDAG projects have produced spin-off investment activity in addition to the private investment directly leveraged by the UDAG.

For distressed cities and towns throughout the nation, UDAG is helping to make the difference between continued economic decline and physical deterioration on the one hand, and economic growth and physical revitalization on the other. The pro-

posed elimination of UDAG comes at a time when the demand for UDAG assistance for commercial, industrial and residential development in distressed cities is at an all-time high. In the most recent UDAG funding round in September, 1984, only 13.4 percent of the $949 million in UDAG grants requested by large cities were funded and only 11 percent of the $460 million requested by small cities were funded. The current annual budget for UDAG is only $440 million. Grants are awarded on a competitive basis, with the primary criterion for selection being the comparative degree of physical and economic distress among eligible cities.

Although the current level of funding for UDAG is clearly insufficient to meet the needs that exist for UDAG assistance, USAG still has a significant impact in recipient cities. At the current funding level USAG buys 50,000 new permanent jobs, 30,000 jobs for lower income persons, 100,000 construction jobs, $2 billion in private investment, and $40 million in local tax revenues each year for distressed cities and towns. More than one-third of all UDAG projects involve manufacturing and related activities, and projects often serve to soften the impact of plant closings by stimulating new job-creating activities. UDAG funds are also used to enable cities to retain existing manufacturers planning to close facilities. Since 79 percent of all UDAG industrial investment occurs in industries for which productivity exceeds twice the national average, distressed cities are helped to make the transition from declining to growth industries, thus favorably shifting their economic bases and helping them to adjust to structural changes in the economy.

The types of commercial activity supported by UDAG tend to have the kind of high employment growth necessary to help distressed cities narrow the economic gap that exists between them and both their suburbs and the rest of the nation.

With already high and increasing concentrations of the poor and minorities and with accelerating population loss, UDAG-eligible distressed cities simply do not have the capacity to deal with their economic development and physical revitalization needs without UDAG assistance. The already high local tax burdens in these cities cannot be increased further without undermining their ability to retain their existing job bases and attract new investment in job-creating enterprises.

The need UDAG has never been greater. And the termination of UDAG will not help reduce the federal deficit. The fact is the U.S. Department of Housing and Urban Development has estimated that additional federal tax payments from UDAG-project profits and employee income plus the cost savings of reduced transfer payments to the previously unemployed is $991 million a year. In terms of reducing federal deficits, termination of UDAG would be a counterproductive step in the wrong direction.

UDAG is needed. It is doing the job it was created to do in a cost-effective way. It is producing more in tax revenue and cost savings for the federal government than is spent on it each year, and it should be continued.

THE FACTS ABOUT UDAG

The Urban Development Action Grant program was created in 1977 to stimulate private investment in distressed cities and urban counties to help alleviate physical and economic deterioration.

UDAG funds are targeted to distressed cities and urban counties and are awarded on a competitive basis with the primary criterion for selection being the comparative degree of physical and economic distress as measured by the extent of growth lag and poverty and the age of housing. Other measurements of distress are considered together with factors relating to the physical and fiscal impact of the assistance proposed on the applicant city or urban county and on low- and moderate-income and minority residents.

The proposed elimination of UDAG comes at a time when demand for UDAG assistance for commercial, industrial and residential development is at a record high. In the UDAG funding round that ended on September, 1984, large cities requested $949 million in UDAG grants, of which only 13.4 percent were funded. Small cities requested $460 million, of which only 11 percent were funded. Total current annual funding for UDAG is $440 million.

UDAG requires a firm private-sector commitment to a project before any UDAG funds are awarded. A minimum of $2.50 in private-sector financing is required for each dollar of UDAG funds granted to a project. Actual experience has shown that UDAG grants leverage $6 of other investment for each UDAG dollar spent.

HUD has conservatively estimated that additional federal tax payments from UDAG-project profits and employee income and the cost savings resulting from reduced transfer payments is approximately $991 million per year. This is more than twice the annual budget of UDAG.

Each $440 million in UDAG funding generates 50,000 new permanent jobs, 30,000 jobs for lower income persons, 100,000 construction jobs, $2 billion in private investment, and $40 million in local tax revenues.

In seven years of operation, UDAG has assisted 2,401 development projects in 1,084 cities in 46 states. Each UDAG dollar has leveraged approximately $6 of other investment. Total UDAG funds awarded in this period totaled $3,678,184,000 and total investment in the projects exceeded $26 billion.

More than one-third of all UDAG projects involve manufacturing and related activity, with about one-half of the companies benefiting from UDAG funding being new to the community in which the facilities are located.

Seventy-nine percent of UDAG industrial development investment is in industries for which growth of productivity exceeds the national average, and 52 percent is in industries for which productivity growth exceeds twice the national average.

Half of all UDAG projects involve total or partial expenditures for commercial development in distressed cities.

Almost two-thirds of UDAG commercial projects include construction of retail space as a single activity or as part of a mixed-use project.

About 45 percent of UDAG commercial projects include the construction or rehabilitation of office space.

The types of commercial activity supported by UDAG tend to have high employment growth compared to the economy as a whole. Retail employment growth, for example, was 2 percent annually between 1974 and 1982 while the national average was 1.5 percent. Employment growth in industries requiring substantial office space, such as insurance and finance, grew at a compound annual rate of 3.6 percent, and employment in the hotel industry grew at 10.6 percent annually.

Already-approved UDAGs include 95,000 units of housing, evenly split between new construction and rehabilitation of existing units. A total of 37 percent of newly constructed units are for owner occupancy and sell for an average of $51,000, which is substantially below the national average.

As of August, 1984, the unemployment rate in all UDAG-eligible cities was 8.2 percent, compared to an unemployment rate of 5.5 percent in cities not eligible for UDAG and 7.4 percent in the U.S. as a whole.

Total employment growth in UDAG-eligible cities was just over half the rate for the U.S. as a whole from 1969 to 1979, and between 1980 and 1984 their employment growth was only one-third of the average for the nation as a whole.

The poverty rate in UDAG-eligible cities was over 17 percent in 1980 and increased to 19.8 percent by 1983.

In UDAG-eligible cities the percent of the population that is minority is almost twice the U.S. average (35.7 percent vs. 18.1 percent), and almost one-quarter of the households in distressed central cities are female-headed households with children.

UDAG-eligible cities already had a tax burden in 1982 that was twice that of non-eligible cities. Further increases would make it even more difficult for them to retain and attract businesses and jobs.

UDAG projects approved to date are expected to generate a total of 479,000 new permanent jobs at an average UDAG cost of $7,676 per new job.

According to a UDAG Evaluation Study conducted by the Reagan Administration in 1982, 70 percent of the jobs created by UDAGs were low- and moderate-income jobs. Just over one-fourth of the employees hired had been unemployed proviously, and just over one-fourth of the jobs were filled by minorities.

UDAGs already approved have provided 479,000 permanent jobs, 467,000 construction jobs and have enabled distressed cities to retain more than 120,000 jobs that would otherwise have been lost.

A Reagan Administration study found that 48 percent of UDAG projects produced spin-off investment activity in addition to the private investment directly generated by the UDAG.

UDAG projects approved to date are expected to generate a total of $521 million of additional property taxes and other local taxes annually.

Two-thirds of the large-city UDAG dollars have gone to the most-distressed and neediest one-third of all cities. In 1984 almost three-fourths of UDAG funds went to the neediest and most distressed cities.●

AMNESTY INTERNATIONAL INTERVENES IN NORTHERN IRELAND HUMAN RIGHTS CASE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. BIAGGI. Mr. Speaker, as chairman of the bipartisan Ad Hoc Congressional Committee for Irish Affairs, I wish to place into the RECORD a recent press release issued by Amnesty International regarding their call for

the British Government to "make public the facts on the reported torture of a man by police in Northern Ireland."

The case involves a 23-year-old man by the name of Paul Caruana who was a prisoner at the Castlereagh Police Holding Center in Belfast last August. He was arrested under the Prevention of Terrorism Act which allows police to arrest and hold someone for up to 7 days without charge merely if a person is suspected of involvement with a terrorist organization.

For many years, I have been raising the issue of human rights in Northern Ireland. I contend that excesses do exist in the enforcement of the Prevention of Terrorism Act by British security forces. Today the fact that human rights violations do exist in Ulster is no longer in issue. Respected human rights commissions have reported on abuses over the years.

It is my hope that the British Government will fully cooperate with Amnesty International and provide the necessary facts. I have also called upon the State Department to provide whatever information they have on this case.

No one will or should underestimate the complexity of the Northern Ireland question. However, if we are in pursuit of the goal of peace and justice for Ireland, then there must be a commitment to restore full human and civil rights to all in Ireland.

AMNESTY INTERNATIONAL CALLS FOR FACTS ON REPORT OF TORTURE IN NORTHERN IRELAND

Amnesty International has called on the British government to make public the facts on the reported torture of a man by police in Northern Ireland, the movement said today, Tuesday, March 26, 1985.

Amnesty International emphasized that the findings of official inquiries should not be confined to the authorities responsible for investigating the case.

The worldwide human rights movement, which carried out its own investigation and medical examination of 23-year-old Paul Caruana, said there was strong evidence to support his statement that he was systematically ill-treated during interrogation last August.

Paul Caruana said police repeatedly punched him, forced his head against his chest, pulled his legs apart and put plastic bags over his head so that he could not breathe. They threatened to abuse his wife sexually, he said. The police questioning him spit and blew their noses in his face, covering it with spittle and mucus as he lay on the floor, he said.

After his first day of interrogation, he was taken to the hospital and fitted with a cervical collar as a result of his injuries, but was then brought back and subjected to more ill-treatment, he said.

The abuse was said to have taken place at Castlereagh Police Holding Center in Belfast after he was arrested at a police checkpoint in Londonderry on August 11 under the Prevention of Terrorism Act. This allows police to arrest and hold someone for up to seven days if he or she is suspected of involvement with terrorist organizations.

The beatings started when he remained silent after police told him to "confess" Paul Caruana said.

The torture only stopped after his lawyer was allowed to see him 72 hours after his arrest, he said. He was released from custody on August 16, five days after his arrest.

Amnesty International sent a doctor to examine him a month after his release. The doctor, who is from Denmark and was accompanied by another Amnesty International delegate from the Netherlands, concluded that there was consistency between Paul Caruana's account of ill-treatment and the signs and symptoms found. Similar findings had been reached by local doctors who examined him soon after his release and who were consulted by the delegate.

Amnesty International asked the British government in December 1984 to investigate the case fully and promptly, and to say whether the interrogation had been monitored on closed-circuit television by senior officers—one of the procedures introduced in Northern Ireland in 1979 after an official inquiry into reports of ill-treatment of security suspects. Amnesty International also asked why Paul Caruana was not allowed access to his lawyer after 48 hours, as required by the regulations.

The authorities replied that an internal police investigation had been carried out and the results sent to the Director of Public Prosecutions to decide whether there would be criminal proceedings in connections with the prisoner's treatment. The file would then be sent to the official police complaints board to decide whether there would be disciplinary action.

Amnesty International said today it had responded by calling on the government to clarify the facts fully after internal investigations were completed.●

BELL CRITICIZES "ASSAULT ON THE PRIVATE COLLEGES"

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. FORD of Michigan. Mr. Speaker, Terrel H. Bell, a career education professional, served as Secretary of Education during the first term of the Reagan administration. In this past Sunday's New York Times Education Survey, he spoke out forcefully on the administration's budget proposals for student financial aid in an article entitled, "Bell Criticizes 'Assault on the Private Colleges'." In this excellent article, Bell states:

Money for student financial aid is a high-priority investment of the taxpayers' dollars. It helps students to help themselves by making them productive, intelligent and self-sufficient. It represents an investment that makes taxpayers out of potential tax eaters. The return to the taxpayer over the years is very high. In short, the student-aid program is good public policy, and the radical changes currently proposed are not justified.

Former Secretary Bell also makes several other important points. He notes that the primary burden of the administration's cuts in student aid will fall on students attending private colleges and universities. This could result in substantial enrollment shifts from the private colleges and universities to the less expensive public institutions. This would mean shifting costs from Federal taxpayers, who have been providing student aid to enable students to attend more expensive private institutions, to State taxpayers, who provide a substantial State subsidy for each student enrolled in a public institution. Worst of all, the drastic cuts proposed by the Reagan administration would indicate that we are abandoning the policy of trying to "nurture an aristocracy of academic excellence," allowing talented but low-income students to "reach the outer limits of their ability." We will return instead to the policy which foolishly barred the doors of many of our best institutions to all but the wealthy.

I commend former Secretary Bell's article to the attention of all of my colleagues.

[From the New York Times, Apr. 14, 1985]

BELL CRITICIZES "ASSAULT ON THE PRIVATE COLLEGES"

(By T.H. Bell)

The proposals advanced by the Director of Management and Budget, David Stockman, to place new limits on Federal aid to college students constitute an unwitting assault on the nation's private colleges and universities.

The legislation that has been proposed—that no federally supported loans would be made to families with incomes above $32,500 and that the total amount of Federal loans, grants and work-study aid for any one student would not exceed $4,000—would result in transfer of thousands of students from private to public institutions. For this reason this higher-education package flies in the face of the arguments advanced by the Reagan Administration that Government policy should encourage the private sector to do more so that government can do less. Public college and university costs are subsidized by taxpayers who support these institutions through state and local taxes. Most state higher-education systems fix their institutional budgets by using a formula that is driven by student enrollments. More students transferring from private to public institutions because they can no longer qualify for Federal student aid will obviously drive up the costs to taxpayers in the states.

Thus the transfer of students from private to public institutions will be accompanied by a transfer of higher-education expenses from the Federal budget to state budgets. This shift of enrollments will, in turn, result in underutilized physical plants at many private institutions and a demand for new construction on campuses of public institutions.

The Stockman proposals apparently assume that government-operated institutions are more efficient and cost-effective than the private colleges and universities because tuition is much lower. This assumption ignores, however, the fact that state appropriations are an indirect tuition subsidy. States subsidize some of the cost of attendance at public institutions through direct appropriations. Federal student aid subsi-

dizes the cost of attendance at private colleges through providing larger loans and grants to the students who choose to attend these institutions as contrasted to the size of the loans and grants to students who attend low-tuition public institutions. But it is not true that great numbers of students who neither need nor deserve a loan are ripping off the taxpayers so they can live in luxury on campus.

The Stockman proposals are not new. They were advanced in earlier years, but they were easily shot down in deliberations inside the Administration because they were so obviously harmful to many deserving students as well as many institutions that depend on tuition revenue to remain solvent.

President Reagan established a Cabinet council procedure to facilitate review of critical issues faced by his Administration. In group discussion meetings with other members of a Cabinet council, each Cabinet officer had an opportunity to make presentations, voice issues and object to proposals of others. Ronald Reagan often sat in on these sessions. His schedule did not permit participation in all of them. Additionally, Cabinet officers had the right to appeal decisions on budget levels to the President's Budget Review Board comprised of James Baker, Edwin Meese and Mr. Stockman. In unusual situations one could even appeal directly to the Oval Office.

To his great credit, the President made his Cabinet members accountable, and he provided ample opportunity for us to remonstrate over O.M.B. decisions. Through this procedure this writer was able to expose weaknesses in new proposals constantly coming out of O.M.B. to emasculate programs of student financial aid. These procedures also highlighted needed reforms in student aid as O.M.B. brought forth some telling criticism that led to changes in the law and in our Administration.

This process apparently did not work well in the current budget preparation cycle. Under the great stress of our horrendous deficits these old ideas found their way into budget recommendations. They should have been debated more thoroughly and the consequences analyzed more carefully inside the Administration. But 1984 was an election year, and it was not until after Nov. 4 that the top policy-makers had an opportunity to spend full-time on matters such as this.

There are certain basic costs required to operate any college. As enrollments decline, those students remaining in the private colleges will be faced with enormous escalations of tuition charges to cover basic costs previously paid from a much higher enrollment base. As this happens even more students will transfer to public institutions. Without the existing student-aid program many of our finest private colleges would have closed their doors years ago.

O.M.B. budget analysts have failed to disprove this in the past in debates we have previously had on the issue that many private colleges cannot survive the huge enrollment loses they might inevitably absorb.

The threat of massive enrollment shifts will cause at least some damage at the private liberal-arts colleges even if the proposals are not enacted. Students are now making decisions as to where to go to school. Many will choose not to attend a private liberal-arts college because of the uncertainty about student aid that will be available in the fall. And this issue will likely not be settled until the fall if Congress disposes of its business at the usual rate.

When an institution's stability is in question the faculty members start looking for other positions. The most distinguished professors are the most mobile. They can easily move to another institution, and the drain on the most qualified faculty will change the basic nature of many prestigious liberal-arts colleges. It takes years to build a distinguished college, and it takes only a few months to tear it apart if the rumor mill begins to start an academic panic.

America's system of higher education is the envy of the world. It has grown over the decades into a healthy mix of public and private colleges and universities. Its diversity is a significant part of its strength. Alongside our distinguished state research universities exist private institutions that are the hallmark of excellence. Some of the best low-income students strive to meet rigorous academic admissions requirements. Some enter directly from high school; others who cannot qualify initially find the motivation to redeem themselves academically in local or regional colleges and then subsequently realize the dream of entering a Harvard, a Univesity of California at Berkeley or other institution with national reputation. But the motivation is there because our government has offered the financial assistance to those who otherwise would not dare to dream of such aspirations. One could argue that we should simply tell these low-income students to plan to go to the Berkeleys and we will write of the Harvards or maintain them for the wealthy, but this would be a foolish policy.

Some remarkable liberal-arts colleges have set the nation's standards for liberal learning in the arts, sciences, and humanities on the undergraduate level. Many of the nation's greatest political leaders, scientists, and industrial executives were educated in these colleges, which add a dimension to the total picture of American academe that we must preserve. O.M.B. budget analysts have not understood this, though this writer spent four years trying to explain it.

The Federal Government's policy of providing financial aid to students rather than subsidizing the institutions is a wise practice.

We have been able to nurture an aristocracy of academic excellence in preference to one of wealth. Under this wisdom, we promise the gifted and talented an equal opportunity if such students are willing to spend the long hours of intense effort demanded to gain admission to our most distinguished institutions. We take away the motivation and hope when we tell a low-income student of great promise that he or she cannot aspire to gain admission to the institution prized by so many.

The criticism that there have been abuses in student loans through defaults cannot be denied. These are exceptional situations, though, that should not result in penalizing the great majority of our students who need the assistance and will pay back the loans as well as pay higher taxes made possible by the education they attain. Moreover, the default rate has been declining in recent years, and loan-default collections were increased threefold during the first four years of the Reagan Administration.

The amendments that we were able to persuade the Congress to enact have resulted in meeting most but not all of the criticisms of the student-aid programs. For example, students with annual family incomes in excess of $30,000 must, under present rules, prove need through the needs-analysis system that is well established in higher education.

Several million conscientious and deserving college students avail themselves of government financial assistance and without such assistance they would not be able to pursue their goals.

Money for student financial aid is a high-priority investment of the taxpayers' dollars. It helps students to help themselves by making them productive, intelligent and self-sufficient. It represents an investment that makes taxpayers out of potential tax eaters.

The return to the taxpayer over the years is very high. In short, the student-aid program is good public policy, and the radical changes currently proposed are not justified.

Thousands of families have been planning to utilize student loans and other forms of financial aid to help them meet the high and growing costs of higher education.

As their plans are revised and as vast numbers of students move to the low-tuition schools that are heavily subsidized by state taxes the Federal budget will be relieved of a few dollar demands, but the headaches will simply shift from the hearing rooms of Congressional appropriations committees to their counterparts in the legislatures of the 50 states.

The stress and pain on students in changing institutions, the relocation of faculty and staff, expansion of facilities on public campuses and the abandonment of existing physical plant on private campuses must all be calculated in assessing the cost of this profound change in Federal policy.

The wealthy will be the only ones able to attend schools where the tuition is high. In order to keep losses of students from reaching disastrous proportions, some institutions will be tempted to lower academic standards to admit the least-well-prepared students who have the money to pay the costs.

As we strive for equal opportunity in higher education, we must provide both access and choice among the public and private institutions.

We do not want a policy that segregates students with the wealthy attending private institutions and the moderate- and low-income students attending the public colleges.

We have a student-aid program that has some imperfections. Let's correct them as the Higher Education Act comes up for renewal in 1985. But let's keep the existing philosophy that promises all academically able students an equal chance.

Equality of educational opportunity leads to unequal results based upon the willingness of the nation's students to work diligently to reach the outer limits of their ability.●

A BILL TO HONOR ARIEL RIOS

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. ROYBAL. Mr. Speaker, I am introducing today a bill to honor Ariel Rios, the first member of the Vice President's Organized Crime Drug Enforcement Task Force to give his life while defending the good citizens of

this country against the threat of illegal drugs.

As chairman of the Appropriations Subcommittee with oversight over some of the agencies involved in the task force, I know that our first line of defense in the war on drugs is those dedicated Federal agents, like Special Agent Rios, whose duty it is to prevent the importation and distribution of addicting drugs. The drug enforcement task forces now operate in 13 of our cities where drug trafficking and drug abuse are especially serious. Their combined agency efforts have been significant in terms of seizures of cocaine, heroin, and marijuana.

Yet, the drug menace remains a major problem, most tragically, among our young people. The seriousness of this problem is one reason for selecting Special Agent Rios as an individual who deserves to be memoralized. He is an example of an Hispanic-American who, while still a youth, decided to join the fight against crime.

A New York City native, Ariel Rios enrolled at John Jay College of Criminal Justice in Manhattan upon his graduation from high school in 1972. He joined the Bureau of Alcohol, Tobacco and Firearms in 1978, and in a short time developed a reputation for integrity, enthusiasm, and professionalism.

Ironically, within the span of 4 short years, Ariel Rios was to become a drug-related crime victim himself, no less a victim than the thousands of his contemporaries who have become reliant on dangerous drugs and no less a victim than countless other law-abiding Americans who have suffered directly from drug-related crimes.

After his death in 1982, Ariel was selected as the Most Outstanding Officer of the Year by the Dade County Association of Chiefs of Police. In 1983, Secretary of the Treasury Regan conferred the highest award presented by the Secretary, the Exceptional Service Award, on Ariel.

The bill I am introducing will further honor this most deserving individual and ensure that his unselfish sacrifice will be memorialized, as is fitting, by naming the Federal building where his agency is headquartered the Ariel Rios Memorial Federal Building. I urge the House to approve this bill so that the Nation can benefit from and learn of his example.

An account of the incidents surrounding his death follows. That account shows, more eloquently than anything I could say, the bravery of Ariel Rios in the line of duty and the dangerousness of the circumstances under which Federal drug enforcement agents must operate every day. Let us not forget the contribution of this brave young man, but let his name inspire us and future generations of Americans to work toward the aim of someday being entirely free of crime and dangerous drugs.

EVENTS LEADING UP TO DEATH OF SPECIAL AGENT ARIEL RIOS

On December 2, 1982, while a member of the Vice President's Task Force on Crime in South Florida, Special Agent Ariel Rios died of a gunshot wound received while serving in the line of duty. Special Agent Rios and his partner, Special Agent Alexander D'Atri, who received critical injuries, were conducting undercover negotiations for the purchase of a quantity of cocaine from suspects involved in illicit narcotics and firearms trafficking.

Although the meeting had gone as planned, one of the perpetrators apparently observed agents closing in to effect an arrest. When this subject drew a gun, Special Agent Rios moved to disarm him and was shot in the face. He died almost instantly.

Special Agent Rio's action was taken quickly and decisively. He acted for his own protection, for the protection of his partner, and for the protection of the other agents effecting the arrest. Ultimately, his life was given for the protection of the citizens of his country. He was the first Federal officer serving with the task force to be killed in the line of duty.

Prior to this incident, Special Agent Rios had been one of the most active and effective agents assigned to the ATF Task Group. For example, one week prior to this incident, he was the case agent for an investigation resulting in the seizure of 2 machineguns and over 100 silencers. The case received notoriety as the silencers were being manufactured where, 3 months earlier, eight people had been shot-gunned to death. The defendant in this case and his son were two of the three people who survived that massacre. Special Agent Rios displayed an infectious enthusiasm in the performance of his duty, which was indispensable to the success of the Task Force. The energy and optimism with which he approached his duty contradicted the personal sacrifice of prolonged separation from his wife and children.

The day he died was not the first time he had been faced with danger while assigned to the Vice President's Task Force. In one investigation, while in an undercover capacity, a defendant had pointed a loaded machinegun to his head during the transaction. The night before he was killed, while working on a separate phase of the same investigation which led to his death, a subject being arrested pulled a gun on his undercover partner. Special Agent Rios and other agents immediately went to his partner's aid and become involved in the struggle while the subject had the gun in hand. Special Agent Rios received a blow to the head during this melee.

Ultimately the investigation, on which Ariel Rios was working when he died resulted in the confiscation of 5 kilograms of cocaine, $82,000 in U.S. currency, 1 automatic weapon, 5 silencers, 20 silencer kits, and 20 other firearms (4 of which were stolen). Seventeen individuals were indicted in three different conspiracies to sell drugs and illegal weapons. Most of these individuals had long criminal histories in narcotics trafficking. Many were Mariel Cuban refugees who spent long terms in Cuban prisons. It was in response to the criminal activities of such individuals that the Vice President's Task Force was formed.

Special Agent Rios dedicated himself to achieving the goals and objectives of the Vice President's Task Force. He died defending the citizens of this country from the criminal element. He died defending the ideals in which he believed.

MY PLEDGE TO AMERICA

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. DICKS. Mr. Speaker, the Veterans of Foreign Wars annually sponsors a "Voice of Democracy Scholarship Program" to encourage national pride among young people in high schools across the Nation. I was pleased to learn that a student in the sixth Congressional District of Washington, which I represent, was selected as the Washington State contest winner. Brian P. Fey, of Gig Harbor, WA, prepared an essay using the contest theme of "My Pledge to America," in which he outlined his view of the rights and responsibilities of U.S. citizenship. His perspective is a most interesting one, and one which I would like to share with my colleagues in the House of Representatives.

MY PLEDGE TO AMERICA

(By Brian P. Fey, Gig Harbor, WA)

My Pledge to America is composed of three parts; my pledge to participate in our democratic system, my pledge to contribute to America in repayment for what I receive from it, and finally my pledge to be a guardian of American liberty and ideals.

My first pledge of participation is simple, but one that too many Americans neglect. A stable democracy needs intelligent participation through the voting process. The American voting system is of vital importance because it provides a peaceful system for change and perhaps is a reason why America has defied Karl Marx's predictions that the U.S. would fall into violent revolution. Naturally along with my pledge to participation goes a commitment to having a rationale for voting as I do. Simply voting is of little purpose unless I make myself fully aware of how each candidate stands on the issues and what the results and repercussions of an initiative or referendum will be. I also try to discourage apathy by challenging people to defend their beliefs and by showing them why I believe as I do.

The second pledge, the pledge I have made to contribute to America, is necessary because of the ways that America serves me. If I wish to receive the freedom, education, protection and security that America offers me, then I am obligated to make some sort of repayment. This repayment may be in the form of civil or military service or in the form of taxes. Of course not all of my repayment need be made to the government. We all have a responsibility to contribute to the lives of our fellow citizens. This can be done through food drives for the needy, crimewatch programs or any other way available to give our neighbors a helping hand. America has been made great through these individual contributions, and I am responsible to return as much or more to American society as I have received.

My final pledge is the most difficult to achieve, but the most personal and impor-

tant. It is not as much a pledge to America as it is a pledge to guard the ideals which America represents. In American history there have been times when America did not follow its original ideals but wavered from its path of freedom, liberty and equality. The true patriots did not blindly support America during these times but worked successfully to return America to its ideals. America does not need blind patriotism. The guardians of the American ideals, citizens and leaders alike, are the reason America continues to be the finest nation on earth. My personal pledge to America is to do my best to be a guardian of the American ideals. After I gain in education and experience, I intend to seek public office. Until that time I will continue to work as a volunteer in political campaigns and to influence the views of those around me. It is my pledge to America to work at every stage of my life in every way possible to be a positive influence upon America today, preparing myself to be a leader in this nation who continues the cause of freedom, liberty, equality and, most important, hope for the future.●

B-1 BOMBER

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. JONES of Oklahoma. Mr. Speaker, I rise to bring to my colleagues' attention an editorial from the March 25 issue of Aviation Week, and ask that it be printed in the RECORD.

This excellent essay, "Decision B-1," raises a number of disturbing questions—questions that may have more bearing on our long-term national security than the much-publicized MX missile.

The Secretary of Defense apparently won't let his staff do what staffs are meant to do: examine all options and possibilities without prejudging or favoring one over another. Creating an intellectual desert in the Pentagon certainly makes for less turmoil; it also makes for $600 toilet seats and $100 wrenches. Now Aviation Week raises the possibility that we may be in for a major procurement catastrophe.

The essay points out the problem which Secretary Weinberger chooses to ignore: We must soon choose between one airplane, the B-1—that is now being built below cost and ahead of schedule—and another airplane, the Stealth, that has never been flown and whose cost is unknown.

Given the fiscal problems we face, I question the wisdom of making a blind commitment to buy the Stealth bomber. How many of us are willing to sign on now to support an untested airplane that could cost $40 billion or more?

Given, also, the threat we face from the Soviet Union, why should we pass up the opportunity to replace B-52's with B-1's, purchased at the most economical rates possible.

These are questions America must face, and if the Department of Defense does not want to take on the necessary task, I hope that Congress will rise to the occasion.

DECISION ON B-1

(By William H. Gregory)

Fiscal 1986 will be a watershed year for the USAF/Rockwell B-1B bomber in terms of the ultimate life of the program. It is the last opportunity to put money in the federal budget for extending the production run beyond the 100 airplanes committed now before the line begins its slow wind-down and workers are laid off or transferred. It is the last chance to attain peak economies from a longer production run, though not the last chance to save the line from extinction.

If Defense Secretary Caspar Weinberger and his staff prevail, the option will be foreclosed. Weinberger is adamant about capping the program at 100 aircraft and moving into the Advanced Technology Bomber stealth aircraft under contract for development with Northrop Corp. He has warned any Air Force leader expressing contrary ideas to start looking for other work. Some USAF planners have been studying the idea even so, but any continuation of the B-1 program has an uphill climb.

Extension of the B-1 is generally controversial, and not the simple, familiar case of the Office of the Secretary of Defense versus one or more of the services. That fact is complicating the campaign of those who are seeking to maintain the production line. Several arguments are advanced for preserving the program:

Existence of an ongoing B-1 program would provide competition for the Advanced Technology Bomber to provide a lever to hold down its cost.

The 100-aircraft number was plucked more or less out of the air and does not represent either the true requirement—originally 240 aircraft—or an economic production program. A 100-airplane program was deemed a nice, round, politically acceptable number at the time the decision was made. True force requirements seldom drop out as neat, even hundreds. Loading development and other non-recurring costs onto a 100-airplane run has resulted in a staggering unit cost for the B-1 at $200 million or more. Extending the program could drop unit costs to around $100 million, or on the order of what a new Boeing 747 costs now.

Introduction of more B-1s into the Strategic Air Command's inventory could mean replacement of General Dynamics FB-111s, which have less delivery capability, or of more Boeing B-52s than planned now. The latter, first delivered in the 1950s, is getting older and more expensive to maintain. It also must be modified to get rid of tube avionic equipment as tubes fade from manufacturing lines. FB-111s could bolster Tactical Air Command forces.

Production money will have to be committed next year for the Advanced Technology Bomber, an airplane that has not flown or been built yet on an assembly line. Keeping the B-1 line running would guard against technical or cost obstacles in the stealth bomber program by having a conventional bomber backup in production.

Low-observable technology, as stealth is more formally referred to, in the Advanced Technology Bomber's flying wing configuration could encounter technical unknowns, as the earlier flying wing did. Stability and control are such areas mentioned for the stealth aircraft.

There are also arguments on the other side of the issue. One of the most important is the lack of enthusiasm for a longer B-1 production run on the part of some in the user community. The MX intercontinental ballistic missile is of far greater priority to strategic planners at the moment than the problem of how to structure the bomber element of the triad.

In that sense, the B-1 controversy is a reenactment of a classic confrontation between research and development troops trying to introduce new technology into the field and the user resisting replacement of his tried-and-true system with an unknown, often regarded as an interloper. Sometimes the user is overcautious in these cases, and sometimes his suspicion of a new and untested piece of hardware is bitterly justified.

While the B-52 in the Strategic Air Command inventory is getting older, its structural life extends easily into the next decade. It is considered by SAC as a highly effective weapon system, especially when it is equipped with cruise missiles. Modernization programs to provide new solid-state avionics to eliminate tubes are programed to cost $4 billion, a sum strategic planners believe will go a lot further in buying added capability than it would put into a B-1 production pot.

Strategic planners do not accept the competition-price argument for the B-1. They show more interest in introducing the Advanced Technology Bomber into the force to use as a hunter-killer against new and difficult-to-detect Soviet mobile intercontinental ballistic missile sites. B-1 proponents argue that these sites will be profoundly difficult to find by a stealth bomber or anything else.

One point in this issue is clear. That is that the Advanced Technology Bomber has not flown yet, and ownership costs of the new stealth technology are far from defined with precision. If the Advanced Technology Bomber meets its preproduction estimates for 138 aircraft, its unit costs will be on the same order as the B-1 as the program is structured now. That estimate has yet to be demonstrated on the assembly line. The argument for extending the B-1, though, is not to do it to displace the Advanced Technology Bomber. It is to go slowly, fly the stealth aircraft before buying, and settle on the B-1 in the interim as a known quantity. Those who support moving ahead with dispatch on the low-observable bomber see this strategy as a way of waltzing the new airplane out of the budget entirely.

Because of the secrecy surrounding stealth, the taxpayer is in a poor position to make an informed judgment on this issue. Congress could do the electorate an inestimable service by getting to the bottom of the question rather than wasting its time playing amateur auditor and ranting about defense industry overhead charges that it knows little about. It is another example of fire and fury over nickels and dimes while the real billions slip quietly out the door.●

A TRIBUTE TO PAMELA COBURN

HON. DAVID SMITH MONSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. MONSON. Mr. Speaker, it is with great pleasure that I bring to the

attention of my colleagues and to all Americans a young citizen of my district who has distinguished herself by writing a winning essay for the Voice for Democracy scriptwriting contest. This contest is sponsored by the Veterans of Foreign Wars and its ladies auxiliary. They conduct this contest each year in order to provide scholarship prizes to outstanding high school students throughout the United States.

Pamela Coburn is a resident of Sandy, UT, and her essay was chosen as the winner from the State of Utah. Her essay describes the importance of participation by each and every person in our governmental process. Pamela demonstrates with this essay that she is proud to be an American and I am proud to recognize this fine young person. I would ask that her entire essay be inserted into the RECORD so that all may benefit from her insight.

MY PLEDGE TO AMERICA

I have a pledge. My pledge to America is to be a responsible citizen. There are at least three ways I know to do this. One way might be for me to actually become involved in politics, and run for an office. But this is not something I plan to do. Although I admire our leaders, I believe there are other kids in my generation whose talents for leadership are more numerous than my own. Because America is important to me and to many others as well, I want to support my country in two other ways.

The first way I can be a responsible citizen is to be an informed citizen. In a few years, I will be old enough to vote. I will be helping to make decisions that may deeply affect our country as well as others, and political issues and leaders are far too important to be decided by people who don't know what they stand for. So starting now, I want to learn about things that are going on in our country. I want to search out the information that's available, but not just any information. I want to be able to rely on my sources as being accurate and unbiased.

I once heard a story about two ant colonies that lived side by side. They distrusted one another so much that they developed tremendous weapon devices in case the other should get too close for comfort. One day, a scouter ant from one of the colonies came back to headquarters, very much frightened. It seemed that this scout had heard a loud noise coming from the neighboring ant's defense area, and he was sure that they were launching an attack. In reality, they were doing nothing of the sort. But the scouter and his colony began a counterattack. The results? Both colonies were destroyed. One faulty piece of information caused it all. Likewise, should I use inaccurate information dealing with an issue or leader of this country, it could cause me to act in a way that could do more harm than good.

Other kinds of information can be just as dangerous. As Benjamin Disraeli said, "It is easier to be critical than correct". Biased reports could limit my knowledge. Good decisions can never be made on limited knowledge. Most of the time, I can rely on newspapers, magazine articles, and the news media to give me the solid information I need.

Now, I know where I can find the facts, but many times I need help understanding them. The issues of today have many sides to them. More than one viewpoint is very important, but luckily for me, one of the favorite topics of discussion is politics. I can get a clearer understanding of the issues by listening to people I hear at school, at home, and other places. Reading about how similar situations were handled in history can also help a lot.

In these ways I can become an informed citizen. But what do I do with the information I receive? Ah, here is the second part of my pledge. I want to become a productive citizen. A productive citizen uses the information he or she has collected, and puts it to good use.

An example of this is the voting ballot. As I mentioned before, information is vital when it comes to decision making. Once I have the facts, I will be able to make constructive decisions for or against issues or politicians.

Another way I can be a productive citizen is to be a respectful citizen. I may not always agree with the way this country is being run. I know this because I often disagree with how things are run at home! But I still respect my parents decisions because of their position of authority. It's the same way with our local and national leaders. Their authority gives them a right to make decisions that will affect us. If I have problems with those decisions, then I should find a way to take action that I think could make a change for the better.

So, here is my pledge. As a responsible citizen, I will become informed and act productively based on the information I receive. These are the ways I believe I can serve America best.●

VOICE OF DEMOCRACY WINNER

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. FLORIO. Mr. Speaker, I am pleased today to call my colleagues' attention to an outstanding essay written by Brian Hall of Turnersville, NJ. Mr. Hall is this year's New Jersey winner of the Veterans of Foreign Wars Voice of Democracy contest. Over 300,000 secondary school students entered the contest this year, with one student from each State selected to attend the final judging in Washington, DC. Mr. Hall's essay well deserves this honor, reflecting a profound sense of patriotism and the responsibilities that go with it.

Mr. Speaker, I would like to commend the VFW for sponsoring an essay contest which not only awards six scholarships totaling $32,000, but also encourages young people to consider their special relationship to their country. I believe my colleagues will be proud of Brian Hall and all of the students who participated in this contest when they read his essay, "My Pledge to America."

The essay follows:

I see, in my mind, a vision that is quite clear. It is a picture of children standing outside of their school by the flagpole on a cold winter morning. As a silence seems to govern the morning air, the children proudly raise their hands to their hearts and begin to say, "I pledge allegiance to the flag of United States of America . . . . "

And so morning has begun all across the land. Children of all ages are reciting the flag salute. Some will say only mere words, but others will express a deep-felt conviction for the principles that have made this country great. In one way or another, these people are the true Voice of Democracy. They are pledging a part of themselves to ensure a better future for us all, and, when you think of it, this is a great way to start off each day. I, too, have a pledge that I feel is worth telling others.

I am very grateful to be an American. I am thankful for the freedoms and the luxuries that we have, but I realize that, more importantly, I must also be willing to pledge my support for maintaining our freedom. Therefore, with freedom comes responsibility. I want to take the responsibility that is needed to uphold the values of our land. Much of the world has looked to America as a great hope, but if we fail to live an ambitious future, we may ultimately lead the rest of the free world to its downfall. I want to see a world where all of us are free, so that is why when I pledge my support for America, I am actually pledging my support for ourselves. We have succeeded as individuals only because America has succeeded as a nation.

So that we can continue to succeed, I must play an active role in fulfilling the dreams of our Fathers. I will be patriotic in my waving of the flag at a parade, or the chanting of the letters "U-S-A" at a rally, but patriotism goes much deeper than that.

The fact that I've written this essay is an affirmation of my belief in America. Unlike in a communist country where I might be forced to say that I'm proud to be a citizen of that country, I say it here, because I really am. I realize that if I am to continue to have freedom, I must also be willing to die to protect it. I will speak up when others are putting America down, and I will try to let my voice proclaim my belief and determination to defend the principles of this land. When I freely attend church or send a letter to the editor of a newspaper or simply wear red, white and blue on a special day, I am telling the world that I am an American, proud and free.

If I were to put together a specific pledge, it would go something like this:

"I pledge to my country my support for its principles of freedom, justice, and equality because I realize how great of a land this is. I will, if called upon, fight to defend these principles in time of war, and I will not remain silent in my defense of them in times of peace. I will practice my rights of free speech, free worship, and free thought. I understand that I must be a good citizen, but I must also be a good person. I will not let my name demoralize this country by becoming a statistic on an unfavorable list. I pledge to honor our leaders and give them my respect. I will vote; I will speak up I will not take anything for granted. It is my hope, and my pledge, to give back to America as much of a portion possible of what America has given to me."

That is my pledge, and with that in mind, I can now return to the picture of the school and children outside saying the salute to the flag on top of that pole. They are finishing it up now with those famous words " . . . indivisible, with liberty and justice for all." If we all pledge ourselves to preserving these principles, the flag on top

of that pole will always wave over a land that is free.●

REMEMBER THE HOLOCAUST

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. DYSON. Mr. Speaker, during his press conference of March 21, President Reagan was asked whether or not he intended to include a visit to Dachau as part of his upcoming trip to Europe—a trip dedicated to commemorating V-E Day. The President responded by pointing out that few German citizens alive today were involved in the Second World War. Therefore, he suggested, a trip to Dachau would be inappropriate. President Reagan apparently believes that no purpose is served by a visit to the notorious death camp that is universally recognized as the symbol of the Holocaust.

The President's thinking betrays a startling lack of understanding, and I am convinced that omiting a visit to Dachau would be a serious mistake. First, public recognition of the Holocaust has nothing to do with the number of German citizens alive today who were involved in the Second World War. Those individuals guilty of personal participation in the genocide of 6 million Jews must be brought to justice, and a visit to Dachau would reaffirm America's commitment to the purpose. But more important, we must not be lulled by the passage of time into forgetting the horror of Hitler's final solution.

The German people are now our friends and allies, and I hope will always remain so. Recalling the Holocaust, however, is not intended to shame our friends. Instead, it is a humble way of paying respect to those who died in the camps, and to those still living that continue to suffer from that pogram. And by paying these respects, we renew our commitment to preserving human rights; our condemnation of wanton murder.

The Baltimore Jewish Council has contacted me to express their concern for the implications of the President's decision, and I wish to have their most recent correspondence included for the RECORD. I support their request that President Reagan reconsider his decision, and urge my colleagues to do likewise.

BALTIMORE JEWISH COUNCIL,
Baltimore, MD.

President RONALD REAGAN,
The White House, Washington, DC.

DEAR PRESIDENT REAGAN: We both heard and read, with dismay, your answer at your March 21 press conference as to why you were not visiting Dachau on your trip to Europe to celebrate V.E. Day.

While the Germans, today, may be our friends and allies, the memory of the destruction of European Jewry, the Holocaust, by Nazi Germany and its cohorts cannot be ignored or dimmed. Your comments that few Germans are alive today who participated in the Holocaust is not consistent with the facts. Thousands of persons, including many living in the U.S., who participated in the Holocaust and World War II, have never been brought to justice.

We urge you to reconsider your decision not to visit Dachau. By doing so, you will demostrate what we believe is your understanding of the lessons of the Holocaust and the remembrance of 6 million Jews, including 1½ million children, killed at the hands of the Nazis simply because they were Jews. We show our commitment to prevent future genocides by working to assure equal justice for all people regardless of their race, ethnicity, or religion and remembering the lessons of the past.

Respectfully yours,

HERBERT GOLDMAN,
PRESIDENT.
STANLEY SOLLINS,
Executive Director.●

TORCH OF FREEDOM AWARD

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. WAXMAN. Mr. Speaker, on Wednesday, April 17, 1985, Los Angeles County Supervisor Kenneth Hahn will be awarded the Torch of Freedom by the State of Israel.

In his 36 years in public office, Kenneth Hahn has been regarded as a unique and effective legislator by his colleagues on the Los Angeles Board of Supervisors as well as by his royal constituents.

A native of Los Angeles, Mr. Hahn received a B.A. in political science from Pepperdine University and an M.A. in education from the University of Southern California. During World War II, he served in the U.S. Navy attaining the rank of lieutenant. Since 1947, at the age of 26 when he became the youngest person ever to serve on the city council, he has been a devoted public servant. From 1952 to the present, as a Los Angeles County Supervisor, he has helped govern the largest county in the Nation comprising 7.5 million people in 84 cities. His interest in making government responsive to the needs of the people has resulted in a wide range of successful projects covering health, recreation, and municipal improvements.

Mr. Hahn's long years of service parallel the period which has seen the establishment and growth of the State of Israel. His dedication and concern for his community, and in a larger sense for the world community, has earned him the recognition he has been designated to receive at this time.

I ask all my colleagues to join me in congratulating Kenneth Hahn on this special occasion and to extend our best wishes to Mrs. Hahn and the other members of the Hahn family who share in the pride of this recognition.●

MAKE DEBATES A PERMANENT FIXTURE

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. COELHO. Mr. Speaker, a very timely article written by Mr. James A. Johnson, chairman of the 1984 Mondale Presidential campaign, was published recently in the Washington Post. The article deals with the need to institutionalize candidate debates into the Presidential campaign process. In recognition of the importance of this issue, I have reprinted Mr. Johnson's article below:

MAKE DEBATES A PERMANENT FIXTURE

(By James A. Johnson)

With the second Reagan inaugural more than two months old and the next Iowa presidential caucus and New Hampshire primary nearly three years away, we are as close as we ever get to a "down" period in presidential politics. And right now is the time to institutionalize presidential debates for the 1988 general election and all future presidential elections.

The experience with presidential campaigns and debates since 1960 tells us two important things.

First, the American people value very highly the chance to catch a glimpse of the candidates for president without the producers, directors and puppeteers who always surround them. The degree of public interest is demonstrated by the massive audience for the recent debates.

Second, efforts of presidential campaigns to control their television message have intensified. The techniques of the Nixon campaigns in 1968 and 1972, which were the subject of exposés at the time, are today more and more commonplace. Each day a single prepackage, carefully controlled image is prepared for the voters.

Debates are welcomed by the voters because they are the most effective antidote to this trend toward more and more candidate-packaging. The 90 minutes of hand-to-hand combat in a debate expose new dimensions of the candidates and provide a significant test of each candidate's knowledge, judgment, humor and ability to make an effective argument.

The value of the debates does not lie in how many votes are changed. The debates provide the best opportunity for voters to confront the strengths and weaknesses of the two candidates in a manner they may escape merely by trying to follow the day-to-day political coverage on the evening news.

Further, the debates generally give the candidate who is trailing a chance to reopen consideration of his candidacy. Events that prolong consideration of the alternatives are healthy for a democracy.

Last August and September, as chairman of Walter Mondale's campaign, I negotiated for several weeks with representatives of President Reagan over the number, timing and format of the 1984 presidential debates. Fortunately, those negotiations led to two

presidential and one vice presidential debate. In 1964, 1968 and 1972 similar negotiations either never occurred or led to no agreement and no debates.

In my opinion leaving the decisions about when, whether, and how to debate to the two nominees in the post-convention period does not adequately protect the interests of the voters. In 1960, 1976, 1980 and 1984, there were 4, 3, 1 and 2 debates respectively. In 1964, 1968, and 1972 there were none.

When there were debates, the length, timing, format and venue were the subjects of endless bickering and in the end were determined by the candidate who had to least political need to participate in the debate. Surely this is not the best way to organize such important events.

Now is the time to institutionalize presidential debates. President Reagan cannot seek reelection. A large number of potential candidates in both parties is likely. The only certainty to the nominating process is that it will grow longer and longer. And perhaps most important, the candidates are more susceptible to broad-based political pressure early in the process than later. Clearly, we should take this opportunity to make presidential debates a permanent part of the political landscape.

I propose that we create a broad bipartisan effort to get all candidates for president in 1988 to declare at the moment they announce their candidacies that they are prepared to participate in general election debates if they get the nomination. In addition, each candidate would agree to participate again in 1992 if elected president in 1988.

There should be a program of three presidential debates and one vice presidential debate. The presidentials should be held on the fourth Sunday of September and the second and fourth Sundays of October. The vice presidential debate would be held during the same period. The length of each debate would be 90 minutes.

We have an unusual opportunity for the leaders of the two parties to join together, for labor and business to work together, for good-government groups of all kinds to come forward, and even for Congress through joint resolution to help guarantee presidential debates. We can build a force that is formidable indeed. We can make an offer no candidate for president can refuse. No laws need to be passed, no minor fights need divert us. This is plainly and simply a political opportunity for those of us who believe presidential debating is important. Let's get to work.

Presidential debates allow the voter to see the candidates respond to issues in an unrehearsed and more spontaneous manner. As such, they allow voters to make a more knowledgeable choice when they cast their ballots. I agree with Mr. Johnson that now is the time to institutionalize these debates, and I urge further consideration of his proposal by both parties.●

EMPLOYMENT OPPORTUNITIES FOR DISABLED AMERICANS ACT

HON. STEVE BARTLETT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. BARTLETT. Mr. Speaker, today I am introducing, along with my colleagues Messrs. HAROLD FORD, CAMPBELL, JEFFORDS, JAMES JONES, GRADISON, GOODLING, MURPHY, TAUKE, GUNDERSON, NIELSON, MCCAIN, and DUNCAN, the Employment Opportunities for Disabled Americans Act. The primary purpose of this legislation is to create conditions for the increased employment of disabled persons.

The legislation is limited in scope: It is the first step in removing all Federal disincentives related to the full employment of disabled persons. The bill has four specific purposes:

First, it would permanently authorize section 1619, a work incentive provision, in the Social Security Act; the provision allows disabled Supplemental Security Income [SSI] recipients to have earned income which exceeds $325 a month, while retaining access to Medicaid. An SSI recipient who does not take advantage of the section 1619, loses both SSI cash benefits and eligibility for Medicaid, when earned income exceeds $325 a month.

Second, it would mandate that the Social Security Administration inform disabled SSI recipients about section 1619 at two times: when the person first becomes a recipient, and again when the person's earned income exceeds $200 a month. Currently only about 6,000 disabled SSI recipients are taking advantage of section 1619. There are about 1.7 million disabled SSI recipients.

Third, it would establish a demonstration grant program to encourage employers to become involved directly with the reemployment or retraining of disabled employees, and thus help reduce disability benefit costs.

Fourth, it would establish a demonstration grant program to assist States develop and secure employment for SSI and Social Security Disability Insurance [SSDI] recipients.

Many disabled Americans, particularly those with severe and multiple disabilities do not work. They do not work, not because they do not want to work and not because they are incapable of work—rather, they do not work because they will lose their medical insurance, specifically, Medicaid. As of September 1984, approximately 1.7 million disabled and blind individuals between 18 and 64 years of age were recipients of Supplemental Security Income [SSI] and through SSI were eligible for Medicaid. Because SSI is means-tested, such persons are by definition, poor, and typically have never had earned income. For example, only 6,082 earn more than $300 a month. The vast majority of disabled SSI recipients do not know that they can earn over $300, and in most States retain their eligibility for Medicaid. Even if they know they can earn—in most States at least three times $300 a month—they are afraid to do so. They are afraid to take the risk of work because the provision, section 1619 of the Social Security Act, which allows them to pursue earnings of over $300 a month expires June 30, 1987. It expired once before on December 31, 1983, leaving over 5,000 disabled SSI recipients at risk—with jobs, but with no medical insurance. Many stopped working to reinstate their eligibility for SSI and Medicaid before Congress reinstated section 1619 in the summer of 1984. The price of economic independence, without access to medical insurance, was too high a price to pay. Many have told me that even with an extension of section 1619 through June 30, 1987, they are reluctant to seek full-time permanent employment. The price of uncertainty in 1987 associated with section 1619 is unemployment today.

In response to this uncertainty I introduced H.R. 6263 in the 98th Congress to make section 1619 a permanent provision in the Social Security Act. H.R. 6263 would have also mandated that the Social Security Administration follow specific notification procedures so that all disabled SSI recipients would know about section 1619.

The bill which my colleagues and I are introducing today includes these important provisions from H.R. 6263, but it goes further. It also includes two new demonstartion programs to promote the employment of disabled persons. These two new programs complement and strengthen the work incentive underlying section 1619. These demonstration programs require very small dollar expenditures up front, but will generate a multiple return to the Treasury through an increase in unexpended Social Security cash benefits and income taxes paid by working disabled persons.

Disabled persons have told me that lack of access to permanent medical insurance is the largest single barrier to employment. There are also many other barriers to the employment of severely disabled citizens. I would like to comment on four. The one barrier that does not exist, in my judgment, is the will to work. In addition to the need for medical insurance, disabled persons often have other special needs related to employment. First, they may require special transportation in order to get to work, they may require a modified or adapted piece of equipment, a job coach, or even an assistant to do a specific job. Adaptive equipment and transportation represent

costs, yet such costs are seldom as high as the enormous support costs of unemployment.

Second, employers may not know that such adaptation would permit a disabled person to become a fully abled employee—and unfortunately, even when employers recognize the potential of a disabled person, they are reluctant to make the additional investment. Moreover, it takes time and expertise to achieve certain types of workplace accommodations, technical assistance that may not be readily available at any price.

Third, State vocational rehabilitation agencies play a critical, and demonstrably effective role in preparing over 900,000 disabled persons a year for the world of work. They concentrate their efforts on the individual, training him or her to develop skills that will transfer to many settings. State vocational rehabilitation agencies must stretch dollars. Therefore, few dollars are available for permanent or expensive on-the-job site modifications or adaptions in a specific company.

Fourth, when an able-bodied employee becomes disabled and can no longer do a job, the partnership between the employee and the company is often severed. The employer may think the only recourse is longer term disability benefits—not retraining, not job site modification. The newly disabled employee may accept disability benefits in lieu of retraining, rehabilitation, or job site accommodation because it is usually easier to obtain. Thus, we have a paradox: retraining or job-site accommodation is cheaper and more productive for the employer, the employee, and the Government than long term monetary support; however, SSI, SSDI, or disability company benefits are more available.

This bill is a modest effort to address these barriers to employment and reemployment of the disabled. The legislation I am introducing today is limited. At some point, we must tackle other issues like assuring appropriate medical insurance for all disabled persons who want to be fully employed. Social Security Disability Insurance [SSDI] does not provide access to section 1619, and Congress must promote a full range of permanent, effective incentives to encourage employers to hire disabled persons and disabled individuals to seek full employment. This bill is a first step.

In summary, the bill has four major purposes:

First, it would make section 1619 of the Social Security Act permanent, and thus allow a disabled person to earn over $300 a month, and in most States continue to have access to Medicaid until earned income exceeded a State specific threshold.

Second, it would require the Social Security Administration to notify each disabled SSI recipient about section 1619 at least on two occasions: (a) when the person first becomes eligible for SSI, and (b) when the person's earned income reaches $200 a month.

Third, it would establish a grant program to provide technical assistance for employers and groups of employers to plan, implement, or evaluate programs to retrain and reemploy disabled employees, thus reducing the need for disability payments and recapturing the past investment made in the employee.

Fourth, it would establish a grant program to assist States to identify, promote, secure, and evaluate jobs for SSI and SSDI recipients. Some of the funds would be targeted for outreach to employers and disabled SSI and SSDI recipients. The majority of the funds, however, would be allocated to on-the-job assistance.

The cost of the bill would be as follows:

First, section 1619—in title I of the bill—would represent a savings of about $324 a month for each of the 6,000 SSI recipients—August 1984—who earned over $713 a month. For such persons Medicaid eligibility would continue, but SSI cash payments per month would be only $1 each; a projected reduction in cash benefits of $23 million in one year. Such persons would also be contributing to Federal, State, and local tax bases.

Second, disabled Worker's Demonstration Program—in title II of the bill—is authorized from 1986 through fiscal year 1992 at these levels:

(a) Fiscal year 1986, $5,000,000.
(b) Fiscal year 1987, $5,500,000.
(c) Fiscal year 1988, $6,000,000.
(d) Fiscal year 1989, $6,500,000.
(e) Fiscal year 1990, $7,000,000.
(f) Fiscal year 1991, $7,000,000.
(g) Fiscal year 1992, $8,000,000.

Third, employment Opportunity Demonstration Program for SSI and Disability Insurance Recipients—in title III of the bill—is also authorized from fiscal year 1986 through fiscal year 1992. On a competitive basis to States, grants would be made for up to 3 years per State. Authorization levels are highest in years where the maximum level of State participation is anticipated, specifically:

(a) Fiscal year 1986, $5,000,000.
(b) Fiscal year 1987, $10,000,000.
(c) Fiscal year 1988, $15,000,000.
(d) Fiscal year 1989, $15,000,000.
(e) Fiscal year 1990, $15,000,000.
(f) Fiscal year 1991, $10,000,000.
(g) Fiscal year 1992, $5,000,000.

Titles II and III of the bill would amend an existing statute, title VI of the Rehabilitation Act of 1973. Both of these demonstration programs are designed to sunset in 1992. State grants under title III are limited to 3 years, to assist States with startup costs. The programs would have a high benefits-costs ratio to the States and employers, and this would typically be permanently funded by either the States or groups of employers.

In considering the introduction of the Employment Opportunities for Disabled Americans Act, my colleagues and I were very aware of the new spending implications that may be associated with the demonstration programs in the bill. Fortunately a strong benefit-cost case can be made for such programs and the section 1619 work incentive. Collectively these initiatives represent a sound investment in fiscal terms. Their principal purpose is to convert disabled persons into taxpayers. The full contribution they will make to the U.S. Treasury may be difficult to project at this point, but costs of disability and unemployment have been documented. To reduce these costs should be a major objective in any deficit reduction plan. The magnitude of the problem is self-evident. For example, for the year 1981—a year in which extensive data on the disabled and unemployment were compiled, these data figures are available: 13.1 million disabled persons were between 18 and 64 years of age—usually defined as working age; 83.5 percent of this age group were unemployed; or only 16.5 percent were employed; 13.6 percent or 1,779,720 of this age group were receiving SSI benefits; 21.2 percent or 2,776,519 disabled persons of working age were receiving SSDI benefits; 1.12 percent or 19,934 of SSI recipients were rehabilitated; less than 1 percent or 18,839 of SSDI recipients were rehabilitated.

Although we cannot determine from these data how many of disabled SSI and SSDI recipients of working age were employed, we do know SSI and SSDI recipients constituted 34.8 percent of the 13.1 million disabled persons between 18 and 64 years of age. Further we know that only approximately 1 percent of this 34.8 percent were rehabilitated, much less employed. The four barriers to employment I have mentioned, directly or indirectly, contributed to unemployment or the underemployment of such persons. Moreover, costs of such unemployment and underemployment to society were enormous not only in human but in fiscal terms. By one estimate, $184.6 billion was spent in 1981 on disability payments to disabled persons of working age: $114 billion for health care—$50.16 billion paid by the Federal Government; $70 billion paid for wage replacement.

The significance of these costs increases if we stop to remember that such costs are for 1 year only, and these benefits are paid every year to every recipient who remains unemployed. By increasing employment and lowering cash outlays for SSI and SSDI benefits, we will be making a de-

monstrable contribution to deficit reduction.

It is imperative that we learn to manage the present if we are to have a future in which disabled citizens, as well as other citizens, benefit. Management of disability costs, reduction of disability costs now, is essential and timely. To reinforce this point, consider an analysis of disability expenditures prepared by Monroe Berkowitz, an economist with the Bureau of Economic Research at Rutgers University, who has studied disability expenditures for the last 15 years. The analysis is of data from 1980 to 1982. Such expenditures include transfer payments, medical costs, and direct services costs. These expenditures increased 401 percent for the 12-year period. In 1970, the total disability expenditures were $24 billion. Expenditures for 1982 were $121.5 billion. The 1982 expenditure figure represented 4 percent of the gross national product, up from 2.4 percent. In 1970, disability expenditures constituted $211 of per capita income; by 1982 it constituted $865 of per capita income.

These dramatic increases from 1970 to 1982 are also reflected in Berkowitz' data for SSI income support payments and Medicaid payments. In 1970, SSI payments were $573.5 million; in 1982, similar payments were $4.2 billion—a 640.4-percent increase (estimates by the Ways and Means Committee are even higher at over $8 billion). In 1970, medical costs paid by the Federal Government were $1.2 billion—in 1982 similar costs were $11.7 billion—an increase of 821.6 percent.

According to the staff of the Ways and Means Committee, in September 1984, the disabled SSI population of working age was 1.7 million; the total SSI population was 4 million. Thus, about 40 percent of the SSI population was disabled in 1984, and, to that extent, received SSI and Medicaid benefits from the Federal Government.

If we create employment opportunities and work incentives for the disabled SSI population now, then we will make a noticeable impact: We will reduce the amount the Federal Government pays in SSI and SSDI benefits to disabled persons in the future.

We have additional incentives for planning for the future—the younger disabled SSI population has increased dramatically. For example, the disabled SSI population under 18 approximately doubled from December 1975 to September 1984, from 104,000 in 1975 to 201,000 in 1984, and the disabled SSI population, age 18-22, increased by 40 percent in the same period. We must respond to the needs of the emerging generations. These young people and those responsible for their care and development have different expectations than those evident a decade ago. They expect to have access to appropriate services and training, and to have opportunities for independent living and jobs. They have different attitudes than those evident a decade ago. They believe that it is just as appropriate, perhaps more appropriate, to adapt environments to people as to adapt people to environments. The cosponsors and I hope that the Employment Opportunities for Disabled Americans Act will promote wider adoption of such an attitude.

The general climate is conducive to such an attitude—civil rights guarantees provided through Public Law 94-142 and section 504 of the Rehabilitation Act ensure broader access and opportunity. Steps have been taken by the private sector: the Washington Business Group on Health initiative is working to reduce disability costs in the work place; the Dole Foundation was created to promote the economic independence of disabled persons; technological advances have been targeted to maximize the abilities of the disabled; moreover, trade associations, business and industry have made efforts to develop job opportunities for disabled Americans. The Employment Opportunities for Disabled Americans Act will complement and help to expand a positive employment climate for the disabled.

I welcome the cosponsorship of all my colleagues. The bill we introduce today is a response to a basic human need—the opportunity for employment—and it is fiscally justifiable.●

TELEPHONE TERMINAL EQUIPMENT CERTIFICATION ACT OF 1985

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. RINALDO. Mr. Speaker, I am introducing legislation today which is designed to ensure that trade reciprocity is accorded to American manufacturers of telecommunications equipment.

This legislation would require that the Federal Communications Commission establish stringent standards for the processing of applications for certification of telephone terminal equipment from nations which discriminate against equivalent American products. Among other things, the Commission may require the submission of prototypes or production samples. The Commission is also advised to give priority to certification of U.S. products or those from foreign nations which do not discriminate aganst U.S. manufacturers. Products from countries that maintain barriers against U.S. exports would be the last to be certified in this country.

As late as 1982, the United States had $850 million trade surplus in telecommunications equipment. Yet, just 1 year later, after the divestiture of AT&T, the U.S. imported $38 million more of this equipment than it exported. Last year, the deficit in telecommunications equipment was more than $600 million.

Perhaps nowhere are the barriers to American manufacturers greater than in Japan. In 1984, American manufacturers sold $110 million worth of telecommunications equipment in Japan compared with Japanese exports to the United States of $1.5 billion. The House Subcommittee on Telecommunications, Consumer Protection and Finance has spent more than 3 years focusing upon the procurement policies of the Nippon Telephone & Telegraph Co., the Japanese Government-owned telephone monopoly. Despite our efforts and repeated assurances by the Japanese Government that they will commit themselves to more open procurement policies, there has been very little improvement. Indeed, our telecommunications trade deficit with Japan has quadrupled in the last 4 years, and U.S. manufacturers continue to face a myriad of nontariff barriers which makes entry into their market almost impossible.

The closed Japanese market enables them to amortize the fixed costs of production as well as research and development in sales in their domestic market. This not only results in an indirect subsidy of their exports, but also means that developing nations closed out of the significant Japanese market direct a larger proportion of their energies to the United States where no barriers to trade exist.

While we know that other U.S. industries are also facing severe setbacks because of their failure to reinvest in state-of-the-art technology, this has not been the case with the telecommunications industry. Last year alone, U.S. manufacturers spent $3.8 billion on research and development efforts and our record of innovation and competitive dynamism remains the envy of our trading partners.

The procurement of telecommunications equipment in Japan and in most other foreign nations comes primarily from state monopolies which operate the national telephone, telegraph, and data transmission systems. Most of these systems pursue a buy national policy which effectively keeps their markets closed and ultimately creates an important advantage in pursuing an aggressive export policy.

I remain firm believer in free trade, believing that American industry and labor has the ability to meet the challenges of the international marketplace. Yet, I also feel that our trading partners should not be entitled to enjoy the benefits of an open market

in the United States while closing their doors at home. Thousands of persons are employed in this industry, and it is time for us to ensure that they enjoy the same advantages as their competitors in Japan and Europe.●

TABULATION OF 1985 QUESTIONNAIRES

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. HUBBARD. Mr. Speaker, in January of this year I distributed my 1985 questionnaire throughout the First Congressional District of Kentucky. A total of 34,898 western Kentuckians responded to the questionnaire.

The questionnaires which were completed and returned to my office were tabulated by my staff and 116 college students at Murray State University and the community colleges at Henderson, Hopkinsville, Madisonville, and Paducah, KY.

The results of the questionnaire will be published in the near future. However, I would like to take this opportunity to thank the faculty and students for their hours of effort in scoring the questionnaires. Indeed, their assistance with the tabulation of the thousands of responses has been invaluable.

The following are the names of the faculty and students who helped me with the tallying of the 1985 questionnaires:

MURRAY STATE UNIVERSITY

Dr. Winfield H. Rose, chairman, department of political science, Beth Baton, Terry Cain, Elizabeth Eissler, Robyn Fridy, Samuel Hall, Judy Harrison, LuAnn Loberger, John Mayolo, Carol Norcia, Machelle Owens, Susan Parkinson, Natalie Tabor, and Richard Watson.

HENDERSON COMMUNITY COLLEGE

Brent Smith, instructor of history and political science, Donna Barron, Sheila Burns, Robert Campbell, Renee Grace, John R. Greenwell, John Hagman, Phyllis Herrin, Sharmari L. Konsler, Emmett Mayhall, Mary Anne McBride, Jackie Roberts, Gary A. Samples, Paul Schmuck, Mike Scott, Courtney Settle, Gwen Shockley, Kelly Steward, Peggy Stone, and Amy R. Zachary.

HOPKINSVILLE COMMUNITY COLLEGE

Don Hoover, associate professor of history and political science, James B. Camp, Linda Cansler, Charles E. Crabtree, Dale Cunningham, Tim East, Lilian E. Glass, Steve Grace, Curtis W. Green, James Harnage, Joyce Henderson, Rubin E. Jones, Jr., Tracy Kunkel, Melvin D. Ladd, John T. Mitchell, David Moddrelle, Wade Moore, Betty J. Petty, Helena Radford, Stephanie R. Rice, Billy B. Taylor, and Cynthia D. White.

MADISONVILLE COMMUNITY COLLEGE

Tim Cantrell, chairman of social sciences, Eddie Albin, Jackie Armstrong, Sharon L. Cain, Gladys Conway, Phyllis Green, James W. Hancock, Kathryn Hancock, Karen W. Imboden, David Kittinger, Melissa Darnell Payton, Jim Ramsey, Marie Ramsey, Vonda Lynn Rickard, and Wanda Sisk.

PADUCAH COMMUNITY COLLEGE

Dr. Chun Ro, chairman, division of social sciences, business, and related technologies, Terri Adams, Vic Adams, Amy Barnhill, Robyn J. Barringer, Linda Bishop, Carol Bonds, Kim Bonds, Greg Brown, Christina Campbell, Todd Cooper, Byron Kelly Cox, Sandra Crawford, Todd Dick, Matthew Doom, Scott Elkins, Laura Evans, Michael Fenwick, Mike Fulgham, Kelly Giles, Lisa Grubbs, John Hagler, Cindy Hardy, Lori Hardy, Todd Hatchcock, Beth Howie.

John Ingram, David W. James, E.J. Emil Jezik, Gregg Jones, Dana Karnes, Sue Khatibi, Roger Lamb, Kevin Long, Lois Manning, Dana Martin, Gilly Martin, Billy Metcalfe, Lisa Mick, David Miller, Lisa Morris, Rudell Pate, Joe Paul, Walter K. Penny II, Harold Riley, Greg Ringstaff, Dennis Roberts, John Scott, Trent Duane Smith, Bubba Spain, Michele Trevathan, Eva Walker, and Johnna Wilson.●

THE FARM CRISIS

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. ROSE. Mr. Speaker, an excellent analysis of the farm situation appeared in the Washington Post on April 7, and since many Members were in their home districts then, I would like to appear with my remarks, so that all of us can benefit from its perceptiveness. Its author, James R. Dickenson, points out that while only a very small percent of our people is directly involved in agricultural production, that small percent delivers the security of at least adequate food supplies for us and a lot of the rest of the world. It also points out that we're losing a younger generation of farmers—a dangerous precedent.

Mr. Speaker, I introduced H.R. 2017, the Agricultural Act of 1985, on April 4 because I want to head off and diminish, if not eradicate, the problems the Post article warns about. A description of my bill is on page 7755 of the April 4 RECORD, and I know that Members are going to be letting me know what their views on it are. I welcome that.

Summed up, Mr. Speaker, my bill would:

Drop the target price and diversion payments system, and, instead, establish loan rates at an acceptable level, 75 percent of parity, to raise farm income and maintain adequate supplies for consumers.

Permit repayment of the loans at market price levels, to increase exports and keep prices to consumers reasonable.

Deny loans to speculators and others who break out highly erodable land, wetlands, or timberlands.

Run the program on a bushels and pounds basis, unless the Secretary of Agriculture determines that it should be run on an acreage basis. I am still considering a limit on the amount of money that could be loaned, including soybeans in the bill, and other modifications, and I would like to include three tables which provide additional information.

THE FARM CRISIS: TWADDLE AND TRUTH

(By James R. Dickenson)

There is a lot of nonsense about the nation's current agriculture woes being spread around these days, much of it by President Reagan, much by supposedly tough-minded and knowledgeable administration spokesmen such as budget director David Stockman, who seems to believe that the trouble is simply a matter of greedy, stupid farmers being punished with bankruptcy.

Such twaddle only masks the fact that our farm problems go well beyond the widespread suffering and heartbreak of farm families individually and rural society in general.

The farm difficulties have a potentially long-term adverse effect on our future farm productivity, which is why there is an unusually high level of public concern about our agriculture problems. People get uneasy when they sense that agriculture is in serious trouble because they know that the security of the nation's food supply is crucial.

Foremost among the erroneous ideas so blithely being fostered by the free marketeers of the administration is that it is inefficient, marginal and greedy farmers who are being forced into bankruptcy as atonement for their mistakes and sins, and that what will emerge thanks to the magic of the market system is a lean, efficient farm industry.

Second is that farm efficiency and productivity is in direct proportion to size because of ongoing technological and scientific improvements—that big is good and bigger is better.

In the first case, the opposite is happening. Most of the farmers being forced into bankruptcy are the younger, more aggressive, more progressive and most willing to take risks. Those who are surviving are generally older, less educated, smaller operators who are less productive but have a tolerable debt ratio.

"What we're seeing has little to do with efficiency because we're cutting out farmers on the basis of debt, not efficiency," says Prof. Neil E. Harl of Iowa State University, one of the nation's leading agriculture economists. "We're cutting out the young, aggressive managers who have set the pace in efficiency. And America doesn't have as much excess [agricultural productive] capacity as many think."

This is partly because the strength of the dollar has cut greatly into American farmers' ability to compete in the export markets that were a great source of their prosperity in the 1970s, with the result that surpluses are piling up at home and driving prices down. The strength of the dollar is a "devastating force" working against the farmers. Until it is devalued by 20 or 30 percent we are going to continue to have serious agriculture problems, Harl says.

The troubles that are driving the best and brightest out of farming began in the 1970s, when they incurred their now intolerable debt loads buying land and machinery. Some were motivated by greed by many

were trying to get a rational hedge against inflation, just as nonfarmers were by indexing wages and income tax brackets.

And many young farmers, who started as most of them do by renting land, were at the normal age to start buying land of their own, which they have to do if they don't want to remain perpetual tenants. Land prices and interest rates were high but inflation kept pushing them up and up, and to many young farmers it seemed that land was moving out of reach, so they grabbed for it.

Iowa State University studies show that the average age of the Midwest farmers who have the lowest debt/asset ratio—10 percent or less of total assets—is 61. The average age of those whose debt/asset ratio is 11 percent to 40 percent is 53. For those in the debt/asset range of 41 percent to 70 percent, the average age is 48. For those 70 percent and over it's 46.

The younger the farmer, the better educated and more productive he is. A farmer's productivity follows a bell curve, according to Harl. It climbs as he builds his operation, is highest between ages 45 and 55, then efficiency and farm size start to fall as he begins to pull back, phase out, turn it over to a son or sons and starts easing into retirement.

There is also the erroneous idea that the demise of a large number of family farmers is inevitable because bigger operations are more productive. In Midwest corn, cattle and hog farming, peak efficiency of scale is reached with about 600 acres. Bigger operations don't enjoy additional economies, and corporate farms particularly start suffering inefficiencies because of problems of management and motivation.

"There are problems of control and coordination, and corporate employees aren't profit-oriented because they don't have a stake in the operation," Harl says. "The Midwest family farm has a high level of management ability and, because of that plus a high level of capital and credit available, corporate farms have been kept out of most states except a few such as California, Hawaii and Florida. States that have limits on farm size don't have a different farm structure than those that don't."

The farmers' worst enemies are public policies such as the huge federal deficits that have the dollar overpriced and contribute to high interest rates and tax provisions that were supposed to help the full-time family farmers. Instead, they have mostly benefited the wealthy who invest in unprofitable operations as tax shelters and encouraged land speculators—"sod busters"—who are paid by the taxpayer to drain wetlands and plow under fragile grasslands to put into crops that are already in surplus. You don't hear of suicides by those operators.

That's why the administration's proposal to do away with price supports eventually is crazy unitl there is a rational economic environment for the most productive farmers. To throw so many into an open market situation—and bankruptcy—under the burdens they now bear is not only desperately unfair but counter to the national interest.

"In the fall of 1983, we were closer to the bottom of the barrel in grain supplies worldwide because of drought and the PIK program [payment in kind of products to farmers as an incentive to curb production] than most realize, probably the lowest in two decades," Harl says. "It wasn't apparent because of our domestic surplus due to our fall off in exports because of the dollar."

There's a reason why the hard-ball remarks of Stockman, a former flower child turned Social Darwinist, and the bad Gridiron Club jokes of President Reagan ("I think we should keep the grain and export the farmers") deserve the contempt with which they were received. Neither of them knows what he's talking about.

TABLE A.—DEFICIENCY AND DIVERSION EXPENDITURES, 1981–84 CROP YEARS

[In thousands of dollars]

	Wheat	Corn	Other feed grains[1]	Rice	Upland cotton	Annual total
Crop year:						
1981:						
Deficiency	414,300		281,085	21,521	467,361	1,184,267
Diversion	221,000					221,000
1982:						
Deficiency	476,469	290,852	124,230	267,215	522,454	1,681,220
Diversion			92			92
1983:						
Deficiency	770,645		47,795	233,047	432,453	1,483,940
Diversion	309,309	903,487	150,151	23,089	2,544	1,388,580
1984:						
Deficiency	1,115,000	1,630,000	205,000	377,370	613,000	3,940,370
Diversion	528,000					528,000
Total deficiency and diversion	3,834,723	2,824,339	808,353	922,242	2,037,812	10,427,469

1982	8.14	8.11	10.85	[2] 65,152,000
1983	8.14	8.76	11.40	[2] 39,990,000
1984	8.00	8.11	11.90	[2] 55,234,000
1985	8.00		11.90	

[1] Bushels.
[2] Hundredweight.
[3] Bales.
[4] Cannot be determined until after Oct. 15.

Parity Stands at 55

Prices received by farmers during February were unchanged from January, according to the latest USDA Agricultural Price Report. Lower prices for cotton and soybeans were offset by higher prices for cattle and hogs. The index is 6.2 percent below one year ago.

Prices paid by farmers remain unchanged from a month earlier and a year ago. Declines from a month earlier for feed, fuels and energy, and building and fencing were offset by an increase for feeder livestock.

The parity ratio this month stands at 55, compared to 58 for February of 1984.

In the table below, the first column is prices received for the various products as of Feb. 15. The second column is 100 percent of parity for each item as of Feb. 15. The third column is the percentage of parity that farmers were getting for the items at mid-month.

Commodity and unit	Prices received	100 percent of parity	Percent of parity received
Wheat (per bushel)	$3.37	$7.08	48
Corn (bushel)	2.62	5.15	51
Barley (bushel)	2.16	4.77	45
Grain Sorghum (hundredweight)	4.20	8.70	48
Soybeans (bushel)	5.74	12.80	45
Dry Edible Beans (hundredweight)	18.30	40.00	46
Cotton, Upland (pound)	.479	1.24	39
Milk (hundredweight—all)	13.80	23.50	58
Beef Cattle (hundredweight—all)	58.70	101.00	58
Calves (hundredweight)	66.20	114.00	58
Hogs (hundredweight)	49.60	89.60	55
Lambs (hundredweight)	64.70	114.00	57
Wool (pound)	.653	2.35	28

COLORADO RIVER FLOODWAY PROTECTION ACT

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. CHENEY. Mr. Speaker, on February 25, 1985, I introduced legislation, the Colorado River Floodway Protection Act, to improve the management of the Colorado River. The Colorado is a major natural resource for the seven Colorado River Basin States, including my home State of Wyoming. The legislation I introduced will allow the existing Colorado River reservoir system, in which billions of dollars have been invested, to function efficiently by maximizing the water storage capability of the system. In that sense, the legislation is a water resources conservation measure.

The Colorado River Floodway Protection Act, H.R. 1246, formally designates a floodway for the Colorado River between Davis Dam and the U.S. border with the Republic of Mexico. Within the designated floodway, an area required to accommodate part of unusually high river flows, the legislation provides that most forms of future Federal financial assistance to persons and development will be prohibited.

My interest in this legislation originated in the high water conditions on the Colorado River in 1983. The Committee on Interior and Insular Affairs, on which I serve, held 2 full days of field hearings on these problems in September 1983. At these hearings, it became clear that there had been significant encroachment in the floodway of the Colorado River below Hoover Dam since that dam was designed and built.

Since the basic purpose of the Colorado River reservoir system is to store water in order to satisfy the interests of many different river users, it is important that requirements for flood control space—that is, empty space in the reservoirs—be rationally related to the multiple purposes served by the reservoir system. Encroachments on the floodway of the river, limiting its use, may lead to requests for broadened flood control requirements to substitute for the flow accommodation and dam safety protection potential of the floodway.

The Colorado River is perhaps the most highly regulated river in the United States. The Federal Government is by far the largest landowner in the area which would be affected by this bill. And finally, the seven Colorado River Basin States have made multibillion-dollar investments in the river reservoir system, a system which would be made more efficient by this bill. For these reasons, legislation to deal with the specific management issue presented by encroachment on the Colorado River Floodway is desirable.

The legislation I have introduced will preclude Federal assistance for future encroachments in the floodway, thus limiting incentives for development in this high hazard area. The floodway boundaries were chosen to accommodate the existing Corps of Engineers flood control regulations for Hoover Dam, with appropriate adjustments for high flows on downstream tributaries and watersheds. The choice of the existing Corps of Engineers flood control regulations for the upstream element of the floodway definition was based in significant part on the fact that the Corps of Engineers had only recently completed an exhaustive review of these regulations and concluded that on balance they best served all of the varied interests of users of the river.

I think it is important to be clear about certain features of the bill, which is modeled in significant part on the Coastal Barrier Resources Act, Public Law 97-348. First, the bill does not alter in any way the existing legal authority of various agencies, particularly the Department of the Interior and the Department of the Army (Corps of Engineers), to regulate the Colorado River and its reservoir system. If changes in river regulation are necessary or desirable, they can be made after the bill is enacted in precisely the same manner in which they can be made under existing law. Second, the bill does not impose any legal limitations on private development of any kind. If it is enacted, private development will be able to occur exactly as it does today. Third, the legislation provides a series of "grandfather" provisions for existing residents and development, and therefore applies essentially prospectively.

I am pleased that my colleague from California GEORGE MILLER, the chairman of the Subcommittee on Water and Power Resources, has agreed to join in cosponsoring this legislation. I believe the legislation is very much in the interest of all seven of the Colorado River Basin States. I look forward to working with my colleagues to enact this legislation, which is a significant first step in dealing with the problem of high water on the Colorado River.●

FIVE OUTSTANDING CITIZENS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. GILMAN. Mr. Speaker, following the fine tradition of Sons of the American Revolution Organizations across the Nation, the Stony Point Chapter in New York recently honored five outstanding citizens during its 21st Annual Awards Dinner. The five honorees recognized on this occasion for their community service were Ernest Bradley Bobb, of Nyack; Charles Hatala, of Garnerville; Hon. David S. Ritter, of New Hampton; Mrs. Marian Valentino, of Blauvelt; and George White, of Haverstraw.

Through their hard work and dedication to public service, these five awardees have enriched not only the Stony Point community but all of our region's citizenry. I am proud to commend their efforts today.

Designated as "Man of the Year" and "Woman of the Year" respectively were Bradley Bobb and Mrs. Marian Valentino. As Nyack Junior High School assistant principal, Bradley Bobb has enhanced students educational opportunities by planning and implementing outdoor education programs. He has also contributed to community education as town historian and by coordinating reenactments of historical events. Mrs. Valentino has served the community as a longtime volunteer for a variety of charitable, civic and historic organizations. Among her many activities, Mrs. Valentino is a founding member and first chair of the Raymond DeMeola Veterans of Foreign Wars Ladies Auxiliary.

The S.A.R. Good Citizenship Award was presented to George A. White, an artist and art teacher. For the past few years, Mr. White has dedicated his talents to the community by teaching others, including children and the mentally and physically handicapped.

S.A.R. Law Enforcement Awards were presented to Orange County Judge David S. Ritter and Haverstraw Police Officer Charles Hatala for service above and beyond the call of duty. Judge Ritter was honored for his efforts in the Rockland County Brinks robbery and murder trials, over which he presided. He has devoted his past 21 years to Orange County law enforcement as assistant to the district attorney, as district attorney from 1976-1979, and finally as Orange County court judge.

Police Officer Hatala was honored for his heroism in rescuing four small children and one adult from a burning building and for his alertness in calling for help. Officer Hatala entered the burning building three times to search for the five victims and to lead them to safety.

The accomplishments of these five distinguished people clearly demonstrates their devotion to society both in their work and in their leisure. They serve as an inspiration to us all. It is my hope that the S.A.R. will continue to recognize such good citizens to serve as worthy examples of achievements for which the youth of today can strive.●

A TRIBUTE TO CAMPUS PARK SCHOOL

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. COELHO. Mr. Speaker, the students of the Campus Park School in Livingston, CA, recently held a fundraising drive to raise money for the restoration of the Statue of Liberty. Due to their hard work and dedication to their project, they succeeded in raising $500.

The project was spearheaded by a teacher at Campus Park School, Ms. Mary Lima. With the help of the school's principal, Mr. Henry Escobar, Ms. Lima and the students of Campus Park held bake sales, craft sales, and an aluminum can drive to raise funds for the restoration project.

This effort by schoolchildren across the United States to raise the funding necessary to restore the Statue of Liberty is very important, because the statue is much more than a simple copper shell. Instead, she is a symbol representing the ideals of liberty and democracy which are so cherished by the people of the United States. As long as the lady stands guard in New York Harbor, welcoming new immigrants to our country with her torch held high and proud, she will remind us of the fundamental freedoms our great Nation was built upon over 2 centuries ago. The movement to restore and rededicate the Statue of Liberty is also a movement to restore and rededicate our Nation's commitment to these fundamental freedoms.

I am very proud of the students of the Campus Park School for their part in this movement, and I commend them for their noble efforts to keep the torch of liberty burning brightly, long into the future.●

YOUTH POLICY INSTITUTE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mrs. SCHROEDER. Mr. Speaker, I wanted to bring to the attention of my colleagues and their staffs a rather special opportunity to stretch those legs after the long winter, and for a good cause to boot.

In 1908, President Theodore Roosevelt issued an Executive order proclaiming that marines should be able to march 50 miles in 20 hours. Half a century later, President John F. Kennedy, challenged American citizens to improve their physical fitness and urged members of his administration to set an example. Attorney General Robert F. Kennedy accepted the challenge and set out on a 50-mile trek to Camp David on a cold February day with several Justice Department colleagues. Only Kennedy finished the walk; 2 years ago, young people at the Youth Policy Institute, a spinoff of the Robert F. Kennedy Memorial, decided to take on the challenge as well. Since then, the institute has sponsored the challenge walk as a fundraiser to provide scholarships for minority students. The institute is a private, nonprofit research group established in 1978 to provide opportunities to young people to monitor, analyze, and report on Government policies affecting youth.

This year's walk will begin early in the morning on Saturday, April 20, at Fletchers Boat House, Washington, DC. Detailed information can be obtained by contacting Mrs. Judith Hackett at YPI at 635-6087. This event combines an exciting personal challenge and an opportunity to help an important effort to broaden minority participation in Government. I urge you all to put on your walking shoes, or short of that, pray for sunshine.●

THE NEED FOR FEDERAL REGULATION OF LANDFILL EMITTED GASES

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. MARTINEZ. Mr. Speaker, I rise today to offer legislation aimed at addressing the problem of gas emissions from landfills. The bill simply amends the Solid Waste Disposal Act [RCRA] to require that EPA promulgate regulations concerning landfill emissions.

I would like to quote Hon. Jennings Randolph. He said, "We as individual Members of Congress have a responsibility to make the public aware of the potential for reusing large amounts of solid waste." Mr. Chairman and esteemed colleagues, I wish to align myself with the Senator and submit that Congress should not only protect the public, but also provide leadership in changing ideas and finding solutions to the problems of waste and waste management.

This bill will accomplish this goal. It protects the public, their health and quality of life, by requiring gas collection devices be installed at landfills. Second, by requiring gas collection the bill will promote better waste management.

The problem is clear. I am sure all of us have driven past a landfill on a hot day only to be nearly overcome by the horrendous odor. My bill will address this problem, and holds landfill emission containment as its goal.

The beauty of the program is that the gas that is captured is a marvelous source of fuel. This is a key part of the effective waste management to which Senator Randolph was referring. In addition to recycling our bottles and cans, we should value our decomposable wastes as well, and use their potential energy to its fullest.

My experience with waste management spans nearly a decade as a city official and as a member of the California Solid Waste Management Board. I have seen the gas collection and reclamation technology and I know it can work. And so do at least 75 landfill owners or operators who have invested in gas energy systems. More facilities are on the way.

I would like to take this opportunity to discuss several other reasons to support this legislation.

Until such time that dumping in landfills is phased out and improved methods of waste management can be implemented, economic and population growth in this country will cause more solid waste to be produced and deposited into landfills. These larger landfills can be managed to produce greater quantities of combustible gas. With respect to the gases released from landfills; continuing technological improvements in landfill management will increase the supply of landfill gas and improve its purity.

Although improved criteria concerning siting of landfills are called for in last year's RCRA amendments, continued encroachment of urban and suburban populations towards existing landfills will increase the possibility of human contact with the potential hazards which exist at some of these sites. Since the amendments were passed last year, EPA has been at work reorganizing itself and adapting its regulations to comply with the new law. This is the perfect time for Congress to voice direction and more specific intent on this issue.

I strongly believe the assurance of proper collection, disposal, and regulation of solid wastes and their byproducts should remain primarily the responsibility of State government—in cooperation with county, or local agencies—and landfill management. But the problem has become national in scope and concern. Landfill problems necessitate Federal action to ensure that State regulatory agencies address landfill gas by enforcing Federal, State and local regulations to deal with landfill gas migration and by encouraging the recovery of landfill gas for utilization. The State will also benefit by having the support of the Federal Government and Federal statutes when dealing with uncooperative landfill management.

I also believe Federal action should take the form of technical assistance and leadership in the development, demonstration, and application of new and improved methods and processing

of landfill gas. Recent cuts in the Department of Energy budget and the great demands put on EPA funding have severely curtailed this sort of Government leadership. Requiring collection will provide an incentive to use private capital for energy systems.

This legislation has several important health and environmental benefits to those who live or work near landfills. Very often the gas which escapes from landfill carries with it a hazardous substance, but normally at very low—nonhazardous—level. Most landfill gas is either not collected and allowed to escape into the atmosphere, or burned-off emitting potential hazards into the air.

One of the major changes in modern landfill management is to separate hazardous substances from sanitary solid wastes—paper, food, cardboard, and so forth. Most landfills are safe, but those that do pose a threat, EPA must have authority to take action. Disposal of solid waste in or on the land without careful planning and management, however, can cause conditions which endanger human health and the environment.

Collection of landfill gases before they reach the ground's surface will reduce the potential contact with surrounding populations and improve the quality of life of those around the site by reducing unpleasant odors. Unlike solid or liquid waste, polluted air quickly travels across legal boundaries to irritate nearby inhabitants.

The best known problem related to gases produced from landfills is that of underground migration. The fire and explosion at the Lorton Youth Facility last December is an example close to home of how deadly this situation can become. At Lorton the landfill gas traveled underground into a neighboring building, where it collected and exploded. Underground migration of landfill gases tend to travel along the path of least resistance, such as utility and sewer lines.

Methods of keeping our air clean must be developed since much of the air over our cities threatens the health of the elderly or sick. In the Los Angeles basin any addition to the already dirty air is cause for concern. Even a small reduction in the amount of impurities in the air is worthy of our support.

The methods already in use to produce energy from landfill methane have proven productive. These methods include: first, a fuel for boilers to heat businesses and homes; second, to generate electricity either by producing steam or directly with turbine generators; third, processed to remove the carbon dioxide and sold to gas utilities to supplement natural gas supplies; fourth, as a chemical feedstock for use in producing plastics; fifth, for use in fuel cells to produce electricity.

Although landfill methane energy technology is not appropriate in every case, I believe critics are unaware of the great strides that have taken place in the technology in recent years. Critics say that the quantities of gas are too small to be productive. They are wrong. The quantities of methane produced from landfills are significant and can become a needed supplement to America's energy supply. Studies by the American Gas Association have shown that billions of cubic feet of methane are wasted each year from lack of collection or burn-off. With the introduction of fuel cells, even small landfills can now productively use the methane produced. I believe this supplement will reduce America's dependence of foreign, unstable sources of petroleum.

Critics state that the methane produced at landfills is too impure and too diluted to burn properly. I disagree. Methods do indeed exist to improve the Btu content and remove the impurities from methane gas collected from landfills.

I urge all my colleagues to review and support the Landfill Gas Collection and Reclamation Act of 1985. For the benefit of my colleagues, I would like to have the text of the bill inserted into the RECORD at the end of my remarks.

H.R. —

A bill to amend the Solid Waste Disposal Act to reduce the risk to public health and the environment associated with gas leaks from landfills

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Landfill Gas Collection and Reclamation Act of 1985".

SEC. 2 FINDINGS.

(a) GAS RELEASES.—The Congress finds with respect to methane and other gases released from landfills:

(1) The continuing technological improvements in methods of collection, refinement and use of combustible landfill gases will allow greater quantities of the landfill gas available to be put to productive use.

(2) Continued economic and population growth in this Nation will result in more and more waste produced and deposited into landfills, (until such time that dumping in landfills is phased out and improved methods of waste management are found) which, if managed properly will produce even greater quantities of combustible gas;

(3) Even with RCRA criteria concerning siting of landfills, continued encroachment of urban and suburban population towards existing landfills will increase the possibility of human contact with the potential hazards which exist at some of these sites.

(4) While assurances of proper collection, disposal, and regulation of solid wastes and their by-products should remain primarily the responsibility of State government, (in cooperation with local agencies), and the landfill management, the problems associated with landfills emissions have become national in scope and in concern and necessitate Federal action to ensure that State regulatory agencies address landfill gas by enforcing current Federal, state and local regulations that deal with landfill gas migration and secondly by encouraging the recovery of landfill gas for utilization. Federal action should also take the form of technical assistance and leadership in the development, demonstration, and application of new and improved methods and processing of landfill produced gas.

(b) ENVIRONMENT AND HEALTH.—The Congress finds with respect to the environment and health, that:

(1) Although useful in several applications, some landfill-produced gas is either not collected and allowed to escape into the atmosphere, or burned-off emitting potential hazards into the air.

(2) Disposal of solid waste in or on the land without careful planning and management could cause dangerous conditions to human health and the environment. Although most gases emitted from landfills are harmless, gases from some landfills may carry with them substances, which could be hazardous or carcinogenic at certain concentration levels.

(4) Collection of these gases before they reach the ground's surface will reduce the potential contact with surrounding populations and improve the quality of life of those around the site by reducing unpleasant odors.

(5) Unlike solid or liquid waste, polluted air is difficult to contain once released into the atmosphere. It can quickly travel across legal boundaries to threaten nearby inhabitants.

(6) Landfill gases, including methane, can travel underground and emerge into neighboring buildings causing potential for explosion and fire. Landfill gases tend to travel along the path of lease resistance, (e.g., utility and sewer lines).

(7) Alternative methods of cleaning the air must be developed since much of the air over our cities threatens the health of the elderly or sick under certain meteorological conditions.

(c) MATERIALS.—The Congress finds with respect to the quality and availability of methane gas that:

(1) Billions of cubic feet of methane are wasted each year from lack of collection or burn-off.

(2) Methods are available to improve the BTU content of methane gas collected from landfills.

(3) The recovery and conservation of this methane can reduce the dependence of the United States on foreign resources and reduce the balance of payments deficit.

(d) ENERGY.—The Congress finds with respect to energy, that:

(1) Landfill gas represents a potential energy resource which can be used as a fuel for boilers to heat businesses and homes; to generate electricity either directly with turbine generators or indirectly by producing steam.

(2) Landfill gas can be processed to remove the carbon dioxide and sold to gas utilities to suppliment natural gas supplies, used as a chemical feedstock for use in producing plastics, or for use in fuel cells to produce electricity.

(3) The need exists to develop alternative energy sources for public and private consumption in order to reduce dependence on such non-renewable sources such as petroleum.

(4) Technology exists to produce usable energy from methane collected from landfills.

SECTION 3. CONTROL OF GAS AT SUBTITLE D FACILITIES.

(a) FEDERAL GUIDELINES.—Section 4002 of the Solid Waste Disposal Act is amended by adding the following new subsection at the end thereof:

"(d) SPECIFIC GUIDELINES FOR LANDFILL GAS CONTROL.—

"(1) SPECIFIC GUIDELINES FOR CONTROL OF GAS.—Not later than 12 months after the date of the enactment of the Landfill Gas Collection and Reclamation Act of 1985, the Administrator shall amend the guidelines promulgated under subsection (b) to include specific guidelines concerning the collection and control of gas from solid waste disposal facilities which received putrescible waste.

"(2) STANDARDS AND CRITERIA.—The guidelines shall establish such standards or criteria as may be necessary to protect human health and the environment from the risks associated with gas which is present at, or which is released from, such facilities. Such guidelines shall provide that facilities required to retrofit shall also include gas collection devices in their pollution collection systems.

"(3) RECOVERY OF ENERGY AND MATERIALS.—The guidelines under this subsection shall also include provisions regarding the recovery of energy and materials from methane and other gas emitted from such facilities which are combustible.

"(4) STANDARDS FOR EXEMPTIONS.—The guidelines under this subsection shall also include provisions to set standards for granting exemptions for specific classes of landfills from such guidelines where the State determines that the application of such guidelines would be inefficient and impractical.".

"(b) MINIMUM REQUIREMENTS FOR STATE PLANS.—(1) Section 4003(a) of such Act is amended by adding the following new paragraph at the end thereof:

"(7) The plan shall provide for compliance with the guidelines promulgated in accordance with section 4002(d) regarding the collection and control of gas, and the recovery of energy and materials from gas, at solid waste disposal facilities which have received putrescible waste. The plan may provide for exemptions for specific classes of landfills from such guidelines where the State determines (based on criteria promulgated under section 4002(d)) that the application of such guidelines would be inefficient and impractical.".

(2) Section 4007 of such Act is amended by striking out "and (5)" and substituting "(5), and (7)" in each place it appears in paragraphs (1) and (2) of subsection (a) and by adding the following at the end thereof:

"(d) GAS CONTROL.—No plan or plan amendment may be approved by the Administrator under this section after the date 12 months after the date of enactment of the Landfill Methane Gas Collection and Reclamation Act of 1985 unless such plan or amendment contains provisions complying with sections 4003(a) (7) (relating to the collection and control of gas and recovery of energy and materials from landfill-emitted gas). Not later than 2 years after the date of the enactment of such Act, the Administrator shall—

"(1) review every plan approved before such 12 month date, date, and

"(2) withdraw approval of the plan unless such plan or amendment contains provisions complying with section 4003(a)(7) (relating to the collection, control, and recovery of energy and materials from landfill-emitted gas).".

(c) CRITERIA FOR SANITARY LANDFILLS.—Section 4004(a) of such Act is amended by adding the following at the end thereof:

"(c) COMPLIANCE WITH GAS CONTROL GUIDELINES.—After the date 2 years after the date of the enactment of the Landfill Gas Collection and Reclamation Act of 1985, no facility which receives putrescrible waste may be classified as a sanitary landfill unless the facility complies with the guidelines promulgated in accordance with section 4002(d) regarding the collection and control of gas and the recovery of energy and materials from gas (or unless such facility is exempt in accordance with the guidelines contained in section 4002(d).".

(d) EPA ENFORCEMENT.—(1) Subtitle D of such Act is amended by adding the following new section at the end thereof:

"ENFORCEMENT OF GAS CONTROL GUIDELINES

"SEC. 4011. (a) Definition of Compliance With Gas Control Guidelines.—Not later than 2 years after the enactment of this section, the Administrator shall determine whether each State has adopted a plan under section 4003 which meets the requirements of section 4003(a)(7) (relating to gas control). The Administrator shall make such a determination in conjunction with approval, disapproval or partial approval of a State plan under section 4007.

"(b) ENFORCEMENT.—

"(1) SECTIONS 3007 AND 3008.—In the case of any State that has not adopted a plan which meets the requirements of section 4003(a)(7) within the 2-year period specified in subsection (a), the Administrator shall use the authorities available under sections 3007 and 3008 of this title to require all facilities in such State which receive putrescible waste to comply with the guidelines under section 4002(d) (relating to gas collection, control, etc.).

"(2) TERMS USED IN SECTIONS 3008 AND 3007.—For purposes applying paragraph (1) of this subsection, after the 2-year date referred to in subsection (a)—

"(A) The term 'requirement of this subtitles' in section 3008 shall be deemed to include guidelines promulgated by the Administrator under section 4002(a) of the title.

"(B) The term 'hazardous wastes' in section 3007 shall be deemed to include solid waste at facilities that may handle putrescible waste."

(2) TABLE OF CONTENTS.—The table of contents for such subtitle D is amended by adding the following new item after the item relating to section 4010:

"SEC. 4011. Enforcement of gas control guidelines.".●

COAL GROUP TO MEET ON PROPOSED CONRAIL SALE

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1985

● Mr. RAHALL. Mr. Speaker, the Congressional Coal Group will hold a meeting on the proposed sale of Conrail on April 17, 1985, in 2167 Rayburn House Office Building, at 1:30 p.m.

Appearing before the coal group will be representatives of Chessie System Railroads, the Norfolk Southern Corp. and Conrail.

I would like to take this opportunity to inform all Members with an interest in this matter of this meeting, and to extend an invitation to them to attend.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, April 16, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 17

9:00 a.m.

•Labor and Human Resources

Business meeting, to mark up S. 484, to extend for 3 years the moratorium on the ban of the use of the artificial sweetener saccharin.

SD-430

9:30 a.m.

Appropriations

Agriculture, Rural Development and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Agriculture and related agencies.

SD-138

Appropriations

Labor, Health and Human Services, Education, and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Education, including education for the handicapped, rehabilitation services and handicapped research, special institutions, including Howard University, bilingual education, and adult and vocational education programs.

SD-116

Appropriations

Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Justice.

S-146, Capitol

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on the effect of new technologies on industrial competitiveness.
SR-253

Finance
To hold hearings to review an administration report on prospective payment for skilled nursing facilities under the medicare program.
SD-215

*Governmental Affairs
Permanent Subcommittee on Investigations
To continue hearings on the status of the U.S Government personnel security system.
SD-342

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on the enforcement of certain copyright laws.
SD-226

10:00 a.m.
Appropriations
Treasury, Postal Service, and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the U.S. Customs Service, Department of the Treasury.
SD-124

Banking, Housing, and Urban Affairs
Securities Subcommittee
To hold hearings on proposed legislation authorizing funds for the Securities and Exchange Commission.
SD-538

Environment and Public Works
To hold hearings on the nomination of A. James Barnes, of the District of Columbia, to be Deputy Administrator of the Environmental Protection Agency.
SD-406

10:15 a.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

11:00 a.m.
Environment and Public Works
To hold hearings on the nominations of Brig. Gen. Robert J. Dacey, USA, and Brig. Gen. Thomas A. Sands, USA, each to be a member of the Mississippi River Commission.
SD-406

1:00 p.m.
Judiciary
Security and Terrorism Subcommittee
To resume hearings in closed session on proposed legislation authorizing funds for the Federal Bureau of Investigation, Department of Justice.
S-407, Capitol

2:00 p.m.
Appropriations
Agriculture, Rural Development and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Agriculture and related agencies.
SD-138

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on proposed budget requests for fiscal year 1986 for programs of the Department of Energy, focusing on environment and safety programs.
SD-366

Judiciary
To hold hearings on the nomination of Joseph H. Rodriguez, to be U.S. district judge for the District of New Jersey.
SD-226

APRIL 18

9:30 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on S. 501 and S. 616, bills to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and continue low-income food assistance programs, focusing on agribusiness.
SR-328A

Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

*Governmental Affairs
Permanent Subcommittee on Investigations
To continue hearings on the status of the U.S. Government personnel security system.
SD-342

10:00 a.m.
*Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Urban Mass Transportation Administration, Department of Transportation.
SD-138

Environment and Public Works
Environmental Pollution Subcommittee
To resume hearings on S. 725, authorizing funds for fiscal years 1986 through 1990 for programs of the Endangered Species Act.
SD-406

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Veterans' Affairs
Business meeting, to mark up H.R. 752, Veterans Educational Assistance Eligibility Amendments of 1985.
SR-418

Joint Economic
Economic Goals and Intergovernmental Policy Subcommittee
To hold hearings on world petrochemical trade.
SD-538

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the National Endowment for the Humanities, and the National Endowment for the Arts.
SD-138

3:30 p.m.
Appropriations
Business meeting, to markup Senate Joint Resolution 106, to approve the obligation of funds available under Public Law 98-473 for supporting military or paramilitary operations in Nicaragua.
SD-192

APRIL 19

9:00 a.m.
Banking, Housing, and Urban Affairs
Financial Institutions and Consumer Affairs Subcommittee
Housing and Urban Affairs Subcommittee
To hold joint oversight hearings to review adjustable rate mortgages.
SD-538

10:00 a.m.
Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the role of Nicaragua in drug trafficking.
SD-430

10:30 a.m.
Finance
Health Subcommittee
To hold oversight hearings of the Peer Review Organizations.
SD-215

APRIL 22

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on the tax treatment of corporation takeovers.
SD-215

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on extended voluntary departure issues.
SD-226

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for certain defense programs, focusing on the strategic defense initiative.
SD-192

APRIL 23

9:30 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Education, including elementary and secondary education, education block grants, impact aid, research and statistics, and libraries.
SD-116

*Environment and Public Works
Environmental Pollution Subcommittee
Business meeting, to mark up S. 53 and S. 652, bills authorizing funds for programs of the Clean Water Act.
SD-406

Finance
To hold hearings on the impact of floating exchange rates on the international trading system.
SD-215

Labor and Human Resources
To hold hearings on the nomination of William E. Brock III, of Tennessee, to be Secretary of Labor.
SD-430

Rules and Administration
To resume hearings on Senate committee resolutions requesting funds for operating expenses for 1985.
SR-301

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for certain defense programs, focusing on the strategic defense initiative (policy and capability).
SD-192

Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Forest Service, Department of Agriculture.
SD-138

2:00 p.m.
Appropriations
Treasury, Postal Service, and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of the Treasury, U.S. Postal Service, and General Government programs.
SD-138

Rules and Administration
To continue hearings on Senate committee resolutions requesting funds for operating expenses for 1985.
SR-301

2:30 p.m.
Finance
To continue hearings on the impact of floating exchange rates on the international trading system.
SD-215

APRIL 24

9:30 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on S. 501 and S. 616, bills to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and continue low-income food assistance programs, focusing on commodity assistance for rural credit programs.
SR-328A

Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Education, including student financial assistance, guaranteed student loans, higher and continuing education, higher education facilities loans and insurance, college housing loans, educational research and training.
SD-116

Appropriations
Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Federal Bureau of Investigation, Department of Justice, the Legal Services Corporation, and the Securities and Exchange Commission.
S-146, Capitol

Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on proposed legislation authorizing funds for the Federal Trade Commission.
SR-253

Finance
To continue hearings on the impact of floating exchange rates on the international trading system.
SD-215

*Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings on activities of the Office of Government Ethics.
SD-342

Labor and Human Resources
To hold hearings on the nominations of Hortencia Benavides, of Texas, Leaanne Bernstein, of Maryland, Lorain Miller, of Michigan, Claude G. Swafford, of Tennessee, Robert A. Valois, of North Carolina, William C. Durant, III, of Michigan, Paul B. Eaglin, of North Carolina, Pepe J. Mendez, of Colorado, Thomas F. Smegal, Jr., of California, Basile J. Uddo, of Louisiana, and Michael B. Wallace, of Mississippi, each to be a Member of the Board of Directors of the Legal Services Corporation.
SD-430

*Veterans' Affairs
To hold hearings on S. 6, to clarify and improve certain healthcare programs and services provided and administered by the Veterans' Administration, and related health legislation affecting veterans.
SR-418

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Federal Emergency Management Agency, and the Environmental Protection Agency.
SD-124

Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the U.S. Coast Guard, Department of Transportation.
SD-138

*Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 644, to provide that loan guarantees in certain programs shall be limited only by the availability of qualified applicants and limitations in appropriation Acts, and other related proposals.
SD-232

Foreign Relations
To hold hearings on American policy toward South Africa.
SD-419

APRIL 25

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on S. 501 and S. 616, bills to expand export markets for the United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and continue low-income food assistance programs.
SR-328A

Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for ACTION (domestic programs), Corporation for Public Broadcasting, Mine Safety and Health Review Commission, National Commission on Libraries and Information Science, and National Council on the Handicapped.
SD-116

Commerce, Science, and Transportation
To hold hearings in conjunction with the National Ocean Policy Study on proposed legislation authorizing funds for the Fisheries Conservation and Management Act and fishery programs of the National Oceanic and Atmospheric Administration, Department of Commerce.

SENATE—*Tuesday, April 16, 1985*

(Legislative day of Monday, April 15, 1985)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

The things that are impossible with men are possible with God.—Luke 18: 27.

Gracious God, our Heavenly Father, You know the immense task before the Senate—the imponderables which involve not only the people of this Nation but all the peoples in the world. You know the issues which collide in the Senate—local, State, and regional concerns—special interests—social corruption and decay—individual constituent needs. You know the political implications which compound the magnitude of these issues—tension between the White House and the Hill—between parties and candidates, who in a sense are never not running for office. Almighty God, for whom nothing is impossible, help the Senators to find the balance between pragmatic politics and principled statesmanship so that fundamental issues in the present are not hostage to 1986. Help the Senators in humility to acknowledge their fallibility, their limitations, their vulnerability, and allow You, Almighty God, room to work Your will among us.

We pray for Senator GARN and those whom he has joined in space a successful mission and a safe return to their families. In His name in whom dwells all wisdom and all power. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

Mr. ARMSTRONG. Mr. President, it is good to be back in session after a few days of recess.

THE CHAPLAIN'S PRAYER

Mr. ARMSTRONG. Mr. President, on my own behalf and that of others, may I thank the Chaplain for his eloquent prayer in which we all join. Especially I am indebted to him for recalling the Lord's words that things that are impossible under human leadership are possible under divine leadership. I think we are all looking forward to an arduous task in the next couple of weeks, and we will be calling on that guidance, and we thank the Chaplain.

SCHEDULE

Mr. ARMSTRONG. Mr. President, I do not have very much business to undertake at this point. We have previously entered an order for Senator PROXMIRE to address the Senate for not to exceed 15 minutes, following the leaders' time. Then, following that, have we already entered an order for the conduct of routine morning business not to extend past the hour of 12 noon? Has that order also been entered?

The PRESIDING OFFICER (Mr. GOLDWATER). The Senator is correct.

Mr. ARMSTRONG. Then, it is my understanding that the Senate will stand in recess from 12 noon until 2 o'clock in order to accommodate the work of the two caucuses.

I am asked to advise the Senate that the majority leader intends, at 2 o'clock, to go into executive session for consideration of the nomination of John E. Krings, to be Director of Operational Test and Evaluation, Department of Defense, hopefully under a 4-hour time limitation. A rollcall vote will occur on the confirmation of Mr. Krings perhaps at the end of this day.

It will also be the intention of the majority leader to turn to other legislative or executive calendar items which have been cleared for action.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. BYRD. Mr. President, I ask unanimous consent that I may reserve the time under my control, at least for a couple of hours.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I yield the floor.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the remainder of the time allocated to the Republican leader be allocated to the Senator from Washington [Mr. GORTON].

The PRESIDING OFFICER. The Senator from Wisconsin has the floor. The Senator from Washington will be recognized when the Senator from Wisconsin is finished.

Is the Senator yielding the leader's time?

Mr. ARMSTRONG. Yes. I am asking unanimous consent that the remainder of the leader's time be yielded to the Senator from Washington.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Washington is recognized.

Mr. GORTON. Mr. President, the Senator from Washington will defer to the Senator from Wisconsin for his special order.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for a period not to exceed 15 minutes.

Mr. PROXMIRE. Mr. President, I thank my good friend from Washington.

IS THE NUCLEAR FREEZE DEAD?

Mr. PROXMIRE. Mr. President, what has happened to the nuclear freeze? In September 1982, the people of Wisconsin voted by a massive 74-percent margin in a statewide referendum in favor of calling on the President of the United States to negotiate a mutual, verifiable nuclear weapons freeze with the Soviet Union. In eight other States, similar referenda were submitted to a statewide referendum. In seven of those States, the nuclear freeze was affirmed. In most cases, the affirmation was by a smashing margin. From time to time, throughout the country, in town meetings, and city referenda, the people of this country again and again affirmed their support for a nuclear freeze to end the arms race. Since then, the recognized professional polls have continued to appraise the public sentiment toward a negotiated nuclear weapons freeze. The results have consistently supported the freeze and by huge margins that have varied from 2 to 1 to 3 to 1.

Now, Mr. President, this is a democracy. It would be difficult to find an issue more important to the survival of our country and to most American citizens than the issue of how to prevent a nuclear war. And yet our Government has failed to make any arms control progress at all.

Why has public opinion on this most critical of all issues—in this democracy—been so ineffective? How about it? Well, the answer is obvious. In this democratic Republic, the President of

the United States has the final, definitive, decisive voice on whether or not this country takes any initiative to negotiate any kind of agreement with a foreign country. And in this democratic Republic, the President is elected democratically. Once elected by all the people, he fulfills the ends of the Republic by exercising the power of the Government on behalf of the people who elected him.

So what does this mean? This means the President may or may not reflect the expressed wish of the people of the country on any particular issue, however strongly our people may feel on the issue. The President is elected to represent the people by following the policies he believes are in the public interest. The President has made no secret about his opposition to a nuclear freeze. He made that opposition clear in 1980. He won a landslide victory in spite of his nuclear freeze opposition.

In the 1984 Presidential election, the nuclear freeze became a major and a central issue in that campaign. The President's opponent, Walter Mondale, declared that his first act as President of the United States would be to invite Soviet leaders to meet with him to negotiate a comprehensive, mutual, verifiable nuclear freeze. The issue could not have been more explicit in the 1984 campaign. The President opposed the freeze. Mr. Mondale favored the freeze. Who won? The President won. President Reagan won by a smashing one-sided landslide.

Does that mean the people of this country had lost faith in the nuclear freeze? Of course not. There were many issues in the 1984 Presidential campaign. The freeze was by far the most significant to many of us. But it was certainly not a sufficiently significant issue for the majority of American voters to outweigh other considerations.

What did determine the election? The economic issue was one major factor. Nineteen hundred and eighty-four turned out to be the best economic year for our country in 33 years. Real economic growth after inflation, personal income, and profits after taxes all improved greatly. Meanwhile, inflation continued at a surprising moderate pace. And even interest rates came down some. All these economic factors greatly helped the President. Also, in spite of the usual international turmoil, in 1984, the country was at peace. America's single military initiative—in Grenada—turned out successfully. And the President had put himself squarely on the side of the traditional moral virtues the people of our country respect. Also he undoubtedly gained from his attractive personality and his superlative ability to deliver speeches.

So the nuclear freeze was swamped in issues of more immediate and vivid concern, and in a personality contest, the President obviously won. In our democratic Republic, the President decides not only the details of arms control negotiations, but whether to proceed at all to any arms control negotiations. So the 1984 election seems to have buried the nuclear freeze at least until January 1989.

What option then does that leave for those of us—a majority of the population of this country—who still believe that the nuclear freeze is still the best course we can follow to achieve peace? First, we should recognize that while 4 years is a political eternity, it is a brief blip in the pursuit of international peace. So we should keep the comprehensive freeze—the one policy that would end the arms race—alive.

And how do we do that? We do that by challenging the options to the freeze that the President has advanced. The most conspicuous current option is the President's proposal to achieve peace by developing a defense against nuclear missile attack, the so-called high frontier or SDI or star wars. The second option pursued by the President is embraced in the arms control negotiations in Geneva that began March 12 and headed by chief negotiator Max Kampelman. Those negotiations would attempt to limit and, if possible, reduce nuclear weapons controlled by both superpowers.

Neither the star wars defense, nor the limitation on reduction of nuclear weapons, would stop the arms race. They might change it. They might push superpower weapons into more or less stable modes. They might provide, through defense, a reduction in the killing power of some offensive weapons. They might provoke a more intensive development of both defensive and offensive new nuclear weapons. That would not be constrained by an agreement. But we know two things the proposed arms control agreement and the missile defense system would indeed achieve. First, they would increase the uncertainty and therefore probably increase the fear on both sides. Second, they would encourage both sides to pursue and feverishly pursue those technologies that would overcome any antimissile defense and those technologies left outside any arms control limitation or reduction.

This is why only a comprehensive end to the arms race, and that is a nuclear freeze that is mutual, verifiable, and designed for the simple single purpose of ending the testing, production, or deployment of nuclear arms by both superpowers, can truly bring the world closer to peace. That is why we need to keep faith in the nuclear freeze.

GENOCIDE: YEAR 36

Mr. PROXMIRE. Mr. President, on another subject very briefly, the Washington Post today ran a very timely and insightful editorial calling for the ratification of the Genocide Convention. The piece is particularly timely because of the Foreign Relations Committee's scheduled April 25 vote on the convention and is insightful in its evaluation of the opponents' major concern.

The editorial effectively lays to rest the arguments of the opponents "who want to sink the treaty by frightening their countrymen." As the Post correctly concludes, "there is absolutely no threat to any American in this treaty, and it is ridiculous to try to persuade citizens that they will be at the mercy of foreign judges if it is ratified."

Mr. President, this is the 36th year that the Genocide Convention has awaited our approval and it is the 40th anniversary of the liberation of the concentration camps. Is it not time at long last that we act decisively and ratify the Genocide Convention?

Mr. President, I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GENOCIDE: YEAR 36

It seems right that, in the month the liberation of the concentration camps is being commemorated, the Senate will once again consider the Genocide Treaty. The pact, which was in part a response to the Holocaust, has been accepted by 96 countries, but not this one. For 36 years the Senate has refused to consent to ratification, first because of fears that the United States would be accused of genocide because of segregation, and later because of similar fears concerning our actions in Vietnam.

Last year, supporters of the treaty were given a boost when President Reagan pressed for ratification. The treaty was approved by the Foreign Relations Committee on a 17-to-0 vote, but it never came to a vote on the floor because time ran out. Instead, the Senate adopted a resolution supporting the principles of the agreement and urging prompt consideration this year. The Foreign Relations Committee is expected to vote April 23, which will leave plenty of time for a floor debate, if it is needed.

Sen. Jesse Helms, who did not oppose the treaty last year, has raised some questions about its provisions that may delay consideration. Sen. Helms asserts that the rights of Americans might be jeopardized under the treaty because, by its terms, the World Court is authorized to hear cases concerning its interpretation. The World Court, of course, is not a criminal tribunal, and no one can be tried and punished for acts in violation of the treaty in that forum. Moreover, it does not have the power to enforce its judgments and must rely on the Security Council of the United Nations—where the United States has a veto—to apply sanctions. Nevertheless, Sen. Helms has indicated his intention to offer a reservation that would take the World Court out of the treaty entirely. Even worse, he has persuaded the administration to accept his terms in the interest of speeding Senate consideration.

The Helms reservation is an old ploy used time and again by those who want to sink the treaty by frightening their countrymen. There is absolutely no threat to any American in this treaty, and it is ridiculous to try to persuade citizens that they will be at the mercy of foreign judges if it is ratified. This country can honestly and proudly affirm its abhorrence of genocide by agreeing to the treaty. Continued reluctance to consent to ratification simply gives others grounds to question the American commitment to human rights. The public has done nothing to deserve that slur.

Mr. PROXMIRE. Mr. President, I yield the floor. I thank my good friend from Washington for his courtesy.

The PRESIDING OFFICER. The Senator from Washington is recognized.

S. 906—TRADE ENHANCEMENT ACT OF 1985

A NEW APPROACH TO GAINING FAIR ACCESS TO OVERSEAS MARKETS

Mr. GORTON. Mr. President, America's burgeoning trade deficit with Japan and other countries is one of the great challenges facing the Nation and the Senate. It reflects injury not only to our export-oriented industries but also to the industrial base of the United States as it competes with imports from nations around the world.

In my view, the single most effective remedy available to this legislative body is fiscal discipline. The budget deficit and in turn the high value of the dollar hurt the ability of all American producers to compete effectively overseas and with imports here. First and foremost, the trade deficit has roots in our own fiscal policy.

That trade deficit is not, however, due entirely to the high value of the dollar. It is also due to the lead the American economy has taken in global economic recovery and to the necessary special trade preferences granted to developing countries. Naturally enough, these countries are taking full advantage of this opportunity to earn hard foreign exchange, and we benefit as they are better able to repay their debts to American banks and suppliers.

The trade deficit is certainly a symptom of serious problems here at home and our efforts to help the developing countries, but I wish to emphasize today that the trade deficit is a symptom of problems originating abroad as well. Given the comparative advantages we enjoy in many markets, were it not for trade restrictions overseas our exports would be considerably greater and our trade deficit considerably smaller.

Congress preempted headlines a couple of weeks ago when both Houses passed resolutions that singled out Japan. The precise timing of this action was triggered by Japan's decision to raise auto exports to the United States by 25 percent, retain quotas, and to ignore the request of the President to reciprocate by opening up Japanese markets. More significant than the exact timing of those resolutions, however, is the continuing and rapidly growing perception that Japan is the prime example of a developed trading partner which enjoys relatively open access to the U.S. market while closing its markets to U.S. producers. The concern of the Congress was also affected by the sheer magnitude of the imbalance—$37 billion in 1984, with some reports indicating that it will top $50 billion in 1985. Nor is this problem faced by the United States alone. European and even other East Asian countries have been stymied in their efforts to break into the free world's second largest market.

Singling out Japan is not entirely fair, for a number of the newly industrialized countries seem to be patterning themselves after the Japanese model. Obviously the world can only accommodate a finite number of nations which pursue a polcy of maximizing exports and minimizing imports.

Let me emphasize that the problem is one of commercial policy, a desire on the part of the United States to see to it that trade is as free as possible in both directions. And not just with Japan. Our concern extends to breaking down barriers to trade with other nations as well. But Japan must be the focal point of our attention for the obvious reason that it is the largest successful country following protectionist policies, and it unavoidably sets an example for much of the world.

Our method of attempting to change these policies for a number of years, beginning before the first Reagan administration, has been specific, product-by-product negotiations which have produced little more than immense frustration. While talks went on over such products as softball bats and more significant items such as beef, electronics, citrus fruits, processed fish products and others, Japanese exports to the United States grew precipitously.

At the summit meeting between President Reagan and Prime Minister Nakasone this January, the administration proclaimed a new approach and came out with an agreement to start a fresh round of talks. As only our beloved State Department can put it, we are now taking what it calls the "market oriented sector selected" MOSS approach, otherwise known as more of the same stuff. This new round focuses on four sectors: forest and paper products, which are of great interest to a Senator from Washington, electronics, medical equipment and pharmaceuticals, and telecommunications.

The telecommunications field provides a perfect example of the failure of negotiations—even negotiations that appear successful—to achieve results. In 1980, the United States and Japan signed an agreement that was intended to open the door to American telecommunications equipment. Since then, American companies have accounted for only about 5 percent of purchases by Japan's telephone company NTT, in spite of being recognized as world leaders in telecommunications technology. In addition, a U.S. study found that:

> Little of what NTT purchases from American firms has been high technology equipment of the type that is central to the telecommunications network and likely to promote the development of long-term relationships with American suppliers.

On the contrary, I understand that these sales consist in part of such items as paper to print telephone books. I am convinced that the present talks are leading us to exactly the same dead end.

This holds true in other product areas as well. As recently as April 9, Prime Minister Nakasone said:

> As for forest products, the government will, for the next five years, take special measures for the promotion of the domestic forest and wood products industry. While observing the development of such promotional measures the government intends to positively consider the reduction of tariffs on plywood, etc., including those made of softwood and hardwood, with a view to starting implementation approximately from the third year.

It is exactly this kind of attitude which is creating a firestorm with respect to or trading relationship with Japan. A 3-year study of the possibility of lowering tariffs on plywood is simply not an acceptable response to an annual trade deficit of $37 billion.

Accumulated frustrations from years of this kind of action has led to sharp congressional reaction this year. We have seen many bills, mostly product-specified in nature, to restrict imports into the United States. Members of Congress from steel States are interested in steel quotas. Those from auto manufacturing States want more restrictive auto import quotas. Those from States in which forest products are important feel pressure to restrict Canadian forest products imports. The list goes on and on.

Not all of these proposals are aimed at Japan. But most are, and it is clear that the large number of Members who wish to cut imports of these and dozens of other products are speaking to a more receptive audience and reflect a greater sense of urgency than at any other time in decades. Congress seems on the verge of passing a bill focused not on one or two commodities, but representing a broad alliance of protectionists imposing quotas on dozens of classes of imports. The effect will be to reduce imports and, to the extent that there is retaliation, exports as well.

At the same time, we see a second congressional approach to this challenge, a range of proposals for general tariff surcharges, several at the level of 20 percent. Some of these proposals have a sunset date, and some do not. They are, by definition, not product-specific, but they have an identical impact. They would obviously reduce imports into the United States without increasing exports from this country. They would have a tendency to create the kind of retaliation which would actually reduce exports from the United States.

Each of these two sets of proposals has one additional impact: Increased consumer prices on imported goods to individual consumers and businesses.

It is easy for any Member of the Congress, or for that matter any person interested in international trade, to criticize this kind of protectionist threat as ultimately self-defeating. But it would be exceedingly unwise to react in no other way without appreciating the real threat to a wide cross-section of our manufacturing and technological infrastructure, affecting jobs of hundreds of thousands of American workers, posed by present and projected trade deficits. It is, I am convinced, absolutely imperative that we develop a more constructive response than those which I have outlined, but a decisive response nevertheless, one which expresses the sense of urgency for greater reciprocity and fairness with our trading partners. The legislation which I am proposing here is, I believe, just such a response.

My bill would impose a 20-percent surcharge on all imports from Japan without exception, and would authorize the President to impose a similar surcharge on imports from any nation when, upon the advice of the U.S. Trade Representative [USTR], he finds that that nation has imposed substantially greater restrictions on American exports than we apply to its products. The surcharge on Japanese goods would drop automatically by 1 percent for every $1 billion by which the 1984 trade deficit is reduced. It would increase by 1 percent for every $1 billion by which that bilateral trade deficit increases. That means that as and when we return to approximately the same situation we found ourselves in 1981—a $17 billion trade deficit with Japan—there would be no surcharge. It would also mean that the surcharge would be considerably larger if, in fact, a $50 billion trade deficit in 1985 becomes a reality. Instead of dealing with Japan on a frustrating ineffective product-specific basis, the bill will give the Japanese Government and economy an economic motive to buy more goods and services from the United States because that will control the level of the surcharge imposed on their exports. The effect on other nations to which the President applies this doctrine will be identical.

The surcharge would be phased in over a 9-month period to give the Japanese time and further incentive to liberalize their markets, and would be calculated quarterly to make it responsive to rapid changes in the trade balance.

I understand that the U.S. Trade Representative presently has a system for monitoring and evaluating trade practices of other nations. It would be my expectation that the information gathered through this system could be used in preparing the reports to the President that are called for in this bill. It is not my intention to require the USTR to continue with any particular system or procedure, however. Rather, the USTR should retain the discretion to comply with the requirements of the bill in whatever efficient manner it finds appropriate.

There are, of course, both advantages and disadvantages even to this approach. The one disadvantage is that it will cause higher consumer prices for some, though I suspect not for all, Japanese goods. For example, the automobile quota system of the last 4 years has resulted in approximately a 20-percent surcharge over what a free market would cause the Japanese automobile to cost in the United States. But perhaps 15 percent of that 20-percent override has gone to the Japanese manufacturer, who has taken advantage of its ability to demand higher prices for goods in limited supply. At the very least, the effect of this 20-percent surcharge would be to put that money into the Treasury of the United States to be applied against our deficit, rather than put it in the hands of the Japanese manufacturers.

The advantages of the proposal, on the other hand, substantially outweigh the disadvantages. They include an almost certain substantial increase in the dollar value of our exports to Japan and in the number of jobs which depend on those exports. Each extra billion dollars of exports of forest products, for example, would mean 10,000 direct and as many as 25,000 indirect jobs in the United States. In fisheries, the effect would be approximately the same. This increase in exports is the primary goal of my proposal.

A secondary result would be to make somewhat more competitive those domestic industries that are now suffering from strong import competition, whether that competition is based on efficiency or on below cost dumping.

Finally, even if the response of the Japanese should be to lower their exports to the United States rather than to increase their imports from the United States, it will result in several billion dollars per year in tariffs to reduce the annual deficit. Imports from Japan last year were roughly $60 billion. One could expect, even with some reduction in imports, $10 to $12 billion in increased tariffs.

We have reached the point at which we can no longer believe in promises that 2 years from now, 3 years from now, 5 years from now, trade will be more free in both directions, not only with Japan but with a number of other nations as well. It is time that we concern ourselves with the future of our own industries. In the State of Washington, we have fisheries and forest products, apple growers and other agricultural producers, communications equipment manufacturers, all of whom are cut out of the Japanese market by arbitrary trade barriers. Fruitless product-by-product negotiations have had no positive results measured by actual new sales. The number of dollars worth of goods flowing in each direction is the true bottom line in international trade. By adopting this suggestion, we can preempt destructive protectionist measures, increase our exports, and begin to reduce the debilitating trade deficit with which we are saddled today.

It is time to act now, decisively and constructively.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 906

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Trade Enhancement Act of 1985".

FINDINGS AND PURPOSE

SEC. 2. (a) FINDINGS.—The Congress finds that—

(1) the economic health of the United States is threatened by continuing increases in the Nation's trade deficits with Japan and other foreign countries;

(2) a significant factor in the escalation of such trade deficits is the inability of products of the United States to penetrate foreign markets, even when such products have a comparative advantage over products of foreign countries;

(3) despite continuing frustration of efforts by the United States to open foreign markets, markets in the United States have remained accessible to foreign products;

(4) the inability of products of the United States to penetrate foreign markets is often the result of unreasonable and discriminatory tariff and non-tariff barriers;

(5) negotiation and consensus are the preferred methods for resolving trade problems, in order to promote international cooperation, good will, and free trade; and

(6) bilateral negotiations directed toward making foreign markets accessible on a product-by-product basis, such as those between the United States and Japan, have frequently resulted in neither reductions in trade barriers nor increases in purchases by foreign countries of products of the United States.

(b) PURPOSE.—It is therefore the purpose of the Congress in this Act to provide Japan and other foreign countries with incentives to permit businesses of the United States to compete in their markets without unreasonable tariff and non-tariff barriers.

DEFINITIONS

SEC. 3. As used in this Act, the term—

(1) "entry" means the entry, or withdrawal from warehouse, of a product for consumption in the customs territory of the United States;

(2) "private entity" means any individual, corporation, partnership, cooperative, or other nongovernmental organization; and

(3) "product" means any item grown, produced, or manufactured by or in any country which is considered part of the merchandise trade of such country.

IMPOSITION OF SURCHARGE DUTY

SEC. 4. (a) DUTY ON JAPAN.—Except as provided in subsection (d) of this section, beginning on July 1, 1985, there is imposed a surcharge duty on the entry of any product of Japan, if the United States had a deficit in its bilateral merchandise trade with Japan that exceeded $4,250,000,000 for the most recent calendar quarter for which bilateral merchandise trade figures are available from the Department of Commerce.

(b) DUTY ON OTHER FOREIGN COUNTRIES.—Except as provided in subsection (d) of this section, beginning on July 1, 1985, the President may, at his discretion, impose a surcharge duty on the entry of any product of a foreign country, if—

(1) the United States had a deficit in its bilateral merchandise trade with such country that exceeded the amount calculated by the United States Trade Representative under subsection (c) of this section for the most recent calendar quarter for which bilateral merchandise trade figures are available from the Department of Commerce; and

(2) the President determines, after consultation with the United States Trade Representative, that such country is or has, within such most recent calendar quarter, engaged in trade practices that are unreasonable, discriminatory, or that unduly burden or restrict the international commerce of the United States.

(c) DETERMINATION OF TRADE BALANCE.—The United States Trade Representative shall, beginning on July 1, 1985, and on the first day of each calendar quarter thereafter, determine (for each foreign country other than Japan) the amount, if any, by which the current dollar value of products which entered the United States from such country exceeded the current dollar value of products which the United States exported to such country. For each foreign country other than Japan with which the United States had a deficit in its bilateral merchandise trade for such most recent calendar quarter, the United States Trade Representative shall estimate what would have been the balance in bilateral merchandise trade with such country if such country had not engaged in trade practices described in subsection (b)(2) of this section. Such estimated balance shall be the figure used to calculate a surcharge duty on the entry of any product of such country under section 5 of this Act.

(d) APPLICABILITY.—No surcharge duty shall be imposed under this section on the entry of any product before the date which is 30 days after the date of enactment of this Act.

(e) RELATIONSHIP TO OTHER LAW.—Any surcharge duty imposed under this section shall be in addition to, and not in lieu of, any other duty permitted or required by law.

DETERMINATION OF SURCHARGE DUTY

SEC. 5. (a) RATE OF SURCHARGE DUTY.—Subject to the provisions of subsection (b) of this section, the surcharge duty to be imposed during a calendar quarter pursuant to section 4 of this Act shall be determined on July 1, 1985 and on the first day of each calendar quarter thereafter. The rate of such surcharge duty shall be, for each increment of $250,000,000 by which the deficit in bilateral merchandise trade with a foreign country for each calendar quarter exceeds the applicable amount of deficit specified in section 4(a) or (b) of this Act, a sum equal to one percent of the amount of such deficit in bilateral merchandise trade, except that any such surcharge duty shall not exceed forthree percent of such applicable amount of deficit.

(b) INITIAL RATE OF SURCHARGE DUTY.—On July 1, 1985, the surcharge duty imposed pursuant to section 4 of this Act shall be twenty-five percent of the amount determined under subsection (a) of this section. On the first day of each quarter beginning after July 1, 1985, such surcharge duty shall increase by twenty-five percent of the amount determined under subsection (a) of this section, in order that, on April 1, 1986, such surcharge duty shall be one hundred percent of the amount determined under subsection (a) of this section.

CALCULATION OF BILATERAL MERCHANDISE TRADE

SEC. 6. (a) CALCULATION.—The Secretary of Commerce shall, for each calendar quarter beginning with April 1, 1985, calculate and publish the bilateral merchandise trade figures for the United States with respect to trade with each foreign country.

(b) EXCLUSION FROM CALCULATION.—No purchase of a product of the United States by a government or private entity of a foreign country shall be included in calculating the balance of bilateral merchandise trade between the United States and such country under subsection (a) of this section, if such product is resold without substantial alteration to the government of another country or to a private entity located in another country within two fiscal years after the date of which such product entered the country in whch the purchaser of such product is located.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond the hour of 12 noon, with statements therein limited to 5 minutes each.

S. 908—AGRICULTURE ACT OF 1985

Mr. McCONNELL. Mr. President, on November 7, 1984, I was elected to the U.S. Senate. It took nearly 3 weeks for the Board of Elections to certify my victory. But it was only 3 days before the Farm Bureau, Kentucky's tobacco growers, our dairy farmers, grain farmers, and all the other farm interests in my State began to find their way to my offices in Jefferson County.

They couldn't wait for me to be certified, Mr. President. They couldn't wait for me to be sworn in or wait for me to get my seat on the Senate Agriculture Committee.

Our farmers couldn't wait, Mr. President, because they knew there was no time to waste. In November, and today, Kentucky's farmers and farmers all across the country face an economic crisis. They need help. They need leadership. They need a farm policy that responds to changing economic conditions. Farmers need a government which stands with them; a government which recognizes that a healthy farm economy is the cornerstone of a healthy America; a government which sets as a primary goal maintaining the health and vitality of America's family farms.

That is the urgent message farmers brought to me last November, Mr. President, and it is the reason I stand before you today.

In 1982, there were 103,000 farms in the State of Kentucky. In 1984, there were 101,000 farms. Across the Nation, we have lost 68,000 farms in the past 2 years. 68,000 farms.

Agriculture is an $11 billion industry in Kentucky alone; 110,000 people in my State derive their income from farming; 750,000 more have agriculture-related jobs. A crisis in agriculture, Mr. President, is a crisis for Kentucky.

And so it is that I stand before my colleagues today to introduce my first piece of legislation as a U.S. Senator from Kentucky. I am introducing a farm bill today, Mr. President, a bill that I believe responds to our current crisis in a fair and equitable and reasonable fashion.

My farm bill represents a new direction in farm policy—a farm policy which clearly recognizes that the prosperity of our Nation's farmers must be derived from the marketplace. This policy was not recommended by some economist who doesn't know the difference between soybeans and green beans, but by farmers and ranchers who are members of the Nation's largest farm organization. The legislation which I am introducing today is the product of countless hours of debate and discussion and is authorized by the members of the American Farm Bureau Federation. I feel privileged to be called upon to sponsor this bill.

Agriculture, Kentucky and America's leading industry, is at a crossroads. American farmers are participating in farm programs designed 40 years ago, when this country was recovering from the Great Depression and preparing for war. Our current farm programs were designed for times and conditions that no longer exist. American farmers no longer produce only for domestic consumption. Our farmers no longer produce

for an ever-expanding export market. Farmers today have to fight for their own domestic markets, not to mention foreign markets. It is time we in the Congress act, and act aggressively, to give America's farmers the tools they need to be competitive in the world marketplace. I believe my farm bill provides those tools.

About the only thing the administration, the Congress, farm groups, and consumer groups agree on is that current farm policy is not working. More and more farmers face economic catastrophe at a time when Federal Government outlays for farm programs are at all-time highs. In fact, we have spent more money on farm programs in the last 4 years than we have in the previous 20. It has been said that agriculture is in the grips of a farm credit crisis, but I think the problem is deeper than that. American agriculture is facing a farm profit crisis, and until some profitability is restored to farming things are not going to get any better.

Mr. President, the McConnell-Farm Bureau proposal is a sensible and realistic approach to the farm profitability crisis. It provides positive direction to farm export policy, which is the key to making America's farmers competitive in the world marketplace. It also provides income safeguards for our farmers while emphasizing the importance of soil and water conservation. This bill recognizes the success of the wool, peanut, and sugar programs by maintaining them in their existing forms. This proposal will also reduce huge Government milk surpluses by finally providing a clear and simple signal to dairy farmers—if you continue to produce more milk than the market can absorb, then we will reduce price supports. Finally, this bill will abolish the farmer-owned grain reserve which hangs like a dark cloud over the marketplace. But, more importantly, this bill provides for an orderly and cautious approach to market orientation. I applaud the administration's efforts to create a fundamental change in agricultural marketing concepts, but these efforts go to far too fast. The administration fails to recognize agriculture as it is today. We simply cannot expect farmers to change overnight the way they have been doing business for years. I believe my bill is a sensible recognition of that fact.

I think it is safe to say that nobody in this body expects any single farm proposal will be enacted in its entirety. The farm bill which eventually becomes law will be the product of earnest compromise by Senators from both sides of the aisle. As we begin this process of developing new farm legislation, I submit that my proposal provides a sound basis from which to begin our discussion.

Witness after witness testifying before the Senate Agriculture Committee has noted that American farm commodities are not competitive in foreign markets. My bill establishes crop loan rates which are set by market prices, not on political trends. Our competitors in the world market will no longer be able to set prices for their commodities based on U.S. loan rates which were arbitrarily established through misguided but well-intentioned legislation. Moreover, this bill will allow American producers to compete profitably against the agricultural subsidies of foreign governments, by offering surplus CCC grain as a bonus to countries which purchase American grain in the world market.

This is a comprehensive farm bill, one that addresses all segments of our agricultural economy, yet recognizes that farm commodities aren't all alike. This legislation provides a reasonable and orderly transition from the current U.S. farm marketing philosophy to a philosophy guided by market signals. I believe that the future prosperity of American agriculture depends on this new direction.

Mr. President, this is a watershed year for American agriculture. This Congress has an opportunity to redirect farm policy in a manner which can truly restore profitability to American agriculture. The transition will not be easy, but in the bill I put before you today we have a solid framework that will give American farmers the edge they need to weather the storm.

I believe the McConnell-Farm Bureau bill represents the middle ground in the farm policy debate. I hope this legislation will help provide the framework and structure for a debate that will result in a farm policy which allows our farmers to produce and prosper. I stand before you today to pledge my commitment to, and signal my involvement in, the development of a national policy that will have a profound effect on the health of our farm economy for years to come.

Mr. President, I ask unanimous consent that a title-by-title summary and the text of the bill appear in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TITLE-BY-TITLE SUMMARY

TITLE I—DAIRY

Provides for continued use of a dairy purchase program with support price set at 90 percent of the previous three years' average "all milk" price. This price level shall be automatically revised effective April 1 and October 1. The support price level shall also be adjusted in relation to the net Government purchases according to the following table:

"If the estimated amount (in billions of pounds) of net Government price support purchases of milk during the relevant period is (in milk equivalent):	The percentage of price support level per hundred-weight for milk shall be:
Less than 3	104
3.0–3.99	103
4.0–4.99	102
5.0–5.99	100
6.0–6.99	98
7.0–7.99	96

The Secretary of Agriculture shall have authority to further adjust the support price by not more than an additional three percent on April 1, 1986, and for any subsequent six-month period if government net purchases are estimated to exceed 7.99 billion pounds milk equivalent during the next 12 months.

TITLE II—WOOL AND MOHAIR

The Wool Act is extended in its present form through 1989.

TITLE III—WHEAT

Wheat loan levels are established at 75 percent of the five year average of domestic prices excluding the high and low valued years. The loan level may not be adjusted by more than 10 percent in any year including the first year of the program.

The wheat target prices in 1986 will be frozen at the 1985 target price level. Beginning in 1987, the target price will be established at the 110 percent of the five year average of domestic prices excluding the high and low valued years. The target price will not be adjusted by more than 5 percent annually.

The Secretary will have authority to require compliance with an acreage reduction and/or paid land diversion program as a condition of eligibility for program benefits. If carryover stocks of wheat exceed 4 percent of annual world utilization, the Secretary will be required to implement and acreage reduction program.

TITLE IV—FEED GRAINS

Corn loan levels are established at 75 percent of the five year average of domestic prices excluding the high and low valued years. The loan level may not be adjusted by more than 10 percent in any year including the first year of the program. Loan levels of grain sorghum, barley, oats and rye will be set in relation to fee value compared to corn.

Corn target prices for 1986 will be frozen at the 1985 target price level. Beginning in 1987, the target price will be established at 110 percent of the five year average of domestic prices excluding the high and low valued years. The target price will not be adjusted by more than 5 percent annually. The target price for grain sorghum, oats and, if designated, barley will be set in reasonable relation to the target price for corn.

The Secretary will have authority to require compliance with an acreage reduction and/or paid land diversion program as a condition of eligibility for program benefits. If feed grain carryover stocks exceed 4 percent of annual world utilization, the Secretary will be required to implement an acreage reduction program.

TITLE V—COTTON

Cotton loan rates will be set at the lower of:

(a) 85 percent of the average price (weighted by market and month) of the U.S.

spot market price of the previous five years excluding the high and low valued years; or

(b) 90 percent of the average of comparable cotton prices quoted C.I.F. Northern Europe. The loan level shall not be adjusted by more than 10 percent in any year including the first year of the program.

The cotton target price in 1986 will be frozen at the 1985 level. Beginning in 1987, the target price will be established at 110 percent of the same average market price used to determine the loan rate. The target price will not be adjusted by more than 5 percent annually.

The Secretary will have authority to require compliance with an acreage reduction and/or paid land diversion program as a condition of eligibility for program benefits. If carryover stock of cotton exceeds normal supply by more than 15 percent, the Secretary will be required to implement an acreage reduction program.

TITLE VI—RICE

Rice loan levels are established at 75 percent of the five year average of domestic prices excluding the high and low valued years. The loan level may not be adjusted by more than 10 percent in any year including the first year of the program.

The rice target price in 1986 will be frozen at the 1985 target price level. Beginning in 1987, the target price will be established at 110 percent of the five year average of domestic prices excluding the high and low valued years. The target price will not be adjusted by more that 5 percent annually.

The Secretary will have authority to require compliance with an acreage reduction and/or paid land diversion program as a condition of eligibility for program benefits. If carryover stocks of rice exceed normal supply by more than 15 percent, the Secretary will be required to implement an acreage reduction program.

TITLE VII—PEANUTS

The peanut program is continued in its present forms with minor modifications. The quota support price in 1986 is maintained at current levels. Changes in quota loan levels would be modified only to reflect the percentage change in the prices paid index of the previous year from the prior year.

The peanut quota will be established at the level of the previous three years' average of domestic edible and seed use with Secretarial discretion for further modification by no more than 5 percent if justified by supply and demand projections.

TITLE VIII—SOYBEANS

The current soybean loan formula is retained. No additional authority for acreage reduction programs or deficiency payments is included.

TITLE IX—SUGAR

The Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at appropriate levels but not less than 18 cents per pound for the 1986 through 1989 crops of sugar. Sugar beet loan levels shall be set at levels that are fair and reasonable in relation to the level of loans for sugarcane.

TITLE X—MISCELLANEOUS

If the Secretary makes land diversion payments to assist in adjusting acreage of the 1986, 1987, 1988, or 1989 crop of wheat, feed grains, cotton or rice, at least 50 percent shall be made available at signup.

The Farmer-Owned Reserve is terminated.

Deficiency payments are limited to $50,000 per person in each of the 1986 through 1989 crop years.

TITLE XI—AGRICULTURAL EXPORTS AND PUBLIC LAW 480

Provides for an export commodity bonus program to offset the use of export subsidies by competing countries and the U.S. trade disadvantages being experienced because of currency exchange relationships. This provision would help regain foreign markets and reduce CCC and farmer-owned reserve stocks. The provisions of the cargo preference laws shall not apply to this program.

The Export Credit Revolving Fund would be activated and extended through 1989. Export sales financed or guaranteed under any CCC export credit program would be exempted from cargo preference laws.

Use of the intermediate credit program authorized under section 4 of the Food for Peace Act of 1966 is mandated.

The special standby export subsidy program is exempted from cargo preference laws.

To provide additional export outlets while helping meet the food needs of developing countries, the minimum tonnage to be shipped under titles I, II and III of PL 480 shall be 10 million tons (up from current levels of about 8 millon tons). All PL 480 shipments would be exempted from cargo preference laws.

TITLE XII—RESOURCE CONSERVATION

The Secretary of Agriculture must provide for a conservation reserve program for owners and operators of erosion-prone land to assist them in conserving soil consistent with budgetary limitations. Contracts of seven to fifteen years would be offered under which producers would convert erosion-prone cropland to less intensive uses such as pasture, permanent grass, legumes or trees.

Any producer who brings fragile land into production shall be ineligible for any farm program benefits on any crop in his entire farming operation.

S. 908

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agriculture Act of 1985".

TITLE I—DAIRY

FEDERAL MILK MARKETING ORDERS

SEC. 101. (a) The Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, is further amended by—

(1) striking out in paragraph (B) of subsection 8c(5) all that part of said subparagraph (B) which follows the comma at the end of clause (c) and inserting in lieu thereof the following: "(d) a further adjustment to encourage seasonal adjustments in the production of milk through equitable apportionment of the total value of the milk purchased by any handler, or by all handlers, among producers on the basis of their marketings of milk during a representative period of time which need not be limited to one year, and (e) a provision providing for the accumulation and disbursement of a fund to encourage seasonal adjustments in the production of milk may be included in an order.";

(2) striking out the period at the end of subsection 8c(17) and adding in lieu thereof the following: *"Provided further,* That if one-third or more of the producers as defined in a milk order apply in writing for a hearing on a proposed amendment of such order, the Secretary shall call such a hearing if the proposed amendment is one that may legally be made to such order. Subsection (12) of this section shall not be construed to permit any cooperative to act for its members in an application for a hearing under the foregoing proviso and nothing in such proviso shall be construed to preclude the Secretary from calling an amendment hearing as provided in subsection (3) of this section. The Secretary shall not be required to call a hearing on any proposed amendment to an order in response to an application for a hearing on such proposed amendment if the application requesting the hearing is received by the Secretary within ninety days after the date on which the Secretary has announced the decision on a previously proposed amendment to such order and the two proposed amendments are essentially the same."; and

(3) inserting after the phrase "pure and wholesome milk" in section 8c(18) the phrase "to meet current needs and further to assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs".

(b) The provisions of subsection (a) shall become effective January 1, 1986 and shall terminate December 31, 1989.

LEGAL STATUS OF PRODUCER HANDLERS

SEC. 102. The legal status of producer handlers of milk under the provisions of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, shall be the same subsequent to the adoption of the amendment made by the Agriculture Act of 1985 as it was prior thereto.

MILK PRICE SUPPORT

SEC. 103. Section 201 of the Agricultural Adjustment Act of 1949 is amended by—

(1) striking out everything in subsection (c) after the first sentence and inserting in lieu thereof the following: "Notwithstanding the foregoing, milk shall be supported through the purchase of milk and the products of milk at such level equal to 90 percent of the simple average "all milk" price received by farmers for each of the preceding three years: *Provided,* That such price support shall be automatically revised effective April 1 and October 1 of each of the years 1986 through 1989 except in the case of 1985 the price level revisions shall occur on the first day of the month following enactment of the Agriculture Act of 1985: *Provided further,* That if the Secretary estimates that net government price support purchases of milk or the products of milk will be less than 5 billion pounds or in excess of 5.99 billion pounds milk equivalent he shall adjust the price support as determined in this subsection according to the following table:

"If the estimated amount (in billions of pounds) of net Government price support purchases of milk during the relevant period is (in milk equivalent):	The percentage of price support level per hundred-weight for milk shall be:
Less than 3	104
3.0–3.99	103
4.0–4.99	102
5.0–5.99	100
6.0–6.99	98
7.0–7.99	96

The Secretary of Agriculture shall have authority to further adjust the support price by not more than an additional three percent on April 1, 1986 and for any subsequent six-month period if government net pur-

chases are estimated to exceed 7.99 billion pounds milk equivalent during the next 12 months."

and

(2) deleting subsection (d) thereof.

TRANSFER OF DAIRY PRODUCTS TO VETERANS HOSPITALS AND THE MILITARY

SEC. 104. Section 202 of the Agricultural Act of 1949 is amended by striking out "1985" in subsections (a) and (b) and inserting in lieu thereof "1989".

DAIRY INDEMNITY PROGRAM

SEC. 105. Section 3 of the Act of August 13, 1968 (7 U.S.C. 450 1), is amended by striking out "1985" and inserting in lieu thereof "1989".

REDUCTION OF DAIRY PRODUCT INVENTORIES

SEC. 106. The Secretary of Agriculture shall utilize, to the fullest extent practicable, the authorities under the Commodity Credit Corporation Charter Act (including exportation of dairy products at not less than prevailing world market prices), the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), and other authorities availble to the Secretary to reduce inventories of dairy products held by the Commodity Credit Corporation so as to reduce net Commodity Credit Corporation expenditures to the estimated outlays for the milk price support program used in developing budget outlays under the Congressional Budget Act of 1974 for the appropriate fiscal year.

TITLE II—WOOL AND MOHAIR

EXTENSION OF SUPPORT PROGRAM; SUPPORT PRICE

SEC. 201. Section 703 of the National Wool Act of 1954 is amended by—

(1) striking out "1985" in subsection (a) and inserting in lieu thereof "1989"; and

(2) striking out all that follows the comma in subsection (b) after the word "Provided" and inserting in lieu thereof the following: "That for the marketing years beginning January 1, 1986 and ending December 31, 1989, the support price for shorn wool shall be 77.5 per centum (rounded to the nearest full cent) of the amount calculated according to the foregoing formula".

TITLE III—WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, WHEAT ACREAGE REDUCTION AND SET ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF WHEAT

SEC. 301. Effective only for the 1986 through 1989 crops of wheat, the Agricultural Act of 1949 is amended by adding after section 107A a new section as follows:

"SEC. 107B. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers non-recourse loans and purchases for each of the 1986 through 1989 crops of wheat at a level equal to 75 per centum of the simple average domestic price of wheat received by farmers for each of the preceding five marketing years, excluding the high and low valued years; *Provided*, That the level of loans and purchases shall not be adjusted by more than 10 per centum in any year, including the first year of such program. The loans to be made available by the Secretary under this subsection shall be available without interest for a nine month period and may be extended at the option of the producer for another nine months, but with interest at a rate equal to the cost of money to the government at that time.

"(b)(1)(A) In addition, the Secretary shall make available to producers payments for each of the 1986 through 1989 crops of wheat in an amount computed in this subsection. Payments for any such crop of wheat shall be computed by multiplying (i) the payment rate by, (ii) the farm program crop acreage, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than actually planted to wheat.

"(B) The payment rate for wheat shall be the amount by which the higher of:

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop is less than the established price per bushel.

"(C) The established price for wheat in 1986 shall not be less than the established price for wheat in 1985. Beginning in 1987, the established price shall be set at a level equal to 110 percent of the simple average domestic price of wheat received by farmers for each of the preceding five marketing years, excluding the high and low valued years, but shall not be adjusted by more than 5 per centum annually each of the 1987 through 1989 crops.

"(D) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected by not to exceed the acreage planted to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate, equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (c) of this paragraph, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their wheat acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of wheat. The proclamation shall be made not later than July 1 of each calendar year for the crop harvested in the next succeeding calendar year, except that in the case of the 1986 crop, the proclamation shall be made as soon as practicable after enactment of the Agriculture Act of 1985. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information, and the secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of wheat are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of wheat be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by an application of the allocation factor if the producers reduce the acreage

of wheat planted for harvest on the farm from the acreage base established for the farm under subsection (e)(2) of this section by at least the percentage recommended by the Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of wheat planted for harvest is less than the acreage base established for the farm under subsection (e)(2), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for wheat, the Secretary may make such adjustments as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisons of this paragraph.

"(d) The farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State or county program payment yields are established, the farm program payment yields shall balance to the national, State or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may provide for any crop either for a program under which the acreage planted to wheat would be limited as described in paragraph (2) or a set-aside program as described in paragraph (3) of this subsection if the Secretary determines that the total supply of wheat, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. The Secretary shall announce any such wheat acreage limitation program or set-aside program not later than July 1 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such program as soon as practicable after enactment of the Agriculture Act of 1985.

"(2) If a wheat acreage limitation program is announced under paragraph (1) of this subsection, such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each wheat-producing farm. Producers who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph shall be the acreage planted on the farm to wheat for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made; provided, under no circumstances shall the sum of the base acres of all program crops on a farm exceed the crop base acreage for the farm. For the purpose of the preceding sentence, acreage planted to wheat for harvest shall include any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (A) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity, by (B) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'. If an acreage limitation program is announced under paragraph (1) of this subsection for a crop of wheat, subsection (c) of this section shall not be applicable to such crop, including any prior announcement which may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on a farm to wheat for harvest within the permitted wheat acreage for the farm as established under this paragraph.

"(3) If a set-aside program is announced under paragraph (1) of this subsection, then as a condition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the acreage of wheat planted for harvest for the crop for which the set-aside is in effect. The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. If a set-aside program is established, the Secretary may limit the acreage planted to wheat. Such limitation shall be applied on a uniform basis to all wheat-producing farms. The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary deems necessary.

"(4) The regulations issued by the Secretary under paragraphs (2) and (3) of this subsection with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adeqate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely. In determining the amount of land to be devoted to conservation uses under an acreage limitation or set-aside program with respect to land that has been farmed under summer fallow practices, as defined by the Secretary, the Secretary shall consider the effects of soil erosion and such other factors as the Secretary considers appropriate.

"(5) The Secretary may make land diversion payments to producers of wheat, whether or not an acreage limitation or set-aside program for wheat is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission on bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county of local community.

"(6) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots of wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(8) Notwithstanding any other provision of this section, when the carryover stocks of wheat exceeds four percent of annual world utilization, the Secretary of agriculture shall implement an acreage reduction program.

"(f) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section pre-

cludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relating to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section if an acreage limitation program is established under subsection (e)(2) of this section, but may be required if a set-aside program is established under subsection (e)(3) of this section.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 302. Section 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1986 through May 31, 1989.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 303. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1986 through 1989 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 304. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1986 through 1989.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1986 THROUGH 1989 CROPS OF WHEAT

SEC. 305. Section 107 of the Agricultural Act of 1949 shall not be applicable to the 1986 through 1989 crops of wheat.

TITLE IV—FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, FEED GRAIN ACREAGE REDUCTION AND SET-ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF FEED GRAINS

SEC. 401. Effective only for the 1986 through 1989 crops of feed grains, the Agricultural Act of 1949 is amended by adding after Section 105A a new section as follows:

SEC. 105B. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers nonrecourse loans and purchases for each of the 1986 through 1989 crops of corn at a level equal to 75 per centum of the simple average domestic price of corn received by farmers for each of the preceding five marketing year, excluding the high and low valued years: *Provided*, That the level of loans and purchases shall not be adjusted by more than 10 per centum in any year, including the first year of such program. The loans to be made available by the Secretary under this subsection shall be without interest for a nine month period and may be extended at the option of the producer for another nine month period and may be extended at the option of the producer for another nine months, but with interest at a rate equal to the cost of money to the government at that time.

"(2) The Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(b)(1)(A) The Secretary shall make available to producers payments for each of the 1986 designated by the Secretary, barley, in an amount computed as provided in this subsection. Payments for any such crop of feed grains shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to such feed grains.

"(B) The payment rate for corn shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop is less than the established price per bushel.

"(C) The established price for corn in 1986 shall not be less than the established price for corn in 1985. Beginning in 1987, the established price for corn shall be equal to 110 per centum of the simple average domestic price of corn received by farmers for each of the preceding five marketing years, excluding the high and low valued years, but shall not be adjusted by more than 5% annually for each of the 1987 through 1989 crops.

"(D) The payment rate for grain sorghums, oats, and, if designated by the Secretary, barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains, or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their feed grain acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of feed grains. The proclamation shall be made not later than October 1 of each calendar year for the crop harvested in the next succeeding calendar year, except that in the case of the 1986 crop, the proclamation shall be made as soon as practicable after enactment of the Agriculture Act of 1985. The Secretary may revise the national program acreage first proclaims for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall proclaim

such revised national program acreage as soon as it is made. The national program acreage for feed gains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determine will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of feed grains be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of feed grains planted for harvest on the farm from the acreage base established for the farm under subsection (e)(2) of this section by at least the percentage recommended by the Secretary in the proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of feed grains planted for harvest is less than the acreage base established for the farm under subsection (e)(2), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The farm program payment yield for each crop of feed grains shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for feed grains was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, state or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the secretary's estimate of actual yields for the crop year involved. If national, state, or county program payment yields are established, the farm program payment yields shall balance to the national, state or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may provide for any crop either for a program under which the acreage planted to feed grains would be limited as described in paragraph (2) or a set-aside program as described in paragraph (3) of this subsection if the Secretary determines that the total supply of feed grains, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. The Secretary shall announce any such feed grain acreage limitation program or set-aside program not later than October 1 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such program as soon as practicable after enactment of the Agriculture Act of 1985.

"(2) If a feed grain acreage limitation program is announced under paragraph (1) of this subsection, such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each feed grain-producing farm. Producers who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm. The Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage limitation under this paragraph if such producer has previously produced a malting variety of barley, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph shall be the acreage planted on the farm to feed grains for harvest in the crop year immediately preceding the year for which the determination is made, or at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made; provided, under no circumstances shall the sum of the base acres of all program crops on a farm exceed the crop base acreage for the farm. For the purpose of the preceding sentence, acreage planted to feed grains for harvest shall include any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (A) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity, by (B) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'. If an acreage limitation program is announced under paragraph (1) of this subsection for a crop of feed grains, subsection (c) of this section shall not be applicable to such crop, including any prior announcement which may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest within the permitted feed grain acreage for the farm as established under this paragraph.

"(3) If a set-aside program is announced under paragraph (1) of this subsection, then as a condition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the acreage of feed grains planted for harvest for the crop for which the set-aside is in effect. The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary. If a set-aside program is established, the Secretary may limit the acreage planted to feed grains. Such limitation shall be applied on a uniform basis to all feed grain-producing farms. The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary deems necessary.

"(4) The regulations issued by the Secretary under paragraphs (2) and (3) of this subsection with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(5) The Secretary may make land diversion payments to producers of feed grains, whether or not an acreage limitation or set-aside program for feed grains is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers

and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreement in any county or local community so as not affect adversely the economy of the county or local community.

"(6) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such dates as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(8) Notwithstanding any other provision of this section, when the carryover stocks of feed grains exceeds four percent of annual world utilization, the Secretary of Agriculture shall implement an acreage reduction program.

"(f) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section if an acreage limitation program is established under subsection (e)(2) of this section, but may be required if a set-aside program is established under subsection (e)(3) of this section."

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1986 THROUGH 1989 CROPS OF FEED GRAINS

SEC. 402. Section 105 of the Agricultural Act of 1949 shall not be applicable to the 1986 through 1989 crops of feed grains.

TITLE V—COTTON

SUSPENSION OF BASE ACREAGE ALLOTMENTS, MARKETING QUOTAS AND RELATED PROVISIONS

SEC. 501. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 shall not be applicable to upland cotton of the 1986 through 1989 crops.

LOAN RATES AND TARGET PRICES, DISASTER PAYMENTS, COTTON ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF UPLAND COTTON

SEC. 502. Effective only for the 1986 through 1989 crops of upland cotton, section 103 of the Agricultural Act of 1949 is amended by adding at the end thereof a new subsection as follows:

"(g)(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1986 through 1989 crops of upland cotton to producers nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (A) 85 per centum of average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (B) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest-priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. northern Europe (adjusted downward by the average difference during the period April through October 15 of the year in which the loan is announced between such average northern European price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9). If for any crop the average northern European price determined under clause (B) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (A) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (A) of the first sentence of this paragraph. The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, except that in the case of the 1986 crop such determination and announcement shall be made as soon as practicable after enactment of the Agriculture Act of 1985, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection shall, upon request of the producer during the tenth month of the loan period for the cotton, be made available for an additional term of eight months, except that such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot marked for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six-month period.

"(2) Whenever the Secretary determines that the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceed 130 per centum of average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of the law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available.

"(B) If a special quota has been established under this paragraph during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in subparagraph (A) of this paragraph or the amount required to increase the supply to 130 per centum of the demand.

"(C) As used in the subparagraph (B) of this paragraph, the term 'supply' means, using the latest official data of the Bureau of Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four-hundred-and-eighty-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established.

"(D) When a special quota is established under the provisions of this paragraph, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

Notwithstanding the foregoing provisions of this paragraph, a special quota period shall not be established that overlaps an existing quota period.

"(3)(A) In addition, the Secretary shall make available to producers payments for each of the 1986 through 1989 crops of upland cotton in an amount computed in this subsection. Payments for any such crop of upland cotton shall be computed by multiplying (i) the payment rate by, (ii) the farm program crop acreage by, (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to cotton.

"(B) The payment rate shall be the amount by which the higher of—

"(i) The average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during the calendar year which includes the first five months of the marketing year for such crop as determined by the Secretary, or

"(ii) The loan level determined under paragraph (1) of this subsection for such crop

is less than the established price per bushel.

The established price in 1986 shall not be less than the established price for cotton in 1985. Beginning in 1987, the established price shall be set at a level equal to 110 per centum of average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, but shall not be adjusted by more than 5% annually for each of the 1987 through 1989 crops.

"(C) The total quantity on which payment would otherwise be payable to the producer for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (4) of this subsection.

"(4)(A) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for cotton to cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of cotton which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(C) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their cotton acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting cotton or other nonconserving crop or from reduced yields, that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(5) The Secretary shall establish for each of the 1986 through 1989 crops of upland cotton a national program acreage. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established, except that in the case of the 1986 crop, such announcement shall be made as soon as practicable after enactment of the Agriculture Act of 1985. The Secretary may revise the national program acreage first announced for any crop year for the purpose of determining the allocation factor under paragraph (6) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall announce such revised national program acreage as soon as it has been made. The national program acreage shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than ten million acres.

"(6) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor (not to exceed 100 per centum) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(7) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of cotton planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of cotton planted for harvest on the farm from the acreage base established for the farm under paragraph (9)(A) of this subsection by at least the percentage recommended by the Secretary in the announcement of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of cotton planted for harvest is less than the acreage base established for the farm under paragraph (9)(A) of this subsection, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for upland cotton, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(8) The farm program payment yield for each crop of upland cotton shall be determined on the basis of the actual yields per harvested acre on the farm for the preceding three years, except that the actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster or other condition beyond the control of the producers. In case farm yield data for one or more years are unavailable or there was no production, the Secretary shall provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available. Notwithstanding the foregoing provisions of this paragraph, in the determination of yields, the Secretary shall take into account the actual yields provided by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this paragraph. If the Secretary determines it necessary, the Secretary may established national, State or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or country program payment yields are established, the farm program payments yields shall balance to the national, State or county program payment yields.

"(9)(A) Notwithstanding any other provisions of this subsection, the Secretary may establish a limitation on the acreage planted to upland cotton if the Secretary determines that the total supply of upland cotton, in the absence of such limitation, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each cotton-producing farm. Producers who knowingly produce cotton in excess of the permitted cotton acreage for the farm shall be ineligible for cotton loans and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as a result of limitation under this subparagraph shall be the acreage planted on the farm to upland cotton for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to upland cotton for harvest in the two crop year immediately preceding the year for which the determination is made. For the

purpose of the preceding sentence, acreage planted to cotton for harvest shall include any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to such commodity, by (ii) the number of acres actually planted to such commodity under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely. If an acreage limitation program is announced under this paragraph for a crop of upland cotton, paragraphs (5), (6) and (7) of this subsection shall not be applicable to such crop, including any prior announcement which may have been made under such paragraphs with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest within the permitted upland cotton acreage for the farm as established under this paragraph.

"(B) The Secretary may make land diversion payments to producers of upland cotton, whether or not an acreage limitation for upland cotton is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of upland cotton to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreement in any county or local community so as not to affect adversely the economy of the county or local community.

"(C) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(10) An operator of a farm desiring to participate in the program under paragraph (9) of this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(11) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(12) The Secretary shall provide adequate safeguards to protect the interest of tenants and sharecroppers.

"(13) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(14) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(15) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(16) The provisons of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(17) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this subsection.

"(18) In order to encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make resource loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act.".

"(19) Notwithstanding any other provision of this subsection, when the carryover stocks of cotton exceeds three and one half million bales, the Secretary shall implement an acreage reduction program.

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Effective only with respect to the period beginning August 1, 1978, and ending July 31, 1989, the tenth sentence of section 407 of the Agricultural Act of 1949 is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells cotton for export, in no event, however, at less than 115 per centum of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

MISCELLANEOUS COTTON PROVISIONS

SEC. 504. Section 103(a) and 203 of the Agricultural Act of 1949 shall not be applicable to the 1966 through 1989 crops.

SKIPROW PRACTICES

SEC. 505. Section 374(a) of the Agricultural Adjustment Act of 1938 is amended by striking out "1985" and inserting in lieu thereof "1989".

PRELIMINARY ALLOTMENTS FOR 1989 CROP OF UPLAND COTTON

SEC. 506. Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938, as amended, shall again become effective as preliminary allotments for the 1989 crop.

TITLE VI—RICE

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, RICE ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF RICE

SEC. 601. Effective only for the 1986 through 1989 crops of rice, section 101 of the Agricultural Act of 1949 is amended by adding at the end thereof a new subsection as follows:

"(i) Notwithstanding any other provision of law—

"(1) The Secretary shall make available to all eligible producers non-recourse loans and purchases for each of the 1986 through 1989 crops of rice at a level equal to 75 percent of the simple average domestic price at rice received by farmers for each of the preceding five marketing years, excluding the high and low valued years, except that the level of loans and purchases shall not be adjusted by more than 10 percent in any given year. The loan and purchase level and the established price for each of the 1986 through 1989 crops of rice shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year, including the first year of such program.

"(2)(A) In addition, the Secretary shall make available to producers payments for each of the 1986 through 1989 crops of rice in an amount computed in this subsection. Payments for any such crop of rice shall be computed by multiplying (i) the payment rate by, (ii) the farm program crop acreage by, (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on

a greater acreage than the acreage actually planted to rice.

"(B) The payment rate for rice shall be the amount by which the established price for rice exceeds the higher of:

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop as determined by the Secretary, or

"(ii) the loan level determined under paragraph (1) for such crop.

"(C) The established price for rice in 1986 shall not be less than the established price for rice in 1985. Beginning in 1987, the established price shall be set at a level equal to 110 percent of the simple average domestic price of rice received by farmers for each of the preceding five marketing years, excluding the high and low valued years, but shall not be adjusted by more than 5 percent annually for each of the 1987 through 1989 crops.

"(D) The yield established for the farm for any year shall be determined on the basis of the actual yields per harvested acre for the three preceding years. The actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the producers. If no rice was produced on the farm during such period, the yield shall be determined taking into consideration the yield of comparable farms in the surrounding area and such other factors as the Secretary determines will produce a fair and equitable yield.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the corp under paragraph (3) of this subsection.

"(3)(A) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ per centum of the established price for the corp for the deficiency in production below 75 per centum for the crop.

"(C) Producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their rice acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crop or from reduced yields, that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(4)(A) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of rice. The proclamation shall be made not later than January 31 of each calender year for the crop harvested in that calendar year. The Secretary may revise the national program acreage first proclaimed for the purpose of determining the allocation factor under paragraph (B) of this subsection if the Secretary determines a revision necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it has been made. The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(B) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(C) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined. The farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the acreage base established for the farm under paragraph (5)(A) of this subsection by at least the percentage recommended by the Secretary in the proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than the acreage base established for the farm under paragraph (5)(A) of this subsection, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(5)(A) Notwithstanding any other provisions of this subsection, the Secretary may establish a limitation on the acreage planted to rice if the Secretary determines that the total supply of rice, in the absence of such limitation, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Any such limitation shall be announced by the Secretary not later than January 31 of the calendar year in which the crop for which the announcement is made is harvested. Such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each rice-producing farm. Producers who knowingly produce rice in excess of the permitted rice acreage for the farm shall be ineligible for rice loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as a result of limitation under this subparagraph shall be the acreage planted on the farm to rice for harvest in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to rice for harvest in the two crop year immediately preceding the year for which the determination is made; provided, under no circumstances shall the sum of the base acres of all program crops on a farm exceed the crop base acreage for the farm. For the purpose of the preceding sentence, acreage planted to rice for harvest shall include any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or condition beyond the control of the producers. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to rice, by (ii) the number of acres actually planted to rice under the limitation established by the Secretary shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe,

all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely. If an acreage limitation program is announced under this paragraph for a crop of rice paragraphs (4) of this subsection shall not be applicable to such crop, including any prior announcement which may have been made under such paragraphs with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to rice for harvest within the permitted rice for harvest within the permitted rice acreage for the farm as established under this paragraph.

"(B) The Secretary may make land diversion payments to producers of rice, whether or not an acreage limitation for rice is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of rice to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreement in any county or local community so as not to affect adversely the economy of the county or local community.

"(C) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

An operator of a farm desiring to participate in the program conducted under this paragraph shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(6) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(7) The Secretary shall provide adequate safeguards to protect the interest of tenants and sharecroppers.

"(8) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(9) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(10) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(11) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(12) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this subsection.

"(13) Notwithstanding any other provisions of this section, when the carryover stocks of rice exceeds normal supply by more than 15 percent, the Secretary shall implement an acreage reduction program.

TITLE VII—PEANUTS

SUSPENSION OF MARKETING QUOTAS AND ACREAGE ALLOTMENTS

SEC. 701. The following provisions of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1986 through 1989 crops of peanuts:

(1) Subsections (a) through (j) of section 358;

(2) Subsections (a) through (h) of section 358(a);

(3) Subsections (a), (b), (d), and (e) of section 359;

(4) Part I of subtitle C of title III; and

(5) Section 371.

NATIONAL POUNDAGE QUOTA AND FARM POUNDAGE QUOTA

SEC. 702. Effective only for the 1986 through 1989 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections as follows:

"(k) The national poundage quota for peanuts for each marketing year, 1986 through 1989, shall be established at the level of the previous three-year average of domestic edible and seed use, with modifications to be made by the Secretary of Agriculture, not to exceed 5 percent.

"(l) The national poundage quota established under subsection (k) of this section shall be apportioned among the States so that the poundage quota allocated to each State shall be equal to the percentage of the national poundage quota allocated for farms in the State for the preceeding year.

"(m)(1) A farm poundage quota shall be established for each farm which had a farm poundage quota for the 1985 crop year. Except as provided in subsection (k), the farm poundage quota for any such farm for the 1986 through 1989 marketing years shall be the same as the farm poundage quota for such farm for the immediately preceding marketing year, but not including any increases for under-marketings from previous marketing years, except that if the farm poundage quota, or any part thereof, is permanently transferred in accordance with section 358a of this Act, the receiving farm shall be considered as possessing the farm poundage quota (or portion thereof) of the transferring farm for all subsequent marketing years.

"(2) The farm poundage quota so determined shall be increased by the number of pounds by which total marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) were less than the total amount of the applicable farm poundage quotas (disregarding adjustments for undermarketings from prior marketing years) for such marketing years. Increases in farm poundage quotas made under this paragraph shall not be counted against the national poundage quota for the marketing year involved.

"(3) Notwithstanding the foregoing provisions of this subsection, if the total of all increases in individual farm poundage quotas under paragraph (2) of this subsection exceeds 10 per centum of the national poundage quota for the marketing year in which such increases shall be applicable, the Secretary shall adjust such increases so that the total of all such increases does not exceed 10 per centum of the national poundage quota.

"(n) For each farm for which a farm poundage quota was established for the 1985 crop of peanuts, and when necessary for purposes of this Act, a farm yield of peanuts shall be determined for each farm. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1981 through 1985. In the event that peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yield established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(o) Not later than December 15 of each calendar year (or in the case of the 1986 crop, as soon as practicable after enactment of the Agriculture Act of 1985), the Secretary shall conduct a referendum of farmers engaged in the production of quota peanuts in the calendar year in which the referendum is held to determine whether such farmers are in favor of or opposed to poundage quotas with respect to the crops of peanuts produced in the four calendar years immediately following the year in which the referendum is held, except that, if as many as two-thirds of the farmers voting in any referendum vote in favor of poundage quotas, no referendum shall be held with respect to quotas for the second, third, and

fourth years of the period. The Secretary shall proclaim the result of the referendum within 30 days after the date on which it is held, and if more than one-third of the farmers voting in the referendum vote against quotas, the Secretary also shall proclaim that poundage quotas will not be in effect with respect to the crop of peanuts produced in the calendar year immediately following the calendar year in which the referendum is held. For purposes of this subsection, if the referendum for the 1986 crop is held after December 31, 1985, it shall be deemed to have been held in calendar year 1985.

"(p) For the purposes of this part and title I of the Agricultural Act of 1949—

"(1) 'quota peanuts' means, for any marketing year, any peanuts produced on a farm having a farm poundage quota, as determined in subsection (m) of this section, that are eligible for domestic edible use as determined by the Secretary, that are marketed or considered marketed from a farm, and that do not exceed the farm poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year (A) any peanuts that are marketed from a farm for which a farm poundage quota has been established and that are in excess of the marketing of quota peanuts from such farm for such year, and (B) all peanuts marketed from a farm for which no farm poundage quota has been established in accordance with subsection (m) of this section.

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or processing into flakes or otherwise when authorized by the Secretary; and

"(4) 'domestic edible use' means use for milling to produce domestic food peanuts (other than those described in paragraph (3) of this subsection) and seed and use on a farm except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE OR TRANSFER OF FARM POUNDAGE QUOTA

SEC. 703. Effective only for the 1986 through 1989 crops of peanuts, section 358a of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections as follows:

"(i) The owner, or the operator with permission of the owner, of any farm for which a farm poundage quota has been established under this Act may, subject to such terms, conditions or limitations as the Secretary may prescribe, sell or lease all or any part of such poundage quota to any other owner or operator of a farm within the same county for transfer to such farm. The owner or operator of a farm may transfer all or any part of such farm's farm poundage quota to any other farm owned or controlled by such owner or operator that is in the same county or in a county contiguous to such county in the same State and that had a farm poundage quota for the 1985 crop. Notwithstanding the foregoing provisions of this subsection, in the case of any State for which the poundage quota allocated to the State was less than 10,000 tons for the 1985 crop, all or any or part of a farm poundage quota may be transferred by sale or lease or otherwise from a farm in one county to a farm in another county in the same State.

"(j) Transfers (including transfer by sale or lease) of farm poundage quotas under this section shall be subject to the following conditions: (1) no transfer of the farm poundage quota from a farm subject to a mortgage or other lien shall be permitted unless the transfer is agreed to by the lienholders; (2) no transfer of the farm poundage quota shall be permitted if the county committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act determines that the receiving farm does not have adequate tillable cropland to produce the farm poundage quota; (3) no transfer of the farm poundage quota shall be effective until a record thereof is filed with the county committee of the county to which such transfer complies with the provisions of this section; and (4) such other terms and conditions that the Secretary may by regulation prescribe."

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 704. Effective only for the 1986 through 1989 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections as follows:

"(f)(1) The marketing of any peanuts for domestic edible use in excess of the farm poundage quota for the farm on which such peanuts are produced shall be subject to penalty at a rate equal to 140 per centum of the support price for quota peanuts for the marketing year (August 1 through July 31) in which such marketing occurs. The marketing of any additional peanuts from a farm shall be subject to the same penalty unless such peanuts in accordance with regulations established by the Secretary, are either (A) placed under loan at the additional loan rate in effect for such peanuts under section 108A of the Agricultural Act of 1949 and not redeemed by the producers, (B) marketed through an area marketing association designated pursuant to section 108A(3)(A) of the Agricultural Act of 1949, or (C) marketed under contracts between handlers and producers, pursuant to the provisions of subsection (j) of this section. Such penalty shall be paid by the person who buys or otherwise acquire the peanuts from the producer, or if the peanuts are marketed by the producer through an agent, the penalty shall be paid by such agent, and such person or agent may deduct an amount equivalent to the penalty from the price paid to the producer. If the person required to collect the penalty fails to collect such penalty, such person and all persons entitled to share in the peanuts marketed from the farm or other proceeds thereof shall be jointly and severally liable for the amount of the penalty. Peanuts produced in a calendar year in which farm poundage quotas are in effect for the marketing year beginning therein shall be subject to such quotas even though the peanuts are marketed prior to the date on which such marketing year begins. If any producer falsely identifies or fails to certify planted acres or fails to account for the disposition of any peanuts produced on such planted acres, an amount of peanuts equal to the farm's average yield, as determined under section 358(n) of this Act, times the planted acres, shall be deemed to have been marketed in violation of permissible uses of quota and additional peanuts and the penalty in respect thereof shall be paid and remitted by the producer.

"(2) The Secretary shall authorize, under such regulations as the Secretary shall prescribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations that were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned. Errors in weight that do not exceed one-tenth of 1 per centum in the case of any one marketing document shall not be considered marketing violations except in cases of fraud or conspiracy.

"(g) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts excluded under section 359(c), are unique strains, and are not commercially available. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use, except as provided in subsection (k) of this section. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(h) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts have the grade, kernel, content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts that the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(i) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing association designated pursuant to section 108A(3)(A) of the Agricultural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be comingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing. Failure by a handler to comply with regulations issued by the Secretary governing the disposition and handling of additional peanuts shall subject the handler to a penalty at a rate equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts involved in the violation.

"(j) Handlers may, under regulations prescribed by the Secretary, contract with producers for the purchase of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval prior to April 15 of the year in which the crop is produced.

"(k) Subject to the provisions of section 407 of the Agricultural Act of 1949, any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus (1) not less than 100 per centum of the

loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season upon delivery by and with the written consent of the producer, (2) not less than 105 per centum of the loan value of the quota peanuts if the additional peanuts are sold after delivery by the producer by not later than December 31 of the marketing year, or (3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year. For the period from the date additional peanuts are delivered for loan to March 1 of the calendar year following the year in which such additional peanuts were harvested, the area marketing association designated pursuant to section 108A(3)(A) of the Agricultural Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price as determined under this section equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this sentence in order to facilitate the orderly marketing of additional peanuts.

"(l)(1) The person liable for payment or collection of any penalty provided for in this section shall be liable also for interest thereon at a rate per annum equal to the rate of interest which was charged the Commodity Credit Corporation by the Treasury of the United States on the date such penalty became due.

"(2) The provisions of this section shall not apply to peanuts produced on any farm on which the acreage harvested for nuts is one acre or less if the producers who share in the peanuts produced on such farm do not share in the peanuts produced on any other farm.

"(3) Until the amount of the penalty provided by this section is paid, a lien on the crop of peanuts with respect to which such penalty is incurred, and on any subsequent crop of peanuts subject to farm poundage quotas in which the person liable for payment of the penalty has an interest, shall be in effect in favor of the United States.

"(4) Notwithstanding any other provision of law, the liability for and the amount of any penalty assessed under this section shall be determined in accordance with such procedures as the Secretary by regulations may prescribe. The facts constituting the basis for determining the liability for or amount of any penalty assessed under this section, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government. Nothing in this section shall be construed as prohibiting any court of competent jurisdiction from reviewing any determination made by the Secretary with respect to whether such determination was made in conformity with the applicable law and regulations. All penalties imposed under this section shall for all purposes be considered civil penalties.

"(5) Notwithstanding any other provision of law, the Secretary may reduce the amount of any penalty assessed against handlers under this section if the Secretary finds that the violation upon which the penalty is based, was minor or inadvertent, and that the reduction of the penalty will not impair the operation of the peanut program.".

PRICE SUPPORT PROGRAM

SEC. 705. Effective only for the 1986 through 1989 crops of peanuts, the Agricultural Act or 1949 is amended by adding a new section as follows:

PRICE SUPPORT FOR 1986 THROUGH 1989 CROPS OF PEANUTS

SEC. 108A. Notwithstanding any other provision of law—

"(1) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1986 through 1989 crops. The national average quota support rate for the 1986 crop of quota peanuts shall be modified only to reflect the percentage change in the prices paid index of the previous two years, but in no event less than 27.5 cents per pound, farmers stock basis. The national average quota support rate for each of the 1987, 1988, 1989 crops of quota peanuts shall be the national average quota support rate for such peanuts for the preceding crop, adjusted to reflect any increase or decrease, during the period January 1 and ending December 31 of the calendar year immediately preceding the marketing year for the crop for which a level of support is being determined, based upon changes in the prices paid index, except that in no event shall the national average quota support rate for any such crop exceed by more than 6 per centum the national average quota support rate for the preceding crop. The levels of support so announced shall not be reduced by any deductions for inspection, handling, or storage: *Provided*, That the Secretary may make adjustments for location of peanuts and such other factors as are authorized by section 403 of this Act.

"(2) The Secretary shall make price support available to producers through loans, purchases, or other operations on additional peanuts for each of the 1986 through 1989 crops at such levels as the Secretary finds appropriate, taking into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets: *Provided*, That the Secretary shall set the support rate on additional peanuts at a level estimated by the Secretary to ensure that there are no losses to the Commodity Credit Corporation on the sale or disposal of such peanuts. The Secretary shall announce the level of support for additional peanuts of each crop not later than February 15 preceding the marketing year for the crop for which the level of support is being determined.

"(3)(A) In carrying out paragraphs (1) and (2) of this section, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in 7 CFR 1446.10 (1980 ed.) to a designated area marketing association of peanut producers that is selected and approved by the Secretary and that is operated primarily for the purpose of conducting such loan activities. The Secretary may not make warehouse storage loans available to any cooperative that is engaged in operations or activities specified in this section and in section 359 of the Agricultural Adjustment Act of 1938. Such area marketing associations shall be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Loans made under this subparagraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsiblities, operations, activities under this section and section 359 of the Agricultural Adjustment Act of 1938.

"(B) The Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by type, area, and segregaton for quota peanuts handled under loan, for additional peanuts placed under loan, and for additional peanuts produced without a contract between a handler and a producer as described in section 359(j) of the Agricultural Adjustment Act of 1938. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each producer. Net gains for peanuts in each pool shall consist of (i) for quota peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts and (ii) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (i) of this subparagraph. Notwithstanding any other provision of this section, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such producer.

"(4) Notwithstanding the foregoing provisions of this section or any other provision of law, no price support shall be made available by the Secretary for any crop of peanuts with respect to which poundage quotas have been disapproved by producers, as provided for in section 358(o) of the Agricultural Adjustment Act of 1938.".

REPORTS AND RECORDS

SEC. 706. effective only for the 1986 through 1989 crops of peanuts, the first sentence of section 373(a) of the Agricultural Adjustment Act of 1938 is amended by inserting immediately before "all brokers and dealers in peanuts" the following: "all farmers engaged in the production of peanuts,".

SUSPENSION OF CERTAIN PRICE SUPPORT PROVISIONS

SEC. 707. Section 101 of the Agricultural Act of 1949 shall not be applicable to the 1986 through 1989 crops of peanuts.

TITLE VIII—SOYBEANS

SOYBEAN PRICE SUPPORT

SEC. 801. Effective only for the 1986 through 1989 crops of soybeans, section 201 of the Agricultural Act of 1949 is amended by—

(1) inserting in the first sentence "soybeans," after "tung nuts,"; and

(2) adding at the end thereof a new subsection as follows:

"(g)(1) The price of soybeans shall be supported through loans and purchases during each of the four marketing years beginning with the 1986 marketing year at a level equal to 75 per centum of the simple average price received by farmers for soybeans for each of the preceding five marketing years, excluding the high and low valued years except that in no event shall the Sec-

retary establish a support price of less than $5.02 per bushel: *Provided*, That if the Secretary determines that the average price of soybeans received by producers in any marketing year is not more than 105 per centum of the level of loans and purchases for soybeans for such marketing year, the Secretary may reduce the level of loans and purchases for soybeans for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for soybeans, except that the level of loans and purchases shall not be reduced by more than 10 per centum in any year nor below $4.50 per bushel. For the purposes of this subsection, the soybean marketing year shall be the twelve-month period beginning on September 1 and ending August 31. The Secretary shall make a preliminary announcement of the level of price support not earlier than thirty days in advance of the beginning of the marketing year based upon the latest information and statistics available when such level of price support is announced, and shall make a final announcement of such level as soon as full information and statistics are available on prices for the five years preceding the beginning of the marketing year. In no event shall such final level of support be announced later than October 1 of the marketing year for which the announcement applies; nor shall the final level of support be less than the level of support set forth in the preliminary announcement.

"(2) Notwithstanding any other provision of law, the Secretary shall not require participation in any production adjustment control program for soybeans or any other commodity as a condition of eligibility for price support for soybeans.".

TITLE IX—SUGAR

SUGAR PRICE SUPPORT

SEC. 901. Effective only for the 1986 through 1989 crops of sugar beets and sugarcane, section 201 of the Agricultural Act of 1949 is amended by—

(1) striking out in the first sentence "honey, and milk" and inserting in lieu thereof "honey, milk, sugar beets, and sugarcane", and

(2) adding at the end thereof a new subsection as follows:

"(h) Effective October 1, 1986, the Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate but not less than 18 cents per pound for the 1986 through 1989 crops of sugar. Effective October 1, 1986 the Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for sugarcane. The Secretary shall announce the loan rate to be applicable during any fiscal year as far in advance of the beginning of that fiscal year as practicable consistent with the purposes of this subsection. Loans during any such fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of that fiscal year.".

TITLE X—MISCELLANEOUS

SUBTITLE A—ADVANCE DIVERSION PAYMENTS

SEC. 1001. If the Secretary of Agriculture makes land diversion payments as provided for in the Agriculture Act of 1985 to assist in adjusting the stated acreage of the 1986, 1987, 1988, or 1989 crop of wheat, feed grains, cotton or rice, at least 50 percent of such a land diversion payment shall be made available to a producer as soon as possible after the producer agrees to undertake the diversion of land in return for the payment.

SUBTITLE B—GRAIN RESERVES

TERMINATION OF PRODUCER OWNED RESERVES

SEC. 1002. The Secretary of Agriculture shall not carry out a producer storage program for any commodity under section 110 of the Agricultural Act of 1949 after the date of enactment of this Act. Commodities which have heretofore been stored under the provisions of section 110 of the Agricultural Act of 1949 shall be permitted to remain in such producer storage program under the terms and conditions upon which the commodities were entered. Effective upon the expiration of the loan and storage agreements for the commodities held in storage as of the date of enactment of this Act, the provisions of section 110 of the Agricultural Act of 1949 are repealed.

WITHDRAWAL OF COMMODITIES

SEC. 1003. Notwithstanding the provisions of section 110 of the Agricultural Act of 1949 or any regulations or contracts governing participation by producers in farmer-owned reserves established under that section, a producer may withdraw any commodity placed in a reserve from that reserve without penalty at anytime that the market price for the commodity is more than 110 percent of the current price support loan rate for that commodity.

SUBTITLE C—MISCELLANEOUS COMMODITY PROVISIONS

PAYMENT LIMITATIONS FOR WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

SEC. 1004. Notwithstanding any other provision of law–

(1) The total amount of deficiency payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice shall be limited to $50,000 for each of the 1986 through 1989 crop years.

(2) The term "payments" as used in this section shall not include loans or purchases or land diversion payments, or any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment or public access for recreation.

(3) If the Secretary determines that the total amount of payments that will be earned by any person under the program in effect for any crop will be reduced under this section, any acreage requirement established under a set-aside or acreage limitation program for the farm or farms on which such person will be sharing in payments earned under such program shall be adjusted to such extent and in such manner as the Secretary determines will be fair and reasonable in relation to the amount of the payment reduction.

(4) The Secretary shall issue regulations defining the term "person" and prescribing such rules as the Secretary determines necessary to assure a fair and reasonable application of such limitation: *Provided*, That the provisions of this section that limit payments to any person shall not be applicable to lands owned by States, political subdivisions, or agencies thereof, so long as such lands are farmed primarily in the direct furtherance of a public function, as determined by the Secretary. The rules for determining whether corporations and their stockholders may be considered as separate persons shall be in accordance with the regulations issued by the Secretary on December 18, 1970, under section 101 of the Agricultural Act of 1970.

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR WHEAT AND FEED GRAINS

SEC. 1005. Effective only for the marketing years for the 1986 through 1989 crops, section 407 of the Agricultural Act of 1949 is amended by—

(1) striking out in the third sentence the language following the third colon and inserting in lieu thereof the following: *"Provided*, That the Corporation shall not sell any of its stocks of wheat, corn, grain, sorghum, barley, oats, and rye, respectively, at less than 115 per centum of the current national average loan rate for the commodity, adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate, plus reasonable carrying charges.";

(2) striking out in the fifth sentence "current basis county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and inserting in lieu thereof the following: "current basic county loan rate (or a comparable price if there is no current basic county loan rate)"; and

(3) striking out in the seventh sentence", but in no event shall the purchase price exceed the then current support price for such commodities" and inserting in lieu thereof the following: "or unduly affecting market prices, but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 1006. Effective only for the 1986 through 1989 crops of wheat, feed grains, upland cotton, and rice, section 408(k) of the Agricultural Act of 1949 is amended to read as follows:

"REFERENCES TO TERMS MADE APPLICABLE TO WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

"(k) Reference made in sections 402, 403, 406, 407, and 416 to the terms support price, 'level of support', and 'level of price support' shall be considered to apply as well to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under this Act; and references made to the terms 'price support', 'price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to the loan and purchase operations for wheat, feed grains, upland cotton and rice under this Act".

SUPPLEMENTAL SET-ASIDE AND ACREAGE LIMITATION AUTHORITY

SEC. 1007. Effective for the 1986 through 1989 crops of wheat and feed grains, section 113 of the Agricultural Act of 1949 is amended to read as follows:

SUPPLEMENTAL SET-ASIDE AND ACREAGE LIMITATION AUTHORITY

SEC. 113. Notwithstanding any other provision of law or prior announcement made by the Secretary to the contrary, the Secretary may announce and provide for a set-aside or acreage limitation program under section 105B(e) or 107B(e) of this title for one or more of the crops of wheat and feed grains if the Secretary determines that such action is in the public interest as a result of the imposition of restrictions on the export

of any such commodity by the President or other member of the executive branch of Government. In order to carry out effectively a set-aside or acreage limitation program authorized under this section, the Secretary may make such modifications and adjustments in such program as the Secretary determines necessary because of any delay in instituting such program".

NORMALY PLANTED ACREAGE AND TARGET PRICES

SEC. 1008. Sec. 1001 of the Food and Agriculture Act of 1977 is amended by striking "1982 through 1985" and inserting in lieu thereof "1986 through 1989" in subsections (a) and (b).

NORMAL SUPPLY

SEC. 1009. Notwithstanding any other provision of law, if the Secretary of agriculture determines that the supply of wheat, corn, upland cotton, or rice for the marketing year for any of the 1986 through 1989 crops of such commodity is not likely to be excessive and that program measures to reduce or control the planted acreage of the crop are not necessary, such a decision shall constitute a determination that the total supply of the commodity does not exceed the normal supply and no determination to the contrary shall be made by the Secretary with respect to such commodity for such marketing year.

SUBTITLE D—GENERAL PROVISION

SPECIAL GRAZING AND HAY PROGRAM

SEC. 1011. Section 109 of the Agricultural Act of 1949 is amended by striking out "1985" in the first sentence of subsection (a) and inserting in lieu thereof "1989".

TITLE XI—AGRICULTURAL EXPORTS AND PUBLIC LAW 480

SUBTITLE A—EXPORT PROVISIONS

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

SEC. 1101. Section 4(d) of the Food for Peace Act by 1966 (7 U.S.C. 1707(a) is amended by—

(1) striking "1985" wherever it appears in paragraph (6) and inserting in lieu thereof "1989"; and

(2) adding a new paragraph (9) as follows:

"(9) Notwithstanding any other provision of law and regardless of terms, interest rates, or other loan conditions, the provisions of the cargo preference laws shall not apply to any agricultural export promotion and sales financed under any Commodity Credit Corporation export credit program.".

SPECIAL STANDBY EXPORT SUBSIDY PROGRAM

SEC. 1102. Section 1203 of the Agriculture and Food Act of 1981 is amended by adding at the end thereof a new subsection as follows:

"(f) The provisions of the cargo preference laws shall not apply to export sales financed under any Commodity Credit Corporation export program.".

EXPANSION OF INTERNATIONAL MARKETS FOR UNITED STATES AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

SEC. 1103. Section 1207(a) of the Agriculture and Food Act of 1981 is amended by—

(1) striking in the first paragraph "the Secretary of Agriculture should and is requested to" and inserting in lieu thereof "the Secretary of Agriculture shall"; and

(2) in paragraph (1) insert immediately after the word "basis" the words "and, in the event the Secretary of Agriculture shall fail to do so, the President shall report to the Senate and House Committees on Agriculture the reasons therefor"; and

(3) in paragraph (2) insert immediately after "1966" the words "and, if the Secretary of Agriculture fails to request such funds, the President shall report to the Committee on Agriculture, Nutrition and Forestry of the Senate and to the Committee on Agriculture of the House, the reasons therefor".

BONUS COMMODITY EXPORTS

SEC. 1104. (a) Notwithstanding any other provision of law and in addition to any authority granted to the Secretary of Agriculture or the Commodity Credit Corporation by any other provision of law, the Secretary shall use "bonus commodities" from the Commodity Credit Corporation acquired through its price support operations, to the extent they are available, that shall be provided to United States exporters, users and foreign purchasers at no cost to offset the adverse effects of export subsidies of competing exporting countries and to offset disadvantages for United States agricultural commodity exports due to the low value of foreign currencies in relation to the United States dollar.

(b) The Secretary shall calculate the estimated annual storage, interest and handling costs of those Commodity Credit Corporation stocks which he determines to be in excess of those Commodity Credit Corporation stocks which together with domestic commercial stocks are in an adequate carryover status, and declare an amount of such excess stocks, equal to the calculated total costs of the storage, interest and handling costs of all stocks the Secretary determines to be excess, to be bonus commodities available for export under this section. The Secretary shall use a minimum of one-third of such bonus commodities each year for the purpose as set forth in subsection (a) and, in the event the Secretary fails to do so, he shall report to the Committee on Agriculture, Nutrition, and Forestry of the Senate, and the Committee on Agriculture of the House, the reasons therefor.

(c) Notwithstanding any other provision of law, the provisions of the cargo preference laws shall not apply to the bonus commodity program provided for in this section.

SUBTITLE B—PUBLIC LAW 480

MINIMUM LEVELS OF EXPORTS

SEC. 1105. Section 401 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(c) In order to more adequately meet the food requirements of needy people in the developing nations while at the same time providing additional export outlets for U.S. farmers, a minimum average quantity of 10 million metric tons of U.S. farm commodities shall be exported annually under titles I, II and III in fiscal years 1986, 1987, 1988 and 1989; *Provided,* That this requirement shall not affect the minimum levels set for title II by section 201(b); *Provided further,* That the 10 million metric ton annual minimum level of exports must be met unless (i) export supplies are not available as determined under subsection (a) or (ii) food needs of developing nations do not merit that quantity as gauged by a lack of request for food assistance by such nations or it is determined by the Food and Agriculture Organization of the United Nations that unfilled food requirements of the developing nations are less than 10 million metric tons during the fiscal year involved. If a quantity less than the minimum level is exported during any year, the President shall report to the Committee on Agriculture, Nutrition and Forestry of the Senate and the Committee on Agriculture of the House the specific reasons for the shortfall."

CARGO PREFERENCE

SEC. 1106. Title IV of the Agricultural Trade Development and Assistance Act of 1954 is amended by—

"Sec. 414. The provisions of the cargo preference laws shall not apply to the export of agricultural commodities under this Act.

EXTENSION OF PROGRAM

SEC. 1107. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by—

(1) striking out in the first sentence "1985" and inserting in lieu thereof "1989"; and

(2) striking out in the second sentence "Agriculture and Food Act of 1981" and inserting in lieu thereof "Agriculture Act of 1985".

TITLE XII—RESOURCE CONSERVATION

SUBTITLE A—CONSERVATION RESERVE

CONSERVATION RESERVE PROGRAM

SEC. 1201. (a) Notwithstanding any other provision of law, the Secretary may formulate and carry out a program with owners and operators of erosion-prone land to assist such owners or operators to make, in orderly progression, changes in their cropping and land use systems needed to conserve, develop, protect, and use the soil and water resources of their farms, ranches, or other lands and to implement the soil and water conservation measures and practices needed under such changed systems and uses. In assisting such owners and operators, the Secretary shall provide contracts covering other than erosion-prone land upon a demonstration by the conservation district that a serious soil erosion problem exists on such land.

(b) The Secretary may enter into contracts of not less than seven or more than fifteen years for the purpose of carrying out this section. In such contract, the owner or operator shall agree—

(1) to effectuate a plan approved by a conservation district for the farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirements thereof are waived or modified by the Secretary;

(2) to forfeit all rights to futher payments under the contract and refund to the United States all payments, with interest, received thereunder upon his violation of the contract at any stage during the time he has control of the land if the Secretary, after considering the recommendations of the soil conservation district and the Administrator of the Soil Conservation Service, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the contract;

(3) upon transfer of his right and interest in the farm, ranch, or other land during the contract period to forfeit all rights to further payments under the contract and refund to the United States all payments received thereunder, unless the transferee of any such land agrees with the Secretary to assume all obligations under the contract;

(4) not to adopt any practice specified in the contract by the Secretary as a practice that would tend to defeat the purposes of the contract; and

(5) to such additional provisions as the Secretary determines are desirable and are

included in the contract to effectuate the purposes of the program or to facilitate the practical administration thereof.

(c) In return for such agreement by the owner or operator, the Secretary shall agree to provide technical assistance, to share the cost of carrying out the conservation measures and practices set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest, and to pay an annual land rental fee on those acres of erosion-prone cropland that are placed in a conservation use for the duration of the contract.

(d) In determining the amount of cost sharing for conservation measures and practices under this section, the Secretary shall determine that part of the total costs that is necessary and appropriate to effectuate the installation and maintenance of the conservation plantings and practices for a normally expected life of such a planting or practice. Payment shall be made in accordance with a formula developed by the Secretary to take into consideration—

(1) the costs of establishing and maintaining the agreed-upon conservation measures, plantings, and practices for a normal life span;

(2) the severity of the erosion hazard on the land to be converted from cropland to permanent cover; and,

(3) the willingness of the owner or operator, as evidenced in the contract, to apply the conservation measures as specified in the contract early in the life of the contract and maintain them for their normally expected life.

(e) In determining the amount of land rental to be paid for the retirement of erosion-prone cropland to conserving uses for the life of the contract, the Secretary shall accept bids from the owners and operators. In considering bids for acceptance, the Secretary shall give priority to those that will give a combination of—

(1) the lowest cost per ton of soil saved on the diverted land, as calculated by the difference between the estimated soil loss on the pre-contract cropping system employed by the owner or operator and the system that will be installed as a result of the contract; and

(2) the lowest cost per acre/year of erosion-prone cropland diverted, taking into account both the amortized value of the cost sharing required for installation of conservation measures and practices and the proposed per-acre rental fee contained in the bid proffered by the owner or operator.

(f) Notwithstanding any other provision of law, payments under this section shall be made in cash or in in-kind commodities in such amounts as agreed upon and specified in the contract.

(g) The Secretary shall provide the owner or operator the option to elect to receive payments under this section on a schedule, as outlined in the contract, that provides for a close correlation between the time the costs for conservation measures and practices are incurred by the owner or operator and the time the Secretary makes the payments to the owner or operator.

(h) The Secretary shall provide the owner or operator the option to hay or graze the land placed in a conservation use in lieu of annual rental payments.

(i) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for sharing, on a fair and equitable basis, in payments under the program.

(j) The Secretary shall provide by appropriate regulations for preservation of cropland, crop acreage, and allotment history applicable to acreage deverted from the production of crops to establish vegetative cover for the purpose of any Federal program under which such history is used as a basis for an allotment or other limitation or for participation in such program.

(k) In carrying out the program authorized by this title, the Secretary may use the funds, facilities, and authorities of the Commodity Credit Corporation.

SUBTITLE B—PROGRAM ELIGIBILITY ON HIGHLY ERODIBLE LAND

SEC. 1202. (a) Except as provided in subsection (b) and notwithstanding any other provision of law, following the date of enactment of this title, any person who produces and agricultural commodity on highly erodible land shall be ineligible, for—

(1) any type of price or income support assistance made available under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) the Commodity Credit Corporation Charter Act of (15 U.S.C. 714 et seq.) or any other Act;

(2) a loan for the construction or purchase of a facility for the storage made under section 4 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h));

(3) crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.);

(4) a disaster payment made under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.); or

(5) a new loan made, insured, or guaranteed under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) or any other provision of law administered by the Farmers Home Administration, if the Secretary determines that such loan will be used for a purpose which will contribute to excessive erosion of highly erodible land.

(b) Subsection (a) shall not apply to—

(1) any land which was cultivated by a person to produce any of the 1975 through 1985 crops of agriculture commodities;

(2) any agricultural commodity crop planted by a person before the date of enactment of this title;

(3) any agricultural commodity crop planted by a person during any crop year beginning before the date of enactment of this title.

(4) any loan described in subsection (a) made before the date of enactment of this title; or

(5) any agricultural commodity crop produced using a conservation system that has been approved by a conservation district and that is based on technical standards set forth in the Soil Conservation Service technical guide for that conservation district. In areas where no conservation district exists, the Secretary shall determine the adequacy of the conservation system to be used in the production of any agricultural commodity on highly erodible land.

SUBTITLE C—GENERAL PROVISIONS

RULES AND REGULATIONS

SEC. 1203. The Secretary shall, within one hundred and twenty (120) days after the enactment of this title, publish in the Federal Register regulations implementing this title, including the technical definition of erosion-prone land and highly erodible land.

ADDITIONAL AUTHORITY

SEC. 1204. The authority provided by this title shall be in addition to and not in place of other authorities available to the Secretary and the Commodity Credit Corporation for carrying out soil and water conservation programs.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1205. There is hereby authorized to be appropriated such sums as are necessary for the administration of this title.

XIII—EFFECTIVE DATE

SEC. 1301. Except as may otherwise be provided herein, the provisions of this Act shall become effective on enactment.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I congratulate the Senator from Kentucky for introducing, at this very early stage in his Senate career, a most meaningful and far-reaching bill affecting agriculture, the McConnell farm bureau bill, as he has called it.

He mentions that it is a signal of his intended involvement in the process of developing farm legislation in this watershed year, and I agree with that term, that indeed this is a watershed year. I have already seen vast evidence of that involvement by Senator MCCONNELL in the process of agriculture legislation. I have held a series of hearings in the process of coming up with a farm bill, and the hearings have affected the farm bill. To the best of my knowledge, Senator MCCONNELL has been at each of those hearings, speaking and contributing to the development of the particular subject at hand for those hearings.

My attitude toward the farm bill probably will not be very far from that of the Senator from Kentucky. I, too, feel that some fundamental changes must be made in the farm picture. I feel, as he does, that the change cannot come overnight, as the administration bill would seem to mandate. That bill, in my judgment, would be a hard blow to the farm economy.

I agree with the Senator from Kentucky when he gives the analysis that no farm bill that is introduced in this session is going to be adopted in toto and that there will be a process of compromise. It is indeed a pleasure to know that the Senator from Kentucky will be hardheaded and will be an important element in developing that compromise.

My attitude with respect to the 1985 farm bill is that some things of great importance must be accomplished. Competitiveness must be restored to American agriculture. Certain conservation aspects must be achieved, because much crop land that is now tilled is fragile and is threatening to blow away. Not only the farmer but also the infrastructure of American agriculture must be put to work again, and that means full production. I support agricultural legislation that moves quickly toward full production of the agriculture sector.

Finally, the other important element of the farm bill, in my judgment, will be the protection of income, because the farmer does need a protective period during what are probably

going to be several hard years ahead. Some protection of farm income is necessary during that period, as we return to a greater free-market concept.

I congratulate the Senator from Kentucky for the introduction of his first bill. I believe it is his first bill. Is that correct?

Mr. McCONNELL. That is correct.

Mr. BOSCHWITZ. It is the first bill he has introduced, and that it should be such a wide-ranging and far-reaching bill as the Farm Bureau bill is an extraordinary compliment to him, as well as the fact that the largest farm organization in the United States would seek him out for the purpose of introducing this bill.

Mr. McCONNELL. Mr. President, will the Senator yield?

Mr. BOSCHWITZ. I yield.

Mr. McCONNELL. Mr. President, I thank the distinguished Senator from Minnesota for his kind remarks about this bill.

I do not think there is anyone in this body who knows more about agriculture than he does. We have all been impressed with his observations during committee meetings and on the floor about the status of American agriculture and what to do about it. Without his inspired leadership on this subject, I do not think we could find our way through this morass in the direction of an appropriate farm bill for the next 4 years.

Mr. BOSCHWITZ. I thank the Senator from Kentucky for those remarks. He will be involved in this process of developing a farm bill for 1985, and so will I. I suppose we will see eye to eye on many of the issues, and I look forward to working with him. I have enjoyed working with him through the committee process, and I compliment him for his extreme activity in the committee. I believe he attended each of the hearings at which I was present.

Once again, I think it is indeed remarkable that a new Senator would be given the task by the largest farm organization in the country of introducing legislation to impact the agriculture sector. I congratulate the Senator from Kentucky.

Mr. McCONNELL. I thank the Senator.

CLAYTON YEUTTER, U.S. SPECIAL TRADE REPRESENTATIVE

Mr. DIXON. Mr. President, today I would like to bring to the attention of my colleagues an editorial from the April 9, 1985, Chicago Tribune commenting on the recent appointment of Mr. Clayton Yeutter as U.S. Special Trade Representative.

The editorial very accurately expresses my own feelings about the wisdom of the selection of Mr. Yeutter, and I ask unanimous consent that it be reprinted in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

YEUTTER'S NEW JOB

Clayton Yeutter's new assignment as the nation's chief trade official puts him on a tough spot, which is the kind of spot Mr. Yeutter thrives on. He has done so for the last six years as president of the Chicago Mercantile Exchange, which has renovated itself under his leadership.

The job for which President Reagan nominated Mr. Yeutter, U.S. special trade representative, is exceptionally challenging right now. The clash with Japan over trade imbalance is a serious concern to both countries and takes in a complex set of issues—not just government policies but deep-rooted traditions and practices on both sides.

Mr. Yeutter fundamentally is a free-trade advocate, and is a tough, able and experienced negotiator in foreign trade matters. He is not noted for tactfulness, and that may seem a drawback in dealing with the Japanese.

Still, courtesies may sometimes mask an inflexible bargaining position. If Mr. Yeutter cannot outdo Japan's representatives in politeness, he is well qualified for any hardball negotiations that may be called for. He and Mr. Reagan are both to be congratulated for the choice.

JOBS CORPS FIREFIGHTERS

Mr. FORD. Mr. President, many reasons have been given for maintaining the Job Corps Program which is providing employment for 44,000 low-income Americans, ages 16 to 22, this year. While the Reagan administration has proposed eliminating the program, the aid of Job Corps workers during the recent rage of forest fires across several Southeastern States gives us the most powerful reason yet to save the program from a proposed elimination.

It is apparent that the primary attack on these devastating forest fires in many of these States, including Kentucky, came from Job Corps crews. I ask unanimous consent that an article from Louisville Courier Journal, which describes Job Corps firefighting assistance, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Louisville Courier Journal, Apr. 15, 1985]

CUTBACKS MAY DOOM JOB CORPS FIREFIGHTERS

(By William Keesler)

PINE KNOT, KY.—When forest fires raged across the Southeast earlier this month, crews from two Job Corps centers in the state helped battle flames on federal land in a half-dozen Eastern Kentucky counties.

A 15-man Job Corps crew helped combat a 1,300-acre fire in Alabama.

And a 10-man crew cooked for firefighters in North Carolina.

The U.S. Forest Service depends heavily on the Job Corps for fire control.

"We couldn't do it without them right now," said Jack Steelmon, district ranger for the Somerset District of the Daniel Boone National Forest. "We would be in serious trouble without their help."

Forest officials are concerned about a Reagan administration proposal to abolish the Job Corps, which is providing employment training for 44,000 low-income Americans, ages 16 to 22, this year.

The $615 million program has frequently been targeted for the fiscal ax, however, and forest officials hope it will again escape a deadly blow.

Job Corps crews make up 75 percent of the firefighting force for the 679,000-acre Daniel Boone National Forest, said Charles J. Crait, forest public information officer.

Corpsmen once were used primarily to back up forest service fire crews. They assisted mainly with mop-up work—helping ensure that fires were completely out.

Over the past two years, however, 100 part-time federal forest-service workers in Eastern Kentucky, many of whom were trained firefighters, have been laid off because of federal budget-cutting measures.

As a result, Job Corps crews now serve as the primary attack force on many fires.

Two of the six Job Corps centers in the state provide fire units. Seventy-five of 224 corpsman at the Pine Knot center in southern McCreary County are trained to fight fires. And 40 of the 168 corpsmen at the Frenchburg center in Menifee County are trained firefighters.

Bill Knisley, deputy director of the Pine Knot center, says firefighting is "strictly a sideline" to the regular Job Corps business of training young people for employment in carpentry, masonry, cooking and other trades. (Job Corps also teaches academic skills, to help corpsmen earn high school equivalency diplomas, and living skills, such as personal hygiene.)

Firefighting supplements the pay of corpsmen, adding $6.49 per hour of firefighting to the $40-to-$100 allowance they receive each month.

"And it's a service to the taxpayers," Knisley said.

Larry Valverde, a vocational-training specialist who supervises firefighters at the Frenchburg center, said firefighting duties also help corpsmen grow—by exposing them to people and dangers they normally wouldn't encounter at the center.

The two centers draw youths from across the country, particularly from the Southeast. Many of the corpsmen come from urban areas and have never tried to negotiate the kind of rugged terrain they find in Eastern Kentucky.

Frank Whaley, a 22-year-old Pine Knot corpsman from Charleston, S.C., says such conditions can be particularly difficult at night, when the forest fire and the battery-operated lamp on a corpsman's helmet often provide the only light.

"You can see the fire on one side of you, but on the other side it's just darkness and silence," Whaley said.

"We don't have too much woods in Charleston. We have streetlights and sidewalks, and you have cars coming at you with headlights.

"It's a different experience."

Corpsmen must be 18 years old and must pass a physical-fitness test to become firefighters. They complete four hours of classroom fire study and four hours of outdoor field training.

Then they spend 12 to 30 hours assisting with prescribed burns—controlled fires set by the forest service to improve growing conditions for pines and destroy undergrowth that could fuel forest fires.

Once corpsmen have sufficient experience with prescribed burns, they can be sent to fight full-fledged forest fires.

Corpsmen from the Pine Knot center helped fight a blaze in Georgia last month. In 1977, nine 20-man crews from Pine Knot spent 28 days battling fires in California.

One afternoon earlier this month, a 10-man Job Corps crew from Pine Knot, plus two supervisors, assisted with a 30-acre prescribed burn on a ridge near Sawyer in northeastern McCreary County.

The corpsmen expected just to help mop up. But things got hotter than anticipated when a spark apparently blew down the slope and set the face of an old coal mine on fire.

When the corpsmen arrived in their van, Kim Spielman, a wildlife biologist with the forest service, came running up to greet them.

"Get the rakes," she urged. "We've got a breakout down by the cliff."

The corpsmen, wearing hard hats and green and yellow fire-retardant clothes, ran several hundred yards to the scene, where they eased carefully down the steep, 75-foot incline, split into two groups of five and began raking.

Every few seconds, a corpsman in each group shouted, "Bump up!" and the line of workers methodically shifted 10 to 20 feet to the left, where the raking continued.

Within 45 minutes, the corpsmen, plus a half a dozen forest service employees, had scratched a 3-foot clearing around the cliff. Then they helped widen the line, limiting the accidental blaze to one acre.

"This kind of situation is exactly what we have them here for," Clemon Garrison, who supervised the prescribed burn for the forest service, said of the corpsmen.

Forest service workers "could have controlled the fire" themselves, said Garrison, his face black with soot. "But we would have had to work a lot harder."

The next night, a crew from Pine Knot was sent to fight the 1,300-acre fire in Alabama.

And during the next three days, five 10-man crews from Pine Knot battled fires in Clay, Leslie, Laurel and Rockcastle counties.

Meanwhile, three 10-man crews from Frenchburg worked on a 100-acre fire in the Morehead area, with one also helping out on the fire in Leslie.

Fires struck more than 500 acres managed by the forest service over the three-day period.

What will happen if there are no more Job Corps crews to fight such fires?

Steelmon said the forest service would still be able to control fires, but only if the corpsmen were somehow replaced. The most logical replacements for Job Corps firefighters would be college forestry students, Steelmon said.

But training the students and paying their wages would likely be more expensive than using the Job Corps, he warned.

NATIONAL LIBRARY WEEK

Mr. MOYNIHAN. Mr. President, I rise to note that yesterday the Senate passed legislation, which I introduced and which 27 of my colleagues cosponsored, to designate the month of April 1985 as National School Library Month.

I would wish to take a moment of the Senate's time, with the kind indulgence of my friend from Arizona [Mr. GOLDWATER], who says I can speak on any subject I like in this regard so long as I mention the Phoenix Library, which I do with great enthusiasm. It is a library which has a longer and more illustrious history than many of the libraries of other parts of the country. Arizona was a settled civilization of the Spanish conquest in the mid-17th century. It was not until 1833 that New Hampshire began a free public library, the first of its kind in the country. But long before that, the people of Phoenix had access to the very considerable libraries associated with the cathedral there.

The object of our joint resolution, Mr. President, which I hope the House will shortly pass and become a law, is to acknowledge this country's school libraries. As we celebrate the 28th annual National Library Week, we acknowledge all our country's libraries, and we remind this body of its responsibility to them—a responsibility which stems from the enactment of the Library Services and Construction Act in 1956, and which has proceeded in a steady, principled, and wholly successful pace for almost three decades.

It was not the first time Congress supported this country's libraries. It was one of the great and inspired choices of our predecessors in this body to purchase Thomas Jefferson's personal library at Monticello in 1815, and thereafter establish the Library of Congress, which is the principal library of its kind. Along with the New York Public Library, they are the two great research libraries of this country, and indeed the world, to which the public has full access.

Mr. President, the point we make is that of all the moneys spent on education, surely none are so modest, nor yet so important as those spent on libraries, which reach from teacher to child, librarian to student, and student to student, through a very long chain of events indeed.

I ask if there are many Members of this body who, if asked to think of the person who most influenced them in school as a young child would not name that librarian, who brought that book down, who said, "Here, have it, take it, it is yours. The shelves are full. Come in. Read what you want. This is for free."

In a world where candy stores were not for free and movie houses were not for free, libraries were. Libraries welcomed; libraries gave. And since 1956, we have been encouraging them with small, steady appropriations in the neighborhood of $100 million a year, never much more than that.

And we have something to show for it. We now have a much improved library system which is responsible, among other things, for introducing young children to data processing, electronic retrieval, and the whole world of computers. As children learn to manage the school library on its computer index, they find themselves connected from the smallest school in New Hampshire or upstate New York or Phoenix to the Library of Congress across the street; they are provided instant access to the most complicated and effective information system in the world.

Mr. President, I make the point that the recent compromise proposal between the White House and the majority in this body apparently intends to put an end to the support for libraries in next year's budget. I urge us not to do this. It would be the smallest of savings and the largest of losses in terms of the education of our children and the vitality of our educational system.

Mr. President, I know that there are Members on the floor who wish to proceed with another debate. So I will not extend my remarks but to say thank you for your courtesy and to ask everyone in this body, if we do not save another program in the budget debate that begins Monday a week from now, let us save the school libraries. Let us at least have that much sense.

TRIBUTE TO B. FINLEY VINSON

Mr. PRYOR. Mr. President, I am pleased to rise today in recognition of one of the truly outstanding Arkansas citizens in recent times, Mr. B. Finley Vinson. He is not only a leader among the people of my State, he is also my longtime friend.

Finley Vinson is chairman emeritus of First Commercial Bank and First Commercial Corp. In his long record of service he has literally changed the face of Arkansas. With his concentration of quality customer service, he has long known the importance of people and the human touch. He is a friend of education who gets excited over the projects of young people, and at the same time he is a leader among community-minded volunteers who make dreams of Arkansas come true.

A native of Texas, Finley came to Little Rock over 30 years ago, and in time he joined First National Bank in Little Rock. He was elected First National president in 1963 and in 1967 was named chairman of the board.

Colleagues in banking have honored him with leadership posts for his entire career. He served as president of the Arkansas Bankers Association and as a member of the board of the American Bankers. He also chaired the ABA Federal legislative committee for 4 years and served on the board of the Federal Reserve bank in Little Rock.

As a member of his community, Finley Vinson is known as a leader with vision. He has been president of the Chamber of Commerce, the Community Concert Association, and the Arkansas Arts Center. He has given

his time to the United Way, the Little Rock Rotary Club, the Red Cross, and the Arkansas Baptist Medical Center. All of us in the State know of his ceaseless efforts on behalf of the Little Rock airport.

I am pleased to congratulate Finley Vinson on the occasion of his retirement. I'm pleased to join his family and many friends in wishing him many years of happy and distinguished contribution in the future. Knowing his energy and commitment, I am certain that he will be active throughout the State. All of us wish him well.

NATIONAL DRUG ABUSE EDUCATION AND PREVENTION WEEK

Mrs. HAWKINS. Mr. President, a very important piece of legislation has recently been introduced in the U.S. Senate, and I am very proud to be its cosponsor.

My esteemed colleague from the State of Florida, Senator LAWTON CHILES, recently introduced legislation authorizing the "National Drug Abuse Education and Prevention Week," to be held April 21-27, 1985. The dates have been chosen to coincide with two major occurrences: The Pharmacists Against Drug Abuse [PADA] Foundation is celebrating its first anniversary in its efforts to educate parents on drug abuse; and the Parents' Research Institute for Drug Education [PRIDE] is hosting an international conference in Atlanta, GA, to focus on current research findings and the outlook for prevention in the future.

Inasmuch as I firmly believe that the key to preventing drug abuse is in educating potential users to its true dangers, I am pleased to be a part of this effort. The use of illicit narcotics threatens our national safety and security, and brings ruin to the lives of too many of our young people. My work as chairman of the Subcommittee on Alcoholism and Drug Abuse, and the drug enforcement caucus, has revealed that the most tragic aspect of drug abuse problem is its affect on an entire generation of young people. Studies, like the highly acclaimed Operation PAR study of my home State of Florida, prove to an alarming degree that drug use by young Americans is increasing. Other indications are equally frightening, for example, the number of multidrug use, like mixing cocaine and heroin, is up, and the use of more debilitating drugs, like PCP and psychotropic inhalants, is also increasing. Despite the enormous amount of information that is available to our kids today, demand has not abated—in fact, we are witnesses to the contrary.

It is up to us, therefore, as parents, and as legislators, to devise new and more effective means to educate young Americans to the real dangers of drug use. This information can help educate parents, too, in their efforts to reverse the peer pressure that exists virtually forcing their children to use drugs. Too often young people begin using drugs at the ages of 8, 9, and 10 years, when they are too young to realize that what they are doing isn't the least bit cool, it's suicidal. Research indicates that when the real story is made clear to children, especially at home, this peer pressure doesn't have the same effect.

There are many reasons why I am excited about the introduction of this resolution, and I am proud to be a cosponsor of the proposal calling for National Drug Abuse Education and Prevention Week.

TRIP TO EUROPE—APRIL 5-13, 1985

Mr. DOLE. Mr. President, during the Easter recess, I led a six-member Senate delegation on a working visit to Western Europe. During the trip, we had the chance to meet with senior leaders of four of our most important allies: the United Kingdom, France, West Germany, and Italy. We also had the privilege of a private audience in the Vatican with His Holiness, Pope John Paul II.

MEMBERS OF THE DELEGATION

Joining me on the delegation were five Senators with special interest in European affairs and special knowledge of the issues dominating our relations with the countries of Western Europe:

Senator STROM THURMOND of South Carolina, the distinguished president pro tempore of the Senate, ranking majority member of the Armed Services Committee and chairman of its Military Construction Subcommittee, whose special interests include defense, NATO affairs and trade problems, especially those impacting on the American textile industry.

Senator JIM MCCLURE of Idaho, the distinguished chairman of the Energy and Natural Resources Committee and member of the appropriations committee, who is especially interested in defense, arms control and trade questions, particularly those related to trade in agricultural products.

Senator PAUL LAXALT of Nevada, a senior member of the Appropriations Committee and chairman of its Military Construction Subcommittee, with special interest in defense, NATO and trade issues. As confidant of the President, Senator LAXALT is also recognized in Europe as speaking with special authority on the administration's positions on United States-European relations.

Senator THAD COCHRAN of Mississippi, whose membership on the Agriculture and Appropriations Committees reflects his expertise and deep involvement in the issues of U.S. defense spending, U.S. agriculture policy, trade—especially trade in agricultural products—and world hunger.

Senator LARRY PRESSLER of South Dakota, chairman of the European Subcommittee of the Foreign Relations Committee, and expert on our relations with NATO and deeply interested in agricultural trade questions.

ISSUES UNDER DISCUSSION

The delegation's discussions with our European friends covered the entire range of security, political, and economic issues permeating the Western alliance. Before outlining the substance of the most important of our individual meetings, though, it is worthwhile to summarize the principal issues which arose during our talks.

Arms control. First, with all of our allies, we found enormous interest in and hope for the Geneva arms control talks. We stressed the strong support in the Senate for the President's efforts in Geneva, and we found a similarly unified allied support for our position. We were especially heartened to find that, despite the existence in some European countries of political minorities pushing for unilateral concessions to the Soviets, everyone with whom we spoke displayed whole-hearted backing for a tough, patient stance in Geneva.

SDI. Second, we found a growing understanding of the President's strategic defense initiative. There is widespread European interest in the potential benefits of participating in SDI-related research, though in some places that interest has not yet crystallized into a firm national decision to participate.

We also found, in candor, some persistent concerns about SDI. Though we appear to be making progress in debunking the notion that SDI reflects an American impulse to delink our defense from Europe's, some of those with whom we spoke still expressed that concern. Two other fears were even more apparent: First, that the high cost of SDI might drain away resources from NATO's force modernization program; and second, that our own arguments for SDI might undercut Western European popular support for deterrence and INF deployments, on which our own security will depend for years to come. We promised our European friends that we would keep these concerns in mind as we continue our own consideration and debate on SDI.

Deficits and interest rates. Third, we found continuing unease about high U.S. deficits and interest rates, which our allies see as at the root of our trade problems and as distorting the international flow of capital. We left with our friends the message that the Senate is determined to do something about our deficits and to do it now. We

will be acting in the days ahead to live up to that pledge.

Trade issues. Finally, and perhaps most important of all, we told our friends that the trade honeymoon is over for all those in Western Europe, Japan, and elsewhere who will not abide by some fair rules of the game. We stated flatly that the upcoming Bonn economic summit may be the last chance to make progress on trade problems in a cooperative, mutually beneficial way, before the forces of protectionism and retaliation overwhelm us. Without denigrating the potential value of a new round of global trade talks, we stressed that we have gone beyond the point where talking is enough. We need action.

Many of us in the delegation represent farm States, and we expressed our special deep concern about the EC's agricultural policies, especially production and export subsidies. We outlined the legislative steps we were considering and predicted—indeed, let me be frank and say we warned—that we will take whatever steps are necessary to see that our farmers are no longer disadvantaged in world markets.

SUMMARY OF INDIVIDUAL DISCUSSIONS

Each one of these issues arose in each of the countries we visited, though naturally in different ways and combinations. I would, therefore, like to give the Senate the flavor of some of the most important of the individual meetings we held at each stop.

London. Because of the Easter holidays, we were in London for only part of 1 working day, but we did have the chance to meet several members of Parliament and discuss INF, SDI and trade related questions. We also met with senior officers of CINCUSNAVEUR, for a briefing on Soviet military capabilities and intentions in Europe, and officials from our missions to NATO and the EC, who came from Brussels to brief us on the security and trade concerns of our European allies. We urged these U.S. officials to stress to their European counterparts the deep concerns in the United States, including in the Congress, on EC agricultural production and export subsidies and import-restricting policies.

Paris. We met, among others, with the following:

OECD Secretary General Paye. Paye said Western Europe's principal economic problems are slow growth and politically dangerous levels of unemployment and its main concern vis-a-vis the U.S. is the high value of the dollar, which helps European exports but destabilizes international exchange markets. The delegation stressed the Senate's determination to tackle our deficit problem. It also underscored its deep concern about EC protectionist practices and especially agricultural subsidies and predicted that time was running out for a negotiated solution to these problems—the pressure for unilateral U.S. action is growing stronger every day. Paye responded that all parties must act to meet the international economic dilemma: The U.S. must reduce deficits and stabilize the value of the dollar; Japan must make a major effort to take more imports; and Western Europe must undertake policies leading to more growth and must deal intensely with the problems created by its agricultural subsidies. Paye counseled against U.S. trade retaliation, which he warned might doom the prospects for real progress in any new round of global trade talks. The delegation indicated American frustration with more talking without concrete action.

Defense Minister Hernu: Hernu stressed two themes: That France, though not in NATO's integrated force structure, was an active member of the Western Alliance, and that France was a loyal and enthusiastic ally of the U.S. He said that France's determination to maintain an independent nuclear force should not be misunderstood—France saw it as one important pillar of overall Western Defenses, not a reflection of any isolationist impulse. France's commitment to the alliance was reflected in the troops it keeps stationed in Germany and its close coordination on defense strategy with NATO. Asked by the delegation about France's view of SDI, he said his government accepted the need for research since the Soviets were similarly engaged. He asked that we consider carefully the impact of U.S. SDI rhetoric in Europe—suggestions that traditional deterrence was somehow immoral might undercut public support for INF deployments, not so much in France but elsewhere in Western Europe. He said France was pushing for a common European position on the question of participating in SDI research, though the potential technological beneifts were clear.

Economics Minister Beregovoy: At the minister's request, the delegation briefed him on the Senate's plans to cut Federal spending and reduce deficits. Beregovoy stated that France is deeply concerned about the strong dollar—that a new round of trade talks must be accompanied by a comprehensive look at the international monetary exchange system. In such trade and monetary talks, the key to success will be that everyone put everything on the table for negotiation—everyone must be willing to compromise. The delegation stressed the seriousness of U.S. concern on our trade deficits and the growing protectionist pressures at home, indicating that the Bonn summit might be the last chance to deal with these problems on a cooperative basis. Beregovoy acknowledged that the EC must be willing to discuss seriously its trade and agricultural policies, including production and export subsidies. He said there is deep admiration for America's recent economic performance. It is up to Europe to initiate industrial restructuring and other economic policies which will produce similar growth.

Senate President Poher: Poher made an eloquent statement on the strength and durability of Franco/American friendship; related his deep personal admiration for the United States; and, in response to delegation questions, discussed the current political situation in France, including the prospects for the 1986 assembly elections.

Bonn. The two most important meetings during our brief stop in Bonn were with:

Foreign Minister Genscher: Genscher offered some general observations on the Soviet Union. He said Gorbachev's moratorium proposal was aimed primarily at Western European public opinion, especially in the Netherlands—which has made no final decision on INF deployments—and at demonstrating publicly that Gorbachev was in charge. He believes that Gromyko's influence may have increased, especially in setting Kremlin policies toward the United States but Soviet policies showed no essential change. Moscow regarded relations with the United States and Bonn as the key to relations in Europe. Genscher stressed his government's close ties with France, even though France remained outside NATO's integrated force structure. In response to delegation questions, he indicated that West Germany understood the need for SDI research and recognized the technological and commercial benefits of participating in that research—though it would want to do so only on a footing equal to the United States, with real access to the relevant technology. He said there was genuine concern, though, about the impact of U.S. Government SDI rhetoric on West German public opinion—if SDI is sold as a substitute for deterrance, it might undermine support for Kohl's security policies. Genscher said he expected a United States-Soviet summit at some point. On economic questions, Genscher said there was great fear that the United States would turn to protectionist trade policies and persistent concern over high U.S. interest rates. He acknowledged that Europe had benefited greatly from the strong U.S. economic recovery. The delegation stressed our special concern over the EC's agricultural policies, indicated that we were growing impatient for some substantial progress on economic issues and urged that the West Germans go to the Bonn summit ready to deal seriously with the alliance's economic problems.

Defense Minister Woerner: Woerner acknowledged that Bonn was initially perturbed that SDI was "sprung on us" with no advance consultations, but he said the West German Government understands that: First, since the Soviets are engaged in similar research, the West must keep up; second, SDI was a major factor in getting the Russians back to the table in Geneva; and third, no one is really happy about basing Western security on the destruction of millions of people. He said Bonn will join in SDI research if there is a full partnership—a full sharing of technology. Woerner dismissed the Gorbachev moratorium proposal as propaganda and expressed his government's support for U.S. arms control efforts. He indicated great concern about NATO's conventional force shortcomings. He also praised highly the quality and combat readiness of U.S. forces and noted the degree to which they were accepted and appreciated by the German public. Genscher expressed understanding of U.S. concerns over NATO burden-sharing but asked for American understanding of West Germany's large, nonmonetary contributions to the alliance. He also asked the delegation to be sensitive to the dangers of "overloading the political circuits" in West Germany by asking too much of our alliance—the INF deployments were necessary but took a political toll in West Germany.

Rome. We met with the most senior leadership of the Italian Government and with the Director General of the FAO.

Prime Minister Craxi: The delegation congratulated Craxi on his address to the joint session. Craxi stressed Italy's freindship for the United States and support for the alliance, despite some fringe political groups in Italy who are anti-United States. He said it is too early to tell if Gorbachev will make a difference in Soviet policies—it will take the new Soviet leader some time to consolidate his control. Craxi indicated he is hopeful for progress in Geneva but recognizes that many hurdles have to be overcome first. The delegation indicated its hope that the Soviets would not try to negotiate through the media, with grandstand plays like the Gorbachev moratorium proposal. The delegation asked Italy's views on SDI, and Craxi said it was clear that Italy was "interested" in participating in SDI research but it would take more than 60 days to determine how that might best be accomplished. Craxi outlined the steps Italy had taken to combat terrorism. As President of the EC, Craxi said he hoped the OECD meetings would lead to progress on trade questions, and he acknowledged that EC agricultural policies needed to be reexamined. The delegation stressed the growing protectionist pressures in the United States and the Senate's determination to see that American agricultural products were not disadvantaged on world markets. Craxi offered his views on a number of middle East issues, saying he hoped that peace initiatives would be given "breathing space" by all sides. He also expressed hope that some way could be found for progress toward peace in central America.

Defense Minister Spadolini: Spadolini said Italy was proud of its record of "perfect" support for NATO despite the existence of a large Communist party. He asked for the delegation's understanding of Italy's contributions to the alliance, both concrete and invisible, when burden-sharing questions were debated. He said the resumption of the Geneva talks was a great political victory for the United States and asked the delegation's views on the prospects for success. The delegation indicated that the United States was serious about the talks but would not compromise on the security of the alliance. The role of the Senate observer team was explained. Spadolini said the Italian Government supported SDI research and regarded SDI as a powerful bargaining chip for Geneva. He did note European concern that SDI rhetoric might outpace its technical development, leading to unrealistic expectations and undermining support for deterrence. Spadolini said tensions between Greece and Turkey were unfortunate and impacted on the strength of NATO's southern flank, increasing further the importance of Italy's role in the alliance. Spadolini said Western Europeans recognized that the Soviet invasion of Afghanistan represented an indirect threat to Europe, but he said NATO's ability to respond directly was limited.

Foreign Minister Andreotti: In response to delegation questions, Andreotti outlined his Government's views on the problem of Cyprus, stressing the need for a negotiated settlement between NATO allies Greece and Turkey. He expressed high hopes for the Geneva arms control talks and said that a Reagan-Gorbachev summit at the appropriate time could be useful. On SDI, he said that the main concern was how to manage any transition from a deterrence-based strategy to an SDI-based strategy without undermining western security by prematurely undercutting public support for deterrence. Italy understands the need for SDI research, said Andreotti, but has not yet reached a common position on how it might participate in that research. Andreotti said he hoped that the political ferment in the Middle East, especially between the Jordanians and the Palestinians, offered some new prospect of progress and encouraged the United States to be as flexible as possible. The delegation expressed to Andreotti the Senate's intention to take firm action to cut Federal spending and reduce deficits but said at the same time Europe must begin to remove protectionist barriers and adopt more reasonable agricultural policies. Andreotti said that as a net importer of food Italy understood the benefits of freer trade in agricultural products.

FAO Director General Saouma: Saouma asked for delegation support for FAO's request for a budget increase of 1.4 percent over the next 2 years. The delegation explained the budget constraints which make any increase of funding difficult. Saouma and his staff outlined the reasons for different FAO and A.I.D. estimates of food need for Africa this year and expressed the belief that, because of better communication between the two organizations, there would be no repetition of such discrepancies next year.

The Vatican. The delegation was privileged to have a private audience with his Holiness, Pope John Paul II, during which I presented a letter to the Pontiff from the President. The letter touched on two issues of deep personal concern to the Pontiff, the troubling situation in Central America and the arms control talks in Geneva. For the information of all Members, I ask unanimous consent to include in the RECORD the statement which I made to the Pontiff on behalf of the delegation and the response of his Holiness.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR BOB DOLE

Your Holiness, on behalf of the members of our delegation, I express deep appreciation for this honor. All of us have the greatest respect and admiration for your tireless efforts on behalf of global peace and the welfare of the most vulnerable among the peoples of the world.

In Europe, we have met with the leaders of four of our closest friends and allies: the United Kingdom, France, the Federal Republic of Germany, and Italy. Our visit to the Vatican today is a fitting climax to our journey.

We have engaged in discussions of a number of major issues—the prospects for reducing the risks of war, especially nuclear war; relations between the states of Europe; improving the economic conditions of our countries; and many other specific matters.

This morning, we fulfill our final important task—delivering to Your Holiness a personal letter from President Reagan. The President's letter touches on two issues which, I know, are of deep personal interest to Your Holiness—the troubling situation in Central America and arms control talks in Geneva.

The President is firmly committed to doing everything reasonably possible to make progress in both these areas. He has outlined constructive steps which our Government has taken in the interest of peace. All of us pray that the President's initiatives will be dealt with objectively by all the other involved parties, and we ask for your

prayers, that these peace efforts will be crowned with success.

Again, thank you sincerely for the privilege of this audience. We will remember it the rest of our lives.

STATEMENT BY POPE JOHN PAUL II

Ladies and Gentlemen, dear Friends,

I am very pleased that you would wish to have this meeting with me during your visit to Europe. For me it is a happy occasion to extend to you the hospitality of the Vatican, and to offer you a word of fraternal encouragement and friendship. I know that you consider me a friend of the American people and I am happy to be looked upon as such.

It is extremely evident from history and from an accurate reading of the signs of the times that the American people have a special mission of service in the world. God has abundantly blessed your forebears and the land they settled in; it is no wonder that he permits so many people throughout the world to place so much hope in America. How many refugees and immigrants have found new life in your land!

I am sure that this visit of yours to Europe is in fact placed under the sign of solidarity—a solidarity that you wish to manifest as representatives of the American people, a solidarity that transcends your national boundaries and reaches out to peoples everywhere. I am sure that every day you pose questions to yourselves: What can we do to be of service to our people? And what can we do to enable our people to fulfill their role of service to their fellow human beings? In a word: How can we advance the great cause of human solidarity? In our search, you certainly come face to face with immense problems, urgent needs, critical situations. But in all of this you must remain conscious of your mission: service and solidarity. And certainly in this service and solidarity there is great human enrichment for the American people, who are themselves confirmed in their traditions and strengthened in their own identity.

But in order to make a lasting contribution of service, in order to promote the true solidarity of peoples, America must remain faithful to herself as "one Nation under God," being truly conscious—in the expression of your own Declaration of Independence—of "Nature's God," of the "Creator," of "the Supreme Judge" and of "the Protection of Divine Providence."

In the awareness of this dependence of God, America is then able to sustain the defense of those rights which your Founding Fathers reverently spoke of as "Life, Liberty and the Pursuit of Happiness."

As Senators of the United States you are in a splendid position to make a monumental contribution to the defense of life, the preservation of liberty and the attainment of true human happiness for countless men, women and children—millions of whom are yet unborn. It is my prayer that the effectiveness of your service will be recorded for future generations in the annuals of the Congressional history of the United States. And through you and your fellow legislators may the cause of human solidarity be advanced among the peoples of the earth.

CONCLUSION

Mr. DOLE. Everywhere we went, our talks were frank, but they were also friendly. And everywhere we went, we found a great interest in the views of the Senate and a great friendship for the United States.

And I would be remiss if I did not mention one final phenomenon which we experienced, perhaps the most encouraging of all. It was French Defense Minister Hernu who first spoke to us of the new wave of support for the western alliance among France's young people, but it was a theme we heard replayed everywhere. The new generation, no less than our own, is committed to the Atlantic alliance as the cornerstone of our mutual security. It is dedicated, no less than we are, to the preservation of the democratic ideals on which the alliance is based. And it is ready to carry on the work begun by the alliance nearly 40 years ago, to preserve peace, defend freedom, and build prosperity on both sides of the Atlantic, by talking, working, and sticking together.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on April 15, 1985, during the recess of the Senate, received a message from the President of the United States, submitting sundry nominations, which were referred to the Committee on Foreign Relations.

(The nominations received on April 15, 1985, are printed at the end of the Senate proceedings.)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:05 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 1714. An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications. construction of facilities, and research and program management, and for other purposes;

H.J. Res. 33. Joint resolution designating the week of April 29 through May 5, 1985, as "National Child Safety Week"; and

H.J. Res. 195. Joint resolution designating May 1985 as "Older Americans Month."

MEASURES REFERRED

The following measures were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1714. An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications, construction of facilities, and research and program management, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.J. Res. 195. Joint resolution designating May 1985 as "Older Americans Month"; to the Committee on the Judiciary.

MEASURE HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent pending further disposition:

H.J. Res. 33. Joint resolution designating the week of April 29 through May 5, 1985, as "National Child Safety Week."

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary reported that on today, April 16, 1985, she had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 17. Joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 28, 1985, as "Jewish Heritage Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-837. A communication from the Acting Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting, pursuant to law, report covering certain properties to be transferred to the republic of Panama in accordance with the Panama Canal Treaty of 1977; to the Committee on Armed Services.

EC-838. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report stating that there were no Federal Railroad Administration contractors or subcontractors indemnified during 1984; to the Committee on Commerce, Science, and Transportation.

EC-839. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to authorize the Secretary of the department in which the Coast Guard is operating to establish fees for Coast Guard services, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-840. A communication from the National Commander of the Civil Air Patrol,

transmitting, pursuant to law, the 1985 Civil Air Patrol Report to the Congress; to the Committee on Commerce, Science, and Transportation.

EC-841. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Merchant Marine Act, 1936, to authorize the foreign acquisition of subsidized U.S.-flag vessels; to the Committee on Commerce, Science, and Transportation.

EC-842. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend section 901(b) of the Merchant Marine Act, 1936; to the Committee on Commerce, Science, and Transportation.

EC-843. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Federal Railroad Safety Act of 1970; to the Committee on Commerce, Science, and Transportation.

EC-844. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to approve the Interstate Cost Estimate and permit the apportionment of funds authorized for fiscal year 1987; to the Committee on Environment and Public Works.

EC-845. A communication from the Chairman and Directors of the Tennessee Valley Authority, transmitting, pursuant to law, the fifty-first annual report of the TVA covering fiscal year 1984; to the Committee on Environment and Public Works.

EC-846. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Cleaning Up Hazardous Wastes: An Overview of Superfund Reauthorization issues"; to the Committee on Environment and Public Works

EC-847. A communication from the Secretary of Transportation transmitting a copy of proposed legislation "to amend title 23, United States Code"; to the Committee on Environment and Public Works.

EC-848. A communication from the United States Trade Representative transmitting a copy of proposed legislation "to provide authorization for the Office of the United States Trade Representative through fiscal year 1986 and to provide express authority for certain necessary actions"; to the Committee on Finance.

EC-849. A communication from the Fiscal Assistant Secretary, Department of the Treasury, transmitting, pursuant to law, annual trust fund reports; to the Committee on Finance.

EC-850. A communication from the President of the Overseas Private Investment Corporation transmitting a copy of proposed legislation to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation; to the Committee on Foreign Relations.

EC-851. A communication from the Attorney General transmitting, pursuant to law, the annual report of the Attorney General for fiscal year 1983; to the Committee on the Judiciary.

EC-852. A communication from the Chairman of the Federal Home Loan Bank Board transmitting, pursuant to law, the annual report for calendar year 1984; to the Committee on the Judiciary.

EC-853. A communication from the National President and the National Executive Director for the Girl Scouts transmitting, pursuant to law, the annual report of Girl Scouts of the United States of America; to the Committee on the Judiciary.

EC-854. A communication from the Freedom of Information Officer, United States Environmental Protection Agency, transmitting, pursuant to law, an annual report of Agency actions during the preceding calendar year; to the Committee on the Judiciary.

EC-855. A communication from the Chairman of the Board, Student Loan Marketing Association, transmitting, pursuant to law, an annual report and a review of the association's operations and activities for the year ended December 31, 1984; to the Committee on Labor and Human Resources.

EC-856. A communication from the Secretary of Education transmitting, pursuant to law, a copy of the 1985-86 Guaranteed Student Loan Family Contribution Schedule; to the Committee on Labor and Human Resources.

EC-857. A communication from the Assistant Secretary for Civil Rights, Department of Education, transmitting pursuant to law, an annual report summarizing the compliance and enforcement activities of the Office for Civil Rights and identifying significant civil rights or compliance problems; to the Committee on Labor and Human Resources.

EC-858. A communication from the Administrator of Veterans Affairs, Veterans Administration, transmitting a copy of proposed legislation to amend title 38, United States Code, to repeal provisions relating to setting the interest rate on guaranteed or insured housing loans to veterans and inspecting manufactured homes purchased by veterans, to increase the VA loan fee, to authorize direct appropriations to the loan guaranty revolving fund, and for other purposes; to the Committee on Veterans Affairs.

EC-859. A communication from the Under Secretary of Agriculture transmitting, pursuant to law, the third quarterly commodity and country allocation table for food assistance for fiscal year 1985; to the Committee on Agriculture, Nutrition, and Forestry.

EC-860. A communication from the Assistant Secretary of the Navy transmitting, pursuant to law, an annual report on a decision to study the conversion of numerous functions at various bases to performance under contract; to the Committee on Armed Services.

EC-861. A communication from the Assistant Secretary of the Navy transmitting, pursuant to law, a report on a decision to study the conversion of numerous functions at various bases to performance under contract; to the Committee on Armed Services.

EC-862. A communication from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, notice of the intention to exclude certain records from examination by the Comptroller General; to the Committee on Armed Services.

EC-863. A communication from the Deputy Secretary of Defense transmitting, pursuant to law, certain certifications with respect to the Low Level Laser Bomb Guidance Kit program; to the Committee on Armed Services.

EC-864. A communication from the Assistant Secretary of Defense transmitting, pursuant to law, a listing of certain contract award dates for May and June, 1985; to the Committee on Armed Services.

EC-865. A communication from the President and Chairman of the Export-Import Bank transmitting, pursuant to law, a report on transactions with communist countries in February 1985; to the Committee on Banking, Housing, and Urban Affairs.

EC-866. A communication from the Secretary of the Interstate Commerce Commission transmitting, pursuant to law, notice of an extension of time for action on an appeal in Allied Chemical Corp., et al. v. Ann Arbor Railroad System, et al.; to the Committee on Commerce, Science, and Transportation.

EC-867. A communication from the Secretary of the Interstate Commerce Commission transmitting, pursuant to law, notice of an extension of time for action on an appeal in Westinghouse Electric Corp. v. Alton & Southern Railway Co., et al.; to the Committee on Commerce, Science, and Transportation.

EC-868. A communication from the Administrator of the Federal Aviation Administration transmitting, pursuant to law, the revised National Airspace System Plan; to the Committee on Commerce, Science, and Transportation.

EC-869. A communication from the Assistant Secretary of the Interior transmitting, pursuant to law, approval of a deferment of certain 1984 construction repayment installments due the U.S. from the Glasgow Irrigation District, Montana; to the Committee on Energy and Natural Resources.

EC-870. A communication from the Acting General Counsel of the Department of Energy transmitting a draft of proposed legislation to authorize appropriations for the Department of Energy for civilian programs for fiscal years 1986 and 1987; to the Committee on Energy and Natural Resources.

EC-871. A communication from the Assistant Secretary of the Interior transmitting, pursuant to law, notice of approval of a loan and grant to the Elsinore Valley Municipal Water District, California; to the Committee on Energy and Natural Resources.

EC-872. A communication from the Secretary of Health and Human Services transmitting, pursuant to law, a report on a study of the Medicare hospital wage index; to the Committee on Finance.

EC-873. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the U.S. in the sixty days previous to April 4, 1985; to the Committee on Foreign Relations.

EC-874. A communication from the Chairman of the D.C. Retirement Board transmitting, pursuant to law, an actuarial report on the D.C. Police and Firefighters' Retirement Fund Disability Retirement Rate; to the Committee on Governmental Affairs.

EC-875. A communication from the President of the Federal Home Loan Mortgage Corp., transmitting, pursuant to law, the Corporation's 1984 annual report under the Government in the Sunshine Act; to the Committee on Governmental Affairs.

EC-876. A communication from the Chairman of the Interstate Commerce Commission transmitting, pursuant to law, the Commission's 1984 Government in the Sunshine report; to the Committee on Governmental Affairs.

EC-877. A communication from the Executive Officer of the National Science Board transmitting, pursuant to law, the Board's 1984 Government in the Sunshine report; to the Committee on Governmental Affairs.

EC-878. A communication from the Secretary of the Foundation of the Federal Bar Association transmitting, pursuant to law, the 1984 audit report of the Foundation; to the Committee on the Judiciary.

EC-879. A communication from the Chairman of the U.S. Merit Systems Protection

Board transmitting, pursuant to law, the Board's 1984 Freedom of Information Act report; to the Committee on the Judiciary.

EC-880. A communication from the Secretary of Education transmitting, pursuant to law, notice of final funding priorities for research in education of the handicapped; to the Committee on Labor and Human Resources.

EC-881. A communication from the Secretary of Education transmitting a draft of proposed legislation to amend the Carl D. Perkins Vocational Education Act; to the Committee on Labor and Human Resources.

EC-882. A communication from the Executive Secretary of Defense transmitting, pursuant to law, the October 1984 report on DOD procurement from small and other businesses; to the Committee on Small Business.

EC-883. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals for April 1, 1985; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Agriculture, Nutrition, and forestry, Armed Services, Commerce, Science, and Transportation, Energy and Natural Resources, Environment and Public Works, Finance, Foreign Relations, Select Indian Affairs, the Judiciary, Labor and Human Resources, Small Business, and Veterans Affairs.

EC-884. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Report on the Implementation of the Farm Credit Act Amendments of 1980"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-885. A communication from the Executive Associate Director of the Office of Management and Budget transmitting, pursuant to law, a report on the reapportionment of the fy 1985 appropriation for the Bureau of Alcohol, Tobacco, and Firearms on a basis necessitating a supplemental appropriation; to the Committee on Appropriations.

EC-886. A communication from the Executive Associate Director of the Office of Management and Budget transmitting, pursuant to law, a report on the reapportionment of appropriation for the Internal Revenue Service on a basis necessitating a supplemental appropriation; to the Committee on Appropriations.

EC-887. A communication from the Executive Associate Director of the Office of Management and Budget transmitting, pursuant to law, a report on the reapportionment of the appropriation for the U.S. Customs Service necessitating a supplemental appropriation; to the Committee on Appropriations.

EC-888. A communication from the Executive Associate Director of the Office of Management and Budget transmitting, pursuant to law, a report on the reapportionment of the appropriation for the Financial Management Service on a basis necessitating a supplemental appropriation; to the Committee on Appropriations.

EC-889. A communication from the Secretary of the Navy, transmitting, pursuant to law, a report stating that the A-6F aircraft and the PHEONIX missile systems have both exceeded unit cost baselines; to the Committee on Armed Services.

EC-890. A communication from the Chairman of the Interstate Commerce Commission, transmitting, pursuant to law, the ninety-eighth annual report of the Interstate Commerce Commission covering fiscal year 1984; to the Committee on Commerce, Science, and Transportation.

EC-891. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend section 411 (a) of title 38, United States Code, to increase the dependency and indemnity compensation for the surviving spouse of the Commandant of the Coast Guard; to the Committee on Commerce, Science, and Transportation.

EC-892. A communication from the Administrator of the Health Care Financing Administration, Department of Health and Human Services, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-893. A communication from the Chairman of the Board of Directors of the Tennessee Valley Authority, transmitting, pursuant to law, the annual report of the TVA under the Government in the Sunshine Act for calendar year 1984; to the Committee on Governmental Affairs.

EC-894. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report with respect to actions taken to recruit and train Indians to qualify them for positions subject to Indian preference; to the Select Committee on Indian Affairs.

EC-895. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the annual report of the Department under the Freedom of Information Act for calendar year 1984; to the Committee on the Judiciary.

EC-896. A communication from the Executive Director of the Civil Air Patrol, transmitting, pursuant to law, the annual report of the Civil Air Patrol for calendar year 1984; to the Committee on the Judiciary.

EC-897. A communication from the Under Secretary of Labor, transmitting, a draft of proposed legislation to assure adequate authorization of appropriations for the President's Committee on Employment of the Handicapped; to the Committee on Labor and Human Resources.

EC-898. A communication from the Secretary of Education, transmitting, pursuant to law, notice of final priorities for innovative programs for severely handicapped children; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 796. A bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1986, and for other purposes (Rept. No. 99-31).

By Mr. STAFFORD, from the Committee on Environment and Public Works:

Special Report on the activities of the Committee on Environment and Public Works for the Ninety-Eighth Congress (Rept. No. 99-32).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GORTON:

S. 906. A bill to provide for the imposition of a surcharge duty on products imported from foreign countries under certain conditions, and for other purposes; to the Committee on Finance.

By Mr. NUNN (for himself and Mr. MATTINGLY):

S. 907. A bill to authorize the establishment of the Jimmy Carter National Historic Site in the State of Georgia and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. McCONNELL:

S. 908. A bill to provide market expansion and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. QUAYLE:

S. 909. A bill to amend the Internal Revenue Code of 1954 to simplify the tax system by providing a low rate progressive schedule for individuals, and for other purposes; to the Committee on Finance.

By Mr. INOUYE:

S. 910, A bill for the relief of Sun Ok Kim Ok Lyun Kim, Koang Hi Kim, Chin Hi Kim, and Hyun Soo Kim; to the Committee on the Judiciary.

By Mr. WARNER (for himself and Mr. HART) (by request):

S. 911. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1986 and fiscal year 1987, and for other purposes; to the Committee on Armed Services.

By Mr. D'AMATO:

S. 912. A bill to amend the Internal Revenue Code of 1954 to increase the percentage of household and dependent care services for which a credit against tax is allowable; to the Committee on Finance.

By Mr. FORD:

S. 913. A bill to amend the Mineral Lands Leasing Act of 1920 to improve the administration of the Federal coal leasing program, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DODD:

S. 914. A bill for the relief of Walter R. McBridge of Hartford, CT; to the Committee on Governmental Affairs.

By Mrs. HAWKINS:

S. 915. A bill to reimburse the State of Florida and its political subdivisions for certain costs incurred in furnishing services to certain aliens; to the Committee on Labor and Human Resources.

By Mr. HEINZ:

S. 916. A bill to amend the Social Security Act to make permanent the provision limiting increases in the Medicare part B premium to the extent necessary to insure that there will not be a net reduction in the benefit check after applying the cost-of-living increase—or when there is no such increase; to the Committee on Finance.

By Mr. GLENN (for himself and Mr. DECONCINI):

S. 917. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to authorize the payment of benefits with respect to public safety officers who die of certain medical conditions sustained in the performance of duty; to the Committee on the Judiciary.

By Mr. D'AMATO (by request):

S. 918. A bill to amend the Securities Exchange Act of 1934 to authorize the Securi-

ties and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as brokers-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

S. 919. A bill to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1986 through 1988; to the Committee on Banking, Housing, and Urban Affairs.

S. 920. A bill to amend the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Company Act of 1940, and the Investment Advisers Act of 1940 to make certain technical, clarifying, and conforming amendments, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. INOUYE (for himself, Mr. FORD and Mr. BOREN):

S. 921. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 with respect to certain passenger motor vehicle safety requirements, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. D'AMATO (by request):

S. 922. A bill to make certain conforming amendments to the Securities Investor Protection Act of 1970 required by the enactment of the Bankruptcy Amendments and Federal Judgeship Act of 1984; to the Committee on the Judiciary.

By Mr. RIEGLE:

S. 923. A bill to establish a Department of International Trade and Industry as an executive department of the Government of the United States, and for other purposes; to the Committee on Governmental Affairs.

By Mr. THURMOND (for himself, Mrs. HAWKINS, Mr. BIDEN, Mr. COCHRAN, Mr. DENTON, Mr. EAST, Mr. KENNEDY, Mr. LAXALT, Mr. MATHIAS, Mr. METZENBAUM, Mr. SPECTER, Mr. ABDNOR, Mr. ANDREWS, Mr. BURDICK, Mr. DOLE, Mr. DOMENICI, Mr. GRAMM, Mr. HEINZ, Mr. HOLLINGS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mr. KERRY, Mr. LAUTENBERG, Mr. LEVIN, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCLURE, Mr. NUNN, Mr. PRYOR, Mr. ROTH, Mr. SASSER, Mr. STEVENS, Mr. SYMMS, Mr. WARNER, Mr. WILSON, and Mr. ZORINSKY):

S.J. Res. 110. A joint resolution designating the month of May 1985 as "National Child Safety Awareness Month"; to the Committee on the Judiciary.

By Mr. DIXON:

S.J. Res. 111. A joint resolution to designate the month of October 1985 as "National Spina Bifida Month"; to the Committee on the Judiciary.

By Mr. PELL:

S.J. Res. 112. A joint resolution to authorize and request the President to call a White House Conference on Library and Information Services to be held not later than 1989, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. CHILES:

S.J. Res. 113. A joint resolution commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. COCHRAN:

S. Con. Res. 40. Concurrent resolution to express the sense of the Congress that the President appoint a bipartisan commission to study the trade deficit and related problems; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GORTON:

S. 906. A bill to provide for the imposition of a surcharge duty on products imported from foreign countries under certain conditions, and for other purposes; to the Committee on Finance.

(The remarks of Mr. GORTON and the text of the legislation appear earlier in today's RECORD.)

By Mr. MCCONNELL:

S. 908. A bill to provide market expansion and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

(The remarks of Mr. MCCONNELL and Mr. BOSCHWITZ and the text of this legislation appear earlier in today's RECORD.)

By Mr. QUAYLE:

S. 909. A bill to amend the Internal Revenue Code of 1954 to simplify the tax system by providing a low rate progressive schedule for individuals, and for other purposes; to the Committee on Finance.

SELF-TAX PLAN ACT

● Mr. QUAYLE. Mr. President, today I am introducing a modified version of my SELF tax reform act; a plan I first introduced in May 1982.

THE CONSENSUS FOR TAX REFORM

With the unveiling last November of the Treasury Department's plan, tax reform is now high on the congressional agenda. But tax simplification has been high on the agenda of the citizens of Indiana for quite some time. In my 5 years in the U.S. Senate I have noticed a rising groundswell of discontent with the complexity, unfairness and vagaries of the Internal Revenue Code. This discontent has been expressed in the union halls and the coffeeshops around my State and across this country for some time. Just this past February I chaired a series of field hearings of the Senate Budget Committee in Indiana and heard the plea again and again for tax simplification. I believe it is time that the Congress responded to our constituents' sensible demand for tax reform. I am proud that I took the initiative—almost 3 years ago—to introduce in the Senate the first major tax simplification bill—the SELF tax plan. SELF incorporates what I believe should be the guiding principles of any tax code; simplicity, efficiency, low rates, and fairness. It is significant that all the major reform proposals introduced after SELF espouse the same goals.

SIMPLICITY

The driving force behind tax reform is the public's desire for simplicity. True—we need to reform the code to improve administrative and economic efficiency—but it is the perceived complexity and unfairness of the tax code that makes tax reform a populist issue. To the extent that simplicity requires the wholesale elimination of tax expenditures and allows us to lower rates, it also brings us to the beneficial derivatives of efficiency and fairness.

I believe that it is essential that individuals be able to understand the basic requirements of the tax law and how to file their own returns. Our current code is a helter skelter maze that confuses and discourages the average taxpayer. Although two-thirds of all taxpayers do not itemize they find it difficult to understand a system that allows their neighbors making the same income to pay thousands of dollars less in taxes because they know how to take advantage of some loopholes or fringe benefits from their Fortune 500 employer.

Current law is so complicated that not even the IRS is able to render consistently reliable interpretations of it. Ralph Nader's tax reform research group ran a test some years ago in which the tax data for a nonexistent couple with one child was submitted to 22 IRS offices around the country. Incredibly, each office came up with a different result ranging from a refund of $811.96 to an underpayment of $52.14—a difference of $864.10.

We must, of course, ask ourselves "at what price simplicity?" There are some deductions that are necessary to the maintenance of traditional American values, such as those for home mortgage interest, charities, and medical expenses. Others, such as IRA's and Keoghs, actually increase aggregate savings by relieving the bias against savings. While SELF allows these deductions, it draws the line at tax preferences which distort tax neutrality and reduce the tax base by targeting savings to specific investments—or which actually reduce aggregate savings by requiring higher marginal tax rates to recoup lost revenues.

EFFICIENCY

SELF intends to promote economic efficiency—to reduce the burden and role of taxation on individual economic decisions through lower rates and a broader base, while maintaining the current level of Federal tax revenues. The Joint Committee on Taxation has

found that SELF would be revenue neutral.

Moreover, broadening the base is essential if we are to increase the neutrality of the code, reduce avenues of avoidance and distortion, and lower marginal tax rates. Taxing fringe benefits, such as health and life insurance, is unpopular—and sometimes not a simple matter—but efficiency and fairness demand it. Income exclusions encourage individuals to invest in tax free goods and services and to underestimate their true income. For instance, high tax rates and special treatment of fringe benefits have encouraged an erosion of the taxable base and inefficient investment in nontaxable employer-provided benefits. These benefits now equal 20 percent of employee compensation—double what they were 20 years ago and rising. A more rational allocation of compensation resulting from the elimination of these preferences will improve the efficiency of the economy. Moreover, the current system is not fair to the employee of a small business because he is not able to take advantage of these fringe benefits to reduce his taxes.

LOW RATES

Even with the great Kennedy and Reagan tax cuts over the last 20 years Federal tax policy has had two simultaneous—and regrettable results: the upward creeping of marginal tax rates and the constriction of the tax base.

In 1960 less than 3 percent of the population was burdened by marginal tax rates in excess of 30 percent. But by 1981, more than 34 percent of Americans were so burdened. Despite the tremendous increase in the average rate of marginal taxation, which measures the economic burden of taxation, Federal revenues remain 19 percent of GNP—evidence that though the amount of revenues collected by the Federal Government has not increased the financial burden on the economy certainly has.

It is no wonder that over the years individuals and special interests have lobbied Congress for special tax preferences. In fact, the number of exemptions allowed against the income tax has doubled in the last 15 years. Unfortunately, the more Congress yielded to demands for additional tax preferences the more Congress found it necessary to raise marginal tax rates in order to recoup lost revenues. This in turn only made more attractive special interest pleas for relief from even higher tax rates. It should be no surprise that nearly 30 percent of all itemized deductions are taken by 4 percent of the richest taxpayers who pay less than 20 percent of all taxes.

SELF aims to reverse this degenerative cycle. I believe that the best way to reduce the role of taxation on individuals and their economic decisions is primarily though the reduction of tax rates and secondarily through the elimination of all but the most vital tax exclusions and exemptions. SELF cuts the top marginal tax rate 40 percent—reducing it to 30 percent on married couples with incomes over $45,000.

So high is the penalty on taxable income that recently released data from the IRS reveals that the share of income taxes paid by the wealthy has actually increased in the 2 years immediately following the 1981 Reagan marginal tax rate cuts—despite the fact that taxpayers in the highest brackets received the largest tax rate reduction. This data yields further credence to the theoretical arguments that marginal rates of taxation over 30 percent are counterproductive and that the real way to soak the rich is to lower their rates and broaden the base.

I believe that we need to continue on this path of reducing the marginal rate of taxation. The recently followed path of loophole closing without rate reductions is quickly approaching political and economic points of diminishing marginal returns. This past summer Congress spent hundreds of hours on the Deficit Reduction Act reducing tax loopholes and increasing revenues. Can we continue on this course? I believe it will be more difficult to eliminate the remaining tax expenditures one at a time. I also question whether such marginal reductions can really increase revenues significantly. I do know from my mail on recordkeeping requirements that they can increase congressional mail considerably.

FAIRNESS

The Joint Committee on Taxation informs me that SELF has an equal number of winners and losers across the income spectrum, and that SELF would leave virtually undisturbed the current distribution of tax liability by income class.

There is more to fairness than political expediency, however. Taxing the poor is just plain unfair—and bad welfare economics. It takes money from those who need it to survive and provides perverse economic constraints. A recent study by Art Laffer demonstrated that the working poor face marginal taxes as high as 279 percent because every dollar they earn reduces their welfare benefits by as much as 100 percent and is taxed at rates of at least 11 percent. By eliminating taxes on individuals with incomes less than $7,000; as well as on couples with two children with incomes less than $14,000; SELF eliminates much of this marginal tax on the working poor. SELF encourages the poor to work—without weakening the safety net. Finally, SELF is fair to all income earning taxpayers because it limits tax preferences to general deductions available to more than an exclusive group of taxpayers.

REASONS FOR TAX REFORM

The U.S. Tax Code represents a major impediment to continued American productivity and prosperity. A combination of punitively high marginal tax rates and hundreds of special exclusions, credits, exemptions, and deductions have an inappropriate distortive effect on individual economic decisions. Our current personal income tax system wrongly induces individuals to consume rather than to save, and to invest in housing and other durable goods rather than financial investments that could lead to further economic growth.

The foundation of any tax reform must be a reduction in the current top marginal income tax rate. Lower marginal tax rates have vital, far reaching economic benefits for all income classes. Low rates encourage individual entrepreneurship, discourage tax avoidance, and allow individuals to make decisions on work, savings, and investments without regard to distorting tax rates.

SELF serves as a model of a comprehensive income tax. It eliminates the current distortions of high marginal tax rates by lowering the top marginal tax rate to 30 percent and by broadening the base.

SELF retains current law deductions for home mortgage interest, charities, medical expenses, IRA's, Keoghs, and other retirement plans.

SELF retains current law treatment of State and local bonds.

SELF indexes all rate schedules, exemptions, and zero bracket amounts to inflation and taxes income at rates of 0, 15, 24, and 30 percent.

SELF provides "zero bracket amounts" of $6,000 for individuals and $10,000 for married taxpayers.

SELF will eliminate the marriage penalty by permitting optional separate filing by two-earner married couples.

SELF will tax all corporations at a rate of 30 percent.

SELF will eliminate most corporate tax preferences and provide for economic depreciation.

SELF will allow for 100-percent deduction of dividends paid on new equity.

CORPORATE TAX

The bill I introduce today differs from its predecessors in that it includes also a model for reform of the corporate tax system. The primary goal of corporate tax reform ought to be tax neutrality—on two levels—neutrality between consumption and savings and neutrality between different investments. The present system taxes long-term structures at significantly higher effective tax rates than shorter term equipment. This results in an uneven tax burden among industries and shortsighted and inefficient investment policies. Higher tax rates on

plant and long-term assets, such as equipment, have contributed to the obsolescence of American plant and industry. Some major companies pay no taxes at all by taking advantage of other preferences. The simplest way to restore tax neutrality is to eliminate most of these preferences—including the investment tax credit [ITC].

We must be concerned about overall neutrality between investment and consumption. Merely eliminating the bias between different kinds of investment by terminating the ITC only aggravates the current bias of the corporate tax system against savings. In order to lower the tax disincentive against all investment SELF provides for a maximum corporate rate of 30 percent and allows a deduction for 100 percent of all dividends paid on new equity. This would eliminate the double taxation of savings and dividends. Current law discourages equity financing because interest is deductible, but dividends paid are not. SELF is vastly more effective than the Treasury proposal—which allows the deduction of 50 percent of all dividends paid. SELF's 100-percent deduction doubles the incentive to invest, but does not provide a multibillion windfall to shareholders of outstanding equity.

SELF applies the principle of tax neutrality to cost recovery also. SELF essentially maintains the current classifications of ACRS, but adjusts the depreciation rate to reflect economic depreciation. The Capital Recovery System in SELF has two other efficient provisions. As does the Treasury proposal, SELF will allow the indexation of all depreciation charges. This will be facilitated by converting depreciation vintage accounts to five open-ended capital accounts.

Indexation of tax provisions is economically efficient and should be considered wherever possible—but not when it conflicts with simplicity. That is why I have chosen to forgo indexing of the capital gains in lieu of continuing a favorable rate.

CONCLUSION

Congress must finally undo the grip of the special interests and act on the need for tax simplification.

Mr. President. I ask unanimous consent that the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 909

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the "SELF-Tax Plan Act of 1985".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

(c) TECHNICAL AND CONFORMING AMENDMENTS.—The Secretary of the Treasury or his delegate, not later than 90 days after the date of the enactment of this Act, shall submit to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate a draft of any technical and conforming amendments to the Internal Revenue Code of 1954 which are necessary to reflect the substantive amendments made by this Act.

TITLE I—REDUCTION OF INDIVIDUAL AND CORPORATE TAX RATES

Subtitle A—Reduction of Rates

SEC. 101. SIMPLIFIED RATES FOR INDIVIDUALS.

So much of section 1 (relating to imposition of tax on individuals) as precedes subsection (f) thereof is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b) who is not a married individual (as defined in section 143), a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $6,000	No tax.
Over $6,000 but not over $20,000	0 plus 15% of the excess over $6,000.
Over $20,000 but not over $30,000	$2,100 plus 24% of the excess over $20,000.
Over $30,000	$4,500 plus 30% of the excess over $30,000.

"(b) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $10,000	No tax.
Over $10,000 but not over $24,000	0 plus 15% of the excess over $10,000.
Over $24,000 but not over $45,000	$2,100 plus 24% of the excess over $20,000.
Over $45,000	$7,140 plus 30% of the excess over $45,000.

"(c) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)), a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $6,000	No tax.
Over $6,000 but not over $20,000	0 plus 15% of the excess over $6,000.
Over $22,000 but not over $35,000.	$2,400 plus 24% of the excess over $22,000.
Over $35,000	$5,520 plus 30% of the excess over $35,000.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $5,000	No tax.
Over $5,000 but not over $12,000	0 plus 15% of the excess over $5,000.
Over $12,000 but not over $22,500.	$1,050 plus 24% of the excess over $12,000.
Over $22,500	$3,570 plus 30% of the excess over $22,500.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this section a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $7,000	15% of taxable income.
Over $7,000 but not over $17,500	$1,050 plus 24% of the excess over $7,000.
Over $17,500	$3,570 plus 30% of the excess over $17,500."

SEC. 102. FLAT TAX FOR CORPORATIONS.

(a) IN GENERAL.—Subsection (a) of section 11 (imposing tax on corporations) is amended to read as follows:

"(a) CORPORATIONS IN GENERAL.—There is hereby imposed on the taxable income of every corporation a tax equal to 30 percent of the taxable income for the taxable year."

(b) CONFORMING AMENDMENT.—Subsection (b) of section 11 (relating to amount of tax) is hereby repealed and subsection (c) and (d) are redesignated as subsection (b) and (c), respectively.

Subtitle B—Repeals and Changes Related to Reduction in Rates

SEC. 111. REPEALS.

(a) GENERAL RULE.—The following provisions are hereby repealed:

(1) Section 3 (relating to tax tables for individuals).

(2) Part VI of subchapter A of chapter 1 (section 55 and following, relating to minimum tax for tax preferences).

(3) Part I of subchapter G of chapter 1 (section 531 and following, relating to corporations improperly accumulating surplus).

(4) Part II of subchapter G of chapter 1 (section 541 and following, relating to personal holding companies).

(5) Section 1551 (relating to graduated corporate tax rates).

(b) TRUST THROWBACK RULES APPLY ONLY TO FOREIGN TRUST.—Subpart D of part I of subchapter J of chapter 1 (relating to treatment of excess distributions by trust) is amended by adding at the end thereof the following new section:

"SEC. 669. SUBPART TO APPLY ONLY TO FOREIGN TRUSTS.

"This subpart shall apply only with respect to amounts distributed from a foreign trust."

SEC. 112. INCOME AVERAGING DISALLOWED FOR TAXPAYER WHO WAS A STUDENT DURING BASE PERIOD.

Subsection (a) of section 1303 (defining individuals who are eligible for income averaging) is amended to read as follows:

"(a) GENERAL RULE.—For purposes of this part, the term 'eligible individual' means any individual who—

"(1) is a citizen or resident of the United States, and

"(2) was not a student in any base period year."

TITLE II—BASE BROADENING

Subtitle A—Credits

PART I—REPEALS

SEC. 201. REPEALS.

The following provisions are hereby repealed:

(1) Section 21 (relating to credit for expenses for household and dependent care services necessary for gainful employment).

(2) Section 22 (relating to credit for the elderly and the permanently and totally disabled).

(3) Section 23 (relating to residential energy credit).

(4) Section 24 (relating to contributions to candidates for public office).

(5) Sections 27(b) and 936 (relating to possessions tax credit).

(6) Section 28 (relating to clinical testing expenses for certain drugs for rare diseases and conditions).

(7) Section 29 (relating to credit for producing fuel from a nonconventional source).

(8) Section 30 (relating to credit for increasing research activities).

(9) Section 32 (relating to earned income).

(10) Section 38 (allowing credits determined under sections 40 and 41 and subparts E and F).

(11) Sections 40 and 87 (relating to alcohol used as fuel).

(12) Section 41 (relating to rules for determining amount of employee stock ownership credit).

(13) Subpart E of part IV of subchapter A of chapter 1 (section 46 and following relating to rules for computing credit for investment in certain depreciable property).

(14) Subpart F of such part IV (sections 51 and 52 relating to rules for computing credit for employment of certain new employees).

PART II—OTHER CHANGES

SEC. 202. REESTABLISHMENT OF PER-COUNTRY LIMITATION ON FOREIGN TAX CREDIT.

Subsection (a) of section 904 (relating to limitation on amount of foreign tax credit) is amended to read as follows:

"(a) PER-COUNTRY LIMITATION.—The amount of the credit allowed under section 901(a) in respect of the tax paid or accrued to any country shall not exceed the same proportion of the tax against which such credit is allowed which the taxpayer's taxable income from sources within such country (but not in excess of the taxpayer's entire taxable income) bears to his entire taxable income for the taxable year."

Subtitle B—Exclusions

PART I—REPEALS

SEC. 211. REPEALS.

The following sections are hereby repealed:

(1) Section 104 (relating to compensation for injuries or sickness).

(2) Section 106 (relating to contributions by employer to accident and health plans).

(3) Section 107 (relating to rental value of parsonages).

(4) Section 112 (relating to certain combat pay of members of the Armed Forces).

(5) Section 113 (relating to mustering-out payments for members of the Armed Forces).

(6) Section 116 (relating to partial exclusion of dividends received by individuals).

(7) Section 118 (relating to contributions to the capital of certain regulated public utilities).

(8) Section 119 (relating to meals or lodging furnished for the convenience of the employer).

(9) Section 120 (relating to amounts received under qualified group legal service plans).

(10) Section 121 (relating to one-time exclusion of gain from sale of principal residence by individual who has attained age 55).

(11) Section 124 (relating to qualified transportation provided by employer).

(12) Section 125 (relating to cafeteria plans).

(13) Section 126 (relating to certain cost-sharing payments).

(14) Section 127 (relating to educational assistance programs).

(15) Section 129 (relating to dependent care assistance programs).

(16) Section 305(e) (relating to dividend reinvestment in public utilities).

(17) Section 621 (relating to payments to encourage exploration, development, and mining for defense purposes).

(18) Section 911 (relating to earned income of citizens or residents of the United States living abroad).

(19) Section 912 (relating to exemption for certain allowances).

(20) Section 931 (relating to income from sources within the United States).

(21) Section 933 (relating to income from sources within Puerto Rico).

(22) Subsections (b) and (d) of section 1382 (relating to exclusion of patronage dividends and per-unit retain allocations for cooperatives).

PART II—OTHER CHANGES

SEC. 212. CERTAIN PRIZES AND AWARDS.

Section 74 (relating to prizes and awards) is amended to read as follows:

"SEC. 74. PRIZES AND AWARDS.

"Except as provided in section 117 (relating to scholarship and fellowship grants), gross income includes amounts received as prizes and awards."

SEC. 213. GROUP-TERM LIFE INSURANCE PURCHASED FOR EMPLOYEES.

(a) IN GENERAL.—Subsection (a) of section 79 (relating to group-term life insurance purchased for employees) is amended to read as follows:

"(a) IN GENERAL.—There shall be included in the gross income of an employee for the taxable year an amount equal to the cost of group-term life insurance on his life provided for part or all of such year under a policy (or policies) carried directly or indirectly by his employer (or employers); but only to the extent that such cost exceeds the amount, if any, paid by the employee toward the purchase of such insurance."

(b) EXCEPTIONS.—Subsection (b) of section 79 is amended by striking out paragraph (1) and redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(c) CONFORMING AMENDMENT.—Subsection (d) of section 79 is hereby repealed.

SEC. 214. TAXATION OF UNEMPLOYMENT COMPENSATION AND OTHER GOVERNMENTAL BENEFITS.

(a) IN GENERAL.—Section 85 (relating to unemployment compensation) is amended to read as follows:

"SEC. 85. UNEMPLOYMENT COMPENSATION AND OTHER GOVERNMENTAL BENEFITS.

"(a) IN GENERAL.—Gross income includes—

"(1) any unemployment compensation received by the taxpayer during the taxable year, and

"(2) any governmental welfare or assistance benefit received by the taxpayer during the taxable year.

"(b) DEFINITIONS.—For purposes of this section—

"(1) the term 'unemployment compensation' means any amount received under a law of the United States or of any State which is in the nature of unemployment compensation,

"(2) the term 'governmental welfare or assistance benefit' means any amount payable in cash or by a qualified instrument under a law of the United States, any State, or the District of Columbia which is in the nature of a welfare benefit or of monetary assistance and which is not otherwise specifically excluded from gross income by a provision of this title or a revenue Act, and

"(3) the term 'qualified instrument' means any scrip, voucher, coupon, stamp, or other instrument which has a fixed monetary value designated on its face and is redeemable for cash or other thing of value.

"(c) LIMITATION.—In the case of any governmental welfare or assistance benefit for which the taxpayer made a cash contribution, the amount includible in gross income of the taxpayer under subsection (a) shall be reduced by the amount of any such contribution."

(b) CLERICAL AMENDMENT.—The item relating to section 85 in the table of sections for part II of subchapter B of chapter 1 is amended to read as follows:

"Sec. 85. Unemployment compensation and other governmental benefits."

SEC. 215. LIMITATION ON PRIVATE-PURPOSE TAX-EXEMPT BONDS.

(a) REPEAL OF TAX EXEMPTION FOR INDUSTRIAL DEVELOPMENT BONDS.—All paragraphs of section 103(b) (relating to industrial development bonds) other than paragraphs (1), (2), and (3) are hereby repealed.

(b) REPEAL OF TAX EXEMPTION FOR MORTGAGE SUBSIDY BONDS.—Section 103A is amended to read as follows:

"SEC. 103A. MORTGAGE SUBSIDY BONDS.

"(a) GENERAL RULE.—Any mortgage subsidy bond shall be treated as an obligation not described in subsection (a) of section 103.

"(b) MORTGAGE SUBSIDY BOND DEFINED.—For purposes of this title, the term 'mortgage subsidy bond' means any obligation which is issued as part of an issue a significant part of the proceeds of which is to be used directly or indirectly for mortgages (or other owner financing) on owner-occupied residences."

(c) REPEAL OF TAX EXEMPTION FOR CERTAIN PRIVATE PURPOSE BONDS.—

(1) IN GENERAL.—

(A) Subsection (a) of section 103 is amended to read as follows:

"(a) GENERAL RULE.—Gross income does not include interest on the obligations of a State, a territory, or a possession of the United States, any political subdivision of any such State, territory, or possession, or the District of Columbia."

(B) Subsection (e) of section 103 is amended to read as follows:

"(e) CERTAIN PRIVATE PURPOSE BONDS.—Any obligation which is issued as part of an issue all or a major portion of the proceeds of which are to be used (directly or indirectly)—

"(1) to finance loans to individuals for educational expenses, or

"(2) by an organization described in section 501(c)(3) which is exempt from taxation under section 501(a),

shall be treated as an obligation not described in subsection (a)."

(2) CONFORMING AMENDMENTS.—

(A) Subsections (b)(1) and (c)(1) of section 103 are each amended by striking out "subsection (a) (1) or (2)" each place it appears and inserting in lieu thereof "subsection (a)".

(B) Paragraph (3) of section 103(b) (defining exempt person) is amended to read as follows:

"(3) EXEMPT PERSON.—For purposes of paragraph (2)(A), the term 'exempt person' means a governmental unit."

(C) Subsections (d), (g), (h), (k), (l), and (m) of section 103 are hereby repealed.

SEC. 216. SCHOLARSHIP AND FELLOWSHIP EXCLUSION LIMITED TO TUITION AND RELATED EXPENSES.

(a) GENERAL RULE.—Subsections (a) and (b) of section 117 (relating to scholarships and fellowships) are amended to read as follows:

"(a) IN GENERAL.—In the case of an individual who is a candidate for a degree at an educational organization described in section 170(b)(1)(A)(ii), gross income does not include any amount received as—

"(1) a scholarship, or

"(2) a fellowship grant,

to the extent such amount is used for qualified tuition and related expenses (within the meaning of subsection (c)(2)).

"(b) PAYMENT FOR TEACHING, RESEARCH, ETC.—Subsection (a) shall not apply to that portion of any amount received which represents payment for teaching, research, or other services in the nature of part-time employment required as a condition to receiving the scholarship or the fellowship grant. If teaching, research, or other services are required of all candidates (whether or not recipients of scholarships or fellowship grants) for a particular degree as a condition to receiving such degree, such teaching, research, or other services shall not be regarded as part-time employment within the meaning of this subsection."

(b) CLARIFICATION OF DEFINITION OF QUALIFIED TUITION AND RELATED EXPENSES.—(1) Clause (i) of section 117(c)(2)(A) is amended by striking out "at an institution of higher education" and inserting in lieu thereof "at an educational organization described in section 170(b)(1)(A)(ii)".

(2) Subparagraph (B) of section 117(c)(1) is amended by inserting "at an institution of higher education" after "qualified tuition and related expenses".

(c) EXCLUSION OF THE AMOUNT OF TUITION REDUCTION REPEALED.—Subsection (d) of section 117 (relating to qualified tuition reduction) is hereby repealed.

Subtitle C—Deductions

PART I—REPEALS

SEC. 221. REPEALS.

The following provisions are hereby repealed:

(1) Subsections (c) and (d) of section 151 (relating to deductions for additional personal exemptions for the elderly and blind) are hereby repealed.

(2) Section 179 (relating to election to expense certain depreciable business assets).

(3) Section 184 (relating to amortization of certain railroad rolling stock).

(4) Section 185 (relating to amortization of railroad grading and tunnel bores).

(5) Section 193 (relating to tertiary injectants).

(6) Section 194 (relating to amortization of reforestation expenditures).

(7) Section 196 (relating to certain unused business credits).

(8) Section 221 (relating to deduction for two-earner married couples).

(9) Section 222 (relating to adoption expenses).

PART II—OTHER CHANGES

SEC. 222. REPEAL OF DEDUCTION FOR ALL CONSUMER INTEREST OTHER THAN INTEREST ON RESIDENTIAL PROPERTY.

Section 163 (relating to interest expenses) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

"(h) DENIAL OF DEDUCTION FOR ALL CONSUMER INTEREST OTHER THAN INTEREST ON RESIDENTIAL PROPERTY.—

"(1) IN GENERAL.—No deduction shall be allowed under subsection (a) for any consumer interest.

"(2) CONSUMER INTEREST DEFINED.—For purposes of this subsection, the term consumer interest means any interest which is allowable as a deduction under this chapter solely by reason of this section, except that such term does not include any interest on any indebtedness the proceeds of which were used exclusively to acquire, construct, or rehabilitate any residential property."

SEC. 223. REPEAL OF DEDUCTION FOR STATE AND LOCAL TAXES.

(a) IN GENERAL.—Subsection (a) of section 164 (relating to deduction for taxes) is amended to read as follows:

"(a) GENERAL RULE.—The following taxes shall be allowed as a deduction for the taxable year within which paid or accrued:

(1) Foreign real property, income, war profits, and excess profits taxes.

(2) The windfall profit tax imposed by section 4986."

(b) TECHNICAL AND CONFORMING AMENDMENTS.—Subsection (b) of such section 164 is amended to read as follows:

"(b) FOREIGN TAXES DEFINED.—For purposes of this section, the term 'foreign tax' incudes only a tax imposed by the authority of a foreign country."

SEC. 224. TERMINATION OF TAX EXEMPTION FOR DEPOSITS INTO, AND WITHDRAWALS FROM, THE CAPITAL CONSTRUCTION FUND UNDER SECTION 607 OF THE MERCHANT MARINE ACT, 1936.

(a) TAXATION OF DEPOSITS.—Subsection (d) of section 607 of the Merchant Marine Act, 1936 (relating to nontaxability for deposits) is hereby repealed.

(b) ALL WITHDRAWALS TREATED AS NONQUALIFIED.—Subsection (f) of such section 607 is amended by adding at the end thereof the following new paragraph:

"(3) No withdrawal after December 31, 1985, shall be treated as a qualified withdrawal."

Subtitle D—Adjustment to Basis; Changes in Certain Special Capital Gains Treatment Provisions

SEC. 231. ADJUSTMENTS TO BASIS TO ALLOW FOR INFLATION.

(a) IN GENERAL.—Part II of subchapter O of chapter 1 (relating to basis rules of general application) is amended by inserting after section 1021 the following new section:

"SEC. 1022. INDEXING OF LAND AND CERTAIN OTHER NONFINANCIAL ASSETS FOR PURPOSES OF DETERMINING GAIN OR LOSS.

"(a) GENERAL RULE.—If an indexed asset is sold or otherwise disposed of, for purposes of this title the indexed basis of the asset shall be substituted for its adjusted basis.

"(b) INDEXED ASSET.—

"(1) IN GENERAL.—For purposes of this section, the term 'indexed asset' means—

"(A) any interest in land held by the taxpayer (whether or not connected with his trade or business),

"(B) any property held by the taxpayer, in connection with a trade or business, of a kind which would normally be included in the inventory of the taxpayer if on hand at the close of the taxable year to the extent the taxpayer does not use the LIFO method of inventorying goods, and

"(C) except as provided in paragraph (2), any other property held by the taxpayer which is not a financial asset (such as stock in a corporation).

"(2) CERTAIN PROPERTY EXCLUDED.—For purposes of this section, the term 'indexed asset' does not include any of the following property or interests in property:

"(A) Recovery property (within the meaning of section 168(e)).

"(B) CREDITOR'S INTEREST.—Any interest in property which is in the nature of a creditor's interest.

"(C) OPTIONS.—Any option or other right to acquire an interest in property.

"(D) NET LEASE PROPERTY.—In the case of a lessor, net lease property (within the meaning of subsection (h)(1)).

"(3) LIFO METHOD DEFINED.—The term 'LIFO method' means the method of inventorying goods described in section 472.

"(c) INDEXED BASIS.—For purposes of this section—

"(1) IN GENERAL.—The indexed basis for any asset is—

"(A) the adjusted basis of the asset, multiplied by

"(B) the applicable inflation ratio.

"(2) APPLICABLE INFLATION RATIO.—The applicable inflation ratio for any asset is the percentage arrived at by dividing—

"(A) the gross national product deflator for the calendar quarter in which the disposition takes place, by

"(B) the gross national product deflator for the calendar quarter in which the asset was acquired by the taxpayer (or, if later, the calendar quarter ending December 31, 1985).

The applicable inflation ratio shall not be taken into account unless it is greater than 1. The applicable inflation ratio for any asset shall be rounded to the nearest $\frac{1}{10}$ of 1 percent.

"(3) GROSS NATIONAL PRODUCT DEFLATOR.—The gross national product deflator for any calendar quarter is the implicit price deflator for the gross national product for such quarter (as shown in the first revision thereof).

"(d) SPECIAL RULES.—For purposes of this section—

"(1) TREATMENT AS SEPARATE ASSET.—In the case of any asset, the following shall be treated as a separate asset:

"(A) A substantial improvement to property.

"(B) Any other portion of an asset to the extent that separate treatment of such portion is appropriate to carry out the purposes of this section.

"(2) ASSETS WHICH ARE NOT INDEXED ASSETS THROUGHOUT HOLDING PERIOD.—

"(A) IN GENERAL.—The applicable inflation ratio shall be appropriately reduced for calendar months at any time during which the asset was not an indexed asset.

"(B) CERTAIN SHORT SALES.—For purposes of applying subparagraph (A), an asset shall be treated as not an indexed asset for any short sale period during which the taxpayer or the taxpayer's spouse sells short property substantially identical to the asset. For purposes of the preceding sentence, the short sale period begins on the day after the substantially identical property is sold and ends on the closing date for the sale.

"(3) SECTION CANNOT INCREASE ORDINARY LOSS.—To the extent that (but for this paragraph) this section would create or increase a net ordinary loss to which the second sentence of section 1231(a) applies or an ordinary loss to which any other provision of this title applies, such provision shall not apply. The taxpayer shall be treated as

having a long-term capital loss in an amount equal to the amount of the ordinary loss to which the preceding sentence applies.

"(4) ACQUISITION DATE WHERE THERE HAS BEEN PRIOR APPLICATION OF SUBSECTION (a) (1) WITH RESPECT TO THE TAXPAYER.—If there has been a prior application of subsection (a) to an asset while such asset was held by the taxpayer, the date of acquisition of such asset by the taxpayer shall be treated as not earlier than the date of the most recent such prior application.

"(e) CERTAIN CONDUIT ENTITIES.—

"(1) PARTNERSHIPS.—In the case of a partnership, the adjustment made under subsection (a) at the partnership level shall be passed through to the partners.

"(2) SUBCHAPTER S CORPORATIONS.—In the case of an electing small business corporation, the adjustment under subsection (a) at the corporate level shall be passed through to the shareholders.

"(f) DISPOSITIONS BETWEEN RELATED PERSONS.—

"(1) IN GENERAL.—This section shall not apply to any sale or other disposition of property between related persons except to the extent that the basis of such property in the hands of the transferee is a substituted basis.

"(2) RELATED PERSONS DEFINED.—For purposes of this section, the term 'related persons' means—

"(A) persons bearing a relationship set forth in section 267(b), and

"(B) persons treated as single employer under subsection (b) or (c) of section 414.

"(g) TRANSFERS TO INCREASE INDEXING ADJUSTMENT OR DEPRECIATION ALLOWANCE.—If any person transfers cash, debt, or any other property to another person and the principal purpose of such transfer is—

"(1) to secure or increase an adjustment under subsection (a), or

"(2) to increase (by reason of an adjustment under subsection (a)) a deduction for depreciation, depletion, or amortization,

the Secretary may disallow part or all of such adjustment or increase.

"(h) DEFINITIONS.—For purposes of this section—

"(1) NET LEASE PROPERTY DEFINED.—The term 'net lease property' means leased real property where—

"(A) the term of the lease (taking into account options to renew) was 50 percent or more of the useful life of the property, and

"(B) for the period of the lease, the sum of the deductions with respect to such property which are allowable to the lessor solely by reason of section 162 (other than rents and reimbursed amounts with respect to such property) is 15 percent or less of the rental income produced by such property.

"(2) STOCK INCLUDES INTEREST IN A COMMON TRUST FUND.—The term 'stock in a corporation' includes any interest in a common trust fund (as defined in section 584 (a)).

"(i) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this section."

(b) CLERICAL AMENDMENT.—The table of sections for part II of subchapter O of such chapter 1 is amended by inserting after the item relating to section 1021 the following new item:

"SEC. 1022. Indexing of certain assets for purposes of determining gain or loss."

SEC. 232. CHANGES IN CERTAIN SPECIAL CAPITAL GAINS TREATMENT PROVISIONS.

(a) DEDUCTION FOR CERTAIN NET CAPITAL GAINS ALLOWED FOR CORPORATIONS.—Subsection (a) of section 1202 (relating to deduction for capital gains) is amended to read as follows:

"(a) IN GENERAL.—If any taxpayer has a net capital gain for any taxable year, 33⅓ percent of the amount of the net capital gain shall be a deduction from gross income."

(b) REPEAL OF ALTERNATIVE TAX FOR CORPORATIONS.—Section 1201 (relating to alternative tax for corporations) is hereby repealed.

(c) NO SPECIAL CAPITAL GAINS TREATMENT ALLOWED FOR INDEXED ASSETS AND RECOVERY PROPERTY.— Section 1221 (defining capital asset) is amended—

(1) by adding at the end thereof the following new paragraphs:

"(6) recovery property (as such term is defined in section 168(e)); and

"(7) indexed assets (as such term is defined in section 1022(b)).", and

(2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof a semicolon.

(d) LIMITATION ON CAPITAL LOSSES APPLIED WITHOUT REGARD TO DISTINCTIONS BETWEEN SHORT TERM AND LONG TERM.—

(1) IN GENERAL.—Subsection (b) of section 1211 (relating to limitation on capital losses in the case of taxpayers other than corporations) is amended to read as follows:

"(b) OTHER TAXPAYERS.—

"(1) IN GENERAL.—In the case of a taxpayer other than a corporation, losses from sales or exchanges of capital assets shall be allowed only to the extent of gains from such sales or exchanges plus (if such losses exceed such gains) whichever is the smallest:

"(A) the taxable income for the taxable year,

"(B) $3,000 ($1,500 in the case of a separate return by a husband and wife), or

"(C) the net capital loss.

"(2) COMPUTATION OF TAXABLE INCOME.—For purposes of paragraph (1), taxable income shall be computed without regard to gains or losses from sales or exchanges of capital assets and without regard to the deductions provided in section 151 (relating to personal exemptions) or any deduction in lieu thereof."

(2) CONFORMING AMENDMENT.—Subsection (b) of section 1212 (relating to carryovers for taxpayers other than corporations) is amended to read as follows:

"(b) OTHER TAXPAYERS.—If a taxpayer other than a corporation has a net capital loss for any taxable year, the excess (if any) of—

"(1) the amount of such loss, over

"(2) the amount allowed for the taxable year under subparagraph (A), (B), or (C) of section 1211(b)(1),

shall be treated as a capital loss in the succeeding taxable year."

(e) ELIMINATION OF DISTINCTIONS BETWEEN SHORT-TERM AND LONG-TERM GAINS AND LOSSES BASED ON HOLDING PERIOD.—Section 1222 is amended to read as follows:

"SEC. 1222. OTHER TERMS RELATING TO CAPITAL GAINS AND LOSSES.

"For purposes of this subtitle—

"(1) CAPITAL GAIN.—The term 'capital gain' means gain from the sale or exchange of a capital asset if, and to the extent that, such gain is taken into account in computing gross income.

"(2) CAPITAL LOSS.—The term 'capital loss' means loss from the sale or exchange of a capital asset if, and to the extent that, such loss is taken into account in computing taxable income.

"(3) NET CAPITAL LOSS.—The term 'net capital loss' means the excess of the losses from the sales or exchanges of capital assets over the gains from such sales or exchanges.

"(4) NET CAPITAL GAIN.—The term 'net capital gain' means the excess of the gains from the sales or exchanges of capital assets over the losses from the sales or exchanges of capital assets."

(f) REPEAL OF RELATED PROVISIONS.—The following provisions are hereby repealed:

(1) Section 268 (relating to sale of land with unharvested crop).

(2) Section 272 (relating to disposal of coal or domestic iron ore).

(3) Paragraphs (1), (2), (4), and (5) of subsection (a) and subsections (b), (c), and (d) of section 291 (relating to reduction in certain corporate preference items).

(4) Section 341 (relating to collapsible corporations).

(5) Section 631 (relating to gain or loss in the case of timber, coal, or domestic iron ore).

(6) Section 735 (relating to distributions of property).

(7) Section 751 (relating to collapsible partnerships).

(8) Paragraph (2) of section 1221 (defining capital asset).

(9) Section 1231 (relating to property used in the trade or business and involuntary conversions).

(10) Section 1235 (relating to sale or exchange of patents).

(11) Section 1238 (relating to amortization in excess of depreciation).

(12) Section 1239 (relating to gain from sale of depreciable property between certain related taxpayers).

(13) Section 1245 (relating to gain from dispositions of certain depreciable property).

(14) Section 1246 (relating to gain on foreign investment company stock).

(15) Section 1247 (relating to election by foreign investment companies to distribute income currently).

(16) Section 1248 (relating to gain from certain sales or exchanges of stock in certain foreign corporations).

(17) Section 1249 (relating to gain from certain sales or exchanges of patents, etc., to foreign corporations).

(18) Section 1250 (relating to gain from disposition of certain depreciable realty).

(19) Section 1252 (relating to gain from disposition of farm land).

(20) Section 1254 (relating to gain from disposition of interest in oil, gas, or geothermal property).

(21) Section 1255 (relating to gain from disposition of section 126 property).

(22) Section 1374 (relating to capital gain of subchapter S corporations).

TITLE III—CAPITAL COST RECOVERY

SUBTITLE A—ACCELERATED COST RECOVERY SYSTEM REFORM

SEC. 301. DEPRECIATION ACCOUNT SYSTEM ESTABLISHED; ACCOUNTS INDEXED FOR INFLATION.

Section 168 (relating to accelerated cost recovery system) is amended to read as follows:

"SEC. 168. CAPITAL COST RECOVERY SYSTEM.

"(a) ALLOWANCE OF DEDUCTION.—In the case of recovery property, there shall be allowed the recovery deduction provided by this section.

"(b) AMOUNT OF DEDUCTION.—The amount of the deduction allowable by subsection (a) for any taxable year shall be the aggregate amount determined by applying—

"(1) The recovery percentage for each class of property, to

"(2) the balance in the recovery account for such class at the end of such year.

"(c) CLASS AND CLASS LIFE.—

"(1) TABLE.—All recovery property—

"(A) shall be placed in 1 of the classes set forth in the following table, and

"(B) shall have the class life set forth for such class in the following table:

"Class	Class life (in years)
1	3
2	5
3	10
4	15
5	18

"(2) ASSIGNMENT TO CLASSES.—For purposes of paragraph (1)—

"(A) IN GENERAL.—Except as provided in subparagraph (B), recovery property shall be assigned to classes in accordance with the following table:

"If the present class life of the property (in years):	The property shall be assigned to (class):
Is less than 4	1
Equals or exceeds 4.0 but is less than 9.5	2
Equals or exceeds 9.5 but is less than 14	3
Equals or exceeds 14	4

"(B) BUILDINGS AND STRUCTURES ASSIGNED TO CLASS 5.—All class 5 real property shall be assigned to class 5.

"(3) CLASS 5 REAL PROPERTY.—For purposes of paragraph (2), the term 'class 5 real property' means any recovery property which is real property except that such term shall not include any real property with a present class life which is less than 9.5 years.

"(d) RECOVERY PERCENTAGE.—For purposes of this section, the term 'recovery percentage' means, with respect to any class of property for any taxable year, the percentage determined under the following table:

"In the case of class:	The recovery percentage is:
1	33⅓
2	20
3	10
4	5
5	2½

"(e) RECOVERY PROPERTY DEFINED—For purposes of this title, the term 'recovery property' means property of a character subject to the allowance for depreciation—

"(1) used in a trade or business, or

"(2) held for the production of income, which is placed in service by the taxpayer after December 31, 1985.

"(f) RECOVERY ACCOUNT.—

"(1) IN GENERAL.—The taxpayer shall establish a recovery account for each class of recovery property.

"(2) ADDITIONS TO ACCOUNT.—

"(A) IN GENERAL.—The recovery account for any class of recovery property shall be increased by an amount equal to the sum of—

"(i) the product of—

"(I) the basis of each recovery property in such class which is placed in service by the taxpayer during the taxable year, and

"(II) the applicable fraction, plus

"(ii) the product of—

"(I) the basis of each recovery property in such class which was placed in service by the taxpayer during the preceding taxable year, and

"(II) 1 minus the applicable fraction.

"(B) ADJUSTMENT FOR INFLATION.—The recovery account for any class of property shall be increased on the first day of each calendar quarter by the applicable inflation ratio.

"(3) REDUCTIONS IN ACCOUNT.—

"(A) PROPERTY DISPOSED OF DURING YEAR.—The recovery account for any class of recovery property shall be deduced by an amount equal to the amount realized on each recovery property of such class disposed of by the taxpayer during the taxable year.

"(B) AMOUNT ALLOWED UNDER THIS SECTION.—The recovery account for any class of recovery property shall be reduced by an amount equal to the amount of the deduction allowed under subsection (a) with respect to such class (but not less than the amount allowable).

"(4) APPLICABLE FRACTION DEFINED.—For purposes of this subsection, the term 'applicable fraction' means, with respect to any recovery property, a fraction—

"(i) the numerator of which is the number of months (using a mid-month convention) in the taxable year during which the property was in service, and

"(ii) the denominator of which is 12.

"(5) APPLICABLE INFLATION RATIO DEFINED.—For purposes of this subsection, the term 'applicable inflation ratio', with respect to the first day of any calendar quarter, is the percentage arrived at by dividing—

"(A) the gross national product deflator (as defined in section 1022(c)(3)) for the second preceding calendar quarter ending before such day, by

"(B) the gross national product deflator for the third preceding calendar quarter ending before such day.

"(6) TIME FOR MAKING ADJUSTMENTS.—

"(A) IN GENERAL.—Any adjustment under paragraph (2)(A) or (3)(A) shall be made as of the close of the taxable year but before the determination of the amount allowable as a deduction under subsection (a) for such taxable year.

"(B) REDUCTION FOR DEDUCTION.—Any reduction under paragraph (3)(B) shall be made as of the beginning of the taxable year following the taxable year for which the amount was allowed (or allowable) as a deduction under subsection (a).

"(7) COORDINATION WITH OTHER PROVISIONS.—

"(A) DISPOSITIONS NOT TREATED AS DISPOSITIONS FOR CERTAIN PURPOSES.—For purposes of this title (other than this section), the disposition of any property in a recovery account shall be treated as if it were not a disposition.

"(B) NEGATIVE BALANCE.—If, as of the close of any taxable year (after the adjustments under paragraphs (2) and (3)(A)), there is a negative balance in any recovery account then, notwithstanding any other provisions of this subtitle—

"(i) an amount equal to the amount by which—

"(I) such negative balance (expressed as a positive number), exceeds

"(II) the applicable fraction of the basis of all recovery property in the class of recovery property for which such account is established which was placed in service by the taxpayer during the taxable year, shall be included in gross income for such taxable year as ordinary income, and

"(ii) the balance in the account shall be adjusted (as of the beginning of the following taxable year) by adding to the account an amount equal to the amount included in gross income under clause (i).

"(g) SPECIAL RULES.—

"(1) PRESENT CLASS LIFE.—The term 'present class life' means the class life (if any) which would be applicable with respect to any property under subsection (m) of section 167 (determined without regard to paragraph (4) thereof and as if the taxpayer had made an election under such subsection).

"(2) NO ADJUSTMENT WHERE PROPERTY DISPOSED OF BEFORE CLOSE OF TAXABLE YEAR IN WHICH PLACED IN SERVICE.—No adjustment shall be made under paragraphs (2) and (3)(A) of subsection (f) in respect of any property which is disposed of by the taxpayer before the close of the taxable year in which placed in service by the taxpayer.

"(3) TRANSFERS AT DEATH.—No reduction shall be made under paragraph (3)(A) of subsection (f) by reason of any transfer at death.

"(4) PROPERTY CEASING TO BE RECOVERY PROPERTY.—If any property taken into account under subsection (f) ceases to be recovery property during any taxable year—

"(A) such property shall be treated as disposed of by the taxpayer during such taxable year, and

"(B) the basis of such property in the hands of the taxpayer after such cessation shall be treated as equal to its fair market value.

"(5) DISPOSITIONS OTHER THAN SALE OR EXCHANGE.—If any recovery property is disposed of in a disposition which is not a sale, exchange, or involuntary conversion and which is not described in paragraph (6) or (7), the reduction under paragraph (3)(A) of subsection (f) for such disposition shall be the fair market value of the property. In the case of a disposition of property by abandonment, the fair market value thereof shall be treated as if it were zero.

"(6) TRANSFERS WHERE BASIS GOES OVER.—

"(A) IN GENERAL.—If any recovery property is transferred and the transferee's basis of such property is determined in whole or in part by reference to the adjusted basis of the transferor, then, under regulations prescribed by the Secretary—

"(i) the transferor's recovery account for the class of property in which the recovery property falls shall be reduced by the transferred amount, and

"(ii) for purposes of determining the transferee's basis in such property, the adjusted basis of such property in the hands of the transferor shall be treated as equal to the transferred amount.

"(B) TRANSFERRED AMOUNT.—For purposes of subparagraph (A), the transferred amount shall be the amount which bears the same relation to—

"(i) the total amount in the transferor's recovery account immediately before the transfer, as

"(ii) the fair market value of the transferred property bears to the fair market value of all property in such account immediately before the transfer.

"(C) AUTHORITY TO PRESCRIBE ALTERNATE METHODS OF ALLOCATION.—The Secretary may by regulations prescribe alternate methods for allocating the balance in any recovery account for purposes of determining the transferred amount of any property.

"(7) LIKE KIND EXCHANGES; INVOLUNTARY CONVERSIONS.—Under regulations prescribed by the Secretary, in the case of any exchange described in section 1031 or 1033—

"(A) if the properties fall in the same class, changes shall be made in the taxpayer's recovery account for such class only to the extent necessary to reflect the money or other property (within the meaning of section 1031) or property not similar or related in service or use (within the meaning of sec-

tion 1033) paid, exchanged, or received, as the case may be, and

"(B) if the properties fall in different classes, proper adjustments in the recovery accounts for both classes shall be made to carry out the nonrecognition provided for in such section.

"(8) SHORT TAXABLE YEARS.—The application of this section to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Secretary.

"(9) TRANSITIONAL RULE.—

"(A) IN GENERAL.—For any taxable year beginning after December 31, 1985, the taxpayer may elect to treat as recovery property any property which would be recovery property if it had been placed in service after December 31, 1985.

"(B) ELECTION MUST APPLY TO ALL CLASSES.—An election made under this paragraph for any taxable year shall apply with respect to all classes of property.

"(C) METHOD IN WHICH PROPERTY TAKEN INTO ACCOUNT.—Any property which is treated as recovery property by reason of an election under this paragraph for any taxable year—

"(i) shall be treated as placed in service during such taxable year, and

"(ii) shall be taken into account in an amount equal to the adjusted basis of such property as of the beginning of the taxable year."

SUBTITLE B—OTHER CHANGES

PART I—REPEALS

SEC. 311. REPEALS.

The following provisions are hereby repealed:

(1) Subsection (c) of section 263 (relating to intangible drilling and development costs in the case of oil and gas wells and geothermal wells).

(2) Section 167 (relating to depreciation).

(3) Subsections (b), (c), (g), and (j) of section 169 (relating to amortization of pollution control facilities).

(4) Subsections (c) and (d) of section 177 (relating to trademark and trade name expenditures).

(5) Section 178 (relating to depreciation or amortization of improvements made by lessee on lessor's property).

(6) Section 179 (relating to election to expense certain depreciable business assets).

(7) Section 194 (relating to amortization of reforestation expenditures).

(8) Sections 613, 613A, and 614 (relating to percentage depletion).

(9) Section 616 (relating to development expenditures).

(10) Section 617 (relating to deduction and recapture of certain mining exploration expenditures).

PART II—OTHER CHANGES

SEC. 316. POLLUTION CONTROL FACILITIES.

(a) IN GENERAL.—Subsection (a) of section 169 (relating to allowance of deduction with respect to the amortization of pollution control facilities) is amended to read as follows:

"(a) Each person, at his election, may treat the amortizable basis of any certified pollution control facility as class 2 recovery property and add an amount equal to such basis to the recovery account (established pursuant to section 168(f)(1)) for such property. Any adjustment in a recovery account under this section shall be made as of the end of the taxable year in which such facility was completed or acquired or the succeeding taxable year. Any election under this subsection shall be made at such time and in such manner as the Secretary shall prescribe."

(b) CLERICAL AMENDMENTS.—Such section 169 is amended by redesignating subsections (d), (e), (f), and (i) as subsections (b), (c), (d), and (e), respectively.

SEC. 317. CIRCULATION EXPENDITURES.

Section 173 (relating to circulation expenditures) is amended to read as follows:

"SEC. 173 CIRCULATION EXPENDITURES.

"(a) GENERAL RULE.—Expenditures (other than expenditures for the purchase of land or depreciable property or for the acquisition of circulation through the purchase of any part of the business of another publisher of a newspaper, magazine, or other periodical) to establish, maintain, or increase the circulation of a newspaper, magazine, or other periodical shall be treated as class 1 recovery property and added to the recovery account (established pursuant to section 168(f)(1)) for such property. Any adjustment in a recovery account under this section shall be made as of the end of the taxable year in which any such expenditure was paid or accrued.

"(b) EXCEPTION.—Subsection (a) shall not apply with respect to any portion of the expenditure as (under regulations prescribed by the Secretary) is chargeable to capital account if the taxpayer elects, in accordance with such regulations, to treat such portion as so chargeable. Such election, if made, must be for the total amount of such portion of the expenditure which is so chargeable to capital account, and shall be binding for all subsequent taxable years unless, upon application by the taxpayer, the Secretary permits a revocation of such election subject to such conditions as he deems necessary."

SEC. 318. TRADEMARK AND TRADE NAME EXPENDITURES.

Subsection (a) of section 177 (relating to trademark and trade name expenditures) is amended to read as follows:

"(a) IN GENERAL.—Any trademark or trade name expenditure paid or accrued during a taxable year beginning after December 31, 1955, may, at the election of the taxpayer, be treated as class 2 recovery property and added to the recovery account (established pursuant to section 168(f)(1)) for such property. The expenditures added to such recovery account shall be treated as expenditures properly chargeable to capital account for purposes of section 1016(a)(1) (relating to adjustments to basis of property). Any adjustment in a recovery account under this section shall be made as of the end of the taxable year in which such expenditure was paid or accrued. Any election under this subsection shall be made at such time and in such manner as the Secretary shall prescribe."

SEC. 318. AMORTIZATION OF CONSTRUCTION PERIOD INTEREST AND TAXES.

(a) GENERAL RULE.—Subsection (b) of section 189 (relating to amortization of amounts charged to capital account) is amended to read as follows:

"(b) AMORTIZATION OF AMOUNTS CHARGED TO CAPITAL ACCOUNT.—Any amount paid or accrued which would (but for subsection (a)) be allowable as a deduction for the taxable year in which paid or accrued shall be treated as class 3 recovery property and added to the recovery account (established pursuant to section 168(f)(1)) for such recovery property. Any adjustment in a recovery account under this section shall be made as of the end of the taxable year in which such amount was paid or accrued."

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Subsections (c) and (d) of section 189 are hereby repealed.

(2) Subsection (e) of section 189 is redesignated as subsection (c).

SEC. 319. START-UP EXPENDITURES.

Subsection (b) of section 195 (relating to start-up costs) is amended to read as follows:

"(b) ELECTION TO TREAT AS RECOVERY PROPERTY.—Any start-up expenditure may, at the election of the taxpayer, be treated as class 2 recovery property and added to the recovery account (established pursuant to section 168(f)(1)) for such property. Any adjustment in a recovery account under this section shall be made as of the end of the taxable year in which any such expenditure was paid or accrued. Any election under this subsection shall be made at such time and in such manner as the Secretary shall prescribe."

TITLE IV—MISCELLANEOUS PROVISIONS

Subtitle A—Foreign Income

SEC. 401. ELIMINATION OF DEFERRAL OF INCOME OF CONTROLLED FOREIGN CORPORATIONS.

(a) GENERAL RULE.—Part III of subchapter N of chapter 1 (relating to income from sources without the United States) is amended by adding at the end thereof the following new subpart:

"Subpart J—Undistributed Profits of Controlled Foreign Corporations

"SEC. 987. AMOUNTS INCLUDED IN GROSS INCOME OF UNITED STATES SHAREHOLDERS.

"(a) AMOUNTS INCLUDED.—

"(1) IN GENERAL.—If a foreign corporation is a controlled foreign corporation (as defined in section 957) for an uninterrupted period of 30 days or more during any taxable year, every person who is a United States shareholder (as defined in section 951(b)) of such corporation who owns (within the meaning of section 958) stock in such corporation on the last day in such year on which such corporation is a controlled foreign corporation shall include in his gross income, for his taxable year in which or with which such taxable year of the corporation ends, his pro rata share of the corporation's earnings and profits for such year.

"(2) PRO RATA SHARE OF EARNINGS AND PROFITS.—United States shareholder's pro rata share referred to in paragraph (1) is the amount—

"(A) which would have been distributed with respect to the stock which such shareholder owns (within the meaning of section 958) in such corporation if on the last day, in its taxable year, on which the corporation is a controlled foreign corporation it had distributed pro rata to its shareholders an amount (i) which bears the same ratio to its earnings and profits for the taxable year, as (ii) the part of such year during which the corporation is a controlled foreign corporation bears to the entire year, reduced by

"(B) an amount (i) which bears the same ratio to the earnings and profits of such corporation for the taxable year, as (ii) the part of such year described in subparagraph (A)(ii) during which such shareholder did not own (within the meaning of section 958) such stock bears to the entire year.

"(b) EARNINGS AND PROFITS.—For purposes of this subpart, under regulations prescribed by the Secretary, the earnings and profits of any foreign corporation, and the deficit in earnings and profits of any foreign corporation, for any taxable year—

"(1) except as provided in section 312(m)(3), shall be determined according to rules substantially similar to those applicable to domestic corporations,

"(2) shall be appropriately adjusted for deficits in earnings and profits of such corporations for any prior taxable year beginning after December 31, 1985, and

"(3) shall not include any item of income which is effectively connected with the conduct by such corporation of a trade or business within the United States unless such item is exempt from taxation (or is subject to a reduced rate of tax) pursuant to a treaty obligation of the United States.

"(c) COORDINATION WITH FOREIGN PERSONAL HOLDING COMPANY PROVISIONS.—In the case of a United States shareholder who, for his taxable year, is subject to tax under section 551(b) (relating to foreign personal holding company income included in gross income of United States shareholders) on income of a controlled foreign corporation, the amount required to be included in gross income by such shareholder under subsection (a) with respect to such company shall be reduced by the amount included in gross income by such shareholder under section 551(b).

"(d) ADJUSTMENTS AND FOREIGN TAX CREDITS.—Under regulations prescribed by the Secretary, the following rules shall apply:

"(1) Adjustments to the basis of stock on account of earnings and profits taxed under subsection (a) shall be made in the manner provided in section 961 (relating to increases and reductions in basis on account of the income tax treatment of subpart F income).

"(2) Elimination of double taxation of previously taxed earnings and profits when distributed shall be made in the manner provided in section 959 (relating to exclusion from gross income of previously taxed subpart F income).

"(3) Corporations shall be deemed to have paid income, war profits, and excess profits taxes paid (or deemed paid) by foreign corporations to a foreign country or possession of the United States in accordance with the special rules set forth in section 960."

(b) TERMINATION OF SUBPART F.—Section 951 (relating to taxation of subpart F income) is amended by adding at the end thereof the following new subsection:

"(e) TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1985.—No amount shall be required to be included in the gross income of a United States shareholder under subsection (a) (other than paragraph (1)(A)(ii) of such subsection) with respect to a taxable year of a controlled foreign corporation beginning after December 31, 1985."

SEC. 402. REPEAL OF FSC AND INTEREST CHARGE DISC.

(a) FSC.—

(1) IN GENERAL.—Section 921 (relating to exempt foreign trade income excluded from gross income) is amended by adding at the end thereof the following new subsection:

"(e) TERMINATION.—This section shall not apply to any taxable year beginning after December 31, 1985."

(2) CONFORMING AMENDMENT.—Section 922 (defining FSC) is amended by adding at the end thereof the following new subsection:

"(c) TERMINATION.—No corporation shall be treated as a FSC for any taxable year beginning after December 31, 1985."

(b) INTEREST CHARGE DISC.—

(1) IN GENERAL.—Section 991 (relating to tax exemption of a DISC) is amended by adding at the end thereof the following new sentence: "This section shall not apply to any taxable year beginning after December 31, 1985."

(2) CONFORMING AMENDMENTS.—

(A) Section 992(a) (defining DISC) is amended by adding at the end thereof the following new paragraph:

"(4) TERMINATION.—No corporation shall be treated as a DISC for any taxable year beginning after December 31, 1985."

(B) Section 995(b)(2) (relating to deemed distributions upon DISC disqualification) is amended by adding at the end thereof the following new subparagraph:

"(C) A corporation which, by reason of the provisions of section 992(a)(4), is a former DISC, for its first taxable year beginning after December 31, 1985, shall be treated, for purposes of this paragraph, as having failed to satisfy the conditions of section 992(a)(1) for such taxable year."

Subtitle B—Other Miscellaneous Provisions

SEC 411. ZERO RATE OF TAX WHERE CORPORATION DISTRIBUTES DIVIDENDS.

(a) ZERO RATE OF TAX.—Part II of subchapter A of chapter 1 (relating to tax on corporations) is amended by redesignating section 12 as section 13 and inserting after section 11 the following new section:

"SEC 12. ZERO RATE OF TAX WHERE CORPORATION DISTRIBUTES DIVIDENDS.

"(a) IN GENERAL.—The amount of the tax imposed by section 11 for the taxable year with respect to the taxable income of a corporation shall be reduced by an amount equal to the amount which would be imposed by section 11 if the taxable income of the corporation for the taxable year equaled its section 12 dividend amount for such year.

"(b) SECTION 12 DIVIDEND AMOUNT DEFINED.—For purposes of this section, the term 'section 12 dividend amount' means the amount of any qualified dividend which was paid by the corporation during the taxable year on eligible stock of the corporation.

"(c) QUALIFIED DIVIDEND AND ELIGIBLE STOCK DEFINED.—For purposes of this section—

"(1) QUALIFIED DIVIDEND.—The term 'qualified dividend' means any dividend (as defined in section 316), but only if such dividend—

"(A) is paid in cash (or is a consent dividend meeting requirements similar to those of section 565),

"(B) is pro rata, with no preference to any share of stock as compared with any other share in the same class, and with no preference to 1 class of stock as compared with another class except to the extent the former is entitled (without reference to waivers of their rights by shareholders) to such preference, and

(c) is not in redemption or in partial or complete liquidation.

"(2) ELIGIBLE STOCK.—The term 'eligible stock' means any share of stock—

"(A) which is issued after December 31, 1985,

"(B) which is a new issue,

"(C) with respect to which the corporation makes an election (in the manner provided in subsection (d)(1)) to have such share taken into account under this section, and

"(D) which is not treasury stock.

"(3) EXCEPTION FOR DIVIDENDS ON CERTAIN PREFERRED STOCK.—The term 'dividend' includes a distribution with respect to stock which is not common stock only if—

"(A) the corporation first issued stock in that class after December 31, 1985, and

"(B) the corporation makes an election (in the manner provided in subsection (d)(1)) to have stock of that class taken into account under this section.

"(d) ELECTION; RECORDKEEPING REQUIREMENT.—

"(1) ELECTION.—The corporation shall make an election—

"(A) to have a new issue of stock treated as eligible stock, or

"(B) to have a class of stock which is not common stock taken into account under this section, at such time and in such manner as the Secretary shall prescribe but not later than the date of issue of such share or class of stock. Any election under this paragraph may not be revoked.

"(2) RECORDKEEPING REQUIREMENT.—Each corporation which makes any election under paragraph (1) shall maintain records in such form as the Secretary shall prescribe of each new issue of and each new class of stock to which such election applies. Records relating to any issue of a share of stock with respect to which an election is in effect shall contain at a minimum the following information with respect to such share:

"(A) The date of issue of such share.

"(B) The amount received by the corporation on the issue of such share (including the fair market value of any property received in lieu of cash).

"(C) The financial characteristics of the issue of which such share was a part.

"(e) DISQUALIFICATION OF ELIGIBLE STOCK IN EVENT OF SUBSEQUENT STOCK PURCHASE OR REPURCHASE BY CORPORATION.—

"(1) IN GENERAL.—In the case of a corporation which has issued any eligible stock and after such issue acquires any share of stock in another corporation or any share of its own stock, the number of eligible shares shall be reduced by the disqualification amount as of the date of any acquisition.

"(2) DISQUALIFICATION AMOUNT.—For purposes of this section, the term 'disqualification amount' means that number of shares of eligible stock for which the corporation received (on the issue of such shares) an amount which is equal to the amount paid by the corporation for an acquisition described in paragraph (1) (including the fair market value of any property transferred by such corporation).

"(3) ORDER IN WHICH SHARES ARE TAKEN INTO ACCOUNT.—For purposes of determining any disqualification amount, eligible stock shall be taken into account on the basis of the average amount of the qualified dividends paid on such stock during the 2-year period ending on the date of any acquisition to which this subsection applies beginning with the highest such average.

"(f) SPECIAL RULES.—For purposes of this section—

"(1) DIVIDENDS PAID AFTER CLOSE OF TAXABLE YEAR.—A dividend paid after the close of any taxable year and on or before the 15th day of the 3rd month following the close of such taxable year shall, to the extent the taxpayer elects in its return for the taxable year, be considered as paid during such taxable year.

"(2) TREATMENT OF DIVIDENDS.—

"(A) IN GENERAL.—The zero rated portion of any dividend paid by a corporation during any taxable year shall not be treated as a dividend for purposes of section 243.

"(B) ZERO RATED PORTION.—The zero rated portion of any dividend is an amount equal to such dividend multiplied by a fraction—

"(i) the numerator of which is the corporation's section 12 dividend amount for the taxable year, including any amount which the corporation elects to treat as such amount under paragraph (2) (or, if lesser, its taxable income for the taxable year), and

"(ii) the denominator of which is the aggregate amount of the dividends paid by the corporation during the taxable year.

"(3) CERTAIN CORPORATIONS NOT ELIGIBLE.—Subsection (a) shall not apply to any corporation which is—

"(A) an insurance company subject to tax under subchapter L,

"(B) a corporation subject to tax imposed by subchapter M (relating to regulated investment companies and real estate trusts), or

"(C) a corporation to which an election under section 936 applies.

"(4) COMPONENT MEMBERS OF THE SAME GROUP.—In the case of controlled group of corporations (within the meaning of section 1563(a))—

"(A) all component members of the group shall be treated as 1 corporation,

"(B) the section 12 dividend amount shall be divided among the component members of the group in the same manner as amounts specified in paragraph (2) of section 561(a) are divided among such members under such section,

"(C) distributions from 1 component member of the group to another component member of the group shall not be treated as dividends, and

"(D) in applying section 1244(c)(3), subparagraph (A) of this paragraph shall apply and amounts received by 1 component member of the group from another member of the group shall not be taken into account.

"(5) SPCEIAL RULE WHERE 20 PERCENT OR MORE OF DIVIDENDS IS PAID TO TAX-EXEMPT OR ACCUMULATION TRUSTS.—Subsection (a) shall not apply to any corporation for any taxable year during which 20 percent or more of the dividends paid by the corporation are paid (directly or indirectly) to one or more of the following:

"(A) Persons which are exempt from tax under section 501.

"(B) Any trust unless, under the terms of the instrument establishing the trust, all of its income is required to be distributed currently.

"(6) PASSIVE INCOME LIMITATION.—

"(A) IN GENERAL.—If the passive investment income fraction of any corporation for any taxable year exceeds ⅛, such corporation's section 12 dividend amount for the taxable year shall not exceed the taxable income of the corporation for the taxable year determined by not taking into account any passive income and any deductions allocable to such income.

"(B) PASSIVE INVESTMENT INCOME FRACTION DEFINED.—The term 'passive investment income fraction' means, with respect to any taxable year, a fraction—

"(i) the numerator of which is the passive investment income for such year, and

"(ii) the denominator of which is the gross receipts for such year.

"(C) PASSIVE INVESTMENT INCOME DEFINED.—The term 'passive investment income' means gross receipts derived from royalties, rents, dividends, interest, annuities, and sales or exchanges of stock or securities.

"(D) SALES OF STOCK AND SECURITIES.—Gross receipts from the sales or exchanges of stock or securities shall be taken into account only to the extent of gains therefrom.

"(E) SPECIAL RULE FOR CERTAIN LENDING OR FINANCE COMPANIES.—If the corporation meets the requirements of section 542(c)(6) for the taxable year, the term 'passive investment income' shall not include gross receipts for the taxable year which are derived directly from the active and regular conduct of a lending or finance business (as defined in section 542(d)(1))."

(b) CONFORMING AMENDMENT.—Section 243 (relating to deduction for dividends received by corporations) is amended by adding at the end thereof the following new subsection:

"(e) CROSS REFERENCE.—

"For adjustment to deduction where zero rate provisions of section 12 apply, see section 12(f)(2)."

(c) CLERICAL AMENDMENT.—The table of sections for part II of subchapter A of chapter 1 is amended by redesignating the item relating to section 12 as section 13 and by inserting after the item relating to section 11 the following new item:

"Sec. 12. Zero rate of tax where corporation distributes dividend."

SEC. 412. METHOD OF ACCOUNTING FOR TAXPAYERS ENGAGED IN FARMING.

(a) GENERAL RULE.—The section heading and subsection (a) of section 447 (relating to method of accounting for corporations engaged in farming) are amended to read as follows:

"SEC. 447. METHOD OF ACCOUNTING FOR TAXPAYERS ENGAGED IN FARMING.

"(a) GENERAL RULE.—The taxable income from farming (including timber) shall be computed on an accrual method of accounting and with the capitalization of preproductive expenses described in subsection (b)."

(b) ACCRUAL METHOD NOT REQUIRED FOR TAXPAYERS HAVING GROSS RECEIPTS OF $1,000,000 OR LESS: REPEAL OF OTHER EXCEPTIONS.—Section 447 is amended by striking out subsections (c), (d), (e), (g), and (h) and by inserting after subsection (b) the following new subsection:

"(c) TAXPAYERS HAVING GROSS RECEIPTS OF $1,000,000 OR LESS.—

"(1) IN GENERAL.—This section shall not apply with respect to any taxpayer if for each prior taxable year of such taxpayer beginning after December 31, 1985 (December 31, 1975, in the case of a corporation), such taxpayer (and, in the case of a corporation, any predecessor) did not have gross receipts exceeding $1,000,000. For purposes of the preceding sentence, all taxpayers which are treated as a single employer under subsection (a) or (b) of section 52 (as in effect before its repeal) shall be treated as 1 taxpayer.

"(2) FARMING SYNDICATES SUBJECT TO ACCRUAL METHOD WITHOUT REGARD TO AMOUNT OF GROSS RECEIPTS.—Paragraph (1) shall not apply to any farming syndicate (as defined in section 464(c))."

(c) CERTAIN EXPENSING DEDUCTIONS NOT ALLOWED TO TAXPAYERS TO WHOM SECTION 447 APPLIES.—Section 447 is amended by inserting after subsection (c) the following new subsection:

"(d) TAXPAYERS TO WHOM SECTION APPLIES NOT ALLOWED TO EXPENSE CERTAIN EXPENDITURES.—In the case of a taxpayer to whom this section applies, the following provisions shall not apply:

"(1) section 175 (relating to soil and water conservation expenditures),

"(2) section 180 (relating to expenditures by farmers for fertilizer, etc.), and

"(3) section 182 (relating to expenditures by farmers for clearing land."

SEC. 413. ADJUSTMENTS TO COMPLETED CONTRACT METHOD.

(a) GENERAL RULE.—Section 229 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to modification of regulations on the completed contract method of accounting) is amended by redesignating subsections (b) and (c) as subsections (c) and (d), respectively, and by inserting after subsection (a) the following new subsection:

"(b) DEFERRAL OF INCOME OR LOSS TO BE TAKEN INTO ACCOUNT IN DETERMINING TAX LIABILITY UNDER COMPLETED CONTRACT METHOD OF ACCOUNTING.—

"(1) IN GENERAL.—The tax treatment of any long-term contract with respect to which the completed contract method of accounting is used shall take into account the fact that under such method there has been a deferral of income or loss for purposes of the Internal Revenue Code of 1954.

"(2) SECRETARY OF TREASURY TO PRESCRIBE REGULATIONS ESTABLISHING METHODS.—

"(A) IN GENERAL.—The Secretary of the Treasury (or his delegate) shall prescribe regulations establishing 2 methods which carry out the purposes of paragraph (1), the exact method and the simplified method.

"(B) ALLOCATION OF INCOME AND LOSS TO PROPER YEAR.—Each method described in subparagraph (A) shall be based on allocating to each taxable year in which activities relating to the long-term contract occur such taxable year's proper share of the net income or loss from the contract.

"(C) EXACT METHOD.—For purposes of this paragraph, the term 'exact method' means a method under which interest is computed under chapter 67 of the Internal Revenue Code of 1954 on the underpayments or overpayments for prior taxable years which would result solely from the application of subparagraph (B).

"(D) SIMPLIFIED METHOD.—For purposes of this paragraph, the term 'simplified method' means a method under which the taxpayer's income or loss for the current year is adjusted by an amount which represents interest on each amount which is allocated under subparagraph (B) to a taxable year before the current year. For purposes of the preceding sentence, interest shall be computed under subchapter C of chapter 67 of such Code but at 70 percent of the rates established by section 6621 of such Code.

"(E) $10,000 SMALL BUSINESS EXEMPTION.—

"(i) IN GENERAL—For each current year, the first $10,000 of interest equivalent which (but for this subparagraph) would be owed by the taxpayer under subparagraph (C) or (D) shall not be taken into account.

"(ii) RELATED PERSONS RULE.—For purposes of clause (i)—

"(I) all trades or businesses (whether or not incorporated) which are under common control shall be treated as 1 taxpayer, and

"(II) all interest equivalents of the taxpayer (and related persons) shall be taken into account.

"(F) ELECTION.—The taxpayer may elect the exact method or the simplified method at such time and in such manner as may be prescribed by regulations. Such an election shall apply to all long-term contracts to which the completed method of accounting applies, and (once made) may be revoked only with the consent of the Secretary of the Treasury or his delegate.

"(G) CURRENT YEAR DEFINED.—For purposes of this paragraph, the term 'current year' means the taxable year in which the income or loss from the long-term contract is taken into account under the completed method of accounting."

(b) ELIMINATION OF EXCEPTION FOR CONTRACTS COMPLETED WITHIN 3 YEARS.—Subparagraph (A) of section 229(c)(2) of the Tax Equity and Fiscal Responsibility Act of 1982 (as redesignated by subsection (a)) is amended to read as follows:

"(A) IN GENERAL.—The term 'extended period long-term contract' does not include any construction contract entered into by a taxpayer whose average annual gross receipts over the 3 taxable years preceding the taxable year in which such contract is entered into does not exceed $25,000,000."

SEC. 414. REPEAL OF TAX EXEMPTION FOR CREDIT UNIONS.

Paragraph (14) of section 501(c) (relating to list of exempt organizations) is hereby repealed.

SEC. 415. RECOGNITION OF GAIN OR LOSS ON DISTRIBUTIONS OF PROPERTY BY CORPORATIONS.

(a) DISTRIBUTION.—Section 311 (relating to taxability of corporation on distribution) is amended to read as follows:

"SEC. 311. TAXABILITY OF CORPORATION ON DISTRIBUTION.

"(a) GENERAL RULE.—Except as provided in subsection (b), gain or loss shall be recognized to a corporation on the distribution of property with respect to its stock in the same manner as if the property distributed had been sold to the distributee at its fair market value.

"(b) EXCEPTION FOR DEBT OF CORPORATION.—Subsection (a) shall not apply with respect to any distribution of an obligation of the corporation."

(b) DISTRIBUTION IN LIQUIDATION.—Section 336 (relating to distributions of property in liquidation) is amended to read as follows:

"SEC. 336. DISTRIBUTIONS OF PROPERTY IN LIQUIDATION.

"(a) GENERAL RULE.—Except as provided in subsection (b), gain or loss shall be recognized to a corporation on the distribution of property in complete liquidation in the same manner as if the property distributed had been sold to the distributee at its fair market value.

"(b) EXCEPTION WHERE BASIS DETERMINED UNDER SECTION 334(b).—Subsection (a) shall not apply to any liquidation under section 332 for which the basis of property received is determined under section 334(b)."

(c) REPEAL OF SECTION 337.—

(1) Section 337 (relating to gain or loss on sales or exchanges in connection with certain liquidations) is hereby repealed.

(2) ADJUSTMENTS TO SECTION 338.—

(A) Paragraph (1) of section 338(a) (relating to certain stock purchases treated as asset acquisitions) is amended by striking out "to which section 337 applies".

(B) Subsection (c) of section 338 is hereby repealed.

SEC. 416. REPEAL OF TAX EXEMPTION FOR CERTAIN EMPLOYEE TRUSTS.

The following provisions are hereby repealed:

(1) Paragraph (9) of section 501(c) (relating to tax-exempt status of voluntary employee beneficiary associations).

(2) Paragraph (17) of section 501(c) (relating to tax-exempt status of supplemental unemployment compensation benefit trusts).

(3) Paragraph (21) of section 501(c) (relating to tax-exempt status of Black Lung trusts).

SEC. 417. PROVISION EXCLUDING REAL ESTATE FROM AT-RISK RULES REPEALED.

Subparagraph (D) of section 465(c)(3) (relating to exclusions for real property) is hereby repealed.

SEC. 418. ELIMINATION OF SPECIAL BAD DEBT RESERVES OF FINANCIAL INSTITUTIONS.

(a) BANKS.—

(1) Paragraph (1) of section 585(b) (relating to addition to reserves for bad debts of banks) is amended to read as follows:

"(1) GENERAL RULE.—For purposes of section 166(c), the reasonable addition to the reserve for bad debts of any financial institution to which this section applies shall be an amount determined by the taxpayer which shall not exceed the addition to the reserve for losses on loans determined under the experience method as provided in paragraph (2)."

(2) Subsection (b) of section 585 is amended by striking out paragraphs (2) and (4) and by redesignating paragraph (3) as paragraph (2).

(b) OTHER FINANCIAL INSTITUTIONS.—Subsection (b) of section 593 (relating to addition to reserves for bad debts) is amended to read as follows:

"(b) ADDITION TO RESERVES FOR BAD DEBTS.—For purposes of section 166(c), the reasonable addition for the taxable year to the reserve for bad debts of any taxpayer described in subsection (a) shall be the amount determined to be a reasonable addition to the reserve to the extent such amount does not exceed an amount determined in the same manner as provided with respect to additions to the reserves for losses on loans of banks under section 585(b)(2)."

SEC. 419. CERTAIN EMPLOYEE BENEFITS TAKEN INTO ACCOUNT FOR PURPOSES OF CERTAIN EMPLOYMENT TAXES.

(a) FEDERAL INSURANCE CONTRIBUTIONS ACT TAXES.—Subsection (a) of section 3121 (defining wages is amended—

(1) by striking out paragraphs (2), (4), (17), (18), and (19), and

(2) in paragraph (20), by striking out "or 132".

(b) RAILROAD RETIREMENT TAX.—Subsection (e) of section 3231 (defining compensation) is amended—

(1) in paragraph (4)(A), by striking out clause (i),

(2) in paragraph (4)(B), by striking out ", except to the extent that such sickness (as determined in accordance with standards prescribed by the Railroad Retirement Board) is the result of on-the-job injury", and

(3) in paragraph (5), by striking out "or 132".

(c) UNEMPLOYMENT TAX.—Subsection (a) of section 3306 (defining wages) is amended—

(1) by striking out paragraphs (2), (4), (12), (13), and (14), and

(2) in paragraph (16), by striking out "or 132".

(d) WITHHOLDING.—Subsection (a) of section 3401 (defining wages) is amended—

(1) by striking out paragraphs (1), (12)(C), (15), (18), and (19), and

(2) in paragraph (20), by striking out "or 132".

SEC. 420. REPEAL OF LIFO CONFORMITY REQUIREMENT.

Subsection (c) of section 472 (relating to condition applicable to last-in, first-out inventorying) is hereby repealed.

TITLE V—EFFECTIVE DATES

SEC. 501. EFFECTIVE DATES.

(a) GENERAL RULE.—Except as otherwise provided in this Act, the amendments made by this Act shall apply to taxable years beginning after December 31, 1985.

(b) TRUST THROWBACK RULES.—The amendment made by section 111(b) shall apply with respect to income accumulated during taxable years of trusts beginning after December 31, 1985.

(c) CREDITS.—

(1) INVESTMENT TAX CREDIT.—The amendment made by section 201(8), to the extent such amendment relates to the credit determined under section 46(a) of the Internal Revenue Code of 1954, shall apply to—

(A) property (to which section 46(d) of the Internal Revenue Code of 1954 does not apply) placed in service after December 31, 1985, and

(B) property to which such section 46(d) applies to the extent of qualified progress expenditures made after December 31, 1985.

(2) PRESERVATION OF EXISTING CREDITS.—The repeals and amendments made by section 201 shall not apply to any carryover of an excess credit from a taxable year beginning before January 1, 1986, to a taxable year beginning after December 31, 1985; except that any carryover to a taxable year beginning after December 31, 1985, shall be reduced to an amount equal to 60 percent of the amount which would have been carried over but for this paragraph.

(d) POSSESSIONS TAX CREDIT.—

(1) REPEAL EFFECTIVE IN 1991.—The amendments made by section 201(5) shall apply to taxable years beginning after December 31, 1990.

(2) 5-YEAR PHASEOUT OF EXISTING CREDIT.—The amount of any credit allowable under section 27(b) of the Internal Revenue Code of 1954—

(A) for taxable years beginning after December 31, 1985, and before January 1, 1987, shall be reduced by 20 percent of the amount which, but for this subparagraph, would be allowed,

(B) for taxable years beginning after December 31, 1986, and before January 1, 1988, shall be reduced by 40 percent of the amount which, but for this subparagraph, would be allowed,

(C) for taxable years beginning after December 31, 1987, and before January 1, 1989, shall be reduced by 60 percent of the amount which, but for this subparagraph, would be allowed, and

(D) for taxable years beginning after December 31, 1988, and before January 1, 1990, shall be reduced by 20 percent of the amount which, but for this subparagraph, would be allowed.

(e) EMPLOYEE BENEFITS AND WAGE REPLACEMENT PAYMENTS.—The amendments made by paragraphs (1), (2), (3), (8), (9), (11), (12), (14), and (15) of section 211 and sections 214 and 419 shall take effect on January 1, 1987.

(f) TAX EXEMPT BONDS.—The amendments made by section 216 shall apply to obligations issued after December 31, 1985.

(g) INDEXED BASIS.—The amendments made by section 231 shall apply to dispositions after December 31, 1979, in taxable years beginning after such date.

(h) CAPITAL GAIN TREATMENT.—The amendments made by section 232 shall apply to dispositions after December 31, 1985, in taxable years beginning after such date.

(i) DEPRECIATION.—The amendment made by section 301 shall apply with respect to property placed in service after December 31, 1986.

(j) ZERO RATE OF TAX WHERE CORPORATION DISTRIBUTES DIVIDENDS.—The amendments made by section 411 shall not be treated as a change in the rate of tax for purposes of section 21 of the Internal Revenue Code of 1954.

(k) RECOGNITION OF GAIN OR LOSS ON DISTRIBUTIONS OF PROPERTIES BY CORPORATIONS.—

(1) The amendment made by subsections (a) and (b) of section 415 shall apply to distributions after December 31, 1985, in taxable years ending after such date.

(2) The amendments made by subsection (c) of section 415 shall apply to sales or exchanges after December 31, 1985, in taxable years ending after such date.●

By Mr. WARNER (for himself and Mr. HART) (by request):

S. 911. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1986 and fiscal year 1987, and for other purposes; to the Committee on Armed Services.

NATIONAL SECURITY PROGRAMS AUTHORIZATION ACT FOR FISCAL YEARS 1986 AND 1987

Mr. WARNER. Mr. President, by request, for myself and the senior Senator from Colorado [Mr. HART], I introduce, for appropriate reference, a bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1986 and fiscal year 1987, and for other purposes.

I ask unanimous consent that a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD immediately following the listing of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 911

Be it enacted the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Security Programs Authorization Act for Fiscal Years 1986 and 1987."

TITLE I—NATIONAL SECURITY PROGRAMS OPERATING EXPENSES

SEC. 101. Funds are authorized to be appropriated to the Department of Energy for fiscal year 1986 for operating expenses incurred in carrying out national security programs (including scientific research and development in support of the Armed Forces, strategic and critical materials necessary for the common defense, and military applications of nuclear energy and related management and support activities) as follows:

(1) For weapons activities, $3,505,400,000.

(2) For materials production, $1,616,300,000.

(3) For defense waste and byproducts management, $405,122,000.

(4) For verification and control technology, $83,475,000.

(5) For nuclear safeguards and security, $54,325,000.

(6) For security investigations, $33,400,000.

(7) For naval reactors development, $489,000,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. Funds are authorized to be appropriated to the Department of Energy for fiscal year 1986 for plant and capital equipment (including planning, construction, acquisition, and modification of facilities, land acquisition related thereto, and acquisition and fabrication of capital equipment not related to construction) necessary for national security programs as follows:

(1) For weapons activities:

Project 86-D-101, general plant projects, various locations, $29,900,000.

Project 86-D-121, general plant projects, various locations, $33,700,000.

Project 86-D-103, decontamination and waste treatment facility, Lawrence Livermore National Laboratory, Livermore, California, $1,000,000.

Project 86-D-104, strategic defenses facility, Sandia National Laboratories, Albuquerque, New Mexico, $8,000,000.

Project 86-D-122, structural upgrade of existing plutonium facilities, Rocky Flats Plant, Golden, Colorado, $3,000,000.

Project 86-D-123, environmental hazards elimination, various locations, $8,700,000.

Project 86-D-124, safeguards and site security upgrading, Phase II, Mound Plant, Miamisburg, Ohio, $3,000,000.

Project 86-D-125, safeguards and site security upgrade, Phase II, Pantex Plant, Amarillo, Texas, $1,500,000.

Project 86-D-130, Tritium loading facility replacement, Savannah River Plant, Aiken, South Carolina, $5,000,000.

Project 85-D-102, nuclear weapons research, development, and testing facilities revitalization, Phase I, various locations, $81,600,000, for a total project authorization of $117,000,000.

Project 85-D-103, safeguards and security enhancements, Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore, California, $27,900,000, for a total project authorization of $32,600,000.

Project 85-D-105, combined device assembly facility, Nevada Test Site, Nevada, $45,400,000, for a total project authorization of $53,000,000.

Project 85-D-106, hardened engineering test building, Lawrence Livermore National Laboratory, Livermore, California, $1,900,000, for a total project authorization of $2,700,000.

Project 85-D-112, enriched uranium recovery improvements, Y-12 Plant, Oak Ridge, Tennessee, $15,300,000, for a total project authorization of $19,800,000.

Project 85-D-113, power plant and steam distribution system, Pantex Plant, Amarillo, Texas, $18,500,000, for a total project authorization of $23,000,000.

Project 85-D-115, renovate plutonium building utility systems, Rocky Flats Plant, Golden, Colorado, $17,700,000, for a total project authorization of $20,600,000.

Project 85-D-121, air and water pollution control facilities, Y-12 Plant, Oak Ridge, Tennessee, $14,000,000, for a total project authorization of $19,000,000.

Project 85-D-123, safeguards and site security upgrade, Phase I, Pantex Plant, Amarillo, Texas, $4,000,000, for a total project authorization of $5,000,000.

Project 85-D-124, safeguards and site security upgrade, Rocky Flats Plant, Golden, Colorado, $2,400,000, for a total project authorization of $3,400,000.

Project 85-D-125, tactical bomb production facilities, various locations, $11,000,000, for a total project authorization of $21,000,000.

Project 84-D-102, radiation-hardened integrated circuit laboratory, Sandia National Laboratories, Albuquerque, New Mexico, $15,500,000, for a total project authorization of $37,500,000.

Project 84-D-104, nuclear materials storage facility, Los Alamos National Laboratory, Los Alamos, New Mexico, $12,100,000, for a total project authorization of $19,300,000.

Project 84-D-107, nuclear testing facilities revitalization, various locations, $30,540,000, for a total project authorization of $65,940,000.

Project 84-D-112, TRIDENT II warhead production facilities, various locations, $60,700,000, for a total project authorization of $140,700,000.

Project 84-D-113, antisubmarine warfare/standoff weapon warhead production facilities, varous locations, $16,00,000.

Project 84-D-115, electrical system expansion, Pantex Plant, Amarillo, Texas, $3,300,000, for a total project authorization of $14,800,000.

Project 84-D-117, insert assembly and test facility, Pantex Plant, Amarillo, Texas, $400,000, for a total project authorization of $13,600,000.

Project 84-D-118, high-explosive subassembly facility, Pantex Plant, Amarillo, Texas, $40,000,000, for a total project authorization of $47,000,000.

Project 84-D-120, explosive component test facility, Mound Plant, Miamisburg, Ohio, $2,300,000, for a total project authorization of $22,300,000.

Project 84-D-211, safeguards and site security upgrading, Y-12 Plant, Oak Ridge, Tennessee, $7,500,000, for a total project authorization of $23,000,000.

Project 84-D-212, safeguards and site security upgrade, Pinellas Plant, Florida, $3,800,000, for a total project authorization of $7,500,000.

Project 83-D-199, buffer land acquisition, Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore, California, $17,000,000, for a total project authorization of $34,000,000.

Project 82-D-107, utilities and equipment restoration, replacement, and upgrade, Phase III, various locations, $195,500,000, for a total project authorization of $765,900,000.

Project 82-D-111, interactive graphics systems, various locations, $6,000,000, for a total project authorization of $26,000,000.

Project 82-D-114, simulation technology laboratory, Sandia National Laboratories, Albuquerque, New Mexico, $10,300,000, for a total project authorization of $34,000,000.

Project 79-7-0, universal pilot plant, Pantex Plant, Amarillo, Texas, $4,500,000, for a total project authorization of $20,400,000.

(2) for materials production:

Project 86-D-146, general plant projects, various locations, $34,800,000.

Project 86-D-149, productivity retention program, Phase I, various locations, $27,200,000.

Project 86-D-150, in-core neutron monitoring system, N reactor, Richland, Washington, $5,460,000.

Project 86-D-151, PUREX electrical system upgrade, Richland, Washington, $3,500,000.

Project 86-D-152, reactor electrical distribution system, Savannah River, South Carolina, $4,000,000.

Project 86-D-153, additional line III furnace, Savannah River, South Carolina, $2,000,000.

Project 86-D-154, effluent treatment facility, Savannah River, South Carolina, $2,500,000.

Project 86-D-156, plantwide safeguards systems, Savannah River, South Carolina, $3,000,000.

Project 86-D-157, hydrofluorination system—FB-line, Savannah River, South Carolina, $2,200,000.

Project 85-D-137, vault safety special nuclear material inventory system, Richland, Washington, $1,900,000, for a total project authorization of $4,400,000.

Project 85-D-139, fuel processing restoration, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho,

$15,000,000, for a total project authorization of $25,000,000.

Project 85-D-140, productivity and radiological improvements, Feed Materials Production Center, Fernald, Ohio, $12,000,000, for a total project authorization of $18,000,000.

Project 85-D-145, fuel production facility, Savannah River, South Carolina, $16,000,000, for a total project authorization of $25,800,000.

Project 84-D-135, process facility modifications, Richland, Washington, $15,000,000, for a total project authorization of $32,500,000.

Project 84-D-136, enriched uranium conversion facility modifications, Y-12 Plant, Oak Ridge, Tennessee, $7,200,000 for a total project authorization of $19,600,000.

Project 83-D-148, non-radioactive hazardous waste management, Savannah River, South Carolina, $3,100,000, for a total project authorization of $22,100,000.

Project 82-D-124, restoration of production capabilities, Phases II, III, IV and V, various locations, $48,900,000, for a total project authorization of $349,534,000.

Project 82-D-201, special plutonium recovery facilities, JB-Line, Savannah River, South Carolina, $4,400,000, for a total project authorization of $83,800,000.

(3) For defense waste and byproducts management:

Project 86-D-171, general plant projects, interim waste operations and long-term waste management technology, various locations, $26,451,000.

Project 86-D-172, B plant F filter, Richland, Washington, $1,000,000.

Project 86-D-173, central waste disposal facility, Oak Ridge, Tennessee, $1,000,000.

Project 86-D-174, low-level waste processing and shipping system, Feed Materials Production Center, Fernald, Ohio, $2,500,000.

Project 86-D-175, Idaho National Engineering Laboratory security upgrade, Idaho National Engineering Laboratory (INEL), Idaho, $2,000,000.

Project 85-D-157, seventh calcined solids storage facility, Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho, $14,500,000, for a total project authorization of $21,500,000.

Project 85-D-158, central warehouse upgrade, Richland, Washington, $5,000,000, for a total project authorization of $5,700,000.

Project 85-D-159, new waste transfer facilities, H-Area, Savannah River, South Carolina, $9,000,000, for a total project authorization of $20,000,000.

Project 85-D-160, test reactor area security system upgrade, Idaho National Engineering Laboratory (INEL), Idaho, $2,250,000, for a total project authorization of $4,250,000.

Project 81-T-105, defense waste processing facility, Savannah River, South Carolina, $205,000,000, for a total project authorization of $637,500,000.

(4) For verification and control technology:

Project 85-D-171, space science laboratory, Los Alamos, New Mexico, $4,500,000, for a total project authorization of $5,500,000.

(5) Nuclear safeguards and security:

Project 86-D-186, nuclear safeguards technology laboratory, Los Alamos National Laboratory, Los Alamos, New Mexico, $1,000,000.

(6) For naval reactors development:

Project 86-N-101, general plant projects, various locations, $7,500,000.

Project 86-N-104, reactor modifications, advance test reactor, Idaho National Engineering Laboratory, $4,500,000.

Project 82-N-111, materials facility, Savannah River, South Carolina, $11,000,000, for a total project authorization of $176,000,000.

Project 81-T-112, modifications and additions to prototype facilities, various locations, $27,000,000, for a total project authorization of $137,000,000.

(7) For capital equipment not related to construction—

(A) for weapons activities, $277,750,000;

(B) for materials production, $123,440,000;

(C) for defense waste and byproducts management, $38,997,000;

(D) for verification and control technology $5,600,000;

(E) for nuclear safeguards and security $4,600,000; and,

(F) for naval reactors development, $30,000,000.

TITLE II—GENERAL PROVISIONS REPROGRAMMING

SEC. 201. Except as otherwise provided in this Act—

(1) no amount appropriated pursuant to this Act may be used for any program in excess of 105 percent of the amount authorized for that program by this Act or $10,000,000 more than the amount authorized for that program by this Act, whichever is the lesser, and

(2) no amount appropriated pursuant to this Act may be used for any program which has not been presented to, or requested of, the Congress,

unless the Secretary of Energy (hereinafter in this title referred to as the "Secretary") transmits to the appropriate committees of Congress a full and complete statement of the action proposed to be taken with respect to the program and the facts and circumstances relied upon in support of the proposed action.

LIMITS ON GENERAL PLANT PROJECTS

SEC. 202. (a) The Secretary may carry out any construction project under the general plant projects provisions authorized by this Act if the total estimated cost of the construction project does not exceed $1,200,000.

(b) If at any time during the construction of any general plant project authorized by this Act, the estimated cost of the project is revised because of unforeseen cost variations and the revised cost of the project exceeds $1,200,000, the Secretary shall immediately furnish a complete report to the appropriate committees of Congress explaining the reasons for the cost variation.

LIMITS ON CONSTRUCTION PROJECTS

SEC. 223. (a) Whenever the current estimated cost of a construction project which is authorized by section 102 of this Act, or which is in support of national security programs of the Department of Energy and was authorized by any previous Act, exceeds by more than 25 percent the higher of (1) the amount authorized for the project, or (2) the amount of the total estimated cost for the project as shown in the most recent budget justification data submitted to Congress, construction may not be started or additional obligations incurred in connection with the project above the total estimated cost, as the case may be, unless a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three days to a day certain) has passed after receipt by the appropriate committees of the Congress of written notice from the Secretary containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of the action.

(b) Subsection (a) shall not apply to any construction project which has a current estimated cost of less than $5,000,000.

FUND TRANSFER AUTHORITY

SEC. 204. To the extent specified in appropriation Acts, funds appropriated pursuant to this Act may be transferred to other agencies of the Government for the performance of the work for which the funds were appropriated, and funds so transferred may be merged with the appropriations of the agency to which the funds are transferred.

AUTHORITY FOR EMERGENCY CONSTRUCTION DESIGN

SEC. 205. The Secretary may perform planning and design utilizing available funds for any Department of Energy national security program construction project whenever the Secretary determines that the design must proceed expeditiously in order to meet the needs of national defense or to protect property or human life.

FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY

SEC. 206. Subject to the provisions of appropriation Acts, amounts appropriated pursuant to this Act for management and support activities and for general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

AVAILABILITY OF FUNDS

SEC. 207. When so specified in an appropriation Act, amounts appropriated for "Operating Expenses" or for "Plant and Capital Equipment" may remain available until expended.

TITLE III—AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1987

SEC. 301. There are authorized to be appropriated to the Department of Energy to be available not earlier than October 1, 1986, such sums as may be necessary for fiscal year 1987 for programs set forth in this Act.

DEPARTMENT OF ENERGY,
Washington, DC, March 21, 1985.

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Enclosed is proposed legislation "[t]o authorize appropriations for the Department of Energy for national security programs for fiscal year 1986 and fiscal year 1987, and for other purposes." This bill would authorize specific appropriations for FY 86 and those appropriations which might be necessary for FY 87. The total amount proposed in title I for FY 86 is $7,958,710,000 of which $6,187,022,000 is for operating expenses, $480,387,000 is for capital equipment, and $1,291,301,000 is for construction projects.

Title II sets forth general provisions that would govern reprogramming of funds, general plant projects, construction projects, fund transfers, construction designs, and availability of funds.

The Office of Management and Budget advises that enactment of this legislative proposal would be in accord with the program of the President.

Sincerely,

ERIC J. FYGI,
Acting General Counsel.

By Mr. D'AMATO:

S. 912. A bill to amend the Internal Revenue Code of 1954 to increase the percentage of household and dependent care services for which a credit against tax is allowable; to the Committee on Finance.

EXPANSION OF DEPENDENT CARE TAX CREDIT

● Mr. D'AMATO. Mr. President, I rise today to introduce legislation designed to assist working parents across the Nation. My bill expands the current dependent care tax credit for individuals who pay employment-related child and dependent care expenses. This legislation is similar to the proposal to expand the dependent care tax credit made by the President in his fiscal year 1986 budget. The growing demand for an expanded credit results from the increasing percentage of families where both parents work or where there is only a single parent who works. In particular, the increasing role of women in the labor force exacerbates this need.

One needs merely to examine hard, simple facts to discover the problem. The percentage of women in this country who work grew from 24 percent in 1970 to 44 percent in 1984. The percentage of women in the labor force with children under the age of 6 has risen from 37 percent in 1970 to 57 percent in 1984. These statistics do not represent the partial employment of mothers, but the stark reality that 71 percent of all working mothers now have full-time careers and work 35 hours a week or more.

This growth, unfortunately, has not been coupled with increasing private or public child care assistance. The Women's Bureau of the U.S. Department of Labor estimated that, in the particular case of one program, title XX of the Social Security Act provided subsidies for full-day care for low-income children to the tune of 799,000 children under the age of 13 at a cost of $800 million in 1977. However, the 1980 expenditure level was down to $650 million and budget cuts have eliminated services for approximately 150,000 children.

The largest Federal program to assist with child care is provided through the dependent care tax credit, which allows working parents to select their own day care services and then receive Federal tax relief. To qualify for the credit, an individual must have a dependent under the age of 15 for whom the taxpayer may claim a dependency exemption; or a dependent of the taxpayer who is physically or mentally incapable of taking care of himself or herself; or a spouse of the taxpayer, if the spouse is physically or mentally incapable of taking care of himself or herself.

Employment-related day care expenses that allow a taxpayer to work are subject to both a dollar limit and income limit. The current credit begins with a maximum of 30 percent of eligible employment-related expenses for an individual with an adjusted gross income of $10,000 or less—this would be changed by my legislation to 40 percent. This portion of my bill is identical to the President's proposal made in his budget for fiscal year 1986.

A comparison of current law to my proposal is as follows:

AGI	Present credit	Proposed credit
0 to $10,000	30 percent of $2,400 of Child care expenses.	40 percent of $2,400 of child care expenses.
$10,000 to $20,000	30 percent less 1 percent for each $2,000 over $10,000.	40 percent less ⅗ of 1 percent for a full $1,000 over $10,000.
$20,000 to $30,000	25 percent less 1 percent for each $2,000 above $20,000.	33 percent less ⅗ of 1 percent for a full $1,000 over $20,000.
$30,000 to $40,000	20 percent	26.7 percent less ⅗ of 1 percent for a full $1,000 over $30,000.
$40,000 and up	20 percent	20 percent.

I firmly believe that this new credit schedule would offer more relief to lower and middle income families most in need. Under current law, the dependent care tax credit is too small and does not target the income groups who most need the assistance.

My proposal is a must. The huge expense faced by the middle class for child care is staggering. These people—not the wealthy—need our help. The bill I am introducing today offers this relief.

Furthermore, I am pleased that the President requested assistance for the middle class in light of the Treasury tax reform proposal to make the current dependent care tax credit a deduction. The Treasury proposal makes little sense because deductions are most valuable to the wealthy and not lower and middle income families. My bill targets those in most need of help. I urge Congress to accept my proposal.

Mr. President, I ask unanimous consent that this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 912

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (2) of section 21(a) of the Internal Revenue Code of 1954 (defining applicable percentage) is amended to read as follows:

"(2) APPLICABLE PERCENTAGE DEFINED.—For purposes of paragraph (1), the term 'applicable percentage' means 40 percent reduced (but not below 20 percent) by ⅗ of 1 percentage point for each $1,000 by which the taxpayer's adjusted gross income for the taxable year exceeds $10,000.".

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1985.●

By Mr. FORD:

S. 913. A bill to amend the Mineral Lands Leasing Act of 1920 to improve the administration of the Federal Coal Leasing Program, and for other purposes; to the Committee on Energy and Natural Resources.

MINERAL LANDS LEASING ACT AMENDMENTS OF 1985

● Mr. FORD. Mr. President, I have always favored a strong energy industry in this country. The very essence of our way of life and the maintenance of America's national security demands that we provide for a viable and resilient domestic energy sector. All of our primary fuels—coal, oil, natural gas, and uranium—must remain plentiful for the United States to thrive.

In the midst of the 1974 energy crisis, Congress, in an attempt to prevent speculation on Federal coal leases and to hasten the development of such leases, enacted section 3 of the Federal Coal Leasing Amendments Act. This section prohibits the Secretary of Interior from issuing any type of onshore mineral lease including oil, gas, oil shale, tar sands, and coal obtainable under the Mineral Lands Leasing Act of 1920 to any entity failing to produce coal in commercial quantities from a Federal coal lease within 10 years from August 4, 1976, the date section 3 was signed into law.

Today, as we approach the 10 year statutory deadline, there is still a need to prohibit the accumulation of Federal coal leases for speculative purposes. However, many of the companies who explore for oil and gas and other minerals on Federal lands would be prohibited by section 3 from continuing this search for natural resources which is essential for this country's energy security.

The bill I am introducing today will continue to prohibit a company from obtaining more Federal coal leases until it develops and produces those Federal coal leases it already has. This legislation will repeal that portion of section 3 of the Federal Coal Leasing Amendments Act which prohibits a lessee from obtaining other Federal mineral leases where such lessee holds and has held a Federal coal lease for 10 years without producing coal in commercial quantities. The ban against obtaining additional competitive coal leases would be retained.

Adding the word "competitive" before "coal leases" will allow the issuance of certain congressionally approved lease acquisitions related to coal exchanges, bypass leases, and maintenance leases.

Adding the term "prior to August 4, 1976" following the word "issued" is for the limited purpose of clarifying the law as presently written and is not considered to be a material change. Leases issued after August 4, 1976, which are not producing in commercial quantities at the end of 10 years

are terminated by statute and therefore would not come within the section 3 prohibition in any event.

I look forward to working with all of my colleagues who are interested in seeing this issue resolved during this session of Congress.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 913

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(a) this Act may be cited as the "Mineral Lands Leasing Act Amendments of 1985".

(b) any amendment or repeal in this Act expressed in terms of an amendment to or repeal of, a section or other provision of the Mineral Lands Leasing Act, shall be considered to be a reference to a section or other provisions of the Act of February 25, 1920, entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain" (41 Stat. 437).

SEC. 2. Section 2(a)(2) (30 U.S.C. Sec. 201(a)(2)) of the Mineral Lands Leasing Act is amended by deleting subparagraph (A) and by inserting in lieu thereof the following:

"(A) The Secretary shall not issue a competitive coal lease or leases under the terms of section 2(a) of the Mineral Lands Leasing Act (30 U.S.C. 201(a)), to any person, association, corporation, or any subsidiary, affiliate, or persons controlled by or under common control with such person, association, or corporation, where any such entity holds a lease or leases issued prior to August 4, 1976, by the United States to coal deposits and has held such lease or leases for a period of ten years when such entity is not, except as provided in Section 7(b) of this Act, producing coal from the lease deposits in commercial quantities. In computing the ten-year period referred to in the preceding sentence, periods of time prior to August 4, 1976, shall not be counted."●

By Mrs. HAWKINS:

S. 915. A bill to reimburse the State of Florida and its political subdivisions for certain costs incurred in furnishing services to certain aliens; to the Committee on Labor and Human Resources.

STATE OF FLORIDA ALIEN REIMBURSEMENT ACT

● Mrs. HAWKINS. Mr. President, today I am introducing legislation to right a wrong that has been committed against the people of my State. Five years ago this month a massive wave of humanity, 150,000 strong, swept up on the shores, beaches, and docks of south Florida.

Florida, like the rest of this country, has been proud of its immigrant heritage. We have stood firm in our commitment to do our share in making the United States a refuge for those who are fleeing tyranny and persecution, and we continue to stand firm in that commitment, but enough is enough. We are committed to doing our share, to pulling our load, but we have been asked instead to pull a disproportionate share of this burden.

In the period of 6 short months, 150,000 Cuban refugees inundated south Florida. They did so with the full knowledge and cooperation of the U.S. Government reflecting the fact that immigration policy in this country is the responsibility of the Federal Government. Yet the Federal Government has failed to live up to its obligations.

This so-called Mariel boatlift has cost the State and local taxpayers of Florida over $150 million, and this doesn't include such things as the additional pressures that such a large influx of people have on State and community services, such as fire, sewage, utilities, and so forth.

The legislation I am introducing today will put this burden back where it belongs—on the Federal Government. The legislation calls for a reimbursement of $150 million to the State of Florida and its local governments for expenses they have incurred in helping these refugees adjust to their new lives here in the United States.

Mr. President, it is fundamentally unfair to expect one State and its taxpayers to bear such a large portion of this burden. The Federal Government must face up to its responsibilities. This is not a regional or State issue, this is an issue of simple justice. When there is a flood or fire or other natural events that place a great burden on a State or locality, the Federal Government steps in to help. In many respects the economic costs to my State of the Mariel boatlift have been similar to the battering it might receive during a major hurricane—only this hurricane was man-made and accomplished with the full cooperation of the Federal Government.

What my State wants is justice, and I urge you to support this plea.●

By Mr. HEINZ:

S. 916. A bill to amend the Social Security Act to make permanent the provision limiting increases in the Medicare part B premium to the extent necessary to insure that there will not be a net reduction in the benefit check after applying the cost-of-living increase (or when there is no such increase); to the Committee on Finance.

PRESERVATION OF SOCIAL SECURITY

● Mr. HEINZ. Mr. President, today, I am introducing legislation to ensure that older Americans and others relying on Social Security benefits will never have their monthly benefit amounts reduced. We have made a solemn compact with those who face a lengthy disability or retirement on Social Security that they will continue to receive the benefits they have earned and are entitled to. I believe no Member of the Senate or of the House intends that this compact ever be broken. The legislation I am introducing today will ensure that it is not broken unintentionally.

Mr. President, the need for this legislation arises out of a danger that congressional efforts to reduce the massive Federal budget deficit might, inadvertently, cut Social Security benefits. This could occur, for example, if the President's 1986 budget proposal to raise monthly premiums paid by Social Security beneficiaries for their medical insurance (Medicare—Part B) caused these premiums to rise faster than the annual Social Security benefit increases. Since the Part B premium is withheld from the monthly Social Security check, the monthly benefit amount could decrease.

In the past, Part B premiums were prevented by law from increasing more rapidly than the cost-of-living adjustment (COLA) in Social Security benefits. However, in 1982, the Congress began increasing Part B premiums at a faster rate to make up for some of the increase in the cost of the Medicare program. A provision was included in this legislation to assure that the premium would not increase by more than the Social Security benefit amount. This provision, Mr. President, is set to expire at the end of 1987. Thereafter, a Part B premium increase more rapid than the Social Security COLA would reduce monthly benefits.

Mr. President, a decrease in Social Security benefits would be a travesty. We have promised the 36 million Americans now dependent on these benefits that their Social Security income will not go down, and we must keep this promise. We must reassure the nearly 100 million workers contributing to Social Security that the Congress is committed to protecting the compact we have with them as well.

The legislation I am introducing today will help keep our promise, and do so quite simply. This bill will extend indefinitely the provision, which otherwise expires in 1987, preventing Medicare Part B premiums from increasing by more than the Social Security benefit amount. This provision will remain in effect whether or not the Congress escalates Part B premiums, and will ensure that monthly Social Security checks do not decline due to an accident of Congress.

I strongly urge my colleagues to join me in this important piece of legislation, Mr. President, and I request its swift consideration and adoption.●

By Mr. GLENN (for himself and Mr. DECONCINI):

S. 917. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to authorize the payment of benefits with respect to public safety officers who die of certain medical conditions sustained in the performance of duty; to the Committee on the Judiciary.

BENEFITS WITH RESPECT TO DEATH OF PUBLIC SAFETY OFFICERS WHO DIE OF CERTAIN MEDICAL CONDITIONS

● Mr. GLENN. Mr. President, I rise today in order to introduce a measure to inject a much-needed element of common sense into the existing Public Safety Officers Benefit Act. Specifically, I hope to correct a defect that denies benefits to deserving survivors. The costs, according to the best estimates, normally would run about $2.5 to $3 million annually.

In passing the 1968 bill, Congress intended to grant benefits to dependents only when officers are killed in the line of duty, not when death resulted from a non-job-related heart attack or an occupational disease incurred in other employment.

Although well-intentioned, that provision has generated inequities that I am attempting to address. Spouses and children have been denied benefits when a law enforcement officer or firefighter dies from service-related causes, though not as a result of direct traumatic injury. An example is the firefighter who makes a strenuous rescue of an endangered citizen several stories above the ground, then carries the person down a ladder and later dies of a heart attack. Given interpretations of existing law, the firefighters' survivors likely would be denied compensation because no direct personal injury was involved.

Such rulings are unfairly restrictive. They force families to suffer unnecessarily, and the example is not entirely hypothetical. Such incidents have occurred and will continue to occur, until we amend the law. That is my purpose today.

The current standard for benefit payments to survivors stipulates that death must have stemmed from "the direct and proximate result of a personal injury sustained in the line of duty." The new language outlined in my bill would grant death benefits to survivors when a public safety officer dies from "a medical condition sustained while ingesting or inhaling a poisonous substance or while subject to extreme physical stress on a single occasion, or during a single event, in the performance of duty."

Nothing we do here can erase the anguish felt by the spouses and children who lose loved ones killed while trying to prevent injury to the rest of us. Congress, however, can permit these families to heal without enduring the added burden of financial stress. We can do no less if we hope to reaffirm the value of human life.

Mr. President, I urge the favorable consideration of this measure by my colleagues and ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 917

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1201(a) of part L of title I of the Omnibus Crime Control and Safe Streets Act of 1968, as amended by the Comprehensive Crime Control Act of 1984 (Title II, Public Law 98-473), is amended by inserting after "in the line of duty" the following: "or of a medical condition sustained while ingesting or inhaling a poisonous substance or while subject to extreme physical stress, on a single occasion or during a single event, in the performance of duty".

SEC. 2. The amendment made by the first section of this Act shall take effect on the first day of the first fiscal year beginning after the date of the enactment of this Act.●

By Mr. D'AMATO:

S. 918. A bill to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

SHAREHOLDER COMMUNICATIONS ACT

● Mr. D'AMATO. Mr. President, identifying shareholders and communicating with them directly is a right of every publicly held corporation in America. Unfortunately, the increased use of street name registration by brokerage house customers and the use of depository companies by banks and other institutional holders have placed an impenetrable barrier between stock-issuing companies and a majority of their stockholders.

Today, I am introducing a bill which is designed to help break down that barrier. It would provide the Securities and Exchange Commission with authority to impose on banks which hold shares in nominee name the same requirements it has for broker-dealers for shareholder communication.

In July 1983, the SEC adopted rule 14b-1(c) which will enable stock-issuing companies—beginning January 1, 1986—to obtain the name, address and number of shares held by nonobjecting shareholders registered in the name of brokerage firms. However, neither the Commission nor the bank regulators currently has authority to regulate the activities of banks, associations, or other entities that hold stock on behalf of beneficial owners. That inability creates a regulatory gap which denies beneficial owners of securities held by those organizations the benefits of the Commission's rules that require timely delivery of information to beneficial owners of securities held in the name of brokers.

The absence of such authority is especially significant with respect to banks because banks hold a majority of the securities registered in nominee name. To remedy this deficiency, the Commission's Advisory Committee on Shareholder Communications, composed of private sector participants, including representatives of issuers, banks, brokers and others, recommended that legislation be enacted to cover banks and other associations exercising fiduciary powers. Last year, the Commission sent to Congress a legislative proposal incorporating this recommendation.

The bill I am introducting today, entitled the Shareholder Communications Act of 1985, which would amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to regulate the proxy processing activities of banks, associations and other entities in the same fashion as the Commission currently regulates brokers with respect to the dissemination of proxy materials. This legislation will ensure that investors whose securities are held in the name of a bank, association or other entities are accorded the same protection as shareholders whose securities are held in the name of a broker.

This legislation is identical to legislation I introduced in the last Congress. I hope that it can be acted on favorably this year.

Mr. President, I ask unanimous consent that the bill and the accompanying section-by-section analysis be printed in the RECORD in its entirety.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 918

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as "The Shareholder Communications Act of 1984."

SEC. 2. Section 14(b) of the Securities Exchange Act of 1934 is amended by inserting, after the phrase "under this title," the phrase "or any bank, association or other entity that exercises fiduciary powers,".

SEC. 3. The amendments made by this Act shall become effective one year after the enactment of this Act.

SECTION-BY-SECTION ANALYSIS

SECTION 1. The Act may be cited as "The Shareholder Communications Act of 1984". The Act authorizes the Securities and Exchange Commission to adopt rules and regulations that would require bank nominees, association nominees, and other nominees that exercise fiduciary powers, to perform the same tasks currently required of registered broker-dealers, with respect to proxy voting and distribution, under Section 14(b) of the Securities Exchange Act of 1934.

SEC. 2. The Act amends Section 14(b) of the Securities Exchange Act of 1934 to make this section applicable to banks, associations, and any other entities that exercise fiduciary powers. The amendment to Section 14(b) broadens the authority of the Commission by allowing it to adopt rules and regulations which will extend to banks, associations, and other entities that exercise fiduciary powers, the rules governing proxy distribution and voting which currently apply only to registered broker-dealers.

The amendment to Section 14(b) will allow the Commission to improve the process by which issuers communicate with the beneficial owners of securities which are registered in the name of a bank, association, or other entity that exercises fiduciary powers. The term "bank" is defined in Section 3(a)(6) of the Securities Exchange Act of 1934.

Historically, the fiduciary powers which this legislation encompasses have been exercised primarily by banks. The inclusion of the phrase "association or other entity that exercises fiduciary powers" is designed to deal with the growing authority of savings and loan associations (both state and federal) and other entities (i.e. savings banks chartered by the Federal Home Loan Bank Board and business trusts) to exercise fiduciary powers and therefore to engage in the same activities as banks that act as nominees. Since these associations and other entities will be permitted to maintain custodian and trust accounts for their customers, the Commission intends, where appropriate, to extend its rules and regulations governing proxy distribution and voting to them, and to other entities that hold securities as nominees for their customers. The Commission would not, pursuant to this legislation, regulate individuals exercising fiduciary powers.

SEC. 3. The Act is to become effective one year after its enactment.●

By Mr. D'AMATO:

S. 919. A bill to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1986 through 1988; to the Committee on Banking, Housing, and Urban Affairs.

AUTHORIZATION OF APPROPRIATIONS FOR THE SECURITIES AND EXCHANGE COMMISSION

● Mr. D'AMATO. Mr. President, I am introducing legislation today which would authorize appropriations for the Securities and Exchange Commission for fiscal years 1986 through 1988 in the following amounts: $113.6 million for 1986, $116 million for 1987, and $121.8 million for 1988. The Senate Banking Committee Subcommittee on Securities will conduct a hearing on April 17, 1985 on the budget authorization request of the Securities and Exchange Commission. The hearing will begin at 10 a.m. in SD-538.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD in its entirety.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 919

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 35 of the Securities Exchange Act of 1934 (15 U.S.C. 78kk) is amended—

(1) in the first sentence thereof, by striking out "and" immediately after "1982,";

(2) by inserting immediately before the period at the end of the first sentence thereof the following: ", $113,647,000 for the fiscal year ending September 30, 1986, $116,023,000 for the fiscal year ending September 30, 1987, and $121,837,000 for the fiscal year ending September 30, 1988"; and

(3) in the last sentence thereof, by striking out "fiscal year 1983" and inserting in lieu thereof "fiscal year 1988.".●

By Mr. D'AMATO (by request):

S. 920. A bill to amend the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Company Act of 1940, and the Investment Advisers Act of 1940 to make certain technical, clarifying, and conforming amendments, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

SECURITIES LAW TECHNICAL AMENDMENTS ACT OF 1985

● Mr. D'AMATO. Mr. President, I am introducing legislation today at the request of the Securities and Exchange Commission. This legislation was drafted by the SEC to correct anachronistic or inconsistent provisions of its statutes as well as to clarify some provisions. Many provisions of the bill contain minor changes, such as typographical errors. The bill does not appear to be controversial and will be considered at a hearing of the Senate Banking Committee Subcommittee on Securities on April 17, 1985.

Mr. President, I ask unanimous consent that the bill and the accompanying section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 920

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Securities Law Technical Amendments Act of 1985".

TITLE I—AMENDMENTS OF SECURITIES ACT OF 1933

SEC. 101. Section 2(5) of the Securities Act of 1933 (15 U.S.C. 77b(5)) is amended by striking out "Federal Trade Commission" and inserting in lieu thereof "Securities and Exchange Commission".

SEC. 102. Section 2(6) of the Securities Act of 1933 (15 U.S.C. 77b(6)) is amended by striking out "Canal Zone,".

SEC. 103. Section 3(a)(1) of the Securities Act of 1933 (15 U.S.C. 77c(a)(1)) is amended by striking all that appears therein and inserting in lieu thereof "(1) Reserved."

SEC. 104. Section 3(a)(2) of the Securities Act of 1933 (15 U.S.C. 77c(a)(2)) is amended—

(1) by striking out "section 103(c)" each place it appears and inserting in lieu thereof "section 103(b)"; and

(2) by striking out "(7)" and inserting in lieu thereof "(13)".

SEC. 105. Section 3(a)(5)(A) of the Securities Act of 1933 (15 U.S.C. 77c(a)(5)(A)) is amended by striking out ", except that the foregoing exemption shall not apply with respect to any such security where the issuer takes from the total amount paid or deposited by the purchaser, by way of any fee, cash value or other device whatsoever, either upon termination of the investment at maturity or before maturity, an aggregate amount in excess of 3 per centum of the face value of such security".

SEC. 106. Section 6(e) of the Securities Act of 1933 (15 U.S.C. 77f(e)) is hereby repealed.

SEC. 107. Section 9(a) of the Securities Act of 1933 (15 U.S.C. 77i(a)) is amended—

(1) by striking out "Circuit Court of Appeals" and inserting in lieu thereof "court of appeals";

(2) by striking out "Court of Appeals of the District of Columbia, by filing in such court" and inserting in lieu thereof "United States Court of Appeals for the District of Columbia, by filing in such Court"; and

(3) by striking out "sections 239 and 240 of the Judicial Code, as amended (U.S.C., title 28, secs. 346 and 347)" and inserting in lieu thereof "section 1254 of title 28, United States Code".

SEC. 108. Section 19(c) of the Securities Act of 1933 (15 U.S.C. 77s(c)) is amended by adding at the end thereof the following new paragraph:

"(6) Notwithstanding any other provision of law, neither the Commission nor any other person shall be required to establish any procedures not specifically required by the securities laws, as that term is defined in section 3(a)(42) of the Securities Exchange Act of 1934, or by chapter 5 of title 5, United States Code, in connection with cooperation, coordination, or consultation with:

"(A) any association referred to in paragraph (1) or (3) or any conference or meeting referred to in paragraph (4), while such association, conference, or meeting is carrying out activities in furtherance of the provisions of this subsection; or

"(B) any forum, agency, or organization, or group referred to in section 503 of the Small Business Investment Incentive Act of 1980, while such forum, agency, organization, or group is carrying out activities in furtherance of the provisions of such section 503.

As used in this paragraph, the terms 'association', 'conference', 'meeting', 'forum', 'agency', 'organization', and 'group' include any committee, subgroup, or representative of such entities.".

SEC. 109. (a) Section 20(b) of the Securities Act of 1933 (15 U.S.C. 77t(b)) is amended by striking out the first sentence and inserting in lieu thereof the following: "Whenever it shall appear to the Commission that any person is engaged or about to engage in any acts or practices which constitute or will constitute a violation of the provisions of this title, or of any rule or regulation prescribed under authority thereof, the Commission may, in its discretion, bring an action in any district court of the United States, or United States court of any Territory, to enjoin such acts or practices, and upon a proper showing, a permanent or temporary injunction or restraining order shall be granted without bond.".

(b) Section 20(c) of such Act (15 U.S.C. 77t(c)) is amended to read as follows:

"(c) Upon application of the Commission, the district courts of the United States and the United States courts of any Territory shall have jurisdiction to issue writs of mandamus commanding any person to comply with the provisions of this title or any order of the Commission made in pursuant thereof.".

SEC. 110. Section 22(a) of the Securities Act of 1933 (15 U.S.C. 77v(a)) is amended—

(1) by striking out "United States, the" in the first sentence and inserting in lieu thereof "United States and";

(2) by striking out ", and the United States District Court for the Distirct of Columbia"; and

(3) by striking out "sections 128 and 240 of the Judicial Code, as amended (U.S.C., title 28, secs. 225 and 347)" and inserting in lieu thereof "sections 1254, 1291, 1292, and 1294 of title 28, United States Code,".

TITLE II—AMENDMENTS OF SECURITIES EXCHANGE ACT OF 1934

SEC. 201. Section 3(a)(6)(C) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(6)(C)) is amended by striking out "under section 11(k) of the Federal Reserve Act, as amended" and inserting in lieu thereof "Under the authority of the Comptroller of the Currency pursuant to the first section of Public Law 87-722 (12 U.S.C. 92a)".

SEC. 202. Section 3(a)(12) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(12)) is amended by striking out "(g)(2)" and inserting in lieu thereof "(g)(3)".

SEC. 203. Section 3(a)(16) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(16)) is amended by striking out "the Canal Zone,".

SEC. 204. Section 3(a)(22)(B) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(22)(B)) is amended—

(1) by striking out "association or any" and inserting in lieu thereof "association, or any"; and

(2) by striking out "own behalf in" and inserting in lieu thereof "own behalf, in".

SEC. 205. Section 3(a)(29) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(29)) is amended—

(1) by striking out "section 103(c)" each place it appears and inserting in lieu thereof "section 103(b)"; and

(2) by striking out "(7)" and inserting in lieu thereof "(13)".

SEC. 206. Section 3(a)(34)(C) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)(C)) is amended by striking out "state" each place it appears and inserting in lieu thereof "State".

SEC. 207. Section 3(a)(39)(B) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(39)(B)) is amended—

(1) by striking out "months, revoking" and inserting in lieu thereof "months, or revoking"; and

(2) by striking out "barring his" and inserting in lieu thereof "barring or suspending for a period not exceeding twelve months his".

SEC. 208. Section 3(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)) is amended by adding at the end thereof the following new paragraphs:

"(42) The term 'securities laws' means the Securities Act of 1933 (15 U.S.C. 77a et seq.), the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.), the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a et seq.), the Trust Indenture Act of 1939 (15 U.S.C. 77aaa et seq.), the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), the Investment Advisers Act of 1940 (15 U.S.C. 80b et seq.), and the Securities Investor Protection Act of 1970 (15 U.S.C. 78aaa et seq.).

"(43) The terms 'person associated with a transfer agent' and 'associated person of a transfer agent' mean any person (except and employee whose functions are solely clerical or ministerial) directly engaged in the management, direction, supervision, or performance of any of the transfer agent's activities with respect to transfer agent functions, and any person directly or indirectly controlling such activities or controled by the transfer agent in connection with such activities.".

SEC. 209. Section 4 of the Securities Exchange Act of 1934 (15 U.S.C. 78d) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding any other provision of law, whenever any fee is required to be paid to the Commission pursuant to any provision of the securities laws or any other law, the Commission may provide by rule that such fee shall be paid in a manner other than in cash.".

SEC. 210. (a) The Securities Exchange Act of 1934 is amended by inserting after section 4 (15 U.S.C. 78d) the following new sections:

"DELEGATION OF FUNCTIONS BY COMMISSION

"SEC. 4A. (a) In addition to its existing authority, the Securities and Exchange Commission shall have the authority to delegate, by published order or rule, any of its functions to a division of the Commission, an individual Commissioner, an administrative law judge, or an employee or employee board, including functions with respect to hearing, determining, ordering, certifying, reporting, or otherwise acting as to any work, business, or matter. Nothing in this section shall be deemed to supersede the provisions of section 556(b) of title 5, or to authorize the delegation of the function of rulemaking as defined in subchapter II of chapter 5 of title 5, United States Code, with reference to general rules as distinguished from rules of particular applicability, or of the making of any rule pursuant to section 19(c) of this title.

"(b) With respect to the delegation of any of its functions, as provided in subsection (a) of this section, the Commission shall retain a discretionary right to review the action of any such division of the Commission, individual Commissioner, administrative law judge, employee, or employee board, upon its own initiative or upon petition of a party to or intervenor in such action, within such time and in such manner as the Commission by rule shall prescribe. The vote of one member of the Commission shall be sufficient to bring any such action before the Commission for review. A person or party shall be entitled to review by the Commission if he or it is adversely affected by action at a delegated level which (1) denies any request for action pursuant to seciton 8(a) or section 8(c) of the Securities Act of 1933 or the first sentence of section 12(d) of this title; (2) suspends trading in a security pursuant to section 12(k) of this title; or (3) is pursuant to any provision of this title in a case of adjudication, as defined in section 551 of title 5, United States Code, not required by this title to be determined on the record after notice and opportunity for hearing (except to the extent there is involved a matter described in section 554(a) (1) through (6) of such title 5).

"(c) If the right to exercise such review is declined, or if no such review is sought within the time stated in the rules promulgated by the Commission, then the action of any such division of the Commission, individual Commissioner, administrative law judge, employee, or employee board, shall, for all purposes, including appeal or review thereof, be deemed the action of the Commission.

"TRANSFER OF FUNCTIONS WITH RESPECT TO ASSIGNMENT OF PERSONNEL TO CHAIRMAN

"SEC. 4B. In addition to the functions transferred by the provisions of Reorganization Plan Numbered 10 of 1950 (64 Stat. 1265), there are hereby transferred from the Commission to the Chairman of the Commission the functions of the Commission with respect to the assignment of Commission personnel, including Commissioners, to perform such functions as may have been delegated by the Commission to the Commission personnel, including Commissioners, pursuant to section 4A of this title.".

(b) The Act of August 20, 1962 (Public Law 87-592; 76 Stat. 394) is hereby repealed.

SEC. 211. The first sentence of section 6(c)(2) of the Securities Exchange Act of 1934 (15 U.S.C. 78f(c)(2)) is amended by striking out "protection shall" and inserting in lieu thereof "protection of investors shall".

SEC. 212. Section 6(c)(3)(A) of the Securities Exchange Act of 1934 (15 U.S.C. 78f(c)(3)(A)) is amended by striking out "association" and inserting in lieu thereof "associated".

SEC. 213. Section 6(c)(4) of the Securities Exchange Act of 1934 (15 U.S.C. 78f(c)(4)) is amended by striking out "may (A) limit" and inserting in lieu thereof "may limit (A)".

SEC. 214. Section 6(e) of the Securities Exchange Act of 1934 (15 U.S.C. 78f(e)) is amended—

(1) by striking out paragraph (3) thereof and by redesignating paragraph (4) as paragraph (3); and (2) in paragraph (3)(E) (as so redesignated)—

(A) by striking out "fixes" and inserting in lieu thereof "fixing";

(B) by striking out "paragraph (4)(A)" and inserting in lieu thereof "subparagraph (A) of this paragraph"; and

(C) by striking out "paragraph (4)(B)" and inserting in lieu thereof "subparagraph (B) of this paragraph".

SEC. 215. Section 11A of the Securities Exchange Act of 1934 (15 U.S.C. 78k-1) is amended—

(1) by striking out "transaction" in paragraph (2) of subsection (b) and inserting in lieu thereof "transactions"; and

(2) by striking out everything after the first sentence in paragraph (4) of subsection (c).

SEC. 216. Sections 11A(e) and 12(m) of the Securities Exchange Act of 1934 (15 U.S.C. 78k-1(e) and 78l(m)) are hereby repealed.

SEC. 217. Section 13(c) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(c)) is amended by striking out "thereof of" and inserting in lieu thereof "thereof".

SEC. 218. Section 13(h) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(h)) is hereby repealed.

SEC. 219. Section 15(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(b)) is amended—

(1) by striking out "fiduciary, or any" in clause (ii) of subparagraph (B) of paragraph (4) and inserting in lieu thereof "fiduciary, transfer agent, or";

(2) by striking out subparagraph (C) of paragraph (4) and inserting in lieu thereof the following:

"(C) is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from acting as an investment adviser, underwriter, broker, dealer, municipal securities dealer, transfer agent, or entity or person required to be registered under the Commodity Exchange Act, or as an affiliated person or employee of any investment company, bank, insurance company, or entity or person required to be registered under such Act, or from engaging in or continuing any conduct or practice in connection with any such ac-

tivity, or in connection with the purchase or sale of any security.";

(3) by striking out "or seeking to become associated," in the first sentence of paragraph (6) and inserting in lieu thereof "seeking to become associated, or, at the time of the alleged misconduct, associated or seeking to become associated"; and

(4) by striking out "17A(b)(4)(B)" in paragraph (10) and inserting in lieu thereof "17A(b)(4)(A)".

SEC. 220. Section 15B(b)(2)(C) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(b)(2)(C)) is amended—

(1) by striking out "security" and inserting in lieu thereof "securities";

(2) by striking out "or the securities"; and

(3) by striking out "burden or competition" and inserting in lieu thereof "burden on competition".

SEC. 221. Section 15B(c)(4) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(c)(4)) is amended by striking out the first sentence and inserting in lieu thereof the following: "The Commission, by order, shall censure or place limitations on the activities or functions of any person associated, seeking to become associated, or, at the time of the alleged misconduct, associated or seeking to become associated with a municipal securities dealer, or suspend for a period not exceeding twelve months or bar any such person from being associated with a municipal securities dealer, if the Commission finds, on the record after notice and opportunity for hearing, that such censure, placing of limitations, suspension, or bar is in the public interest and that such person has committed any act or omission enumerated in subparagraph (A), (D), or (E) of paragraph (4) of section 15(b) of this title, has been convicted by any offense specified in subparagraph (B) of such paragraph (4) within ten years of the commencement of the proceedings under this paragraph, or is enjoined from any action, conduct, or practice specified in subparagraph (C) of such paragraph (4).".

SEC. 222. Section 15B(c)(6)(A) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(c)(6)(A)) is amended by striking out "board' and inserting in lieu thereof "Board".

SEC. 223. Section 17 of the Securities Exchange Act of 1934 (15 U.S.C. 17q) is amended—

(1) by amending subsection (c)(2) to read:

"(2) The appropriate regulatory agency for a clearing agency, transfer agent, or municipal securities dealer for which the Commission is not the appropriate regulatory agency shall file with the Commission notice of the commencement of any proceeding and a copy of any order entered by such appropriate regulatory agency against any clearing agency, transfer agent, municipal securities dealer, or person associated with a transfer agent or municipal securities dealer, and the Commission shall file with such appropriate regulatory agency, if any, notice of the commencement of any proceeding and a copy of any order entered by the Commission against the clearing agency, transfer agent, or municipal securities dealer, or against any person associated with a transfer agent or municipal securities dealer for which the agency is the appropriate regulatory agency."; and

(2) by striking out subsection (f)(3) and inserting in lieu thereof the following:

"(3) In order to carry out the purposes of paragraphs (1) and (2) of this subsection, the Commission or its designees may enter into agreements with the Attorney General that will permit the Commission or the designees to use the facilities of the Federal Bureau of Investigation to receive, store, and disseminate information in regard to missing, lost, counterfeit, or stolen securities and to have direct inquiry access to such information. Notwithstanding any other provision of law, in performing identification and processing functions pursuant to paragraph (2), the Attorney General shall provide the Commission, and self-regulatory organizations that the Commission designates, with access to all criminal history record information in the possession of the Federal Bureau of Investigation, including any such information in the Computerized Criminal History File.".

SEC. 224. Section 17A of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1) is amended—

(1) by inserting after "concerning such transfer agent" in subsection (c)(2) "and any persons associated with the transfer agent";

(2) by striking out "thirty" in said subsection (c)(2) and inserting in lieu thereof "forty-five";

(3) by striking out subsection (c)(3)(A) and inserting in lieu thereof:

"(3) The appropriate regulatory agency for a transfer agent, by order, shall deny registration to, censure, place limitations on the activities, functions, or operations of, suspend for a period not exceeding twelve months, or revoke the registration of such transfer agent, if such appropriate regulatory agency finds, on the record after notice and opportunity for hearing, that such denial, censure, placing of limitations, suspension, or revocation is in the public interest and that such transfer agent, whether prior or subsequent to becoming such, or any person associated with such transfer agent, whether prior or subsequent to becoming so associated—

"(A) has committed or omitted any act enumerated in subparagraph (A), (D), or (E) of paragraph (4) of section 15(b) of this title, has been convicted of any offense specified in subparagraph (B) of such paragraph (4) within ten years of the commencement of the proceedings under this paragraph, or is enjoined from any action, conduct, or practice specified in subparagraph (C) of such paragraph (4); or

"(B) is subject to an order entered pursuant to subparagraph (C) of paragraph (4) of this subsection barring or suspending the right of such person to be associated with a transfer agent.";

(4) by redesignating subparagraphs (B) and (C) of subsection (c)(3) as subparagraphs (A) and (B), respectively, of new subsection (c)(4);

(5) by inserting after subsection (c)(4)(B) (as so redesignated) the following new subparagraph:

"(C) The appropriate regulatory agency for a transfer agent, by order, shall censure or place limitations on the activities or functions of any person associated, seeking to become associated, or, at the time of the alleged misconduct, associated or seeking to become associated with the transfer agent, or suspend for a period not exceeding twelve months or bar any such person from being associated with the transfer agent, if the appropriate regulatory agency finds, on the record after notice and opportunity for hearing, that such censure, placing of limitations, suspension, or bar is in the public interest and that such person has committed or omitted any act enumerated in subparagraph (A), (D), or (E) or paragraph (4) of section 15(b) of this title, has been convicted of any offense specified in subparagraph (B) of such paragraph (4) within ten years of the commencement of the proceedings under this paragraph, or is enjoined from any action, conduct, or practice specified in subparagraph (C) of such paragraph (4). It shall be unlawful for any person as to whom such an order suspending or barring him from being associated with a transfer agent is in effect willfully to become, or to be, associated with a transfer agent without the consent of the appropriate regulatory agency that entered the order and the appropriate regulatory agency for that transfer agent. It shall be unlawful for any transfer agent to permit such a person to become, or remain, a person associated with it without the consent of such appropriate regulatory agencies, if the transfer agent knew, or in the exercise of reasonable care should have known, of such order. The Commission may establish, by rule, procedures by which a transfer agent reasonably can determine whether a person associated or seeking to become associated with it is subject to any such order, and may require, by rule, that any transfer agent comply with such procedures.";

(6) by striking out "clearing agency or transfer agent" in subsection (d)(3)(B) and inserting in lieu thereof "clearing agency, transfer agent, or person associated with a transfer agent"; and

(7) by inserting, after "transfer agent" in subsection (d)(4), ", or a person associated with a transfer agent,".

SEC. 225. Section 21 of the Securities Exchange Act of 1934 (15 U.S.C. 78u) is amended—

(1) by striking out "Wherever" in subsection (d) and inserting in lieu thereof "Whenever";

(2) by striking out ", and the United States District Court for the District of Columbia," in subsection (e); and

(3) by striking out the second sentence of subsection (g).

SEC. 226. Section 23(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78w(a)) is amended—

(1) by inserting "or" before "any self-regulatory organization" in the last sentence of paragraph (1); and

(2) by inserting "shall" after "section 19(b) of this title," in paragraph (3).

SEC. 227. Section 23(b)(4)(F) of the Securities Exchange Act of 1934 (15 U.S.C. 78w(b)(4)(F)) is amended by striking out "The" and inserting in lieu thereof "the".

SEC. 228. Section 27 of the Securities Exchange Act of 1934 (15 U.S.C. 78aa) is amended—

(1) by striking out ", the United States District Court for the District of Columba,"; and

(2) by striking out "Sections 128 and 240 of the Judicial Code, as amended (U.S.C., title 28, secs. 225 and 347)" and inserting in lieu thereof "sections 1254, 1291, 1292, and 1294 of title 28, United States Code".

SEC. 229. Section 28(c) of the Securities Exchange Act of 1934 (15 U.S.C. 78bb(c)) is amended by striking out "self-regulatory organization or a member thereof" and inserting in lieu thereof "self-regulatory organization on a member thereof".

SEC. 230. Section 28(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78bb(d)) is amended by striking out "change is beneficial" and inserting in lieu thereof "change in beneficial".

SEC. 231. Section 28(e)(1) of the Securities Exchange Act of 1934 (15 U.S.C 78bb(e)(1))

is amended by striking out "Amendments in 1975" and inserting in lieu thereof "Amendments of 1975".

SEC. 232. Section 211 of the Securities Exchange Act of 1934 (15 U.S.C. 78jj) is hereby repealed.

TITLE III—AMENDMENTS OF PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

SEC. 301. Section 8 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79h) is amended by striking out "otherwise,—" and inserting in lieu thereof "otherwise—".

SEC. 302. Section 18 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 78r) is amended—

(1) by redesignating subsections (f) and (g) as subsections (e) and (f), respectively; and

(2) in subsection (f) (as so redesignated), by striking out ", the district court of the United States for the District of Columbia,".

SEC. 303. Section 24 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 78x) is amended by striking out "sections 239 and 240 of the Judicial Code, as amended (U.S.C., title 28, secs. 346 and 347)" and inserting in lieu thereof "section 1254 of title 28, United States Code".

SEC. 304. Section 25 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79y) is amended—

(1) by striking out ", the district court of the United States for the District of Columbia,"; and

(2) by striking out "sections 128 and 240 of the Judicial Code, as amended (U.S.C., title 28, secs. 225 and 347), and section 7, as amended, of the Act entitled 'An Act to establish a court of appeals for the District of Columbia', approved February 9, 1893 (D.C. Code, title 18, sec. 26)" and inserting in lieu thereof "sections 1254, 1291, 1292, and 1294 of title 28, United States Code".

SEC. 305. Section 30 of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79z-4) is amended by striking out the last sentence thereof.

TITLE IV—AMENDMENTS OF TRUST INDENTURE ACT OF 1939

SEC. 401. Section 303(4) of the Trust Indenture Act of 1939 (15 U.S.C. 77ccc(4)) is amended by striking out "undertakng" and inserting in lieu thereof "undertaking".

SEC. 402. Section 303(12) of the Trust Indenture Act of 1939 (15 U.S.C. 77ccc(12)) is amended by inserting "(including a guarantor)" after "person" each place it appears.

TITLE V—AMENDMENTS OF INVESTMENT COMPANY ACT OF 1940

SEC. 501. Section 2(a)(19) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(a)(19)) is amended by inserting "completed" before "fiscal years" each place it appears.

SEC. 502. Section 2(a)(39) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(a)(39)) is amended by striking out "the Canal Zone,".

SEC. 503. Section 2(a)(48)(B) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(a)(48)(B)) is amended by striking out "sections 55(a) (1) through (3)" and inserting in lieu thereof "paragraphs (1) through (3) of section 55(a)".

SEC. 504. Section 3(c)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(c)(3)) is amended—

(1) by inserting "or" after "therefor;"; and

(2) by inserting a period after "guardian" and striking out all that follows through "principal to another or others.".

SEC. 505. Section 3(c)(7) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(c)(7)) is amended by striking it out and inserting in lieu thereof "(7) Reserved.".

SEC. 506. Section 3(c)(11) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(c)(11)) is amended—

(1) by striking out "or which holds only assets of governmental plans" and inserting in lieu thereof "; or any governmental plan"; and

(2) by striking out "trusts;" and inserting in lieu thereof "trusts or governmental plans, or both;".

SEC. 507. Section 5(a)(2) of the Investment Company Act of 1940 (15 U.S.C. 80a-5(a)(2)) is amended by striking out "Close-end" and inserting in lieu thereof "Closed-end".

SEC. 508. Section 6(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-6(a)) is amended—

(1) by striking out "the Canal Zone," in paragraph (1); and

(2) by striking out paragraph (2) and by redesignating paragraphs (3), (4), and (5) as paragraphs (2), (3), and (4), respectively.

SEC. 509. Section 9 of the Investment Company Act of 1940 (15 U.S.C. 80a-9) is amended—

(1) by striking out paragraphs (1) and (2) in subsection (a) and inserting in lieu thereof the following:

"(1) any person who within ten years has been convicted of any felony or misdemeanor involving the purchase or sale of any security or arising out of such person's conduct as an underwriter, broker, dealer, investment adviser, municipal securities dealer, transfer agent, or entity or person required to be registered under the Commodity Exchange Act, or as an affiliated person, salesman, or employee of any investment company, bank, insurance company, or entity or person required to be registered under the Commodity Exchange Act;

"(2) any person who, by reason of any misconduct, is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from acting as an underwriter, broker, dealer, investment adviser, municipal securities dealer, transfer agent, or entity or person required to be registered under the Commodity Exchange Act, or as an affiliated person, salesman, or employee of any investment company, bank, insurance company, or entity or person required to be registered under the Commodity Exchange Act, or from engaging in or continuing any conduct or practice in connection with any such activity or in connection with the purchase or sale of any security; or"; and

(2) by inserting after "this title," in paragraph (2) of subsection (b) "or of the Commodity Exchange Act,"; and

(3) by inserting after "this title," in paragraph (3) of subsection (b) "or of the Commodity Exchange Act,".

SEC. 510. Section 12 of the Investment Company Act of 1940 (15 U.S.C. 80a-12) is amended—

(1) by striking out "Treasury" in subsection (d)(1)(A)(iii) and inserting in lieu thereof "treasury";

(2) by striking out "it reasonably possible" in subsection (d)(1)(G) and inserting in lieu thereof "is reasonably possible"; and

(3) by striking out "only thereof" in subsection (f) and inserting in lieu thereof "thereof only".

SEC. 511. Section 15 of the Investment Company Act of 1940 (15 U.S.C. 80a-15) is amended—

(1) by striking out "(40)" in subsection (d) and inserting in lieu thereof "(42)"; and

(2) by striking out the period at the end of subparagraph (B) of paragraph (3) of subsection (f) and inserting in lieu thereof a comma.

SEC. 512. Section 17 of the Investment Company Act of 1940 (15 U.S.C. 80a-17) is amended by striking out the second sentence of each of subsections (h) and (i).

SEC. 513. Section 18(e) of the Investment Company Act of 1940 (15 U.S.C. 80a-18(e)) is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

SEC. 514. Section 20 of the Investment Company Act of 1940 (15 U.S.C. 80a-20) is amended—

(1) by striking out the second sentence of subsection (b);

(2) by striking out the first sentence of subsection (d); and

(3) by striking out "at any time after the effective date of this title" in subsection (d).

SEC. 515. Section 21(b) of the Investment Company Act of 1940 (15 U.S.C. 80a-21(b)) is amended by striking out "to the extension or renewal of any such loan made prior to March 15, 1040, or".

SEC. 516. Section 22 of the Investment Company Act of 1940 (15 U.S.C. 80a-22(e)) is amended—

(1) by striking out "subsection (b)(8)" in paragraph (1) of subsection (b) and inserting in lieu thereof "subsection (b)(6)";

(2) by striking out paragraph (2) of subsection (b) and redesignating paragraphs (3) and (4) as paragraphs (2) and (3), respectively;

(3) by striking out "section 15A(k)(2)" in subsection (b)(2) (as so redesignated) and inserting in lieu thereof "section 19(c)";

(4) by inserting in the first sentence of subsection (e) a comma after the word "redemption" where it first appears and where it appears for the third time; and

(5) by striking out the last sentence of subsection (e).

SEC. 517. Section 24(d) of the Investment Company Act of 1940 (15 U.S.C. 80a-24(d)) is amended by inserting a period immediately after "issuer" in the second sentence thereof and by striking out all that follows in such sentence.

SEC. 518. Section 26(b) of the Investment Company Act of 1940 (15 U.S.C. 80a-26(b)) is amended by striking out "intend" and inserting in lieu thereof "intended".

SEC. 519. Section 26(c) of the Investment Company Act of 1940 (15 U.S.C. 80a-26(c)) is amended by striking out "contract of agreement" and inserting in lieu thereof "contract or agreement".

SEC. 520. Section 28(a)(2)(B) of the Investment Company Act of 1940 (15 U.S.C. 80a-28(a)(2)(B)) is amended by striking out "subsection" and inserting in lieu thereof "paragraph".

SEC. 521. Section 28(d)(2) of the Investment Company Act of 1940 (15 U.S.C. 80a-28(d)(2)) is amended by inserting "of" immediately before "subsection (a)".

SEC. 522. Section 36 of the Investment Company Act of 1940 (15 U.S.C. 80a-35) is amended—

(1) by striking out "loans" in paragraph (4) of subsection (b) and inserting in lieu thereof "loads";

(2) by redesignating subsection (d) as subsection (c); and

(3) in subsection (c) (as so redesignated), by striking out "through (c)" and inserting in lieu thereof "and (b)".

SEC. 523. Section 42 of the Investment Company Act of 1940 (15 U.S.C. 80a-41) is

amended by redesignating subsection (e) as subsection (d).

SEC. 524. Section 53 of the Investment Company Act of 1940 (15 U.S.C. 80a-52) is amended by inserting a period in the first sentence thereof immediately after "1941" and by striking out everything that follows in such sentence.

SEC. 525. Section 54(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-53(a)) is amended by striking out "defined in sections" and inserting in lieu thereof "defined in section".

SEC. 526. Section 55(a)(1)(B) of the Investment Company Act of 1940 (15 U.S.C. 80a-54(a)(1)(B)) is amended by striking out "described in sections" and inserting in lieu thereof "described in section".

SEC. 527. Section 57(i) of the Investment Company Act of 1940 (15 U.S.C. 80a-56(i)) is amended by striking out "sections 17(a) and (d)" each place it appears and inserting in lieu thereof "subsections (a) and (d) of section 17".

TITLE VI—AMENDMENTS OF INVESTMENT ADVISERS ACT OF 1940

SEC. 601. Section 202(a)(19) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2(a)(19)) is amended by striking out "the Canal Zone,".

SEC. 602. Section 203 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-3) is amended—

(1) by striking out "or fiduciary" in subparagraph (B) of paragraph (2) of subsection (e) and inserting in lieu thereof "fiduciary, transfer agent, or entity or person required to be registered under the Commodity Exchange Act";

(2) by striking out paragraph (3) of subsection (e) and inserting in lieu thereof the following:

"(3) is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from acting as an investment adviser, underwriter, broker, dealer, municipal securities dealer, transfer agent, or entity or person required to be registered under the Commodity Exchange Act, or as an affiliated person or employee of any investment company, bank, insurance company, or entity or person required to be registered under the Commodity Exchange Act, or from engaging in or continuing any conduct or practice in connection with any such activity, or in connection with the purchase or sale of any security.";

(3) by inserting after "this title," in paragraph (4) of subsection (e) "the Commodity Exchange Act,";

(4) by striking out "or seeking to become associated" in the first sentence of subsection (f) and inserting in lieu thereof ", seeking to become associated, or, at the time of the alleged misconduct, associated or seeking to become associated"; and

(5) by striking out "subsection (d)" in subsection (g) and inserting in lieu thereof "subsection (c) or subsection (e)".

SEC. 603. Section 205 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-5) is amended to read as follows:

"SEC. 205. (a) No investment adviser, unless exempt from registration pursuant to section 203(b), shall make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to enter into, extend, or renew any investment advisory contract, or in any way to perform any investment advisory contract entered into, extended, or renewed on or after the effective date of this title, if such contract—

"(1) provides for compensation to the investment adviser on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of the client;

"(2) fails to provide, in substance, that no assignment of such contract shall be made by the investment adviser without the consent of the other party to the contract; or

"(3) fails to provide, in substance, that the investment adviser, if a partnership, will notify the other party to the contract of any change in the membership of such partnership within a reasonable time after such change.

"(b) Paragraph (1) of subsection (a) shall not—

"(1) be construed to prohibit an investment advisory contract which provides for compensation based upon the total value of a fund averaged over a definite period, or as of definite dates, or taken as of a definite date;

"(2) apply to an investment advisory contract with—

"(A) an investment company registered under title I of this Act, or

"(B) any other person (except a trust, governmental plan, collective trust fund, or separate account referred to in section 3(c)(11) of title I of this Act), provided that the contract relates to the investment of assets in excess of $1 million,

if the contract provides for compensation based on the asset value of the company or fund under management averaged over a specified period and increasing and decreasing proportionately with the investment performance of the company or fund over a specified period in relation to the investment record of an appropriate index of securities prices or such other measure of investment performance as the Commission by rule, regulation, or order may specify; or

"(3) apply with respect to any investment advisory and a business development company, as defined in this title, if (A) the compensation provided for in such contract does not exceed 20 per centum of the realized capital gains upon the funds of the business development company over a specified period or as of definite dates, computed net of all realized capital losses and unrealized capital depreciation, and the condition of section 61(a)(3)(B)(iii) of title I of this Act is satisfied, and (B) the business development company does not have outstanding any option, warrant, or right issued pursuant to section 61(a)(3)(B) of title I of this Act and does not have a profit-sharing plan described in section 57(n) of title I of this Act.

"(c) For purposes of paragraph (2) of subsection (b), the point from which increases and decreases in compensation are measured shall be the fee which is paid or earned when the investment performance of such company or fund is equivalent to that of the index or other measure of performance, and an index of securities prices shall be deemed appropriate unless the Commission by order shall determine otherwise.

"(d) As used in paragrahs (2) and (3) of subsection (a), 'investment advisory contract' means any contract or agreement whereby a person agrees to act as investment adviser to or to manage any investment or trading account of another person other than an investment company registered under title I of this Act.".

SEC. 604. Section 209 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-9) is amended by redesignating subsection (e) as subsection (d).

SEC. 605. Section 211(b) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-11(b)) is amended by striking out "the Federal Register Act" and inserting in lieu thereof "chapter 15 of title 44, United States Code,".

SEC. 606. Section 213(a) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-13(a)) is amended by striking out "sections 239 and 240 of the Judicial Code, as amended" and inserting in lieu thereof "section 1254 of title 28, United States Code".

SEC. 607. Section 214 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-14) is amended by striking out "sections 128 and 240 of the Judicial Code, as amended, and section 7, as amended, of the Act entitled, 'An Act to establish a court of appeals for the District of Columbia', approved February 9, 1893" and inserting in lieu thereof "sections 1254, 1291, 1292, and 1294 of title 28, United States Code".

SECTION-BY-SECTION ANALYSIS

The short title of the bill is the Securities Law Technical Amendments Act of 1985.

TITLE I

Title I of the Bill would affect various amendments of the Securities Act of 1933 (the "1933 Act").

Section 101 would change the definition of the term "Commission" in section 2(5) of the 1933 Act so that it refers to the Securities and Exchange Commission rather than the Federal Trade Commission. The FTC administered the 1933 Act before the establishment of the SEC in 1934.

Section 102 would amend the definition of "Territory" in section 2(6) of the 1933 Act to exclude the Canal Zone. Pursuant to the Panama Canal Treaty between the United States and Panama, T.I.A.S. No. 10,030 (Sept. 7, 1977), the Canal Zone is no longer a possession of the United States. *Sections 203, 502, and 601* would exclude the Canal Zone from the definition of "State" under the Securities Exchange Act, the Investment Company Act, and the Investment Advisers Act, respectively, and *Section 508(1)* would exclude the Canal Zone from a list of United States possessions, for the same reason.

Section 103 would repeal as obsolete Section 3(a)(1) of the 1933 Act. Section 3(a)(1) provided an exemption from the registration provisions of the Act for offerings pending at the time the Act's enactment and, in the words of a leading commentator, "has long since spent its force." L. Loss, Fundamentals of Securities Regulation 297 (1983). The bill would reserve the paragraph (1) designation for future use, rather than renumber the remaining paragraphs. These paragraphs have been in effect for over 50 years, and are among the most frequently cited provisions of the securities laws. Renumbering them would cause unnecessary confusion and result in undue expense in, for example, the extensive editing of reference works that would be required.

Section 104 would amend section 3(a)(2) of the 1933 Act by changing cross-references to section 103(c) of the Internal Revenue Code to cross-references to section 103(b) of the Internal Revenue Code. Public Law No. 94-455 repealed former section 103(b) of the Internal Revenue Code, redesignated former section 103(c) as section 103(b), and made other nonsubstantive changes in designation to which *Section 104* would conform the 1933 Act. *Section 205* would effect similar changes in the Securities Exchange Act of 1934 for the same reasons.

Section 105 would amend the registration exemption in section 3(a)(5)A) of the 1933 Act for securities issued by regulated savings and loan associations and similar institutions by eliminating the so-called "3 per-

cent limitation." The 3 percent limitation makes the S&L exemption inapplicable if the issuer of the security takes a fee from the purchaser in excess of 3 percent of the face value of the security.

The reason for including the 3 percent limitation in the S&L exemption is unclear. The legislative history of the 1933 Act is silent on the subject, and the Commission has rarely attempted to deny the availability of the exemption on the basis of the limitation. The only apparent recorded instance of a denial occurred in 1935, when the Commission staff indicated in a letter that the exemption would be unavailable if an S&L deducted a withdrawal fee in excess of 3 percent from the account of an investor, even if the deduction were made solely from profits previously credited to the investor's shares.

The 3 percent limitation appears to have little or no application to the securities of S&L's in today's marketplace. Moreover, it could be considered a form of discrimination against S&L's, as compared to banks, since banks are not subject to any similar restriction in the exemption provided for their securities under section 3(a)(2) of the 1933 Act.

Section 106 would delete section 6(e) of the 1933 Act as obsolete. Section 6(e) provides that no registration statement may be filed within the first 40 days following the Act's orginal enactment, which occurred on May 27, 1933.

Section 107 would make conforming changes to section 9 of the 1933 Act necessitated by other enactments. *Section 107(1)* would conform the nomenclature for federal appellate courts of general jurisdiction in section 9(a) of the 1933 Act from "Circuit Courts of Appeals" to "courts of appeals,"to conform to the nomenclature adopted in 1948. *Section 107(2)* would conform the name of the United States Court of Appeals for the District of Columbia to the name change adopted in 1934. *Section 107(3)* would replace a reference to sections 239 and 240 of the Judicial Code with a reference to 28 U.S.C. 1254, where the provisions of sections 239 and 240 of the Judicial Code were codified when title 28 was enacted into law in 1948. *Sections 303 and 606* would make the same change in Section 24 of the Public Utility Holding Company Act of 1935 and sections 213(a) of the Investment Advisers Act of 1940, respectively.

Section 108 would amend section 19(c) of the 1933 Act to facilitate cooperation by the Commission with state regulators and industry groups in resolving small business capital formation problems. Such cooperation was mandated by title V of the Small Business Investment Incentive Act of 1980, Pub. L. No. 96-477, 94 Stat. 2275 (primarily codified at 15 U.S.C. 80a-53—64) ("Incentive Act").

Title V calls for two annual conferences at which federal and state securities authorities meet with one another, and with the investment community and small business organizations, for the purpose of resolving problems of small business capital formation and coordination of federal and state securities laws in general. The first conference, required under section 503 of the Incentive Act (15 U.S.C. 80c-1), is an annual government/business forum to review the status of problems and programs relating to small business capital formation. The Commission is required to invite to participate in the forum other federal agencies, organizations representing state securities commissioners, and leading small business and professional organizations concerned with capital formation.

The second conference, required under section 19(c) of the 1933 Act (as added by section 505 of the Incentive Act), is an annual conference to promote cooperation among federal and state securities authorities. Section 19(c) requires the Commission to invite participation in this conference by representatives of associations of state securities officials and other duly constituted securities associations, securities self-regulatory organizations, agencies, and private organizations involved in capital formation. Section 19(c) also directs the Commission to conduct necessary meetings with these representatives to carry out the policies and purposes of Congress reflected in section 19(c). Finally, title V authorizes the Commission to cooperate and share information with associations of state securities officials to effectuate greater uniformity among the Federal Government and the states in securities regulation matters.

Since the decision of the United States Court of Appeals for the District of Columbia Circuit in *Center for Auto Safety* v. *Cox*, 580 F.2d 689 (1978), there has been some question as to whether federal statutes requiring standards and uniform procedures governing the establishment, operation, and duration of advisory committees, task forces, and similar groups apply to cooperative efforts like those required of the Commission by title V. The court in *Center for Auto Safety* held that some provisions of the Federal Advisory Committee Act ("FACA") applied when the Administrator of the Federal Highway Administration used the American Association of State Highway and Transportation Officials to obtain advice and recommendations in developing regulations, which were exempt from the notice and comment requirements of the Administrative Procedure Act, to govern the federal-aid highway program. The court did not determine which specific provisions of the FACA applied when the Administrator used this association of state officials in developing the regulations.[1] The FACA includes numerous provisions that could apply, including provisions requiring federally-approved charters, balanced membership, open meetings chaired by a federal official, review by the Office of Management and Budget, and automatic termination of groups unless extended.

The Commission believes that it was not Congress' intent in enacting the Incentive Act that these kinds of provisions should apply to the cooperative efforts mandated by title V of that Act. It would be difficult, if not impossible, to implement several of the FACA's requirements in the context of the meetings and communications required by title V. For example, under the FACA legislation, agencies establishing advisory committees should "require the membership * * * to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee." Congress clearly had no such balance requirement in mind when it passed title V. It is of the nature of the meetings and consultations contemplated by title V that the composition of the groups formed to discuss various issues will change radically depending on the issue and the nature of the discussions. It would be impossible to carry out the congressional mandate with one—or even several—"committees" with fixed membership and a defined charter. Applying these and other provisions of the FACA would substantially impede the cooperation that currently exists between the Commission and state securities authorities in the area of promoting small business capital formation and would hamper efforts to improve such cooperation. It would be particularly inappropriate to apply the FACA to the Commission's work with pre-existing organizations like the North American Securities Administrators Association, with which the Commission has been working closely under title V.

Thus, *Section 108* merely would clarify what the Commission believes to have been Congress' original intent. The Administrative Procedure Act and the securities laws contain safeguards sufficient to prevent the kinds of abuses that concerned the court in *Center for Auto Safety*. The Commission would have to adopt any proposed regulations resulting from title V consultations pursuant to the notice and comment procedures of the Administrative Procedure Act, and in compliance with additional standards set forth in the securities laws.

Sections 109 and 110 would delete references in sections 20 and 22(a) of the 1933 Act to the District Court of the United States for the District of Columbia. These references are superfluous in view of 28 U.S.C. 132(a), which states that "[t]here shall be in each judicial district a district court which shall be a court of record known as the United States District Court for the district," and 28 U.S.C. 88, which states that "[t]he District of Columbia constitutes one judicial district." *Section 109* would also make minor, nonsubstantive stylistic changes to section 20(b) and (c). *Section 110(3)* would amend section 22(a) by replacing a reference to sections 128 and 240 of the Judicial Code with a reference to sections 1254, 1291, 1292, and 1294 of title 28, where the provisions of sections 128 and 240 of the Judicial Code were codified when title 28 was enacted into law in 1948. *Sections 225(2), 228, 302(2), 303, 304, 606, and 607* would delete references to the United States District Court for the District of Columbia and replace references to the Judicial Code with references to title 28 in the Securities Exchange Act, the Public Utility Holding Company Act, and the Investment Advisers Act for the same reasons.

TITLE II

Title 2 of the Bill would effect various amendments of the Securities Exchange Act of 1934 (the "1934 Act").

Section 201 would replace a reference to section 11(k) of the Federal Reserve Act in section 3(a)(6)(C) of the 1934 Act with a reference to the Comptroller of the Currency. Public Law No. 87-722, which was enacted in 1962, repealed section 11(k) of the Federal Reserve Act and transferred the authority exercised under that subsection to the Comptroller of the Currency pursuant to 12 U.S.C. 92a.

Section 202 would correct an apparent typographical error in section 3(a)(12), which now provides that, for purposes of section 15A(g)(2) (granting power to deny membership on the basis of statutory disqualifications), municipal securities are "exempted securities." The proper section reference should have been to section 15A(g)(3) (granting authority to deny membership based on operational and professional qualifications). Since section 15A(f) of the 1934 Act provides that "[n]othing in this section

[1] The court remanded the case to the district court for such a determination. The district court's determination on this issue is not reported.

shall be construed to apply with respect to any transaction * * * in any exempted security," section 3(a)(12) as written would prohibit the National Association of Securities Dealers, Inc. ("NASD") from denying membership in that organization to persons subject to a statutory disqualification, while granting the NASD the power to establish operational and professional qualifications. In fact, the opposite result was intended by the Congress, as evidenced by the fact that (1) in S. 2474, the predecessor bill to the 1975 amendments to the 1934 Act, the definitional section was drafted so that the NASD could not deny membership based on operational and professional qualifications (*see* S. 2474, 93d Cong., 2d Sess., para 1 (1975)), and (2) the Municipal Securities Rulemaking Board was given the rulemaking authority with respect to the establishment of standards of operational capability (*see* section 15B(b)(2)(A) of the 1934 Act). *See* Securities Exchange Act Release No. 11876, at n.7 (Nov. 26, 1975), 40 Fed. Reg. 60084, 60085 n.7 (1975).

Section 203. See discussion of *Section 102*, above.

Section 204 would remove the ambiguity in the definition of "exclusive processor" in section 3(a)(22)(B) of the 1934 Act that resulted from the omission of two commas, an apparent typographical error.

Section 205. See discussion of *Section 104*, above.

Section 206 would capitalize the word "state" in section 3(a)(34)(C) of the 1934 Act and thereby remove any ambiguity as to whether it refers to the defined term "State" used elsewhere in the Act.

Section 207 would correct two apparent typographical errors in section 3(a)(39)(B) of the 1934 Act. The first correction involves inserting a conjunction in a series of items where there is none now. The second involves including within the definition of "statutory disqualification" for purposes of the Act "suspen[sion] for a period not exceeding twelve months" from being associated with a broker, dealer, or municipal securities dealer. This would conform the definition of "statutory disqualification" to the statutory sanctioning authority of the Commission in section 15(b)(6) of the 1934 Act. It is apparent that the omission is a typographical error both because the language does not conform to section 15(b)(6) and because suspension by a self-regulatory organization from being associated with a member of the organization, which would generally be a lesser sanction than suspension by the Commission for a period not exceeding twelve months from being associated with a broker or dealer, is included within the definition of "statutory disqualification" under section 3(a)(39)(A).

Sections 208 and 225(3) would transfer the definition of the term "securities laws," which now appears in section 21(g) of the 1934 Act, to section 3(a), the "definitions" section of the Act. The transfer is advisable because the term is used in new section 4(c), which would be added by *Section 209. Section 208* also would conform the language of the definition to the style of section 3(a) and correct several obviously erroneous cross-references in the definition.

Section 208 also would add a definition of the term "person associated with a transfer agent" to section 3(a). The new definition is necessary because of the new authority over such persons conferred under *Section 224*. The definition is patterned after the definition of the terms "person associated with a broker or dealer" and "person associated with a municipal securities dealer" in sections 3(a)(18) and 3(a)(32) of the 1934 Act, except that persons whose functions are solely clerical or ministerial are excluded from the new definition for all purposes. The definition also excludes employees of diversified transfer agents, such as banks, who are not involved in transfer agents functions.

Section 209 would add new subsection (c) to section 4 of the 1934 Act. Section 4(c) would give the Commission authority by rule to decline to accept payment of fees in cash, and to prescribe the manner of such payments.

The receipt of cash by the Commission raises security and safekeeping problems. The Commission's administration of the federal securities laws does not otherwise require it to handle, safeguard, and maintain records regarding large amounts of cash. The amount of individual and aggregate cash payments received on a particular day is sometimes quite large, occasionally several thousand dollars. The Commission now attempts to assure the safety of the cash it receives, and of the employees who receive it, by making special security arrangements. Special separate recordkeeping and auditing procedures are also required because of the Commission's acceptance of cash. The Commission believes it could reduce costs if it were not required to accept cash payments for fees.

Section 210 would add new sections 4A and 4B to the 1934 Act. The additions would not make any substantive change in current law. The provisions that would be added as sections 4A and 4B are now contained in a 1962 statute, which is codified after section 4 of the 1934 Act in the United States Code, but is not a part of that Act. The provisions concern delegation of functions by the Commission and transfer of functions with respect to assignment of personnel to the Chairman. *Section 210* would insert these provisions into the 1934 Act, where they would be more readily accessible, and would make minor stylistic changes to conform the provisions to current legislative drafting conventions.

Section 211 would correct a typographical error in the first sentence of section 6(c)(2) of the 1934 Act. The words "of investors" were omitted after the word "protection." Inserting the words would logically complete an otherwise incomplete thought.

Section 212 would correct an obvious typographical error in section 6(c)(3)(A) of the 1934 Act. The phrase "any natural person association with such broker" is meaningless. By changing the word "association" to "associated," the phrase assumes the meaning intended by Congress.

Section 213 would amend section 6(c)4) of the 1934 Act to correct a typographical transposition of the letter "(A)", which designates a clause within a sentence, and the verb in the sentence.

Section 214 would delete as obsolete paragraph (3) of section 6(e) of the 1934 Act. It also would provide for the redesignation of paragraph (4). Paragraph (3) provides for the filing by the Commission, until December 31, 1976, of certain information with Congress. The filings are not required after that date. *Section 214(2)* would correct an obvious typographical error by substituting the word "fixing" for the word "fixes" in subparagraph (E), so as to conform its use to other clauses in the subparagraph.

Section 215(1) would amend an obvious typographical error in section 11A(b)(2) of the 1934 Act. The word "transaction" should be in the plural so as to be in accord with the words "in securities" which immediately follow.

Section 215(2) would delete as obsolete two sentences in section 11A(c)(4) of the 1934 Act. The sentences required the Commission, by September 1975, to report to Congress on exchange rules limiting off-board trading and to commence, and to conclude before the end of 1975, a proceeding amending any such rules that were unnecessary or inappropriate. These requirements were met several years ago.

Section 216 would delete sections 11A(e) and 12(m) of the 1934 Act. Section 11A(e) provides for a study and report concerning the extent to which persons excluded from the definitions of "broker" and "dealer" maintain accounts on behalf of public customers. The report was submitted in 1977. Section 12(m) provides for a study and report concerning the practice of recording ownership of securities in street and nominee names. The report was submitted in 1977.

Section 217 would correct an apparent typographical error in section 13(c) of the 1934 Act, where the word "of" appears between the words "thereof" and "the" in what is obviously intended to be the phrase "the Commission shall require in lieu thereof the submission".

Section 218 would delete section 13(h) of the 1934 Act. Subsection 13(h) provides for a study and report concerning the effectiveness of the ownership reporting requirements of section 13 and the desirability and feasibility of modifying the 5 percent threshold reporting requirement of section 13. The report was submitted in 1980.

Sections 219(1) and (2) would amend section 15(b)(4) of the 1934 Act to permit the Commission to bar or otherwise sanction a broker-dealer on the basis of a conviction arising out of the conduct of the business of a securities transfer agent or on the basis of an injunction prohibiting the broker-dealer from acting as a transfer agent. The amendment also would have the effect of permitting the Commission to sanction municipal securities dealers and associated persons of broker-dealers and municipal securities dealers for convictions or injunctions related to securities transfer agent activities, and of permitting the "appropriate regulatory agency" [2] for a municipal securities dealer to do likewise with respect to municipal securities dealers and their associated persons within the jurisdiction of the agency.[3]

At present, section 15(b)(4) permits the Commission and the appropriate regulatory agencies to sanction broker-dealers, municipal securities dealers, and their associated persons on the basis of convictions and injunctions relating to numerous financial activities, including banking, insurance, commodity futures, and most securities-related activities. There is no apparent reason for

[2] Section 3(a)(34)(A) of the 1934 Act provides that either the Comptroller of the Currency, the Federal Reserve Board, or the Federal Deposit Insurance Corporation is the "appropriate regulatory agency" for a municipal securities dealer that is a bank, bank holding company, or department, division, or subsidiary thereof within the primary regulatory jurisdiction of the agency.

[3] These effects would result because sections 15(b)(6), 15B(c)(2), and 15B(c)(5) of the 1934 Act, which authorize administrative sanctions against associated persons of broker-dealers and against municipal securities dealers and their associated persons, incorporate by reference most of the permissible bases for sanctions provided in section 15(b)(4).

not authorizing sanctions for convictions and injunctions related to securities transfer agent activities.

The amendment is similar in concept to Congress' action in section 6(b) of the Insider Trading Sanctions Act of 1984, Pub. L. No. 98-376, § 6(b), 98 Stat. 1265 (Aug. 10, 1984), where convictions and injunctions related to commodity futures activities and violations of the Commodity Exchange Act were added to the list of permissible bases for administrative sanctions against broker-dealers, municipal securities dealers, and their associated persons. The amendment also would effect several stylistic changes to conform section 15(b)(4) to the administrative sanctioning provisions of the Investment Advisers Act of 1940, which also would be amended by the bill to add convictions and injunctions related to transfer agent activities to its list of permissible bases for administrative sanctions. *See* discussion of *Sections 602(1) and (2)*, below. Sections 9(a) and (b) of the Investment Company Act of 1940 would be amended correspondingly to add convictions and injunctions related to transfer agent activities to their lists of bases for disqualifying persons from serving in various capacities to investment companies. *See* discussion of *Section 509*, below.

Sections 219(3), 221, and 602(3) would clarify ambiguities in sections 15(b)(6) and 15B(c)(4) of the 1934 Act and in section 203(f) of the Investment Advisers Act of 1940. These amendments would codify the Commission's interpretation that it has jurisdiction under those sections to bring administrative proceedings against persons who were associated with, or were seeking to become associated with, a broker-dealer, municipal securities dealer, or investment adviser at the time they committed an alleged violation of the federal securities laws, regardless of their current employment or association status.

Before 1975, section 15(b)(7) of the 1934 Act and section 203(f) of the Investment Advisers Act authorized the Commission to bring administrative proceedings and to censure or suspend for not more than 12 months from the broker-dealer and investment advisory businesses "any person" found to have made false statements to the Commission, or to have otherwise violated the federal securities laws or aided or abetted a violation.

At that time, based on the plain language of these sections, the Commission brought a number of administrative proceedings under section 15(b)(7) against banks, lawyers, and other persons who had allegedly violated the federal securities laws, but who had not been and were not engaged in the securities business as brokers, dealers, or investment advisers, and had no apparent intention of becoming so engaged.[4] As mentioned above, the only sanction the Commission could impose under sections 15(b)(7) and 203(f) were censure, suspension, or a bar from the business of broker-dealer or investment adviser, respectively.

Apparently, objections were raised as to the logic and fairness of imposing these sanctions in administrative proceedings on persons who were not subject to regulation by the Commission as registered broker-dealers and investment advisers and had no intention of entering the businesses from which they might be suspended or barred.[5]

In apparent response to these objections, section 15(b)(7) (renumbered section 15(b)(6)) was changed in 1975 to refer to "any person associated, or seeking to become associated, with a broker or dealer," rather than to "any person," and section 203(f) was changed to refer to "any person associated or seeking to become associated with an investment adviser."[6] Section 15B(c)(4), which was added to the 1934 Act by the 1975 amendments and applies to associated persons of municipal securities dealers, follows the same pattern.

This phrasing creates a possible ambiguity, however. It raises the possibility of an argument that a person who was associated with a broker-dealer, municipal securities dealer, or investment adviser at the time of the violation, but who is no longer so associated at the time of the bringing of an administrative proceeding, could not be the subject of such a proceeding. It also raises the possibility of an argument that someone who was seeking to become associated with a broker-dealer, municipal securities dealer, or investment adviser at the time of alleged misconduct, but is not seeking such association at the time of an administrative proceeding, cannot be a subject of the proceeding.

These interpretations would clearly be contrary to the purposes of the sections, however, since they would allow persons who had violated the federal securities laws to avoid administrative sanctions merely by leaving the business and stating that they were no longer associated with a broker-dealer, municipal securities dealer, or investment adviser and were not seeking to become so associated. This situation could arise, for example, if an employee charged with violations resigned his employment or, in the case of principals of a firm, resigned or caused the firm to cease doing business. It could also arise if someone who files a fraudulent application for registration abandons the application.

The proposed amendments correct this potential problem by inserting, in sections 15(b)(6), 15B(c)(4), and 203(f), the phrase "or, at the time of the alleged misconduct, associated or seeking to become associated." These amendments make clear Congress' original intent that misconduct during a *past* association or attempt at association, as well as during a *present* or *prospective* association, subjects a person to administrative proceedings and sanctions under the Securities Exchange Act and the Investment Advisers Act.

The proposed amendments follow closely the language and the rationale of section 1809(a) of the American Law Institute's Federal Securities Code.[7] There the proposed statutory language subjects a person to liability who "*is, was* at the time of any conduct alleged [to be a violation] * * * or *is seeking* to become * * * an associate" (emphasis supplied). The commentary on this section in effect acknowledges that it would be merely a codification of present law: "[I]t does seem fair enough to make clear that the Commission can proceed against a person who *was* a broker, etc., *at the time of the alleged conduct*" (emphasis in original).[8]

Section 219(4) would correct an apparent typographical error in section 15(b)(10) of the 1934 Act, where there is a cross reference to "statutory disqualification" under section 17A(b)(4)(B), but that section does not use the term "statutory disqualification," whereas section 17A(b)(4)(A) does use the term, and it is apparent that the correct reference is section 17A(b)(A).

Section 220 would correct several obvious typographical errors in section 15B(b)(2)(C) of the 1934 Act.

Section 221 would effect two changes in section 15B(c)(4) of the 1934 Act, which deals with administrative proceedings against persons associated with municipal securities dealers. The first change would conform the remedies available against persons associated with municipal securities dealers to those provided in parallel provisions of the federal securities laws for persons associated with broker-dealers and investment advisers. The second change would clarify that administrative proceedings may be instituted against a person who was associated or seeking to become associated with a municipal securities dealer at the time of the conduct complained of. *See* discussion of *Section 219(3)*, above.

The first amendment would make it clear that the Commission and other appropriate regulatory agencies may "place limitations on the activities or functions" of a person associated with a municipal securities dealer.[9] At present, the language of section 15(c)(4) authorizes the agencies to impose against such persons the sanctions of censure, suspension, and bar. The other provisions of the securities laws that deal with permissible sanctions against persons associated with broker-dealers and investment advisers, however, allow the Commission to censure, suspend, or bar them and also to *place limitations on* their activities.[10]

The omission of specific language giving the Commission and the other agencies "limitations" authority with respect to persons associated with municipal securities dealers is not explained in the legislative history of section 15B(c)(4). Indeed, the legislative history suggests that the omission

[4] 5 Loss, Securities Regulation 3386-87 (1969).

[5] *See* II American Law Institute, Federal Securities Code 870 (1980).

[6] The definition of "associated person" does not include lawyers, banks, or other persons unless they are employed in the securities business or are in a control relationship with a broker-dealer or investment adviser. Section 3(a)(18) of the 1934 Act defines the term "person associated with a broker or dealer" as "any partner, officer, director, or branch manager of such broker or dealer (or any person occupying a similar status or performing similar functions), any person directly or indirectly controlling, controlled by, or under common control with such broker or dealer, or any employee of such broker or dealer, except that any person associated with a broker or dealer whose functions are solely clerical or ministerial shall not be included in the meaning of such term for purposes of section 15(b) of this title (other than paragraph (6) thereof)." Similarly, section 202(a)(17) of the Investment Advisers Act defines "person associated with an investment adviser" as "any partner, officer, or director of such investment adviser (or any person performing similar functions), or any person directly or indirectly controlling or controlled by such investment adviser, including any employee of such investment adviser, except that for the purposes of section 203 of this title (other than subsection (f) thereof), persons associated with an investment adviser whose functions are clerical or ministerial shall not be included in the meaning of such term."

[7] II American Law Institute, Federal Securities Code § 1809(a) (2d Supp. 1981).

[8] *Id.* at 870 (1980).

[9] Section 15B(c)(5) of the Act allows other "appropriate regulatory agencies" to impose on municipal securities dealers and associated persons within their jurisdictions the same sanctions that Sections 15B(c)(2) and (4) authorize the Commission to impose. The appropriate regulatory agency for bank-affiliated municipal securities dealer is defined in Section 3(a)(34)(A) of the Act as one of several federal bank regulatory authorities. *See* note 2, above.

[10] 1934 Act § 15(b)(6), 15 U.S.C. 78o(b)(6); Investment Advisers Act § 203(f), 15 U.S.C. 80b-3(f).

was an oversight. The Senate Report that accompanied the Securities Acts Amendments of 1975, which added section 15B(c)(4) to the Act, indicated that the provision was intended to provide "limitations" authority. The Report stated that section 15B(c)(4) would authorize the Commission "by order, to censure or *impose limitations on the functions and activities.* or bar or suspend * * * any person from being associated with a municipal securities dealer."[11] However, neither at the time the 1975 bill was reported, nor when it was enacted into law, did its actual text ever include a reference to "limitations." [12]

Additional evidence that the lack of express "limitations" authority in section 15B(c)(4) was an oversight is found in section 15B(c)(2) of the Act, which was added at the same time as section 15B(c)(4). Section 15b(c)(4) sets out the permissible sanctions applicable to municipal securities dealers themselves. It expressly confers "limitations" authority upon the Commission and the other appropriate regulatory agencies. There is no explanation in the legislative history for the difference in treatment of municipal securities dealers and persons associated with municipal securities dealers. In the sections of the securities laws dealing with sanctions applicable to other registrants and their associated persons, there is "limitations" authority with respect to both.[13]

The proposed amendment would remedy this apparent oversight and conform the provisions governing the sanctions expressly applicable against persons associated with municipal securities dealers to those applicable against persons associated with other dealers and with brokers and investment advisers.[14] The Commission regards this as a desirable change in the law because the limitations authority is an important recognition by Congress of the need for flexibility to fashion sanctions that fit the offense and situation presented. For example, the Commission may use its "limitations" authority in the broker-dealer area to suspend the operation of a single branch office, rather than an entire firm, where misconduct was localized; or to confine an offending employee to nonsupervisory positions where an outright bar or suspension is unnecessary; or to bar persons formerly associated with broker-dealers from entering other securities professions where they might continue to perpetrate frauds upon unsuspecting investors.

Section 222 would capitalize the word "board" in section 15B(c)(6)(A) of the 1934 Act and thereby remove any ambiguity as to whether it refers to the defined term "Board" used elsewhere in the Act.

Section 223(1) would amend section 17(c)(2) of the 1934 Act to require that the Commission and the federal banking agencies, which serve as regulatory agencies for transfer agents and municipal securities dealers, to notify each other when they institute proceedings and enter orders against persons associated with transfer agents and municipal securities dealers. Currently, section 17(c)(2) requires the Commission and the banking agencies to notify each other only when they institute proceedings and enter orders against transfer agents and municipal securities dealers themselves, not when they do so against associated persons only. The purpose of the requirement is to foster cooperation among government agencies in law enforcement and regulation. *See* S. Rep. No. 94-75, 95th Cong., 1st Sess. 120-21 (1975). The extension of the requirement to proceedings and orders against associated persons is consistent with this purpose and is the approach adopted in the American Law Institute's *Federal Securities Code.*[15] Section 15B(c)(6) of the 1934 Act already requires the Commission and the banking agencies to notify and consult with each other before entering orders of investigation and commencing proceedings against *both* municipal securities dealers *and* associated persons of municipal securities dealers. Therefore, the extension of the section 17(c)(2) requirement to associated persons of municipal securities dealers should not impose any significant burdens on the agencies. The extension to associated persons of transfer agents is consistent with *Section 224(5)* of the bill, which would extend the administrative jurisdiction of the agencies to such persons. Moreover, the requirement that the agencies file with each other copies of orders imposing sanctions on persons associated with transfer agents would facilitate the employment review process contemplated under *Section 224(5).*

Section 223(2) would amend section 17(f)(3) of the 1934 Act to provide the Commission and self-regulatory organizations ("SRO's") designated by the Commission with access, in connection with the identification and processing of fingerprints taken in satisfaction of the fingerprinting requirement of section 17(f)(2), to all criminal history record information in the FBI's National Crime Information Center system. The amendment is specifically intended to enable the NASD and other SRO's that have plans for the processing of fingerprint cards approved by the Commission to obtain complete arrest information on prospective employees of their members.

At present, the SRO's are unable to obtain complete arrest information in connection with section 17(f)(2) fingerprint submissions because of Department of Justice regulations. The regulations prohibit the release to the SRO's of arrest information not accompanied by information relating to the disposition of the arrest if the arrest information is more than one year old and no active prosecution of the case is known to be pending. *See* 28 C.F.R. §§ 20.33, 50.12 (1984). Under current law, the Commission itself could obtain such arrest information, but the proposed amendment covers the Commission so as not to raise a negative implication that the self-regulatory organizations could obtain access while the Commission could not.

A restriction on release of year-old arrest data not accompanied by disposition data where there is no known active prosecution is not, on its face, unreasonable. But such a restriction is not advisable when the purpose of a fingerprint submission is the investigation of prospective employees in the securities business who will handle and act as fiduciaries with respect to large amounts of other peoples' money. Moreover, arrest data in the National Crime Information Center system may not be accompanied by disposition data for reasons entirely unrelated to the seriousness of the arrest. There may be delays in the disposition of arrests, and local law enforcement officials sometimes fail to report dispostions, even convictions, to the FBI. As a consequence, the SRO's and their members can be prevented by the regulations from receiving precisely the kind of information they need to identify potentially untrustworthy personnel and make informed hiring decisions about persons convicted of securities-related offenses.

The proposed amendment would provide the SRO's with access similar to that granted by section 233 of the Futures Trading Act of 1982, Public Law No. 97-444, 96 Stat. 2294, to registered futures associations, which are regulated by the Commodity Futures Trading Commission ("CFTC"). Frequently, prospective employees who are subject to the jurisdiction of a registered futures association, which is in essence a futures SRO, are also subject to the jurisdiction of a securities SRO. Since trustworthiness concerns are as important in the securities industry as they are in the futures industry, it is appropriate that securities SROs have access to the same type of information as futures SROs. Moreover, restricting securities SRO access to criminal history record information contributes to duplicative fingerprint and background investigation requirements when employees move from the securities industry to the futures industry by changing jobs or by expanding their product lines. Currently, sales personnel whose fingerprints have been processed by the FBI and are on file with the CFTC are exempt from the SEC's fingerprinting requirement. The CFTC does not have a reciprocal exemption, however, because the information provided by the FBI to securites SROs does not include the more extensive arrest information available to registered futures associations regulated by the CFTC. By granting access to such information to securities SROs, the amendment would enable the CFTC to consider adopting an exemption that would eliminate dual fingerprint and background investigation requirements.

Section 224 of bill would amend the provision in section 17A of the 1934 Act relating to regulation of transfer agents. The purpose of the amendments is to improve compliance with those provisions. The amendments would place the enforcement authority of the Commission and the federal bank regulatory agencies with respect to transfer agents and transfer agent professionals [16]

[11] S. Rep. No. 94-75, 94th Cong., 1st Sess. 116 (1975).

[12] *See id.* at 215.

[13] *See* 1934 Act § 15(b)(4), (b)(6), 15 U.S.C. 78o(b)(4), (b)(6); Investment Advisers Act § 203(e), (f), 15 U.S.C. 80b-3(e), (f).

[14] If the municipal securities dealer with which the person is associated is also a broker-dealer against which the Commission may proceed under section 15(b) of the Act, of course, the Commission can proceed against the associated person under the general sanctioning provisions of section 15(b)(6), which contains express "limitations" sanctioning authority. The definitions in the 1934 Act, however, prevent the Commission from sanctioning a bank-affiliated municipal securities dealer or its associated persons under section 15(b). Instead, the Commission must rely on section 15B(c), which addresses municipal securities dealers specifically. Thus, the principal effect of the proposed amendment would be expressly to permit the Commission to place limitations on persons associated with bank-affiliated municipal securities dealers. *See* 1934 Act §§ 3(a)(5), 3(a)(30) & 3(a)(32), 15 U.S.C. 78c(a)(5), 78c(a)(30), 78c(a)(32).

[15] *See* II American Law Institute, Federal Securities Code § 1803(f)(2), at 828 (1980).

[16] Section 3(a)(34)(B) of the 1934 Act provides that the Comptroller of the Currency, the Federal Reserve Board, or the Federal Deposit Insurance Corporation is the "appropriate regulatory agency" for a transfer agent that is a bank within its primary regulatory jurisdiction, or the subsidiary of such a bank, and that the Commission is the "appropriate regulatory agency" for all other transfer agents.

on a par with their authority over brokers, dealers, municipal securities dealers, and investment advisers and their associated professionals.

Transfer agent regulatory authority was added to the 1934 Act by Congress in 1975. *See* Pub. L. No. 94-29, § 15, 89 Stat. 141. Thus, the proposed amendments reflect ten years' experience in federal regulation of transfer agents.

The amendments were developed in consultation with the staffs of the other transfer agent regulatory agencies—the Comptroller of the Currency, the Federal Reserve Board, and the Federal Deposit Insurance Corporation. The staffs of all three agencies offered support for the legislation.

The Securities and Exchange Commission believes that the proposed changes would enhance significantly the enforcement capabilities of the transfer agent regulatory agencies. The proposed legislation would close existing gaps in administrative authority and would provide important, flexible tools with which the Commission and the other agencies more efficiently may remedy violations of the federal securities laws by registered transfer agents and their associated professionals.

Section 224(1) would amend section 17A(c)(2) of the 1934 Act to make it clear that the Commission or the other appropriate regulatory agency for a transfer agent may require information about professionals associated with the transfer agent in the transfer agent's application for registration. The clarification is desirable in view of *Section 224(5)* of the bill, which would extend the adjudicative jurisdiction of the agencies to professionals associated with transfer agents.

Section 224(2) would amend section 17(A)(c)(2) of the 1934 Act to extend the effective date of a transfer agent's registration from 30 days to 45 days after the filing of the application, as is the case for brokers and dealers. The additional processing time is needed for the agencies to review the additional information about professionals that may be required under the amendment provided for in *Section 224(1)*, discussed above. The existing provision allowing the agencies to accelerate the effectiveness of the registration would not be changed.

Section 224(3) would amend section 17A(c) of the 1934 Act, the section of that statute that provides for the institution of administrative proceedings against transfer agents, in two ways. First, it would permit the appropriate regulatory agency for a transfer agent to institute administrative proceedings against, and impose sanctions on, the transfer agent for acts committed or omitted by professionals associated with the transfer agent itself. The new scheme would conform the regulation of transfer agents to the rules that apply to broker and dealers, which are subject to administrative proceedings both for their own acts and for acts of their associated persons.

Second, *Section 224(3)* would significantly expand the grounds for instituting administrative proceedings against, and imposing sanctions on, transfer agents. The current statute authorizes administrative proceedings and sanctions only for violations of, or inability to comply with, sections 17 and 17A of the 1934 Act and the rules thereunder. Sections 17 and 17A and their accompanying rules are quite narrow in scope. They prescribe statutory and regulatory requirements only with respect to maintaining books and records and clearing and settling securities transactions. The amendment would expand the grounds for sanctioning transfer agents to include those currently available for sanctions against brokers, dealers, and municipal securities dealers. The grounds include violations by transfer agents and their associated persons of the federal securities laws; convictions and injunctions relating to financial activities such as banking, insurance, commodity futures, and securities-related businesses; and convictions for offenses involving fraud or dishonesty. The grounds are set out in detail in subparagraphs (A) through (E) of section 15(b)(4) of the 1934 Act, which would be incorporated by reference in section 17A(c)(3) under the proposed amendment. An outstanding order barring or suspending the transfer agent or one of its associated persons from associating with a transfer agent also would constitute grounds for an administrative sanction. This is comparable to the provision that applies to brokers and dealers in section 15(b)(4)(F) of the 1934 Act.

The legislative history of section 17A(c)(3), which was added by Congress to the 1934 Act in 1975, does not disclose why the adjudicative authority of the transfer agent regulatory agencies is limited to violations of sections 17 and 17A. The Commission's experience over the last ten years in administering the federal securities laws relating to transfer agent activities, however, indicates that transfer agents can use their position as recordkeeper and certificate processor for issuers to violate other federal and state laws that outlaw fraud and deception and regulate the provision of financial services. However, if a transfer agent violates, for example, the antifraud provisions of the securities laws, the Commission and the other transfer agent regulatory agencies cannot now bring an administrative proceeding under section 17(A)(c)(3) to revoke, deny, or suspend registration or to censure or place limitations on the activities of the transfer agent, absent violations of section 17 or 17A or the rules thereunder.

Transfer agents that violate other provisions of the federal securities laws, of course, occasionally also violate section 17 or section 17A of the 1934 Act.[17] In such cases, however, under current law, the Commission may be required to bring two separate proceedings to satisfy the public interest. The Commission would have to institute administrative proceedings to revoke the transfer agent's registration on the basis of section 17 or 17A violations, and seek an injunction from a court to redress the violations of other provisions of the federal securities laws, if the public interest required both sanctions. Moreover, transfer agents and their associated persons that violate other provisions of the federal securities laws may operate their transfer agency in substantial compliance with sections 17 and 17A or may be able to cure any minor section 17 or 17A violation easily. In those cases, the public interest and investor protection may not justify severe administrative sanctions, such as revocation or registration, for the section 17 or 17A violations, even though the violations of other provisions of the federal securities laws might merit such remedies.

The proposed amendment would close this gap in the administrative authority of the Commission and the other transfer agent regulatory agencies. It would confer upon them administrative adjudicatory authority comparable to that applicable to brokers, dealers, municipal securities dealers, and investment advisers.[18] The agencies thus would be able to tailor administrative remedies in cases of multiple violations and would not be required to rely exclusively on section 17 or 17A violations.

Section 224(4) would redesignate current subparagraphs (B) and (C) of section 17A(c)(3) of the 1934 Act as subparagraphs (A) and (B) of new section 17A(c)(4). This would accommodate the amendments of section 17A(c)(3) accomplished under *Section 224(3)*.

Section 224(5) would add a new paragraph (4)(C) to section 17A(c) of the 1934 Act. As mentioned above, the new provision would permit the Commission or the other appropriate regulatory agency for a transfer agent to institute administrative proceedings against, and impose sanctions on, persons associated with the transfer agent. At present, the Commission and the other transfer agent regulatory agencies can bring administrative proceedings only against the transfer agent itself. The grounds for instituting proceeding against, and imposing sanctions on, associated persons of transfer agents would be the same as those applicable to other securities professionals, including violations of the securities laws and convictions and injunctions relating to financial services industry activities. The available sanctions also would be the same—bar, suspension, censure, and placing of limitations on the activities of the transfer agent professional.

New paragraph (4)(C) of section 17A(c) also would make it unlawful for a person subject to a bar or suspension from associating with a transfer agent to become so associated without the consent of both the appropriate regulatory agency that entered the bar or suspension and the appropriate regulatory agency for the transfer agent with which the person wishes to associate, if different. Likewise, it would be unlawful for a transfer agent to knowingly or negligently permit a person subject to such a bar or suspension to associate with it without the consent of both the appropriate regulatory agencies.

To enable a transfer agent to determine whether a person associated or seeking to become associated with it is subject to a bar or suspension, the legislation authorizes the Commission to establish procedures to allow transfer agents to obtain the relevant information. The Commission contemplates that, in exercising this authority to establish procedures, it will consult with the other transfer agent regulators and weigh carefully the statutory objectives against paperwork, reporting, and recordkeeping burdens. Recent Commission experience and consultations with the other agencies indicates that no more than a handful of bars and suspensions would be issued in any given year. It would be possible, therefore, for each transfer agent regulator to disseminate notice of these actions to all registered transfer agents, and to require that all transfer agents maintain a file of these notices. The transfer agents could be required to check this file before permitting a professional to

[17] *See, e.g., International Postal Systems, Inc.*, Securities Exchange Act Release No. 14901 (June 28, 1978) (administrative proceedings to determine whether to deny registration to a transfer agent involved in violations of section 5(a) of the 1933 Act and section 10(b) of the 1934 Act, on the basis of violations of section 17A(c)(1) of the Act).

[18] *See* 1934 Act §§ 15(b) (4) & (6), 15B(c) (2) & (4); Investment Advisers Act §§ 203 (e) & (f).

associate with them. This alternative may be less burdensome than establishing or appointing a central repository of the information and requiring a transfer agent to inquire of the respository each time a professional seeks association.

Under the current statutory scheme, the Commission and the federal banking regulatory agencies are empowered to impose administrative sanctions on transfer agents as entities, but not on persons associated with transfer agents, even if those persons are directly responsible for violations of the federal securities laws.[19] Moreover, although the Commission can revoke the registration of a transfer agent, it cannot, without cumbersome proceedings, prevent culpable associated persons from establishing a new transfer agent and continuing their unlawful activities.[20] Administrative authority over associated persons is therefore essential if the Commission is to fashion efficient enforcement remedies that satisfy the public interest.

The existing statutory scheme unduly hampers Commission enforcement capabilities. For example, in *Corporate Registrar and Transfer Company* ("CR&T").[21] The Commission instituted administrative proceedings against a transfer agent for violations of sections 17 and 17A of the Act. The Commission, however, could not impose administrative sanctions on the associated person responsible for the transfer agent's violations.[22] Moreover, although the associated person consented to revocation of the transfer agent's registration, the associated person acquired another transfer agent and assigned to it all of the assets and clients of CR&T.[23]

The proposed legislation would rectify these enforcement limitations. The Commission and the other transfer agent regulatory agencies would be able to tailor appropriate remedial sanctions against associated persons, as is currently the case with associated persons of registered broker-dealers, municipal securities dealers, and investment advisers, through censure, limitation of activities, suspension, and bar of association. Furthermore, the Commission would be able efficiently to revoke or deny the registration of a transfer agent on the basis of an associated person's prior misconduct.

Sections 224(6) and 224(7) would add references to persons associated with a transfer agent to sections 17A(d)(3)(B) and 17A(d)(4) of the 1934 Act. Section 17A(d)(3)(B) provides that nothing in the Act should be construed to limit the Commission's authority to make rules pursuant to the Act and to enforce compliance by transfer agents and clearing agencies. Section 17A(d)(4) provides that nothing in section 17A should be construed to impair the authority of any state or federal regulatory authority having jurisdiction over transfer agents and clearing agencies to make or enforce rules governing such agents and agencies that are not inconsistent with the 1934 Act. The new references are advisable in recognition of the new authority over associated persons of transfer agents that *Section 224* would provide.

Section 225(1) would correct an apparent typographical error in section 21(d) of the 1934 Act, where the word "wherever," rather than the word "whenever," is used to indicate the time at which something may be done.

Section 225(2). See discussion of *Section 109*, above.

Section 225(3). See discussion of *Section 208*, above.

Section 226(1) would insert in section 23(a)(1) of the 1934 Act the conjunction "or" before the last of a number of items in a series where a disjunctive conjunction obviously is required.

Section 226(2) would insert the verb "shall" before the work "keep" in a sentence in section 23(a)(3) of the 1934 Act that otherwise would read: "The Commission * * * keep in a public file * * *."

Section 227 would set in lowercase the letter "t" in the word "the" in section 23(b)(4)(F) of the 1934 Act. The word does not appear at the beginning of a sentence and does not otherwise require initial capitalization.

Section 228. See discussions of *Sections 109 and 110(3)*, above.

Section 229 would correct an apparent typographical error in section 28(c) of the 1934 Act. It appears that the word "or" was inserted in section 28(c) instead of the word "on," because, as written, section 28(c) speaks of sanctions imposed *by* members of self-regulatory organizations and *by* persons associated with members. These concepts are totally foreign to the 1934 Act. The inapt language can be harmonized with the remainder of section 28 by amending it to refer to a "disciplinary sanction imposed by a self-regulatory organization *on* a member thereof."

Section 230 would correct a typographical error in section 28(d) of the 1934 Act, where the word "is," instead of the word "in," is used in what is obviously intended to be the phrase "change in beneficial or record ownership."

Section 231 would amend a reference in section 28(e)(1) of the 1934 Act from the "Securities Act Amendments *in* 1975" to the "Securities Acts Amendments *of* 1975."

Section 232 would delete section 211 of the 1934 Act. Section 211 provided for a study and report by the Commission of reorganization proceedings. The report was completed and became the basis for the Trust Indenture Act of 1939.

TITLE III

The Title III of the Bill would effect various nonsubstantive and noncontroversial amendments to the Public Utility Holding Company Act of 1935 ("PUHCA").

Section 301 would conform section 8 of PUHCA to the *Government Printing Office Style Manual* rule that a dash is not used immediately after a comma.

Sections 302 through 304. Section 302(1) redesignates subsections (f) and (g) of section 18 of PUHCA to eliminate the nonconsecutive subsection designations that resulted from the repeal of subsection (e) by Public Law No. 91-452 in 1970. *Sections 302(2), 303, and 304* would make the conforming changes discussed above in connection with the discussions of *Sections 107, 109, and 110.* In addition, *Section 304(2)* would delete a reference in section 25 of PUHCA to the 1893 statute that established a court of appeals for the District of Columbia. The statute was repealed in 1949. The rights of appeal provided for in the statute are now provided for in 28 U.S.C. 1254, 1291, 1292, and 1294, to which section 25 would refer under the proposed amendment. *Section 607* would delete a similar reference in section 214 of the Investment Advisers Act of 1940 for the same reasons.

Section 305 would delete from section 30 of PUHCA the sentence that provided for the study and report that led to enactment of the Investment Company and Investment Advisers Acts of 1940.

TITLE IV

Title IV would effect several amendments of the Trust Indenture Act of 1939.

Section 401 would correct an obvious typographical error in section 303(4) of the Act, where the word "undertaking" is spelled "undertakng."

Section 402 would amend the definition of the term "obligor" in section 303(12) of the Act to clarify that a guarantor is an obligor with respect to indenture securities under the Act. The amendment reflects current administrative practice and is beneficial in eliminating the necessity to interpret the term "obligor" to include a guarantor.

TITLE V

Title V would effect a number of amendments of the Investment Company Act of 1940.

Sector 501 would amend the definition of the term "interested person" in section 2(a)(19) of the Investment Company Act by inserting the word "completed" before the words "fiscal years" each time the latter words appear. The words "two fiscal years" are used in the definition of the term "interested person" as a test of the materiality of certain business relationships immediately before the time in question. The revision conforms with SEC staff interpretations and removes an ambiguity in the present law.

Section 502. See discussion of *Section 102*, above.

Section 503 would correct an apparent typographical error in section 2(a)(48)(B) of the Investment Company Act, where the word "sections," instead of the word "section," is used before "55(a)(1) through (3)," by amending the provision so that it refers to "paragraphs (1) through (3)," which is the preferred usage.

Section 504 would delete the last clause of section 3(c)(3) of the Investment Company Act, which was intended to, and effectively did, create an exemption from the Act for the Massachusetts Hospital Life Insurance

---

[19] The federal bank regulatory agencies may have authority under other federal statutes to remedy violations by associated persons. *See, e.g.*, 12 U.S.C. 1818 (1976).

[20] Contrast these limitations with the provisions pertaining to administrative authority over brokers and dealers and persons associated with brokers and dealers. Under section 15(b)(6) of the Act, for example, the Commission could place limitations on association with a broker or dealer on the ground that the associated person previously violated the federal securities laws. Furthermore, under section 15(b)(4) of the Act, the Commission could deny registration to an applicant broker or dealer on the ground that an associated person previously violated the federal securities laws.

[21] Securities Exchange Act Release No. 20765 (Mar. 19, 1984).

[22] *See also National Bond and Share Company*, SEC Litigation Release No. 9898 (Feb. 17, 1983), in which the Commission obtained an injunction against both the transfer agent and its controlling person after the Commission suspended trading in five shell companies for which the transfer agent performed transfer functions. The Commission later brought administrative proceedings against the transfer agent for violations of sections 17 and 17A of the 1934 Act and several rules thereunder, but was unable to seek administrative remedies against the individual. *See* Securities Exchange Act Release No. 19638 (Mar. 29, 1983).

[23] Under the proposed scheme, the Commission could have prevented such a clear circumvention of its enforcement program easily and efficiently. The Commission might have sanctioned the associated person for his part in the violations of sections 17 and 17A. It then could have revoked the registration of the newly acquired transfer agent on the ground that an associated person previously violated the federal securities laws.

Company. The "Massachusetts Company," the successor to that company, no longer requires the exemption.

Section 505 would delete as obsolete section 3(c)(7) of the Investment Company Act. Section 3(c)(7) exempts from the operation of the Act companies subject to regulation by the Interstate Commerce Commission under Section 11302 of title 49, United States Code (section 214 of the Interstate Commerce Act before the enactment of title 49 in 1978), and certain holding companies controlled by companies subject to regulation under section 11302. Section 11302 provided for regulation by the Interstate Commerce Commission of the securities activities of interstate motor vehicle carriers. It was repealed by section 19(a) of the Bus Regulatory Reform Act of 1982, Pub. L. No. 97-261, § 19(a), 96 Stat. 1121. Since there are no longer any companies subject to regulation under section 11302, section 3(c)(7) of the Investment Company Act has no force and effect, and should be repealed. The bill would reserve the paragraph (7) designation for future use, rather than renumber the succeeding paragraphs, to avoid the confusion that would result from renumbering these frequently-cited provisions of law.

Sections 506 (1) and (2) would amend section 3(c)(11) of the Investment Company Act to make clear that a governmental plan described in that section need not be a trust to be exempted from the operation of the Act. The purpose of this amendment is to carry out Congress' apparent intent when it amended the Investment Company Act in the Small Business Investment Incentive Act of 1980.

Section 3(c)(11) does not specifically provide for the exemption of collective trust funds consisting solely or partially of assets of governmental plans not held in a trust. But the clear intent and purpose of Congress in amending section 3(c)(11) in 1980 was to conform section 3(c)(11) to section 3(a)(2) of the 1933 Act. Section 3(a)(2) was amended by the same legislation to exempt from application of the registration provisions of the 1933 Act any interest in a collective trust fund maintained by a bank issued in connection with a governmental plan, without requiring that the plan's assets be held in trust before it invested in the fund. *See* 126 Cong. Rec. 21,272-74 (1980) (remarks of Senator Sarbanes); 126 Cong. Rec. 28,632 (1980) (remarks of Representative Scheuer). The proposed amendment thus merely corrects a draftsman's oversight and codifies the current Commission staff interpretation of section 3(c)(11). Moreover, the proposed amendment is consistent with the action of Congress in 1982 when it amended the Internal Revenue Code to provide that a group trust that otherwise meets the requirements of section 401 of the Code shall not be treated as not meeting those requirements on account of the participation or inclusion in the trust of money of a governmental plan. The House Report on the legislation stated that the tax-exempt status of a group trust would not be affected adversely because the trust accepts money from a governmental plan "whether or not * * * the assets are held in trust." H.R. Rep. No. 97-760, 97th Cong., 2d Sess. 640 (1982).

Section 507 would correct an obvious typographical error in section 5(a)(2) of the Investment Company Act, where "closed-end" is spelled "Close-end."

Section 508(1). See discussion of *Section 102*, above.

Section 508(2) would remove as obsolete the exemption in section 6(a)(2) of the Investment Company Act for companies for which a receiver, trustee in bankruptcy, or similar officer had been appointed by a court before the effective date of the Act, so long as the conduct of the company's business remains subject to the supervision of the court. The Commission knows of no company that meets the conditions for the exemption today, and it is highly unlikely that any such company exists.

Section 509(1) would amend section 9(a) of the Investment Company Act to add three additional kinds of conduct to the existing list of activities that give rise to disqualification under the provision. The three kinds of conduct that would be added are convictions or injunctions in connection with activities of transfer agents, municipal securities dealers, and entities or persons required to register under the Commodity Exchange Act. Similarly, *Sections 509 (2) and (3)* would add willful violations of the Commodity Exchange Act to the lists of statutes, in section 9(b) of the Investment Company Act, the violation of which may give rise to administrative sanctions after notice and opportunity for hearing before the Commission.

Section 9(a) disqualifies persons who have been convicted of certain crimes, or against whom certain injunctions have been issued, from serving in the management, as employees, as investment advisers, or as principal underwriters of investment companies without an order granted by the Commission under section 9(c). At present, the list of disqualifying items includes injunctions and convictions of crimes arising out of the person's conduct as an underwriter, broker-dealer, or investment adviser, or as an affiliated person or employee of an investment company, bank, or insurance company. Section 9(b) gives the Commission authority to disqualify a person for willful violations of, or for willfully aiding and abetting violations of, the 1933 Act, the 1934 Act, and the Investment Company and Investment Advisers Acts.

Sections 9 (a) and (b) serve essentially the same purpose as section 15(b)(6) of the 1934 Act and section 203(f) of the Investment Advisers Act, which give the Commission authority to bar persons from association with broker-dealers and investment advisers on the basis of specified convictions, injunctions, and violations. The Investment Company Act and the Advisers Act, unlike the 1934 Act, however, do not include, among the specific bases for disqualification, convictions and injunctions relating to transfer agent activities and activities of an entity or person required to register under the Commodity Exchange Act. Moreover, the Investment Company Act, unlike the 1934 Act and the Investment Advisers Act, does not specifically include convictions and injunctions related to conduct as a municipal securities dealer. *Section 509* would close this gap in the Investment Company Act and substantially conform the 1934 Act, the Investment Company Act, and the Investment Advisers Acts in these respects. The amendments adding violations, and aiding and abetting violations, of the Commodity Exchange Act would follow the pattern set by Congress in the Insider Trading Sanctions Act of 1984, Pub. L. No. 98-376, § 6(b), 98 Stat. 1265, in which Congress added violations of the Commodity Exchange Act to the list of permissible bases for bars and other sanctions against broker-dealers and persons associated with broker-dealers. *Sections 602 (1), (2), and (3)* would effect corresponding changes in the Investment Advisers Act.

Section 510 would correct three obvious typographical errors in section 12 of the Investment Company Act. In one instance, the word "treasury" is capitalized when referring to the "treasury stock" of an investment company. In another, the word "it," instead of the word "is," is used in what is obviously intended to be the phrase "as is reasonably possible." Finally, the words "thereof" and "only" are transposed in the phrase "own all or any part of the capital stock thereof only if such stock is acquired and held for investment."

Section 511(1) would correct an erroneous cross-reference to paragraph 40 of section 2(a) in section 15(d) of the Investment Company Act. Section 2(a)(2) of the 1970 Amendments to the Investment Company Act redesignated paragraph (40) as paragraph (42), but section 15(d) was not amended to reflect the redesignation.

Section 511(2) would correct an obvious typographical error in section 15(f)(3)(B) of the Investment Company Act, where a period, instead of a comma, is used in the middle of a sentence.

Section 512 would delete as obsolete the second sentence of each of section 17(h) and section 17(i) of the Investment Company Act. The second sentences of both sections provide that the prohibitions of the section will not be deemed violated if noncomplying language in effect on the effective date of the Investment Company Act is amended to comply with the sections within one year of that date or if, if not so amended, persons who would otherwise be protected under the language file waivers with the Commission. We are not aware of any such waivers that have been filed that are still in effect.

Section 513 would delete as obsolete paragraph (1) of section 18(e) of the Investment Company Act. Paragraph (1) makes inapplicable the prohibitions of section 18, which relate to the capital structure of investment companies, to senior securities issued or sold by any registered closed-end company pursuant to a firm contract to purchase or sell entered into before March 15, 1940.

Section 514 would delete as obsolete two sentences in section 20 of the Investment Company Act and would remove superfluous language in section 20(d). This first sentence to be removed as obsolete is the second sentence of section 20(b), which makes the prohibition in that section on the use of interstate commerce to sell voting-trust certificates inapplicable to a class of voting-trust certificates if any certificates of the class were publicly offered by the issuer before March 15, 1940. The second sentence to be removed as obsolete is the first sentence of section 20(d), which required elimination of cross and circular ownership of investment companies, which are prohibited by section 20(c), within five years of enactment of the Act.

Section 515 would delete as obsolete the exemption in section 21(b) of the Investment Company Act for the extensions or renewals of loans made before March 15, 1940. Section 21(b) generally makes it unlawful for any registered management company to lend money or property to persons in control of the company.

Section 516(1) would correct an obsolete cross-reference in section 22(b)(1) of the Investment Company Act from section 15A(b)(8) of the 1934 Act to section 15A(b)(6). The provisions contained in section 15A(b)(8) before the 1975 amendments to the 1934 Act are now contained in section 15A(b)(6), but the cross-reference to section 15A(b)(8) has never been changed.

Section 516(2) would delete as obsolete paragraph (2) of section 22(b) of the Investment Company Act and renumber the remaining paragraphs of the section. Paragraph (2) gave the Commission authority to adopt rules with respect to excessive sales loads in primary distributions of redeemable securities of investment companies. The rules were applicable to broker-dealers regulated by the Commission under its "SECO" (SEC only) program. The rules were necessary because broker-dealers regulated under the SECO program were not members of the NASD and not bound by the NASD's rules on excessive sales loads unless they chose to bind themselves. However, Commission rulemaking authority in this area is no longer necessary. The SECO program was abolished by legislation in 1983. Pub. L. No. 98-38, § 3, 97 Stat. 206. All broker-dealers now are required to join the NASD unless they effect transactions solely on national securities exchanges, in which case they are regulated by the exchanges. Thus, most of the broker-dealers formerly regulated under the SECO program are now regulated by the NASD, and subject to the NASD's rules on excessive sales loads. Those few that are not regulated by the NASD effect transactions solely on national securities exchanges. Since redeemable investment company securities normally are neither traded nor distributed on exchanges, it is not necessary to have excessive sales load rules applicable to this group. If one of these broker-dealers effected a distribution off an exchange, it would lose its exemption from the requirement of NASD membership, be required to join the NASD, and become subject to the NASD's rules on excessive sales loads.

Section 516(3) would correct an obsolete cross-reference in current section 22(b)(3) of the Investment Company Act, which would be redesignated section 22(b)(2) under the bill. Section 22(b)(3) refers to the Commission's authority to affect the rules of registered securities association, such as the NASD, under section 15A(k)(2) of the 1934 Act. The Commission's authority in this area was moved to section 19(c) of the 1934 Act in the 1975 amendments to that Act. Secion 15A(k)(2) no longer exists.

Section 516(4) would amend the first sentence of section 22(e) of the Investment Company Act to make it clear that the seven-day period referred to in the sentence may not be used to suspend redemptions. Rather, an investment company may use the period only to postpone payment or satisfaction upon redemption for up to seven days. A company may suspend the right of redemption or extend the seven-day period for postponements of payments only if one or more of the three conditions specified in paragraphs (1) through (3) of section 22(e) is satisfied. This is the Commission staff's interpretation of the sentence and the interpretation adopted in the *Federal Securities Code* of the American Law Institute. *See* II American Law Institute, Federal Securities Code §1418(e), at 50 (2d Supp. 1981); Investment Co. Act Release No. 14244 (Nov. 21, 1984), 49 Fed. Reg. 46558 (1984); Investment Co. Act Release No. 10113 (Feb. 7, 1978). The interpretation is supported by a recognized authority in the field. *See* 3 T. Frankel, The Regulation of Money Managers 160-61 (1980).

Section 516(5) would delete as obsolete an exemption in the third sentence of section 22(e) of the Investment Company Act that terminated one-year after the effective date of the Investment Company Act, which was November 1, 1940.

Section 517 would delete as obsolete the provision in section 24(d) of the Investment Company Act which makes available the intrastate offering exemption in Section 3(a)(11) of the 1933 Act for new offerings of securities sold by the issuer or bona fide offered to the public before the effective date of the Investment Company Act.

Section 518 would correct a typographical error in section 26(b) of the Investment Company Act, where the word "intend," instead of the word "intended," is used in what is obviously intended to be the phrase "the purposes fairly intended by the policy and provisions of this title."

Section 519 would correct a typographical error in section 26(c) of the Investment Company Act, where the word "of" is used instead of the word "or" as a conjunction.

Section 520 would correct an error in section 28(a)(2)(B) of the Investment Company Act, where the word "subsection" is used to refer to a paragraph.

Section 521 would correct a typographical error in section 28(d)(2) of the Investment Company Act, where the word "of" is omitted from what is obviously intended to be the phrase "paragraph (2) of subsection (a)."

Section 522(1) would correct a typographical error in section 36(b)(4) of the Investment Company Act, where the word "loans," instead of the words "loads," is used in what is obviously intended to be the phrase "sales loads."

Section 522 (2) and (3) would redesignate subsection (d) of section 36 as subsection (c) and, within redesignated subsection (c), amend the phrase "subsections (a) through (c)" to read "subsections (a) and (b)." At present, section 36 has a subsection (d) but no subsection (c).

Section 523 provides for redesignating subsection (e) of section 42 of the Investment Company Act as subsection (d), to eliminate the nonconsecutive designation that resulted from the repeal of former subsection (d) by Public Law No. 91-452 in 1970.

Section 524 deletes as obsolete the proviso in section 53 of the Investment Company Act which permitted face-amount certificate companies to register before January 1, 1941, the effective date of the Act's provisions relating to face-amount certificate companies, and declare that such registration would not operate to change or affect the effective date as to the company or any face-amount certificates issued by it.

Section 525 through 527 would amend sections 54(a), 55(a)(1)(B), and 57(i) of the Investment Advisers Act, where the word "sections" was used before a citation to a single section of the Act.

TITLE VI

Title VI would effect a number of amendments of the Investment Advisers Act of 1940.

Section 601. See discussion of *Section 102*, above.

Section 602 (1) and (2) would amend section 203(e) of the Investment Advisers Act to add convictions and injunctions related to transfer agent activities to the list of permissible bases upon which the Commission may impose administrative sanctions on investment advisers and persons asssociated with investment advisers; the amendment also would conform section 203(e) stylistically to the administrative sanction and disqualification provisions in the 1934 Act and the Investment Company Act. *See* discussions of *Sections 219 (1) and (2) and 509*, above. In addition, *Sections 602 (2) and (3)* would add, to the list of permissible bases for sanctioning investment advisers and their associated persons, convictions and injunctions related to commodity futures activities and violations of the Commodity Exchange Act. This amendment would conform the Investment Advisers Act to section 15(b)(4) of the 1934 Act, which Congress amended recently to authorize administrative sanctions for convictions and injunctions relating to commodity futures activities and violations of the Commodity Exchange Act. *See* Insider Trading Sanctions Act of 1984, Pub. L. No. 98-376, § 6(b), 98 Stat. 1265; discussion of *Sections 219 (1) and (2) and 509*, above.

Section 602(4). See discussion of *Section 219(3)*, above.

Section 602(5) is a conforming amendment to correct an erroneous cross reference in subsection (g) of section 203 of the Investment Advisers Act. The error was occasioned by amendments to subsection (d) of section 203, to which subsection (g) currently refers, in 1970 and 1975. Subsection (g) discusses the Commission's authority to deny registration to or revoke or suspend the registration of successors to registered investment advisers. This authority, which is found in subsections (c) and (e), was conferred under subsection (d) before 1970, and the cross-reference was correct. Subsection (d) was redesignated subsection (e) in section 24(c) of the 1970 amendments to the securities laws, however, and the cross-reference in subsection (g) was not altered to conform to the redesignation. *See* Pub. L. No. 91-547, § 24(c), 84 Stat. 1430. The problem was compounded by the 1975 amendments to the securities laws, which lodged the Commission's authority to deny registration in subsection (c), separating it from the Commission's authority to revoke or suspend registration, which remained in redesignated subsection (e). *See* Pub. L. No. 94-29, § 29, 89 Stat. 166-68. The proposed amendment would correct the erroneous cross-reference.

Section 603 would reenact present section 205 of the Investment Advisers Act with two major changes. First, the amendment would add new subsection and paragraph designations to section 205 to conform to the accepted usage in other portions of the Act and to make the section easier to read and understand. Several stylistic changes also would be made in connection with this rearrangement. Second, the amendment would conform the language forbidding investment advisers from charging performance fees to retirement plans described in section 3(c)(11) of the Investment Company Act to the clarifying amendments to section 3(c)(11) in *Sections 506 (1) and (2)* of the bill. The language change would make it clear that no investment adviser required to register under the Act may charge a performance fee to a governmental retirement plan. In amending section 205 in 1970, Congress intended to extend the protection of the ban on performance fees in that section to all retirement plans exempt from the operation of the Investment Company Act under section 3(c)(11). *See* discussion of *Sections 506 (1) and (2)*, above; H.R. Rep. No. 91-1631, 91st Cong., 2d Sess. 31 (1970). Because section 3(c)(11) is being amended to make it clear that all governmental retirement plans described in section 3(a)(2)(C) of the 1933 Act are within the purview of section 3(c)(11), section 205 must be correspondingly amended to refer to all such plans.

It is recommended that section 205 be reenacted in its entirety, with these changes,

because confusion has resulted from the 1980 amendments to the Investment Advisers Act over the current form of section 205. Some publishers have printed current clause (C) of the section after the last sentence, rather than immediately after clause (B) as was intended by Congress. It is hoped that this confusion will end with the reenactment of the entire section with conventional subsection and paragraph designations.

Section 604 provides for redesignating subsection (e) of section 209 of the Investment Advisers Act as subsection (d) to eliminate the nonconsecutive subsection designation that resulted from the repeal of former subsection (d) by Public Law No. 91-452 in 1970.

Section 605 would amend section 211(b) of the Investment Advisers Act by replacing a reference to the Federal Register Act with a reference to chapter 15 of title 44 of the United States Code, where the provisions of the Federal Register Act were codified when title 44 was enacted into law in 1968.

Section 606. See discussion of *Section 107(3)*, above.

Section 607. See discussion of *Sections 110(3), and 304(2)*, above.●

By Mr. INOUYE (for himself, Mr. FORD, and Mr. BOREN):

S. 921. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 with respect to certain passenger motor vehicle safety requirements, and for other purposes; to the Committee on Commerce, Science, and Transportation.

MOTOR VEHICLE TRAFFIC SAFETY

● Mr. INOUYE. Mr. President, I am introducing legislation today with Senator FORD to stop the importation of foreign automobiles that are not in compliance with U.S. safety and emissions standards.

This so-called gray market was created a number of years ago to prevent hardship to those Americans who went overseas long enough to purchase automobiles and then wished to return to the United States with these automobiles. This was accomplished by permitting persons other than automobile manufacturers to bring into the United States cars that are not in compliance with U.S. standards of safety and emissions. This exemption has been exploited, however, by commercial importers who are bringing in noncomplying automobiles and reselling them without doing the proper modifications. The result is that over 50,000 potentially dangerous and polluting automobiles will enter the United States this year, an increase of 1,000 percent since 1982.

The problems created by noncomplying automobiles are numerous and well documented. Besides the pollution caused by emissions and the serious safety problems such as electrical fires and ruptured gas tanks, there are also accountability problems. These vehicles are not covered by manufacturers warrantees as their modifications cannot all be inspected and documented by the proper agencies. Gray market vehicles also cannot be traced in the United States and thus cannot be reached in a manufacturers recall campaign.

Furthermore, purchasers of gray market vehicles have no assurance of the quality of the modifications that have been made are or indeed if they have been made at all. In short, these vehicles are like time bombs which may or may not go off, but either way create much uncertainty and distort the marketplace.

I urge my colleagues to support this measure, and I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 921

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 102(5) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391(5)) is amended by striking all after "motor vehicle equipment," and inserting in lieu thereof "or who has express written authorization of any such person to import such motor vehicles or motor vehicle equipment for resale.".

(b) Section 108(a)(1)(A) of such Act (15 U.S.C. 1397(a)(1)(A)) is amended by inserting "and is covered by a certification issued by the manufacturer under section 114," immediately after "such standard".

(c) Section 108(b) of such Act is amended—

(1) in paragraph (2), by striking "or importer";

(2) by amending paragraph (3) to read as follows:

"(3) a motor vehicle or item of motor vehicle equipment offered for importation in violation of paragraph (1)(A) of subsection (a) shall be refused admission into the United States, except under any of the following circumstances:

"(A) The Secretary may exempt any motor vehicle or item of motor vehicle equipment from the prohibition against importation in such paragraph upon such terms and conditions as the Secretary finds necessary for the purpose of research, investigations, studies, demonstrations or training, competitive racing events, or for reasons of national security.

"(B) The Secretary of the Treasury and the Secretary may, by joint regulations, authorize the temporary importation into the United States of a motor vehicle or item of motor vehicle equipment upon such terms and conditions (including the furnishing of bond) as may appear to the Secretary of the Treasury and the Secretary to be appropriate to ensure that any such motor vehicle or item of motor vehicle equipment will be exported from or abandoned to the United States.

"(C) The Secretary of the Treasury and the Secretary may, by joint regulations, authorize importation into the United States of a motor vehicle or item of motor vehicle equipment where an individual, who has never before imported a nonconforming motor vehicle or item of motor vehicle equipment, seeks to import such a motor vehicle or item of motor vehicle equipment for personal use and not for resale and demonstrates that such importation is necessary to meet unforeseen cases of extreme hardship or unforeseen extradordinary circumstances. In any such case, the motor vehicle or item of motor vehicle equipment may be imported into the United States upon such terms and conditions (including the furnishing of a bond) as may appear to the Secretary of the Treasury and the Secretary to be appropriate to ensure that any such motor vehicle or item of motor vehicle equipment will be brought into conformity with applicable Federal motor vehicle safety standards prescribed under this subchapter.

"(D) An incomplete motor vehicle or incomplete item of motor vehicle equipment (as defined by the Secretary) shall not be refused admission into the United States where such motor vehicle or item of motor vehicle equipment is accompanied at the time of importation by a statement issued by the person who first manufactures or assembles the incomplete vehicle or incomplete item of equipment, indicating the Federal motor vehicle safety standards in effect at the time of manufacture with which such incomplete vehicle or item of equipment is in compliance. The Secretary shall prescribe the form and contents of such statement."; and

(3) by striking paragraph (4) and by redesignating paragraph (5) as paragraph (4).

(d) Section 114 of such Act (15 U.S.C. 1403) is amended—

(1) by inserting ", as appropriate," immediately after "dealer";

(2) by striking "or distributor" the second time it appears; and

(3) by inserting "Every distributor of a motor vehicle or motor vehicle equipment shall furnish to a dealer, at the time of delivery of such vehicle or equipment, a certification which was previously furnished to the distributor by the manufacturer." immediately after the first sentence.●

By Mr. D'AMATO (by request):

S. 922. A bill to make certain conforming amendments to the Securities Investor Protection Act of 1970 required by the enactment of the Bankruptcy Amendments and Federal Judgeship Act of 1984; to the Committee on the Judiciary.

MAKING CONFORMING AMENDMENTS WITH RESPECT TO BANKRUPTCY

● Mr. D'AMATO. Mr. President, I am introducing legislation today which would preserve certain jurisdictional provisions of the Securities Investor Protection Act [SIPA]. The recently enacted Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law No. 98-353, 98 Stat. 333 conflicts with the jurisdictional provisions of SIPA and may render them meaningless. The legislation I have proposed would eliminate these unintended conflicts.

SIPC was created by Congress in 1970 to protect the clients of brokerage firms. SIPC is an insurance fund that provides each brokerage firm customer up to $500,000 in coverage for securities held by the firm and $100,000 for customer cash balances. All registered broker-dealers are required to join SIPC and pay assessments to support the fund at a level now set at $300 million. In an emer-

gency, SIPC can also draw up to $1 billion from the U.S. Treasury through the Securities and Exchange Commission.

This legislation is urgently needed in order to preserve this important protection. It is my hope that we act expeditiously on this much needed legislation.

Mr. President, I ask unanimous consent that the bill and the accompanying section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 922

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REFERENCE TO BANKRUPTCY JUDGES.

Section 5(b)(4) of the Securities Investor Protection Act of 1970 (15 U.S.C. 78eee(b)(4)) is amended to read as follows:

"(4) REFERENCE TO BANKRUPTCY JUDGES.—Upon the issuance of a protective decree and appointment of a trustee, or a trustee and counsel, under this section, the court shall forthwith refer the entire liquidation proceeding to the bankruptcy judges for the district. Section 157(d) of title 28 of the United States Code notwithstanding, the district court may withdraw, in whole or in part, the liquidation proceeding so referred, on its own motion or on timely motion of any party, for cause shown. For purposes of this paragraph, such cause shall not include the circumstance that resolution of the proceeding or part thereof requires consideration of both title 11, United States Code, and one or more of the following Federal securities laws: the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Company Act of 1940, the Investment Advisers Act of 1940, and this Act.".

SEC. 2. SECURITIES INVESTOR PROTECTION CORPORATION PARTICIPATION.

Section 5(d) of the Securities Investor Protection Act of 1970 (15 U.S.C. 78eee(d)) is amended by inserting at the end thereof the following new sentence: "SIPC may, on its own motion, file notice of its appearance in any proceeding held in State court by reason of sections 1334(c) (1) or (2) of title 28, United States Code, and may thereafter participate as a party.".

SEC. 3. JURISDICTION OF DISTRICT COURTS.

Section 10(e) of the Securities Investor Protection Act of 1970 (15 U.S.C. 78fff-4(e)) is amended to read as follows:

"(e) JURISDICTION OF DISTRICT COURTS.—After SIPC has published notice of the institution of a direct payment procedure under this section, any person aggrieved by any determination of SIPC with respect to his claim under subsection (c) may, within six months following mailing by SIPC of its determination with respect to such claim, seek a final adjudication of such claim. The district courts of the United States shall have original and exclusive jurisdiction of any civil action for the adjudication of such claim. Any such action shall be brought in the judicial district where the head office of the debtor is located. Any determination of the rights of a customer under subsection (c) shall not prejudice any other right or remedy of the customer against the member.".

SEC. 4. TECHNICAL AMENDMENT.

Section 16 of such Act (15 U.S.C. 78111) is amended by striking out "the Bankruptcy Act" in the matter preceding paragraph (1) and inserting in lieu thereof "title 11, United States Code,".

EXPLANATION/JUSTIFICATION

Section 5(b)(4) of SIPA now provides for the removal of the entire liquidation proceeding from the district court "to the court of the United States in the same judicial district having jurisdiction over cases under title 11 of the United States Code." Recently the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law No. 98-353, 98 Stat. 333 ("Bankruptcy Amendments Act") took bankruptcy jurisdiction from the bankruptcy courts and gave it the district courts, thus making the removal provision under SIPA, if read literally, a nullity. The amendment of section 5(b)(4) will avoid this problem.

The withdrawal provisions of section 157(d) of title 28 of the United States Code could be interpreted to allow the piecemeal withdrawal of claims filed in a liquidation proceeding and thereby play havoc with the trustee's review of claims and frustrate the Congressional intent that the SIPA trustee cause prompt satisfaction of customer claims. Indeed, since claims under SIPA can be viewed as requiring consideration of both title 11 and title 15 of the United States Code, section 157(d) could require district court review of hundreds or thousands of claims in SIPA proceedings. This would be disastrous to the courts and the claimants. The amendment of section 5(b)(4) of SIPA would avoid this problem. The withdrawal provision would permit the withdrawal of any part of the liquidation proceeding which, under applicable law other than title 11 of the United States Code or SIPA, requires trial by jury.

Section 5(d) of SIPA needs to be amended to allow SIPC to participate in State court proceedings which will occur because newly amended sections 1334(c) (1) and (2) of title 28 of the United States Code mandate the abstention of the district courts on State law claims or causes of action related to a case under title 11 of the United States Code.

Section 10(e) of SIPA needs to be amended to take into account the jurisdictional changes caused by the newly amended section 1334(a) of title 28 of the United States Code.

The amendment of section 16 of SIPA makes a technical conforming change only.

SECTION-BY-SECTION ANALYSIS

SECTION 1—REFERENCE TO BANKRUPTCY JUDGES

Section 1 of the bill amends section 5(b)(4) of SIPA to carry out Congress' clear intention that all questions arising in SIPA liquidation proceedings be handled by bankruptcy judges rather than by district judges. See, H.R. Rep. No. 95-746, 95th Congress, 1st Session 27 (1977); S. Rep. No. 95-763, 95th Congress, 2d Session 10 (1978). The courts, too, believe SIPA liquidation proceedings should be before bankruptcy judges. See, e.g. Exchange National Bank of Chicago v. Wyatt, 517 F. 2d 453, 458 (2d Cir. 1975) ("This is the kind business [oversight of trustee's review of claims] for which bankruptcy judges have developed special expertness and administrative skills and which Congress did not intend to dump on already overburdened district courts without needed clerical and other facilities."). This amendment will remove any confusion that may exist over the jurisdictional changes effected by the Bankruptcy Amendments and Federal Judiciary Act of 1984, Public Law No. 98-353, 98 Stat. 333.

Section 1, of the bill also amends section 5(b)(4) of SIPA by limiting the withdrawal powers of the district courts. Notwithstanding the withdrawal provisions of section 157(d) of title 28 of the United States Code, only the entire liquidation proceeding (with one exception) can be withdrawn. This will avoid piecemeal withdrawal which could disrupt the liquidation proceeding, play havoc with the trustee's review of claims, and frustrate the Congressional intent that the SIPA trustee cause prompt satisfaction to claimants by the delivery of securities and, where necessary, funds advanced by SIPC. This section does allow for withdrawal of any part of the liquidation proceedings which, under applicable law other than title 11 of the United States Code or SIPA, requires trial by jury.

SECTION 2—SECURITIES INVESTOR PROTECTION CORPORATION PARTICIPATION

Section 2 of the bill amends section 5(d) of SIPA by providing for SIPA's participation in state court proceedings. This amendment recognizes that more matters will be heard in State courts because newly amended sections 1334(c) (1) and (2) of title 28 of the United States Court mandate the abstention of the district courts on State law claims or causes of action related to a case under title 11 of the United States Code. Such a provision would not raise any Constitutional question because "[i]n enacting SIPA, Congress drew upon the commerce power and the bankruptcy power." Exchange National Bank of Chicago v. Wyatt, 517 F. 2d 453, 459 (2d Cir. 1975).

SECTION 3—JURISDICTION OF DISTRICT COURTS

Section 3 of the bill amends section 10(e) of SIPA to reflect newly amended section 1334(a) of title 28 of the United States Code.

SECTION 4—TECHNICAL AMENDMENT

This section makes a conforming change only.●

By Mr. RIEGLE:

S. 923. A bill to establish a Department of International Trade and Industry as an Executive Department of the Government of the United States, and for other purposes; to the Committee on Governmental Affairs.

DEPARTMENT OF INTERNATIONAL TRADE AND INDUSTRY

Mr. RIEGLE. Mr. President, over the past 3 weeks both the House and the Senate have passed resolutions urging the President to act against the unfair trade practices of the Japanese. Soon, we may consider legislation requiring that he do so. But Japan's trade practices are only one part of the problem. As we take long-needed action to address the trade practices of Japan we must not lose sight of the broader goal of regaining American competitiveness.

Japan is taking unfair advantage of our market while continuing to keep out American exports. But the real danger is that Japan is setting a course that others are following. Korea, Taiwan, and other newly indus-

trializing nations are adopting the Japanese model. These countries are embarking on single-minded nationalistic policies aimed at a continual increase in exports, primarily to the United States.

The challenge is not simply to open foreign markets but to ensure that American industry is fully able to compete in them. Over the past few years it has become painfully clear that we, as a Nation, are unable to take decisive and coherent action in American trade policy. Instead we have relied on ad-hoc policies that are usually too little too late.

The administration has kept trade policy on the back burner until the problems have gotten too big to ignore.

We must change U.S. trade and economic policy to reflect the new realities of the international economic system. U.S. policy must be based on a coordinated effort to promote the competitiveness of American industry while working to keep world markets open.

CURRENT U.S. TRADE POLICY SYSTEM IS NOT WORKING

In the last 6 months alone, two Presidential commissions have found that the current U.S. system for setting trade policy is not equipped to deal with the new realities of the international economy.

The President's Commission on International Private Enterprise, release in December, found that: "In order to cope with the new and changing circumstances, a new institutional structure is needed to ensure better formulation and coordination of U.S. international and domestic economic policy."

The President's Commission on Industrial Competitiveness, released in February, found that: "Fragmented trade policy responsibility in the United States seriously limits our ability to respond to growing volume and complexity of international trade."

Over the past few years many reports on the long-term competitiveness of the United States, have been issued by a wide variety of groups. They have come from organized labor, leading companies of all sizes, public policy foundations and political action groups. One common thread has run through the nearly 20 reports issued over the past 30 months. They all express alarm over the confusion in U.S. trade policymaking, and they all call for better coordination of the various actions that influence business activities and U.S. participation in the global marketplace.

I believe a prime reason why we do not have a clear U.S. trade policy is that we do not have a single authoritative voice to articulate such a policy.

In the current system, responsibility for trade policy is divided among 25 different agencies, none of whom is clearly the leader. By law, the U.S. Trade Representative is the President's primary adviser on trade. But a number of high level officials, many with full cabinet status also deal with our trading partners as the spokesman on U.S. trade policy.

Trade policy is made in one department and expected to be carried out in another. The Office of the U.S. Trade Representative has responsibility for setting policy and negotiating trade agreements with foreign nations. But these policies and agreements must then be implemented in a number of other departments including, the Department of Commerce, the Department of the Treasury, the International Trade Commission and the Department of Agriculture.

The Trade Representative is responsible for representing the interests of American industry, but is not responsible for analyzing the competitive status of these industries.

Such fragmentation makes a single coherent trade policy impossible. As we flounder in search of a trade policy the competitiveness of American industry has been ignored. If we wait to act our economy will soon suffer irreparable damage.

THE EFFECTS OF DISORGANIZATION

The recent negotiations with Japan give the clearest picture of the effects of the fragmentation of U.S. trade policy. No less than five different American agencies have taken roles in the negotiations.

The National Security Council and the Department of State handled the January summit between President Reagan and Prime Minister Nakasone, and currently oversee the sectoral negotiations agreed to at that meeting.

The trade negotiations themselves are headed by four different agencies. The Department of Agriculture is the lead agency in the negotiations on forest products. The U.S. Trade Representative is the lead agency for electronics and medical equipment. And the Department of Commerce and the USTR work together on telecommunications.

The "market-oriented sector selective," or "moss," approach of the negotiations was proposed by the Department of the Treasury after their negotiations with the Japanese on financial markets.

While these negotiations were going forward the Trade Policy Council, chaired by the USTR, the Cabinet Council on Commerce and Trade, chaired by the Secretary of Commerce, and the Senior Interagency Group—International Economic Policy chaired by the Treasury were all considering whether or not the Japanese restraint on auto exports should be continued.

Perhaps we shouldn't be surprised—with so many people trying to make policy—that American officials finally decided to let the Japanese make key decisions about our future. We gave up on the single biggest part of the $37 billion trade deficit with Japan. Why should the Japanese have taken our negotiators seriously?

Recent news reports make it even clearer that Prime Minister Nakasone could not understand the U.S. position because there was no clear U.S. position.

As a result, there has been little progress in any of the negotiations.

In this absence of a strong, coherent trade policy, Congress has tried to fill the void. We must develop a mechanism to deal with trade and national competitiveness issues on a regular and coordinated basis.

THE DEPARTMENT OF INTERNATIONAL TRADE AND INDUSTRY

Today I am introducing legislation that will establish a Department of International Trade and Industry to make American competitiveness in world trade a national priority guided by a national policy. This bill is similar to the trade reorganization bill that was reported out of the Senate Committee on Governmental Affairs and supported by the administration.

The bill would transfer all of the USTR and most of the Commerce Department to a new department which would be responsible for both international and domestic commerce and competitiveness.

The office of the USTR would be a part of the office of the Secretary of International Trade and Industry, who would be the trade representative and top spokesman for U.S. trade policy. A deputy Secretary and three under secretaries would serve under him.

The Department would be responsible for U.S. trade policy and the broad range of issues that affect competitiveness. An Office of Productivity would oversee the activities of the Patent Office, the National Technical Information Service, and the National Telecommunications Office. This office could also be used by the Secretary to assist in implementing the Stevenson-Wydler Act of 1980 to encourage research on new manufacturing technologies and help business utilize such innovations.

An office of Small Business Assistance would be established to provide information and technical assistance to small business to foster increased exports.

This legislation would establish an Office of Competitive Analysis to monitor and analyze trends in American industry on a sector-by-sector basis. OCA would report to Congress annually on problems or opportunities facing specific sectors of American industry.

The Secretary of DITI would be empowered to establish advisory councils of business, labor, and Government representatives to make recommenda-

tions on how industry can meet the challenges found by OCA. These councils would be set up on a temporary basis, and their recommendations would be nonbinding. But they would help foster the kind of cooperative attitude this country would need to address the challenges of adjustment to the new international marketplace.

The President would be required to issue International Economic Impact Statements on all proposed rules, regulations, and laws.

This bill would also establish a top level Economic Security Council within the White House. Members of the ESC would be designated by the President. It would provide the coordination and guidance for national and international business and economic policy that the National Security Council provides in defense and foreign affairs.

Both Secretary of Commerce Baldrige and USTR Brock agree on the need for just such a coordinating body with direct access to the President.

The President's Task Force on International Private Enterprise has recommended that "the President establish an Economic Security Council [ESC] to formulate and coordinate domestic and international economic policy."

The President's Commission on Industrial Competitiveness recommended that the establishment of "a more effective coordinating mechanism under the direction of the President for integrating, balancing, and reconciling differences between domestic and international policies—for example, trade, economic, national security, foreign relations * * *."

The provision which establishes the ESC is based on the language which set up the National Security Council in 1947 and was also used as the basis of the National Trade Council Act proposed earlier this year by Senator HOLLINGS.

Because of the complex interaction of domestic and international economic affairs, the ESC would have a broad mandate to coordinate all policies that affect business and U.S. competitiveness—of which trade policy is only one part.

A BIPARTISAN CALL TO ACT

Mr. President, the need to reorganize this Nation's process for making trade policy could not be clearer or more urgent. I believe that there now is strong bipartisan support for reform.

Last session, with the active support of President Reagan, Secretary Baldrige, Senators ROTH and EAGLETON worked together to bring a trade reorganization bill out of the Senate Governmental Affairs Committee.

It is my hope that introduction of this bill today will get that legislative iniative back on a fast track. I believe it is a sound, vigorously needed bill, that deserves the support of the President and the Congress.

By Mr. THURMOND (for himself, Mrs. HAWKINS, Mr. BIDEN, Mr. COCHRAN, Mr. DENTON, Mr. EAST, Mr. KENNEDY, Mr. LAXALT, Mr. MATHIAS, Mr. METZENBAUM, Mr. SPECTER, Mr. ABDNOR, Mr. ANDREWS, Mr. BURDICK, Mr. DOLE, Mr. DOMENICI, Mr. GRAMM, Mr. HEINZ, Mr. HOLLINGS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mr. KERRY, Mr. LAUTENBERG, Mr. LEVIN, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCLURE, Mr. NUNN, Mr. PRYOR, Mr. ROTH, Mr. SASSER, Mr. STEVENS, Mr. SYMMS, Mr. WARNER, Mr. WILSON, and Mr. ZORINSKY):

S.J. Res. 110. Joint resolution designating the month of May, 1985 as "National Child Safety Awareness Month"; to the Committee on the Judiciary.

NATIONAL CHILD SAFETY AWARENESS MONTH

Mr. THURMOND. Mr. President, today, I, along with 35 of my colleagues, including Senator PAULA HAWKINS, the ranking minority member, and 7 other distinguished members of the Judiciary Committee, am introducing legislation to designate the month of May 1985, as "National Child Awareness Month."

More than 1.5 million children have been reported missing in the United States. Many of these children may never be found; many may become the innocent victims of physical and/or sexual abuse, as recently portrayed in the television drama "Adam."

The beginning of a national, coordinated effort to combat this problem took place in the 97th Congress with the passage of the Missing Children Act. This was continued during the final days of the 98th Congress, when the Comprehensive Crime Control Act of 1984—Public Law 98-473—containing the Missing Children's Assistance Act, was passed by both Houses of Congress and signed by President Reagan. Both of these measures have facilitated the investigation and prosecution of crimes involving missing and exploited children and the identification of deceased missing children.

In addition, there is now a national clearinghouse, the National Center for Missing and Exploited Children, and a toll-free hotline to centralize the efforts to locate missing children. The toll-free number—1-800-843-5678—is available for information about, and inquiries regarding, missing children. The information received through the hotline is disseminated to appropriate law enforcement agencies. The National Center provides other assistance, such as educational child safety literature and materials about identification procedures, to help combat the tragedy of missing children.

Much more needs to be done. Establishing May as "Child Safety Awareness Month" will bring nationwide attention to the problem of missing and exploited children. During this month, attention should be focused on preventive programs—voluntary fingerprinting, dental charting, obtaining hair samples, photographing, and compiling vital statistics of children. Involving parents, children, volunteer groups, and whole communities will aid State and national law enforcement officials in locating missing children.

The protection, safety, and security of all children should be one of our highest priorities. Therefore, I urge my colleagues to take an active role in establishing educational projects in their States during May to assist in the safeguarding of our children—our greatest natural resource and the future of our country.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 110

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas more than 1.5 million children have been reported missing in the United States;

Whereas many of these children are never found;

Whereas missing children are often innocent victims of physical and sexual abuse;

Whereas many local volunteer groups already are working enthusiastically to promote child safety;

Whereas the Missing Children Act and the Missing Children's Assistance Act have facilitated the investigation and prosecution of crimes involving missing and exploited children;

Whereas there is now a national clearinghouse, The National Center for Missing and Exploited Children, and a toll-free hotline to centralize the efforts to locate missing children;

Whereas The National Center for Missing and Exploited Children provides educational child safety materials and information about identification procedures, such as voluntary fingerprinting, dental charting and photographing of children;

Whereas information received through the toll-free hotline is disseminated to appropriate law enforcement agencies;

Whereas the protection, safety, and security of all children should be one of our highest priorities;

Whereas it is essential that we continue to increase public awareness and provide information and assistance to combat and prevent the increasing problem of missing and exploited children: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the month of May, 1985, as "National Child Safety Awareness Month," and to call upon Federal, State, and local government agencies, and the

people of the United States to observe the month with appropriate programs, activities, and ceremonies for the better protection, security, and safety of all children.

By Mr. DIXON:

S.J. Res. 111. Joint resolution to designate the month of October 1985, as "National Spina Bifida Month"; to the Committee on the Judiciary.

NATIONAL SPINA BIFIDA MONTH

Mr. DIXON. Mr. President, again this year I am introducing a joint resolution to designate the month of October as "National Spina Bifida Month."

The purpose of this joint resolution is to focus public attention on this birth defect of the spinal column. Spina bifida is the most common crippler of newborns, resulting when one or more bones in the vertebrae fail to close completely during prenatal development.

The cause of spina bifida is not known. However, it appears to be the result of multiple environmental and genetic factors. Studies have shown a high occurrence of spina bifida in urban areas and more births during certain months of the year.

Spina bifida occurs more frequently than muscular dystrophy, multiple sclerosis, polio, and cystic fibrosis combined. It occurs in one of every 1,000 births, often accompanied by hydrocephalus—a condition involving improper circulation and accumulation of fluid in the brain. Spina bifida results in varying degrees of paralysis, loss of sensation in the lower limbs, and in bowel and bladder complications.

Although most of the March of Dimes and Easter seal poster children have spina bifida, many people have not heard of the defect. Even today, only a few cities in the United States have proper care centers and specialized professionals that can provide the most effective, aggressive treatment for children and adults with spina bifida.

I am confident that activities surrounding October 1985, "National Spina Bifida Month" will heighten public awareness of this crippling birth defect. Additionally, I am confident that the activities will generate public awareness of the much improved treatment available to infants born with spina bifida.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD and I urge its prompt approval.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 111

Whereas spina bifida is a birth defect in the spinal column which occurs in one of every one thousand births in the United States;

Whereas spina bifida is the most common crippler of newborns, resulting when one or more bones in the back (vertebrae) fail to close completely during prenatal development;

Whereas while the cause of spina bifida is not known, it appears to be the result of multiple environmental and genetic factors;

Whereas although most of the March of Dimes and Easter Seal poster children have spina bifida, many people have not heard of the defect;

Whereas only a few cities in the United States have proper care centers and specialized professionals that can provide the most effective, aggressive treatment for children and adults with spina bifida; and

Whereas an increase in the national awareness of the problem of spina bifida may stimulate the interest and concern of the American people, which may lead, in turn, to increased research and eventually to the discovery of a cure for spina bifida: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of October 1985 is designated "National Spina Bifida Month" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

By Mr. PELL:

S.J. Res. 112. Joint resolution to authorize and request the President to call a White House Conference on Library and Information Services to be held not later than 1989, and for other purposes; to the Committee on Labor and Human Resources.

WHITE HOUSE CONFERENCE ON LIBRARY AND INFORMATION SERVICES

● Mr. PELL. Mr. President, during this 28th annual observance of National Library Week (April 14–20), it seems altogether fitting and proper that I take this opportunity to introduce legislation calling for the second White House Conference on Library and Information Services to be held in 1989. You may recall that I announced my intention to do this last August 3d when I placed in the RECORD the Department of Education's publication, "Alliance for Excellence: Librarians Respond to a Nation at Risk." There was much food for thought in that document, highlighting the role of our Nation's libraries in helping to foster excellence in education and in providing adequate, up-to-date resources for a learning society.

Now, during National Library Week, we are all particularly conscious of the budgetary dilemma that besets us, with a $200 billion deficit confronting us. We note that libraries, too, at every level are beleaguered by budgetary problems. As a matter of fact, they suffered from double-digit inflation long before the rest of the country, in terms of trying to keep pace with rising book and periodical subscription costs. And when the rest of us worried over gasoline shortages, they too felt the pinch in their pocketbooks when the prices soared for petrochemical-based products, such as films, microfiche, and audio tapes. More recently, libraries have been turning to automated circulation systems, computerized resource, sharing networks, and other high tech devices to modernize their services and to increase productivity in order to keep up with increasingly sophisticated user demands.

Accordingly, it appears none to soon for library users, civic leaders, and lawmakers at all levels to join forces in working with librarians and suppliers of library and information service products to consider what new directions we expect our libraries to take in the future. Because so much information becomes available only online and for a fee-per-use, the library role in guiding users to the most appropriate source in whatever format and to providing access to those who could not otherwise afford needed information, will be crucial.

Although I do not for 1 minute believe that books are going to disappear, I do envision libraries widely utilizing satellite receivers and optical discs and microwave devices to help resolve storage and preservation problems as well as to facilitate delivery of services to their patrons in remote areas and those precluded from using the library because of age or handicap.

It is important to keep in mind that a significant aspect of the White House Conference process is the preceding series of local town hall meetings, speakouts, and Governors' conferences held in each of the States to help our citizens assess and better use the resources we have on a nationwide basis.

I would eagerly invite those of you who share my interest and concern, that all our citizens have access to quality library and information services to join me in cosponsoring this legislation calling for a second White House Conference on Library and Information Services in 1989.●

By Mr. CHILES:

S.J. Res. 113. Joint resolution commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny; to the Committee on the Judiciary.

BAY OF PIGS INVASION COMMEMORATION

● Mr. CHILES. Mr. President, I introduce this resolution in commemoration of the 24th anniversary of the Bay of Pigs attempted liberation of Cuba.

On this day, we honor and pay tribute to the men of the 2506th Brigade. These brave men who fought and died on that day never questioned the almost insurmountable odds they faced. They set forth in their just cause with dedication and courage. And theirs was a cause many still long for today—the liberation of a beloved homeland, the resurgence of a free and independent Cuba. This patriotic effort commands nothing less than utmost respect from all.

We must never forget the cause for which these men so courageously fought. The spirit of the 2506th Brigade should be contagious.

While it is well known that these men lacked the resources to successfully complete their mission, they proved to be amply equipped with courage and bravery. The final outcome of the Bay of Pigs liberation effort was unsuccessful, but the men who so gallantly fought in the invasion were genuine heroes. They are true Cuban patriots who risked their lives and in some cases sacrificed their lives for a free Cuba.

On this day, with this resolution, we commemorate the spirit of the 2506th Brigade and the bravery of these true Cuban heroes. Mr. President, I ask unanimous consent that the text of this resolution be printed at this point in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 113

Whereas April 17, 1985, marks the twenty-fourth anniversary of the first day of the Bay of Pigs attempted liberation of Cuba by the heroic 2506 Brigade, a battle which entailed three days of fighting at a narrow strand of mangrove, bunch grass, coral head, and sand lying thirty miles from the towns of Giron and Playa Larga and bounded by the Bay of Pigs and the Cienga de Zapata swamp;

Whereas, on such day in 1961, the fourteen hundred gallant and intrepid men who made up the brave 2506 Brigade were ill-equipped but possessing immeasurable spirit, courage, and determination, sought in the tradition of the great liberators Jose Marti and Simon Bolivar to liberate from Communist tyranny the beautiful isle of Cuba and reestablish freedom and democracy for the people of Cuba, that great island lying so close to the United States; and

Whereas the patriotic, noble, and sacrificial effort of the 2506 Brigade to liberate Cuba as in the same patriotic spirit that prompted other courageous and intrepid men to liberate the American colonies from a foreign monarch and establish freedom and democracy in America; and

Whereas the people of the United States proudly commend those courageous warriors who fight for the cause of freedom and justice anywhere in the world and the Congress wishes to express the commendation of the American people to the gallant warriors of the 2506 Brigade who made such an historic effort to establish freedom and democracy in Cuba: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 17, 1985, be commemorated as the twenty-fourth anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.●

ADDITIONAL COSPONSORS

S. 6

At the request of Mr. CRANSTON, the names of the Senator from Maryland [Mr. SARBANES] and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of S. 6, a bill to amend title 38, United States Code, to make certain improvements in Veterans' Administration health-care programs, and for other purposes.

S. 58

At the request of Mr. DANFORTH, the names of the Senator from Florida [Mrs. HAWKINS] and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of S. 58, a bill to amend the Internal Revenue Code of 1954 to increase research activities, to foster university research and scientific training, and to encourage the contribution of scientific equipment to institutions of higher education.

S. 84

At the request of Mr. INOUYE, the names of the Senator from Montana [Mr. MELCHER], the Senator from Tennessee [Mr. SASSER], the Senator from North Dakota [Mr. BURDICK], the Senator from Nevada [Mr. HECHT], the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Maine [Mr. COHEN], the Senator from South Dakota [Mr. ABDNOR], the Senator from Florida [Mr. CHILES], and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of S. 84, a bill to incorporate the Pearl Harbor Survivors Association.

S. 281

At the request of Mr. PRYOR, the name of the Senator from Indiana [Mr. LUGAR], was added as a cosponsor of S. 281, a bill to amend the Internal Revenue Code of 1954 to add a section dealing with public safety vehicles.

S. 412

At the request of Mr. GOLDWATER, the name of the Senator from Maryland [Mr. MATHIAS], was added as a cosponsor of S. 412, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 434

At the request of Mr. D'AMATO, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of S. 434, a bill to extend the authorization of the Robert A. Taft Institute Assistance Act.

S. 631

At the request of Mr. CHAFEE, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 631, a bill to amend the Securities Exchange Act of 1934.

S. 632

At the request of Mr. CHAFEE, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 632, a bill to amend the Internal Revenue Code of 1954 to require a mandatory section 338 election in hostile stock takeovers, and for other purposes.

S. 633

At the request of Mr. D'AMATO, the names of the Senator from Pennsylvania [Mr. HEINZ] and the Senator from Pennsylvania [Mr. SPECTER] were added as cosponsors of S. 633, a bill to continue the authorization for Federal Crime Insurance under the National Housing Act.

S. 657

At the request of Mr. THURMOND, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 657, a bill to establish the Veterans' Administration as an executive department.

S. 725

At the request of Mr. BENTSEN, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 725, a bill to authorize appropriations to carry out the Endangered Species Act of 1973 during fiscal years 1986, 1987, 1988, 1989, and 1990.

S. 728

At the request of Mr. CHAFEE, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 728, a bill to prohibit the entry of Japanese telecommunications products until Japanese markets are open to U.S. telecommunications products.

S. 744

At the request of Mr. COCHRAN, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 744, a bill to amend the Agriculture and Food Act of 1981 to provide protection for agricultural purchasers of farm products.

S. 746

At the request of Mr. CHILES, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 746, a bill to require the National Drug Enforcement Policy Board to provide a comprehensive assessment of the designer drug problem and make recommendations to Congress for necessary legislation.

S. 766

At the request of Mr. CHILES, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 766, a bill entitled the "International Narcotics Control Act of 1985."

S. 768

At the request of Mr. PRESSLER, the names of the Senator from Alaska [Mr. MURKOWSKI] and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of S. 768, a bill to authorize the President of the United States to award a Congressional Gold Medal to Jan C. Scruggs in recognition of his work on behalf of Vietnam veterans, and to authorize the Secretary of the Treasury to sell bronze duplicates of such medal.

S.770

At his own request, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 770, a bill to amend the Tariff Sched-

ules of the United States to impose a surcharge tariff on all imports from Japan.

S. 825

At the request of Mr. PRESSLER, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 825, a bill to amend the Immigration and Nationality Act to provide for a program for the waiver of the visa requirement in the case of nonimmigrant tourists from certain countries.

S. 837

At the request of Mr. HEINZ, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 837, a bill to amend the Social Security Act to protect beneficiaries under the health care programs of that act from unfit health care practitioners, and otherwise to improve the antifraud provisions of that act.

S. 843

At the request of Mr. COCHRAN, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 843, a bill to amend the Agricultural Act of 1949 to provide support for the 1986 through 1989 crops of certain agricultural commodities, to promote the export of U.S. agricultural commodities, and for other purposes.

S. 887

At the request of Mr. DOLE, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 887, a bill to amend the Internal Revenue Code of 1954 to extend the deduction for expenses incurred in connection with the elimination of architectural and transportation barriers for the handicapped and elderly.

SENATE JOINT RESOLUTION 35

At the request of Mr. GORTON, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of Senate Joint Resolution 35, a joint resolution to authorize and request the President to issue a proclamation designating April 21 through April 27, 1985, as "National Organ Donation Awareness Week."

SENATE JOINT RESOLUTION 42

At the request of Mr. INOUYE, the name of the Senator from Hawaii [Mr. MATSUNAGA] was added as a cosponsor of Senate Joint Resolution 42, a joint resolution to consent to an amendment enacted by the legislature of the State of Hawaii to the Hawaiian Homes Commission Act.

SENATE JOINT RESOLUTION 46

At the request of Mr. MATSUNAGA, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Joint Resolution 46, a joint resolution relating to NASA and cooperative Mars exploration.

SENATE JOINT RESOLUTION 47

At the request of Mr. CRANSTON, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of Senate Joint Resolution 47, a joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week."

SENATE JOINT RESOLUTION 66

At the request of Mr. D'AMATO, the names of the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Iowa [Mr. GRASSLEY], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of Senate Joint Resolution 66, a joint resolution designating June 14, 1985, as "Baltic Freedom Day."

SENATE JOINT RESOLUTION 83

At the request of Mr. DOLE, the names of the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. SIMON], and the Senator from Oklahoma [Mr. NICKLES] were added as cosponsors of Senate Joint Resolution 83, a joint resolution designating the week beginning on May 5, 1985, as "National Asthma and Allergy Awareness Week."

SENATE JOINT RESOLUTION 92

At the request of Mr. DENTON, the names of the Senator from Kansas [Mr. DOLE], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Georgia [Mr. NUNN], the Senator from California [Mr. CRANSTON], the Senator from Indiana [Mr. LUGAR], the Senator from Minnesota [Mr. BOSCHWITZ], and the Senator from Florida [Mrs. HAWKINS] were added as cosponsors of Senate Joint Resolution 92, a joint resolution to designate October 1985 as "National Foster Grandparents Month."

SENATE JOINT RESOLUTION 93

At the request of Mr. METZENBAUM, the names of the Senator from Kansas [Mr. DOLE], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from North Dakota [Mr. ANDREWS], the Senator from South Carolina [Mr. THURMOND], the Senator from Alabama [Mr. DENTON], the Senator from Connecticut [Mr. WEICKER], the Senator from Georgia [Mr. MATTINGLY], the Senator from Nevada [Mr. LAXALT], the Senator from Florida [Mrs. HAWKINS], the Senator from Vermont [Mr. STAFFORD], the Senator from Maryland [Mr. SARBANES], the Senator from North Dakota [Mr. BURDICK], the Senator from Nebraska [Mr. ZORINSKY], the Senator from Massachusetts [Mr. KERRY], the Senator from South Carolina [Mr. HOLLINGS], the Senator from California [Mr. CRANSTON], the Senator from Georgia [Mr. NUNN], the Senator from Michigan [Mr. RIEGLE], the Senator from Arizona [Mr. DECONCINI], the Senator from Arkansas [Mr. BUMPERS], the Senator from New Jersey [Mr. BRADLEY], the Senator from Hawaii [Mr. INOUYE], the Senator from Ohio [Mr. GLENN], the Senator from Louisiana [Mr. JOHNSTON] and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of Senate Joint Resolution 93, a joint resolution to designate the month of May 1985 as "Better Hearing and Speech Month."

SENATE JOINT RESOLUTION 98

At the request of Mr. D'AMATO, the names of the Senator from Oklahoma [Mr. BOREN] and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Joint Resolution 98, a joint resolution condemning the passage of Resolution 3379, in the U.N. General Assembly on November 10, 1975, and urging the U.S. Ambassador and U.S. delegation to take all appropriate actions necessary to erase this shameful resolution from the record of the United Nations.

SENATE JOINT RESOLUTION 103

At the request of Mr. PELL, the names of the Senator from New York [Mr. MOYNIHAN], the Senator from South Carolina [Mr. THURMOND], and the Senator from Minnesota [Mr. BOSCHWITZ] were added as cosponsors of Senate Joint Resolution 103, a joint resolution to designate the month of May 1985, as "Very Special Arts U.S.A. Month."

SENATE CONCURRENT RESOLUTION 20

At the request of Mr. CRANSTON, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of Senate Concurrent Resolution 20, a concurrent resolution expressing the sense of the Congress that payments by the Veterans' Administration to veterans as compensation for service-connected disabilities should remain exempt from Federal income taxation.

SENATE CONCURRENT RESOLUTION 23

At the request of Mr. BAUCUS, the names of the Senator from South Carolina [Mr. THURMOND], the Senator from Idaho [Mr. SYMMS], and the Senator from Mississippi [Mr. STENNIS] were added as cosponsors of Senate Concurrent Resolution 23, a concurrent resolution to express the sense of the Congress concerning the reduction of trade barriers by Japan.

SENATE RESOLUTION 82

At the request of Mr. D'AMATO, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of Senate Resolution 82, a resolution to preserve the deduction for State and local taxes.

SENATE RESOLUTION 112

At the request of Mr. COHEN, the names of the Senator from Iowa [Mr. HARKIN] and the Senator from Utah [Mr. HATCH] were added as cosponsors of Senate Resolution 112, a resolution relating to bilateral discussions between the United States and the Soviet Union to ban chemical weapons.

AMENDMENT NO. 24

At the request of Mr. CRANSTON, the names of the Senator from Maryland [Mr. SARBANES] and the Senator from Hawaii [Mr. INOUYE] were added as cosponsors of amendment No. 24 intended to be proposed to Senate Concurrent Resolution 32, an original concurrent resolution setting forth the congressional budget for the U.S. Government for the fiscal years 1986, 1987, and 1988, and revising the congressional budget for the U.S. Government for the fiscal year 1985.

SENATE CONCURRENT RESOLUTION 40—FAVORING A COMMISSION TO STUDY THE TRADE DEFICIT AND RELATED PROBLEMS

Mr. COCHRAN submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 40

Whereas the continuing imbalance of foreign currencies with the United States dollar is a principal factor in undermining United States trade competitiveness;

Whereas the United States trade deficit grew to a record $123,300,000,000 in 1984;

Whereas with the appreciation of the dollar by more than 40 percent against a trade-weighted average of fifteen major currencies, United States exports are under pressure in all segments of the economy;

Whereas the trade deficit has caused the loss of millions of jobs and severe dislocation in many areas of the United States economy;

Whereas the strength of the dollar is motivating United States manufacturers to shift production abroad or to purchase components and finished products from foreign suppliers;

Whereas United States exporters have been forced to abandon overseas markets while foreign producers are gaining a foothold in the United States market;

Whereas the serious imbalance of trade threatens the continuing economic recovery which the United States has experienced over the last two years;

Whereas domestic policy decisions must include a full consideration of the international competitive position of the United States; and

Whereas the trade deficit and related problems require immediate attention and a comprehensive plan of action: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should appoint a Commission which shall—

(1) be composed of bipartisan members selected from government, private industry, and educational institutions;

(2) make a full study of the United States trade deficit and related problems; and

(3) within six months after the formation of such Commission, submit a report including findings and recommendations for a plan of action, to the President.

● Mr. COCHRAN. Mr. President, today I am submitting a concurrent resolution urging the President to appoint a bipartisan commission to study the imbalance of currency values and other problems associated with the current trade deficit.

The continuing imbalance of foreign currencies with the U.S. dollar is a principal factor in undermining U.S. trade competitiveness abroad. U.S. exports are under extreme pressure in all segments of the economy. With the appreciation of the dollar by more than 40 percent against a trade-weighted average of 15 major currencies, U.S. exporters are losing their overseas markets while foreign producers gain footholds on U.S. markets. The strength of the dollar is likewise motivating domestic manufacturers to shift production abroad, causing the loss of millions of jobs and severe dislocation in many areas of the U.S.

The trade problem requires the immediate attention of the best minds in our Nation. That is why I am calling upon the President to appoint a bipartisan commission, composed of individuals from both the public and private sectors, to study the problem and to report its findings and recommendations to the President within 6 months of its formation.

It is essential that domestic policy decisions are made with a full consideration of our international competitive position and a full understanding of alternatives for addressing the trade problem. I am confident that the findings and recommendations of this bipartisan commission would provide valuable assistance in efforts to relieve pressure on U.S. exporters and to ensure continued economic recovery.

I hope my colleagues will join me by cosponsoring this legislation and by giving it prompt approval.●

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, April 16, 1985, to conduct a hearing on International Organizations and Multilateral Diplomacy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INVESTIGATIONS

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations, of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Tuesday, April 16, 1985, to conduct a hearing on the U.S. Government's Personnel Security System.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

REBUTTAL TO SENATOR GRASSLEY'S PROPOSED DEFENSE FREEZE

● Mr. GOLDWATER. Mr. President, certainly there is more than just cause for Members of Congress and, in fact, for people all across this country, to be upset by the continuing revelations of bad practice on the part of some, I say again, some, of the large firms doing business with the Pentagon.

Senator GRASSLEY of Iowa has been one of the leaders in condemning these people, and I have always supported his approach. However, some time ago, the Wall Street Journal ran an article by Senator GRASSLEY in which there appeared some errors and, wanting to correct those errors, I wrote a piece in answer and submitted it to the paper. The paper has not seen fit to use this article so, wanting to keep the record clear, as I have said before, I will insert it into the CONGRESSIONAL RECORD in hopes that editors across this country can find corrections for the mistakes that were made in the Journal article.

I ask that my reply to Senator GRASSLEY's article be printed at this point in my remarks.

The reply follows:

[From the Wall Street Journal, Mar. 14, 1985]

DRAFT REPLY FOR SENATOR B.W. GOLDWATER TO ARTICLE BY SENATOR C.E. GRASSLEY "A FREEZE IS JUST WHAT THE PENTAGON NEEDS"

On March the fourteenth, the Wall Street Journal published an article by Senator Charles Grassley entitled "A Freeze is Just What the Pentagon Needs". In his article, Senator Grassley argued first that a freeze on defense spending this year is necessary to reduce the federal deficit. His major second point was that a defense freeze would not weaken the security of our nation.

Senator Grassley is dead wrong on both counts. A defense freeze would be financially short sighted because it would actually increase defense costs in the future. More importantly, a freeze would dangerously disrupt all the progress we've made in rebuilding our nation's defenses.

Senator Grassley is not a member of the Armed Services Committee, so he does not have access to all the information required to discuss the defense budget. This may explain why he fails to understand the consequences of a defense freeze for our national security. But his irresponsible use of misleading statistics to bolster patently unfounded arguments is inexcusable. Senator Grassley does his state and our nation a disservice when he passes off his simplistic, self serving advocacy as reasoned analysis.

How can Senator Grassley suggest, for example, that somehow this nation's defenses have grown weaker, when exactly the opposite is so clearly evident? As Chairman of the Senate Armed Services Committee, I have just completed a series of hearings on the current readiness and future needs of our armed forces. Leaders of the Army,

Navy, Air Force, and Marines all said that, by virtually any measure, our military forces today are better manned, better equipped, better trained and more combat ready than ever before. But professional opinions aside, the objective facts further contradict Senator Grassley's arguments at every turn.

Take his assertion that during that 1982-1985 period, we have been buying fewer weapons. For many items, such as munitions, this is patently false. But even so, how many items we buy is not always a clear indication of how much capability we're getting for our money. Quality often matters as much as quantity, as in the case of the Army's Bradley Fighting Vehicle. For years the Army bought comparatively large numbers of their M113 Armored Personnel Carriers, in part because they were nursing along an inadequate combat vehicle. In short, they were substituting quantity for quality. Now that the superior Bradley Vehicle is available, we are buying less of them, but getting more capability through higher quality.

Senator Grassley also says there has been little force modernization, but again that kind of allegation is clearly not based on facts. Airlift is a good example. Adequate airlift is essential to our ability to project force to respond to crises or support allies. Here the progress has been substantial. Since 1981, the Air Force has bought 13 new C-5B heavy airlift transports, nearly 50 C-130 intra-theater transports, and more than 30 KC-10 tanker aircraft. During the last four years, our total strategic airlift capability has increased by 28 percent.

Similarly, in the case of Navy ship construction, Senator Grassley asserts that "... major surface combatants decreased by 17% from the Carter years despite a 47% increase in funds". But Senator Grassley ignores the entire U.S. nuclear submarine force, along with the fact that meaningful sea power derives from the collective capabilities of many ship types which compose a balanced fleet.

At the core of this fleet are the combatant ships: aircraft carriers, battleships, cruisers, destroyers, frigates, and nuclear powered attack and ballistic missile submarines. In February 1981, the Navy had 309 of these fighting ships. Exactly four years later, this number had grown to 341. Among major combatants which include aircraft carriers, battleships, cruisers and attack submarines, the improvement has been even more dramatic. Between 1978 and 1981, a total of 11 major combatants were authorized by Congress. By contrast, from 1982 to 1985, 28 major combatants were authorized, an increase of 254%.

Still, one really has to look at the entire fleet, rather than any single category in isolation, to appreciate the real progress which has been made. When President Reagan took office in 1981, there were 479 ships in the U.S. battle forces. Today there are 532 ships, an increase of 53 ships and 10%. An additional 103 ships are under construction, conversion, or reactivation. United States maritime supremacy is being restored and by 1989, the U.S. Navy will be 600 ships strong.

Marine Corps modernization has kept pace as well. Marine infantry battalions are being restructured with 10% fewer people and 25% greater firepower. This is possible because of a host of new, more powerful individual and crew served weapons. Marine artillery battalions have already taken delivery of more than 300 of their new M198 155mm Howitzers, which shoot further than earlier guns and can deliver highly accurate precision-guided munitions. In the air, three Marine Fighter/Attack Squadrons have replaced their aging F-4 Phantom aircraft with the versatile F/A-18 Hornet. Three more squadrons will follow during the next year.

Senator Grassley's approach to the issue of force readiness is similarly misleading. First he asserts improvements in readiness have not been proportional to the increased funding we've provided to those accounts. As with procurement, he then bases his argument on a carefully selected collection of statistics, again taken out of context. He argues, for example, that increases in the operations and maintenance budget have not resulted in major improvements in material readiness. Once again, both the objective facts and operational experience are quite the contrary.

Between 1980 and 1984, the share of Air Force F-15, F-16, and F-111 fighter aircraft that were fully ready to perform all their combat missions improved by 33%, 24% and 41% respectively. Air Force tactical pilots are flying 22% more training hours and having 30% less mishaps. Wartime airlift capacity of the C-5 and C-141 aircraft has increased by 64% and wartime fighter sorties by 76%. Further, because of a continuing commitment to correcting longstanding ammunition shortages, today the Air Force can support 48% more aircraft sorties with optimum munitions than just 2 years ago.

The Army has also made substantial gains in training and readiness. Since 1980, Army flying hours and battalion training days have increased substantially. As a result of additional funding, the Army has also been able to overhaul more equipment and reduce its backlog of depot level maintenance by more than $100 million during 1984 alone. By one estimate, the Army's total potential warfighting capability improved by 18% between fiscal year 1980 and 1984.

The Navy's experience is equally encouraging. As a direct result of higher quality manning and increased funding for spare parts, the readiness of the Navy's surface ships has improved 29%, nuclear attack submarines by 34%, and aviation squadrons by 42% over the last four years. From FY 1981 to FY 1985, actual munitions in magazines for Navy and Marine Corp major weapons systems increased by 37%. By FY 1987, when current ammunition contracts will be delivered, those levels will improve by another 41%.

Senator Grassley would have us believe a lack of competition is the root cause of all his alleged defense ills. Competition, he asserts, is alien to the defense world. But is it? Again the Senator's use of statistics is selective and self-serving. When he claims only 5% of all defense dollars are awarded competitively, Senator Grassley includes only those contracts that are formally advertised. But, Congress has recognized in legislation that contracts competitively negotiated are equal to those formally advertised. By this broader standard, the outlook is far brighter.

The Navy has been leading the way in fostering competition in the weapons procurement process. In FY 1984 the Navy awarded $14 billion dollars competitively, which is 37% of all Navy procurement dollars. Should you doubt we are making progress, this represents a 54% increase over the total dollars awarded competitively in FY 1982. The percentage of competition in Navy shipbuilding has risen from 15.7% in 1980 to 84.3% in 1985.

The resulting savings can be enormous. For example, competition among two shipbuilders for three AEGIS class cruisers in FY 1984 saved more than $228 million from the President's budget request. Similarly, competition in the SSN-688 class submarine program saved $108 million last year.

But if competition is to be sustained, then we must build ships and the like in sufficient quantities to make it worthwhile for more than one manufacturer to compete. For example, when we build three AEGIS cruisers a year, the contending builders sharpen their pencils and reduce costs, because the low bidder wins two ships. By contrast, if the AEGIS program were cut to only two ships, competition would be impractical and sole sourcing would inevitably lead to sharply increased costs.

The same is true of programs where we are enjoying substantial savings because of stable and efficient production rates. Freezing funding means cutting back on production rates and that inevitably will drive unit costs higher. The Navy's EA-6B electronic warfare aircraft makes the point well. In 1985 we paid $64.1 million each for 6 of these planes. This year the administration has proposed to buy 12 of the same airplanes for $39 million each. By supporting efficient production levels, we can save more than $25 million per aircraft. Similarly, the Administration has asked to buy 48 Air Force strategic B-1 bombers in 1986 at a cost of $159 million each. If that quantity is halved, it would add $4.6 billion to the total cost of the B-1 program. In short, we will end up paying more to get less.

The defense budget is not sacrosanct. Some reductions will doubtless be necessary this year in light of the federal deficit. But given how far we've come in improving our defenses, how those reductions are applied is terribly important. Superficial, impulsive schemes, like Senator Grassley's defense freeze, are far better suited to bumper stickers than the realities of the dangerous world in which we live. When reductions are made, it is vital they be based on thorough analysis and guided by the best professional judgment available. Our own taxes and our children's security depend on it.

THE WISDOM OF OUR YOUTH

● Mr. SIMON. Mr. President, today as we return to the challenges of our responsibilities, many of us have honored two special holidays with our families and constituents. In meeting with those people who have elected us to this body, we have been made aware of their needs and concerns once more. I have appreciated the opportunity to listen to those messages.

On return to my office, I was humbled further by a group of letters written by seventh- and eighth-grade students at Costa Catholic School in Galesburg, IL. These, of course, are not messages from registered voters or taxpayers or contributors. They are letters from young adults, future heirs of this Nation. They are representative of the letters I receive each week written by elementary and high school students from across the State of Illinois. I must say, that in my 3 months

as a U.S. Senator, I have not been so deeply touched as I have been by the simple truth, faith, and poignancy found in these letters.

It would be wise for us to listen to these young people. As we have seen in the past, our Samantha Smiths and exchange students are frequently among our greatest ambassadors. Children are blessed with the remarkable gift of sifting through great streams of knowledge and retaining the substance of issues. As we ponder the complexities of our world policies, we ought to remember that it is the course of these children's future we chart.

In preparation for Easter, these students have studied sacrifice. They have learned of hunger and have prayed for peace. They have pleaded with us to listen and to consider their voices in the decisions being made by this body.

With these pleas in mind, I wish to share their messages with my colleagues and ask that excerpts of these letters be printed in the RECORD.

The material follows:

EXCERPTS

In the past few weeks we have been praying for world peace, saw a movie on world peace, kept a vigil in our chapel and fasted for 30 hours, all in preparing for Easter . . .—DON O'BRIEN.

We talked about World Peace for the last couple of days and we had a lenten service. At the beginning of lent everyone wrote down what they were doing for lent. We sealed them in an envelope and the last day of school before Easter Vacation, we burnt the envelopes. Each Tuesday, the whole school gathered for a prayer service. The seventh and eighth grade fasted March 28 and March 29. We gathered together today and said the rosary. Those who participated in the fast stayed after school today and we wrote letters to the Senators, the President and our daily newspaper. I feel strongly about the subject of World Peace.

In South Africa and in Iran the black people are treated differently. I don't think this is a good way to express ones Americanism. Every man is equal. No man should be treated differently because of their looks, color or something else about him. The people in our school act as one community. There is much love and peace in our school. I wish this love could spread throughout the world. Thank you for your time.—ERIN HANEGHAN.

We have been fasting for world peace for 2 days . . . We felt like we were going to die because we were starving but we weren't starving as much as the Ethiopians are. They have been starving for months, and people send their money but it's not enough. I wish people would start recognizing that they really are starving and they are dying because of it.—*Michelle Leahy.*

We did more than just fast, we prayed the rosary, and had a vigil.—BETH NELSON.

. . . the tragic problem of starvation in our world. This concern not only includes foreign countries, but our own nation. I, along with other caring junior high students at Costa Catholic School, have wholeheartedly attempted to experience true hunger. I am not only concerned with hunger, but world peace. Our nation is so powerful, I hope we can stay in control of it.—CARLA CARPENTER.

I myself feel even if I haven't given any money to hungry people . . . by doing this fast I feel as if I've saved someone's life. In the words of Martin Luther King, Jr., I have a dream for world peace to prevail.—KEISHA HARRIS.

We participated in a . . . fast for world peace. It enriched our feelings and concerned us about world peace.—MARIPAT MANNINO.

All of this has made us realize how the starving people all around the world are suffering. Even though the fast hasn't been too long, it's been hard.—JOE THOMPSON.

We now realize what the starving people feel like . . .—LISA MANGIERI.

I feel very strongly about getting World Peace. This is something every nation should have.

I think that nuclear bombs should be destroyed. I feel this would be a wonderful start. I would love to have a world without war.—MISSY ALLEN.

. . . At least we can work towards peace.

One thing that I feel we should do away with are nuclear weapons. We have enough to blow up the world ten times. Why do we need that many? Do you think the excuse, well if we don't have as many as the Russians then we will have a war, is a good one? Don't you think we could find a better solution?

Another thing that you are considering doing is putting weapons in space . . . now you want to ruin space too. Don't you think this is a little crazy?

One last thing I would like you to think about are the one billion dollar sub-marines we are having built. With that money we could feed the hungry people in South America for the next 20 years. You talk about trying to send help to the Ethiopians and how could you even think about building one billion dollar weapons. Just think about how much food and help we could send over with that money.—KATHRYN C. CONKLIN.

I am 100 percent against nuclear missiles. I have one suggestion about the money going towards nuclear missiles. Why don't you send it to Ethiopia to people who really need it? Thank you.—JULIE MARER.

I am strongly against nuclear bombs because the adults of today are deciding tomorrows adults' future. I think most of tomorrows adults would just like world peace. Thank you for your consideration.—HEATHER NALL.

I would really appreciate if the world would come to peace. Please try to get world peace because God would want it . . .—JOE PONCE.

We have all been praying for world wide peace, I know that everyone has probably prayed for it at least a dozen times, but I think the president should take it into consideration, starting NOW . . . he's going and spending all of our money on missiles, I think he should spend a little bit more time worrying about the people in Ethiopia.—MICHELLE WELLS.

World peace is a necessity to all the people in this world. If in the future we do not have it this world will be dead.

We hope that this fast will do some good.—CHRISTIAN DUBOIS.

. . . I have learned much from it. I found out how hard it is for people in other countries with no food and that was what this sacrifice was mostly for, to see what it felt like. We sacrificed for them so couldn't you cut down on missiles and unnecessary expenses. A lot of people would appreciate it so please help.—MIKE RUTLEDGE.

. . . We were doing it for world peace. I wish there was no nuclear war because I think it is stupid.—JENNIFER BURGTORF.

. . . During this fast we had people in our chapel to pray for world peace. We can achieve world peace by working together.—CHRIS KENNEDY.

For many years our students and their parents have been concerned about nuclear war and world peace. Just a few months ago we started to recognize that nuclear war could become a real problem.

I feel the government is working on the issue of nuclear war, but I also feel it should be given more attention. It would be a total waste of hard work and human lives to start or take part in a war. I know you will do everything in your power to keep world peace and abolish nuclear war. My fellow students and I just wanted to let you know how we feel. I hope this shows you how strongly we feel . . . please consider this issue.—ANGELA D. THURMAN.

. . . We were particularly surprised at the statistics on the number of people who marched in different protests against nuclear war. There were many more people who marched in other countries than there were at the protests in the United States.

I hope our fast has made an impression . . .—CARRIE LARSON.

I hope you can help us unite with other countries.—KEVIN BOBOFCHAK.

We are writing letters to our country's leaders and if for no other reason we learned what the hungry people in the world must feel like. Everyone in the United States should stop and see how fortunate we really are.

I appreciate being able to write to my country's leaders.—JENNIFER GOHRING.

We are all depending on you to make decisions that will help promote world peace. Thank you for your time.—GERI REED.

My greatest dream is for one man that is so devoted to his country that he would do anything for his country and that he would make peace with every living thing on this Earth. I know that it only has about a 10 percent chance . . . but there is still that 10 percent.—TRACY FOX.

. . . It was a voluntary idea. My prayer was to make peace with Russia, and that can only begin with you.—LINDA THOMPSON.●

REVEREND NAUDE'S ACCOUNT OF SOUTH AFRICAN VIOLENCE AND U.S. RESPONSE

● Mr. KENNEDY. Mr. President, I call to my colleagues' attention an article published in the Friday, April 12 edition of the New York Times, entitled "South African Blacks Have Started to Rise Up." The article was written by Rev. Beyers Naude, a minister in the Dutch Reformed Church and general secretary of the South African Council of Churches.

Reverend Naude describes the tenuous nature of the situation in South Africa. "Taking everything into account, the position of the blacks has substantially worsened over the last 25 years. This year will bring more polarization between the white ruling classes and the majority of the people, more clashes, strikes, injuries, and deaths. For too long the black commu-

nity has suffered political oppression, economic exploitation, and educational neglect, while the government has ignored the warning pleas of millions of young people."

Reverend Naude argues that preventing violence in South Africa depends on dismantling apartheid. He believes that the United States has an obligation to take action to help minimize the emerging violence and maximize the chances of peaceful change in South Africa. But lack of support from the United States for the black community has only served to deepen feelings of anger toward the United States as well as American institutions and policies. Reverend Naude concludes that the United States should end its policy of "constructive engagement" and initiate more meaningful pressures to hasten fundamental, nonviolent change.

I ask that the full text of Reverend Naude's article be printed in the RECORD.

The article follows:

[From the NY Times, Apr. 12, 1985]

SOUTH AFRICAN BLACKS HAVE STARTED TO RISE UP

(By Beyers Naude)

The era of protest politics has been set aside in South Africa, replaced by the first phase of a militant revolutionary era. As one youth leader put it last year: "We are now at war."

The 25 years since the massacre in Sharpeville have brought increasing polarization to our politics. The ruling Nationalist Party points to the new Constitution and other legislative reform as proof of real change. Most black leaders disagree and maintain that, taking everything into account, the position of blacks has substantially worsened in the last 25 years.

In the meantime, indisputably, black opinion on political issues has become much better informed, support for resistance has become more widespread both in urban and rural areas, black attitudes have become much more militant and black actions are much better organized. In reaction, white political feelings, in both the Afrikaans and English-speaking communities, have shifted noticeably to the right. This has been going on for some time, as demonstrated by the growth of the Conservative Party, but the recent unrest in the black townships is creating a sharp new sense of insecurity and fear.

All indications are that 1985 will see an exacerbation of the hardships endured by the majority of South Africans. It will also surely bring an extension of the struggles waged in 1984.

The recession is deepening, with companies going bankrupt daily and thousands of people being thrown out of work. Wages are not keeping up with rising prices. Meanwhile, as the government cuts spending on education, conditions in the schools will get worse. As bosses try to hold down wages and push up productivity, tension in the factories will grow. And, as local authorities persist in calling on the police and the military, our communities will surely remain a battleground.

It is clear to me that this year will bring more polarization between the white ruling classes and the majority of the people, more clashes between the police and striking students and workers, more injuries and deaths. It does not require the insight of a prophet to predict that, unless the Government initiates clear and fundamental change, the unrest throughout the country will increase—to the point where violence becomes endemic and eventually uncontrollable.

For too long, the black community has suffered under political oppression, economic exploitation, educational neglect and denigrating white attitudes. For too long, the authorities (and those who put them in power) have ignored the warning pleas of millions of young people. For too long, people have been detained, tortured, banned and imprisoned without adequate cause. And for too long, the regime has succeeded in cajoling, manipulating, bribing or pressuring blacks and others to collaborate in implementing apartheid in the hope that they will be incorporated in the system.

Now the moment has arrived when the people, after decades and decades of silent suffering, have started to rise up—burning Government property, bombing the homes and businesses of black officials and other stooges, killing black police officers. Many of us who oppose the regime have forseen these developments for years—and we believe that all of it could have been prevented if our pleas had been heard and heeded. But now that this situation has become a bitter reality, what awaits us?

South Africans, both black and white, will now have to agonize on how to resolve the crisis. Yet a serious obligation also rests on the most powerful and affluent country in the world to reconsider its responsibility toward South Africa. The United States must help us to minimize the emerging violence and maximize the chances of peaceful change.

To begin with it must recognize that its lack of meaningful support for the South African black community and its struggle for liberation has created feelings of deep anger and animosity not only toward Washington and its policy of "constructive engagement," but also toward many American institutions and initiatives in South Africa. A word of serious warning has to be sounded to the American Government and people: Do not be surprised if the anger of black South Africans eventually turns to hatred or rejection of an American presence in Africa. Take cognizance now of these feelings of anger and bitterness and consider active steps to create a better attitude.

Second, Americans must disabuse themselves of the bogus concept that the root cause of the unrest in our country is a Communist onslaught created and manipulated by Moscow. Please recognize that the policy of apartheid is the real threat to peace and stability in my country—and all of southern Africa.

Third, Americans should give more serious attention and weight to the pleas of the churches and other organizations in South Africa known for their opposition to apartheid. Please listen to these groups, which are trying to do everything in their power to bring about fundamental change by peaceful means or, where peaceful change is no longer possible, with a minimum of violence. Americans should also do all they can to support the efforts in their own country—by churches, academic institutions and other organizations—to press their Government to change its disastrous policy toward South Africa.

Fourth, the United States should terminate the policy of "constructive engagement" and initiate more meaningful pressures to hasten fundamental, nonviolent change. The whole disinvestment debate could soon become irrelevant if the current unrest in South Africa continues unabated—for before long it will have created such an unstable economic climate that overseas investors will be frightened to do business here. Before long, they will decide of their own free will not to support any further investment. They will conclude that the risk is too great and will initiate steps toward disinvestment.

Fifth, Washington should encourage Pretoria to ease up. I am convinced that no return to stability is possible here as long as the black leader Nelson Mandela and other political prisoners remain in prison. Americans must understand this, and they should demand the unconditional release of all political prisoners, the right of all exiles to return, the release of all detainees, the unbanning of the banned and the banished. They should also encourage Pretoria to grant all South African people the freedom to elect their own leaders to initiate a process of negotiated change.

Sixth, the United States must make it clear that it does not want to see things get worse. The situation in South Africa may eventually become so ungovernable that the authorities would be forced to declare a state of emergency—and this could very easily lead to military rule of some kind. Such a development would have disastrous consequences for the cause of justice and peace in South Africa, fanning the flames of violent revolution and eventually leading the country into civil war. If the United States is sincere in its concern to prevent further violence, it should take effective steps now to prevent the establishment of military rule, with all its serious consequences not only for black and white South Africans, but also for the rest of southern Africa.

Finally, the American Government and people must reassess their policy toward Namibia, Angola, Mozambique and Zimbabwe—a policy that is creating increasing frustration, cynicism and bitterness toward the United States in all these countries. The State Department clearly fears their Marxist tendencies and fears to lend them American support. But the sooner both the United States and South Africa accept that the political change that black South Africans wish to bring about will inevitably involve changes in the capitalist system of free enterprise—a change toward some form of socialism—the less traumatic and painful the transition toward majority rule will be.

I do not believe that the United States can determine the direction or momentum of change in South Africa, but it can help the South African Government to understand and accept what is happening. It can also enlist the support of other Western countries to prepare South Africa and themselves for the upheaval of fundamental change that is on its way. I share the fears of many here that this process is going to be painful—and bloody. But the sooner the apartheid system is dismantled, the greater the hope of shortening this period of bloodshed and hastening the transition to nonracial democratic rule.●

SPORT FISHING AND BOATING ENHANCEMENT FUND

● Mr. D'AMATO. Mr. President, I rise today in support of Senate Resolution

130, introduced by my distinguished colleague, Senator WALLOP, which calls upon the admininistration to honor its commitments under the Wallop-Breaux Trust Fund, also known as the Sport Fishing and Boating Enhancement Funds.

Just last summer, the President signed into law legislation creating this new fund designed to expand the Dingell-Johnson fund. This bill was intended to enhance boating and fishing opportunities with funds raised by user fees.

By signing this bill into law, the President was being consistent with his long-time position that many of the programs which, in the past, have been subsidized by the Federal Government should be self-sufficient. The fund allowed our Nation's anglers and boaters to respond to the President's call to reduce the deficit by providing a tax to pay for fishing programs.

However, the administration is now refusing to release these funds to the States. This means that all over the country, boaters and sportfishermen who are now paying additional Federal user fees will lose $100 million authorized by the Congress last year. New York will lose about $1.4 million from its freshwater and saltwater programs.

Specifically, New York will not be able to purchase the new Lake Erie research vessel, there will be severe cuts in Lake Erie, Lake Ontario, Finger Lakes, and the Hudson River Fishery Unit programs, we will face delayed construction of many new launching sites, progress will be stopped on statewide walleye rehabilitation and hatchery construction plans, warmwater fishery research and the annual fishery monitoring of Oneida Lake will be terminated, and we will need to defer maintenance and repairs to 75 fishing access sites. New York will not be able to purchase $50,000 of new hatchery equipment which would improve efficiency and fish production.

Mr. President, I believe that if the administration can make this type of decision on the Wallop-Breaux Fund, we will find that the Congress will become skeptical of any user fee legislation. User fees will become identical to any other tax used to reduce the deficit. This was not the intent of the Wallop-Breaux Fund.

Mr. Henry Williams, commissioner of environmental conservation in New York State, pointed out the irony of this situation when he said:

> . . . Sportsmen, boaters, conservationists and fisher professionals fought hard for seven years to get Wallop-Breaux passed. Now they are paying increased excise taxes and may get nothing in return.

It is time for these funds to be used as the Congress intended. I urge my colleagues to join in support of this resolution.●

THE U.S. SENATE: LET'S DEBATE THE ISSUES

● Mr. SIMON. Mr. President, I am honored and happy to serve Illinois in this unique body of lawmakers, but I must share with my colleagues my disappointment that there is not more debate on the issues before all Senators here on the floor. I ask to have printed in full in the RECORD a column I write each week for the newspapers in my State.

The column follows:

P.S./WASHINGTON

(A weekly column from U.S. Senator Paul Simon of Illinois)

THE U.S. SENATE: LET'S DEBATE THE ISSUES

The other day Senator Dale Bumpers of Arkansas commented, "The United States Senate is supposed to be the world's greatest deliberative body, it is not."

That is not the exact quote, but it approximates what he said.

Unfortunately there is an element of truth to his comments.

There is no forum in the world that compares with the Senate. But that forum is not used effectively. When Sen. Bumpers made his remarks, discussing the important issue of the MX missile, he talked to an almost empty Senate.

I have made only brief remarks on the floor of the Senate so far, because of my freshman status, but when I spoke on the MX there also were only a few members present.

We do have a radio hooked up in our personal offices that permits us to follow debates half-way. We listen as we dictate letters or sign mail. But often Senators are in committee meetings, or we're in meetings with constituents where we cannot listen.

It is also true that the debate is reported in detail in the *Congressional Record* the next day, but no Senator has time to read all of it.

Where the major discussion now takes place is in the Democratic and Republican caucuses. The best statements I heard on the MX were not on the floor of the Senate, but in the Democratic caucus where Sen. Albert Gore of Tennessee supported the MX and Sen. John Glenn of Ohio opposed it.

This issue—as is true of most issues—should not be a partisan matter and the whole Senate, and the nation, should have heard that exchange, not just one political party's caucus.

Sometimes at lunch in the Senate dining room I see more Senators than I do on the floor of the Senate.

There should be some method of encouraging genuine give-and-take on the floor of both the Senate and the House, more than now occurs. There were many flaws in the Illinois General Assembly when I served in that body more than a decade ago, but when we debated the members generally were present. It was rare indeed to have only one-third of the membership present for debate.

In this United States Senate it is rare indeed to have one-third of the members present to hear the debate.

Yes, there is dialogue and debate, but most of it does not take place on the floor under public scrutiny.

Yes, the quality of membership in the U.S. Senate is higher than the public image.

But what ails the U.S. Senate is part of what ails the world: We're not listening to each other.●

VOICE OF AMERICA'S "FOCUS" PROGRAM ON THE SEARCH FOR JOSEPH MENGELE

● Mr. KENNEDY. Mr. President, on March 22, 1985, Congressman ROBERT MRAZEK and I proposed that the next appropriations bill include a provision for the Department of Justice to pay a reward of $1 million for information leading to the apprehension of Josef Mengele, the infamous Angel of Death at Auschwitz. In addition, we asked the U.S. Information Agency to give a high priority in its overseas programming to publicizing the reward and other aspects of the search.

I am pleased to call the attention of my colleagues to the ongoing role of the Voice of America, a division of the U.S. Information Agency, in the search for Mengele. Its February 28 Focus program, entitled "The Search for Joseph Mengele," was broadcast in English, and distributed to Voice of America's 41 language services for translation and use. In eloquent detail, the program includes interviews with survivors of Mengele's gruesome experiments at Auschwitz, excerpts from a recent Senate hearing chaired by Senator SPECTER, discussions with French Nazi-hunter Serge Klarsfeld, Justice Department officials from the Office of Special Investigations, and Simon Wiesenthal, Chairman of the International Academic Advisory Board of the Simon Wiesenthal Center.

In one of the most moving parts of the program, Marc Bercowitz, a twin of 12 when he entered Mengele's cruel laboratory, describes his mother's death and the motivations of those who seek to bring Mengele to justice:

> I saw a line of women and suddenly I recognized my mother in the line and I knew if she passed the gate of "F" Lager, that was it. Nothing beyond that point . . . I literally walked my mother to the gas chambers . . . the next thing I saw smoke, flame and smoke . . . and I promised my mother not to be a hateful person because she didn't want me. From all I've seen, she asked me not to be a mad person, to love God, to love humanity, and to seek justice. So I'm not here out of hate or vengeance, but I'm here for my brother and all the soldiers who served in that tragedy, who gave their lives, not that this man should be free . . . so I beg you, please, for the sake of future generations, for my grandson, not for me, and for the little babies that I saw march every day to the gas chamber, help us. Bring this man to justice.

Mr. President, the Voice of America program has a special timeliness this week as people throughout America and around the world pause to remember the victims of the Holocaust. I ask that the text of Focus: The Search for

Joseph Mengele may be printed in the RECORD.

The text follows:

FOCUS: THE SEARCH FOR JOSEPH MENGELE

ANNCR: The Voice of America presents "Focus."

CART: "Focus" theme (established, then fade under Anncr)

ANNCR: At an international hearing in Israel in early February, thirty people who survived the death camp of Auschwitz told an International Board of Inquiry about the medical experiments that Nazi physician Joseph Mengele had performed on them. Board member Telford Taylor of the United States read the Board's conclusions.

TAPE: Cut one: Taylor (:46)

"There exists a body of evidence justifying the commitment for trial of the S-S Physician Hauptsturmfuhrer Joseph Mengele for war crimes and crimes against humanity, including crimes against the Jewish people and against members of other nations.

"Among those crimes, first mention should be given to acts of murder, the causing of grievous bodily harm, acts of brutality against the bodies and souls of men and women, children and adults.

(OPT) "All these acts were perpetrated by Joseph Mengele as a medical practitioner, a member of the Nazi party, and as an officer of its criminal organization, the S-S, under the role of the Third Reich." (End OPT)

ANNCR: As the board was issuing its statement, the U.S. Justice Department announced an investigation into Doctor Mengele's whereabouts and reports he may have been in U.S. custody after World War Two. The U.S. Senate also opened hearings on the case.

To focus now on the search for Joseph Mengele, here is Todd Leventhal.

HOST: Some three million people died in the camps of Auschwitz. For the few who survived, the past is never far away.

TAPE: Cut two: Berkowitz (:19)

"It's not forty years, it's a moment ago. It's a moment ago that a little boy with his family arrives, with his mother, little twin sister, grandparents, and aunts and uncles, to a place called Birkenau."

HOST: From the railway station at Birkenau, it was a three kilometer walk to the main camp at Auschwitz for young Marc Berkowitz and for millions of others. Berkowitz survived because he was a twin and because his blond hair and blue eyes interested Doctor Mengele.

(OPT) Testifying before the U.S. Senate, Berkowitz described the experiments that Mengele performed on him.

TAPE: Cut three: Berkowitz (:50)

BERKOWITZ: "He told us to lay face down and the next thing I knew that they were, you know, sort of checking my spinal area, my vertebrae area, and I felt a very sharp instrument. And then the next thing I just fought to keep my consciousness. And I whispered to my little twin sister, 'just bear with it.' "

Senator SPECTER: "What happened to you?"

BERKOWITZ: "For about half an hour I felt paralyzed. But I could hear voices and I heard them say that the fluid is not clear enough and we'll have to try it again."

SPECTER: "What was done to you?"

BERKOWITZ: "I was twelve years old. I was a guinea pig (an animal used for experiments). I was a Jewish child. I never asked." (End OPT)

HOST: Mengele was trying to unlock medical secrets that would enable the Nazis to build a race of supermen. He experimented not on laboratory animals, but on human beings.

(OPT) Mengele was particularly interested in twins. Many believe he hoped to find a way to allow Germany to increase its population more quickly after the war. His experiments produced nothing of scientific value. (End OPT)

Those who could not be used by Mengele were consigned to death. One of them was Marc Berkowitz's mother, who passed before her son while he picked vegetables in Mengele's garden.

TAPE: Cut Four: Berkowitz (2:10)

BERKOWITZ: "I was picking brussels sprouts for him because he had us make a garden for him where we grew brussels sprouts for him. And while picking the brussels sprouts, I saw a line of women and suddenly I recognized my mother in the line and I knew if she passed the gate of 'F' lager, that was it. Nothing beyond that point. The next thing is that big gate that takes you to gas chamber five or four. And I knew that once one woman passed that barrack, the S-S barrack outside, that was it."

SPECTER: "And did she pass that barrack?"

BERKOWITZ: "The woman passed that barrack. With that Mengele stepped out of his quarters because he wasn't too far away. And he said to me, 'I have an errand for you to run.' And that meant that I could report out and I literally walked my mother to the gas chambers."

(OPT) SPECTER: "And that was the last you saw of your mother."

BERKOWITZ: "The next thing I saw smoke, flame and smoke. I wasn't supposed to say kaddish. I was too young. I wasn't a man yet. But I said whatever I could say.

"And I promised my mother not to be a hateful person because she didn't want me. From all I've seen, she asked me not to be a mad person, to love God, to love humanity, and to seek justice.

"So I'm not here out of hate or vengeance but I'm here for my brother and all the soldiers who served in that tragedy, who gave their lives, not that this man should be free. What did they die for? So that this man could live and be free? The man is a free man.

"So I beg you, please, for the sake of future generations, for my grandson, not for me, and for the little babies that I saw march every day to the gas chamber, help us. Bring this man to justice." (end OPT)

(OPT) HOST: Vera Kriegel was another Jewish twin whom Mengele experimented on. As a child of six, she saw a sight she would never forget in Mengele's laboratory.

TAPE: Cut five: Kriegel (:30)

"I looked at the wall and what did I see on this wall? I saw all kinds of colors of human eyes, looking at me. And I was thinking I was maybe in some other world. I was on another planet. I wasn't in this world at all.

"And I'm telling you, he was turning these poor children's eyes with his fingers, he was turning them over. And he was taking them out of the sockets and he was also putting drops into these eyes. He was trying to change the color." (end OPT)

HOST. Mengele injected dye into his victim's eyes, in an attempt to change their color to blue. He mutilated bodies, removed organs, and injected powerful chemicals that caused enormous pain and sometimes death.

In one of Mengele's cruelest experiments, he prevented a newborn baby from nursing. The child's mother, Ruth Eliaz, had infuriated Mengele because he had not noticed she was pregnant.

TAPE: Cut six: Eliaz (4:08)

(OPT) "He said in his sarcastic smile, he said, 'You wait and give birth to your child and then we will see.' I couldn't imagine in my biggest fantasies what's waiting me.

"And my hour came when I got my pains. A Polish midwife was assisting my birth. I laid on the stones without anything. And I gave birth to a beautiful girl. No soap, no hot water, no cotton ball, nothing. In my own filth, with my baby. (end OPT)

"In the morning, Mengele arrived and he gave the order to bandage my breasts. I heard afterwards that he wanted to make an examination, a trial, a research, I don't know how to call it—how long a newborn can live without food.

(OPT) "I had no other choice from the diet but to take a little bit of linen, and I chewed the bread I got, I put it into this little piece of linen, put it either in coffee or in the soup I got. And with this I fed my child, my girl. (End OPT)

"She got thinner and thinner and thinner. Everyday came Mengele. My milk started to dry up. And the child was crying for hunger and I couldn't give her anything. After several days, she had no strength anymore to cry, it was only whimpering and it was a skeleton lying near me.

"One day, Mengele arrived. It was, I think, six or seven days. And he told me, 'tomorrow morning, you be prepared with your child, I'm coming to fetch you.' And I knew that my last day of living had arrived, that I was going to the gas chambers.

"I started to cry. (OPT) I think I was hysterical. (End OPT) I started to scream. And a doctor came to me, a Jewish doctor, a prisoner, Marsha Steinberg. And she asked me why I am crying. I told her my story. And she said, 'I must help you.'

"After the lights went off, she came back with a syringe in her hand. And she told me in such a brisk voice, 'give this to your child.'

"And I said, 'what is it?'

"And she told me, 'it is morphine. This will kill your child. It can't live anymore.'

"So I told her, 'Marsha, you want me to kill my own child?'

"So she told me, 'look here, (OPT) you are young and I made the oath of Hippocrates—saving people's lives. (End OPT) I must save your life. Your child can't live anymore. And I can't do it.' And she started to talk in an angel's voice. And she talked and talked and talked until I did it. I murdered my own child."

HOST:

After World War Two, Mengele apparently lived for a time in his home town of Gunzburg (Ginz-Burg), in Bavaria, where his family owns a large company that manufacturers farm equipment. The United States Justice Department is investigating recent reports that he may have been in the custody of the U.S. Army in 1947. In the early 1950's, Mengele went to Argentina, where he lived for the most part until 1959, when West Germany sought his extradition. He then fled to Paraguay, where he became a citizen.

Under international pressure, Paraguay revoked Mengele's citizenship in 1979 but said they had no knowledge of his whereabouts. The Paraguayan Government now promises to arrest Mengele, if they can locate him.

(OPT) After so many years, there is a real question as to whether Mengele is still alive. French Nazi-Hunter Serge Klarsfeld, who helped bring Klaus Barbie to justice, believes that he is.

TAPE: Cut seven: Klarsfeld (:27)

"We know that he is alive, Mengele, because if he were dead, the family would announce it. It would change the financial structure of the firm and also, I would say, for the company, whose name is Mengele, it would be the end of the link between a Nazi criminal so horrible and the company." (end opt)

HOST: Allan Ryan headed the Justice Department's Office of Special Investigations, which is responsible for prosecuting war criminals, from 1980 to 1983. He believes the chances for locating Mengele depend on international cooperation, in particular from the South American countries where Mengele was last seen.

TAPE: Cut eight: Ryan (1:06)

"(OPT) from 1960 onward, he was living in Paraguay under the official protection of the Government of Paraguay and he lived in great physical security behind barriers that made it very difficult for anyone to approach." (end OPT)

"The official protection has ended. The question is, does unofficial protection exist. And I think the answer to that question will come when we see how fully the Government of Paraguay cooperates with the Justice Department in its investigation. Will the Government of Paraguay cooperate fully or will they simply say 'good luck, but we're not going to help you."

"If it's the latter response, then in a way it's an unofficial protection (OPT) because looking for someone in Paraguay is not like going into the streets of New York or Chicago. It's a jungle. And unless the United States Government has the cooperation of the governments down there—Paraguay, Argentina, where Mengele lived for many years in the 1950's, and its neighbors—and unless it has the cooperation of European governments in generating information, I think the chances of success are smaller than they otherwise would be." (end OPT)

HOST: Simon Wiesenthal (see'-mon vee'-sen-thal) has hunted Nazis since the end of World War Two. On several occasions, he missed trapping Mengele by only a day or two.

(OPT) Wiesenthal says that only a handful of the Nazi criminals he has apprehended have expressed any regret for their actions.

TAPE: Cut nine: Wiesenthal (:41)

"I am working forty years. I brought to justice in different parts of the world, in different countries, a little over eleven hundred people. From all these people, only three confess. Three people confess. And these three people say sorry.

"The others keep silent or say 'I fulfilled the orders. I was a soldier. I fulfilled my orders, I fulfilled my duty.' The duty of an S-S man will be, you know, to kill innocent people, women and children and so on." (end OPT)

HOST: Wiesenthal believes it is very important to capture Joseph Mengele and to bring him to trial. A forgetful world must be reminded, he believes, that Nazi atrocities were real. And, he adds, those people who might engage in genocide in the future should know that such crimes will be punished.

TAPE: Cut ten: Wiesenthal (2:24)

"Why we need Mengele before a trial? You can believe me that in all these years we had offers of people to kill him. I say no. First of all, this is not my way. We need sentenced criminals. We don't need to produce martyrs, (OPT) first of all. (end OPT)

"And second, we have today two generations after the Holocaust. (OPT) Young people. (end OPT) And at the same time we have the deniers of the Holocaust. They are groups, they are organizations, which have published so many books that the Holocaust was a hoax; that Auschwitz was only a labor camp; that the gas chambers never existed or when they existed it's only for disinfection of clothing.

"A trial of Mengele is not only of juridical but I would say of educational and historic importance. This will be a repetition of a historic lecture. Naturally, such a trial will be a half year or more. And this will be an answer against the indoctrination, especially of young people.

"(OPT) and from the other side, (end OPT) sometimes people come to me and say, 'look you are doing forty years, you are working between blood and tears. Why are you doing it? (OPT) Why you do it? (end OPT) These people are not a danger. They wish only to die in peace.'

"I say I am doing it for my grandchildren. You see, the history of man is a history of crimes. And maybe at this moment are born the murderers of tomorrow. (OPT) We never knew when the murderers of our families were born. But (end OPT) these new murderers should know what to expect—that even forty years after a crime, (OPT) or forty-five years in many cases, (end OPT) they have no place in the world that could be safe.

(OPT) "They also wish to die in peace. But we don't let them die in peace. (end OPT) This is the lecture for the murderers of tomorrow. He who is involved in a genocide will never have peace. If we will not do it, then the millions died for nothing."

HOST: The search for Joseph Mengele, now seventy-three years old, continues. Simon Wiesenthal says that his latest information, (OPT) from January of this year, (end OPT) places Mengele in Paraguay. Other professionals (OPT) in the field (end OPT) believe that Mengele may be on the move among several South American countries. Whatever is the case, the search for the man known as the Nazi "Angel of Death" seems certain to continue until his death.

HOME CARE PROTECTION ACT OF 1985

● Mr. D'AMATO. Mr. President, I rise today to cosponsor S. 778, the Home Care Protection Act of 1985, introduced by my good friend and colleague, the senior Senator from Pennsylvania.

The steady growth of our elderly population and the rising cost of institutionalized medical care have resulted in the increasing popularity and necessity of home health care. Home care is a cost effective and humane alternative to institutionalized care.

Medicare, however, is currently an acute care provider. Although it does cover some home care services, Medicare is primarily a hospital-based payer. The implementation of the diagnosis related groups (DRG) reimbursement system for Medicare part A has decreased by almost 25 percent the average number of patient days spent in hospitals. According to a report recently released by the General Accounting Office, this has had the unintended effect of releasing elderly patients prematurely. This problem underscores the importance of home health care.

Although Medicare was intended to cover home care, its application has been severely limited. The differing interpretation of intermittent care has denied millions of elderly Americans proper home care coverage. Because of strict Federal interpretation of intermittent care, many elderly patients have had to spend down to Medicaid eligibility to receive coverage for home care—80 percent of all Medicaid funds spent for home care are spent in my home State of New York.

The Home Care Protection Act would explicitly, when medically necessary, allow up to 60 days of home care coverage, and will guarantee beneficiaries access to these services. The availability of such care will not only discourage excessive hospital readmissions, but also will reduce admissions into nursing homes. Although one reason that home care benefits have not already been expanded or clarified is a concern over the cost of additional coverage. It is important to remember that hospital and nursing home care cost several times more than home care. It is also important to remember that many of the elderly would prefer to be medically attended at home whenever possible.

The demand for home health care will grow as the number of elderly citizens increase. Congress must reaffirm and clarify its intent with respect to home health coverage under Medicare. The Home Care Protection Act is just the bill necessary for this job. I urge my colleagues to join with me as cosponsors of this bill.●

THE 10TH ANNIVERSARY OF THE END OF THE VIETNAM WAR

● Mr. MURKOWSKI. Mr. President, I rise to join with citizens across our Nation to mark the 10th year of the end of the Vietnam war. Today, thanks in a large part to the leadership of our President, a renewed sense of patriotism is felt throughout the country. This national pride has come partially as a result of our coming to terms with the difficult questions raised by our Nation's involvement in Vietnam. Regardless of one's political viewpoint on the merits of the Vietnam war, our Nation has recognized the need to pay respect to the many men and women who served during these troubling times.

The past 10 years has been a time of healing. The Congress has contributed greatly to welcoming the Vietnam veteran home by providing a number of important benefits and services specifically to foster their readjustment

process. Some of those programs include vet centers, which provide readjustment counseling in 185 storefront centers and satellites throughout the country; special noncompetitive hiring into the Federal civil service known as veterans readjustment appointments to assist veterans' entry into the work force; Emergency Veterans' Job Training Act, which provides money for employers to hire and train chronically unemployed Vietnam veterans so they can build a new career; the Vietnam era GI bill, which provided, and continues to provide, a most generous and important educational benefit; as well as several important legislative initiatives which address the concerns raised by veterans who were exposed to agent orange in Vietnam. Those initiatives include free health care to Vietnam veterans who believe that their disabilities are related to agent orange exposure, a number of important studies to document scientifically if any diseases can be related to exposure to agent orange, and the Vietnam Veterans' Relief Act, which provides a framework for adjudication of claims filed by veterans who were exposed to agent orange. These are just a few of the many worthwhile programs extended to Vietnam veterans by a grateful Nation and Congress for the sacrifices rendered by men and women in uniform.

Mr. President, in spite of the fact that some Vietnam veterans still do have problems as a result of their experiences in Vietnam, these veterans have come a long way since they returned home from fighting a most unpopular war. They have become productive, responsible citizens and have gained the respect of their compatriots who did not participate in the war effort.

It is important to emphasize the positive and to recognize the individual contributions of these patriotic Americans. Although we need to continue to recognize the special problems associated with service during the Vietnam conflict, we also need to give credit where credit is due. I wish to thank the millions of men and women who bravely and patriotically served during the Vietnam war and to note my pride in their service and my gratitude for their efforts on the behalf of all Americans. I am honored to serve as chairman of the Veterans' Affairs Committee and I pledge to continue my efforts to demonstrate our Nation's gratitude to all our veterans of Vietnam. Let us work together in that effort and reap the benefits of the peace they fought so hard to win.●

NATIONAL COMMISSION ON ILLITERACY

● Mr. GLENN. Mr. President, today I rise to join in a bipartisan effort to establish a National Commission on Illiteracy. Currently, a staggering 20 percent of the adult population are illiterate. Among minorities the illiteracy rate is as high as 40 percent.

Billions of dollars have been spent on remedial reading by our schools, colleges, businesses, governmental agencies, and the armed services. In a 1983 survey, three out of four corporations indicated that they had to provide some form of remedial assistance to their employees. The Army alone spent over $14 million in an effort to bring its recruits, 90 percent of whom were high school graduates, up to the ninth grade levels. The Air Force, in their effort to bring over 2,000 recruits up to the ninth grade reading level spent $1.8 million in fiscal year 1984.

Despite the considerable amount of funds which have been spent, the number of adult illiterates increases substantially each year. Therefore, Mr. President, I agree with my colleague from Nebraska, Senator ZORINSKY, that American taxpayers deserve a better return on their investment in reading instruction. Not only are the results dismal, but the net effect is that additional funds must be spent to remedy what the schools should have done properly in the first place.

Therefore, while I am not fond of establishing commissions, I feel a Commission on Illiteracy is necessary. This Commission would be more than a symbolic gesture. It would have at least four clearly defined objectives. First, it would assess the factors which contribute to illiteracy. Second, it would recommend programs and policies to prevent illiteracy. Third, it would recommend the appropriate local, State, and Federal roles in the prevention of illiteracy, and finally the Commission would assemble, analyze, and publish its findings.

This Commission is not intended to create any Federal policy with respect to reading, nor is it just another spending bill. This Commission would merely identify problems and propose solutions. Even in an era of tight budget restraint, I am convinced it shows foresight to establish a commission not only to evaluate the return taxpayers receive for their investment, but also to determine if we are doing all that is possible to combat the problem of illiteracy and its problematic side effects. For these reasons I join with Senator ZORINSKY and other distinguished colleagues who have cosponsored this much needed legislation.

Mr. President, I urge my colleagues full and favorable consideration of this measure.●

DR. WILLIAM E. FOUNTAIN, MERCED, CA

● Mr. WILSON. Mr. President, I rise today to congratulate Dr. William E. Fountain of Merced, CA, on winning the "Rural Physician of the Year" award for 1985 from the California Medical Association.

Dr. Fountain received the Frederick K.M. Plessner Memorial Award for his work as a local physician who "best exemplifies the ethics and practice of a rural country practitioner." Dr. Fountain devoted nearly 50 years to serving the public and caring for people and their families in Merced.

Throughout his career, Dr. Fountain served his community with personal attention. He made house calls, visited the elderly and handicapped on weekends, and often delivered babies of the poor in their homes. Retired from his office duties 18 months ago, Dr. Fountain remains active in local health efforts such as teaching nutrition to elementary school children.

Once again, I congratulate Dr. Fountain on a job well done in Merced. His lifetime of dedication to his community deserves much praise.

I also request that Dr. Fountain's biography be included in the RECORD.

The biography follows:

1985 FREDERICK K.M. PLESSNER MEMORIAL AWARD RECIPIENT

The 1985 recipient of the Frederick K.M. Plessner Memorial Award is William E. Fountain, M.D., of Merced.

With time out for World War II service in the Navy medical corps, "Dr. Bill" served the people of Merced County as a physician and surgeon from 1937 until his 1983 retirement from active practice; he still practices part-time.

Dr. Fountain, who was born in Oregon and moved to Merced at age four, was graduated from Stanford University and from its School of Medicine in 1937. He began practicing general medicine and surgery in Merced in association with his father, the late Dr. Edwin R. Fountain, and was the county's public health officer for two years.

From 1942 to 1945 he served in the Navy medical corps in the South Pacific, earning a presidential citation and saving the lives of both American and Japanese troops.

During his entire career, Dr. Fountain made house calls. He visited migrant workers in agricultural camps throughout the county and delivered babies of indigents in their homes. Because of the risks to mothers and babies under such conditions, Dr. Fountain was instrumental in establishing a new obstetrical unit at the Merced hospital, specifically to give indigent mothers a safer alternative to home deliveries. "Dr. Bill" considers this OB unit one of his most important achievements in improving the quality of health care in Merced.

After retiring from half a century of very active medical practice that occupied most of his waking hours, Dr. Fountain has become the Merced-area regional director of the San Joaquin Valley Health Consortium. Through the consortium he is developing a nutrition project to teach nutrition to first, second and third graders, and he hopes to expand it to higher grades. It is to this project that he plans to contribute his $5,000 Plessner Award.

Over the years, Dr. Fountain has taken time for community involvement, as president of the Rotary Club and, twice, the Merced-Mariposa Medical Society. He spearheaded the society's professional relations

committee for many years because he felt it had the greatest potential for monitoring the quality of medical care and correcting physicians' practices when needed. He is also a member of the California and American Medical Associations, American Academy of Family Practice, Elks and American Legion.

He helped initiate an "academic decathlon" for local high schools, endowed a scholarship fund at Merced College and is a sustaining member of the Friends of Merced County Library. He is an avid reader; his home library reflects his interest in history, and it includes medical texts dating back to the 1400s. Other interests include coins, travel, foreign languages and working with University of California/Davis' family-practice resident physicians at the Merced Community Medical Center.

"Dr. Bill" is married to the former Ester June Lockhart of Santa Rosa; they have two married sons. Robert L., Ph.D., is Muskegon, Michigan's city chemist and has rewritten a textbook on wastewater management. James is a deputy health officer in the Los Angeles County Public Health Department, working on a cure for a penicillin-resistant strain of gonorrhea.

THE AWARD

California Medical Association's Frederick K.M. Plessner Memorial Award is presented to the CMA-member physician residing and practicing in California who best exemplifies the ethics and practice of a rural country practitioner. Mr. Plessner requested in his will that, in selecting the winner, consideration be given to services donated by the physician to the indigent or services rendered to charitable groups.

The Plessner Award traditionally is presented at the CMA House of Delegates by the chairman of CMA's governing Council.

The CMA Council selects the Plessner Award recipient. Nominations for the award are submitted by CMA's component county medical societies, reviewed by the CMA Committee on Nominations and its specially appointed Plessner Award subcommittee, which interviews the finalists and makes a recommendation to the CMA Council.

The Award, consisting of $5,000 and a commemorative silver bowl, is financed with income from a $50,000 endowment, as stipulated in Mr. Plessner's will.

Besides the Frederick K.M. Plessner Memorial Award presented by CMA, a similar award is presented in Michigan through the Michigan State Medical Society and the University of Michigan. Mr. Plessner's estate also underwrites the Frederick and Besse Moulton Plessner Loan Fund for medical students at the University of Southern California.

WHO WAS FREDERICK K.M. PLESSNER?

Frederick K.M. Plessner, though not himself a physician, was the son, grandson and great-grandson of physicians and held great admiration for the medical profession.

According to accounts of relatives, Mr. Plessner worshipped the American dream, Horatio Alger and the self-made man. Fred Plessner never had any financial help or a business partner, and he never had an employer throughout his entire working life. He made his fortune operating a chain of theaters on the East Coast and florist shops on the West Coast, and for the last 25 years of his life, built and managed apartments in Southern California.

Frederick Plessner was born in Saginaw, Michigan in 1889, was graduated from the University of Pennsylvania's Wharton School of Business and Finance and earned a commission as a cavalry officer during World War I.

Mr. Plessner was a lifelong bachelor. According to his nephew, "In all his life he never smoked, never drank and the most profane word he was ever heard to use was 'rascal.' A 'rascal' was someone who had cheated him out of a sum of money in excess of $100,000. Lest you think Fred Plessner weird, at his death he left a female blonde 30 years his junior in a condo in Spain. Fred Plessner never married because he felt it was as illogical as smoking cigarettes."

Mr. Plessner's generosity is attributed to his esteem for the medical profession and his gratitude for the handsome scholarship he received to Wharton School of Business. It is said he was most grateful to higher education as an institution for having made his way of life possible.

PAST RECIPIENTS OF THE FREDERICK K.M. PLESSNER MEMORIAL AWARD

1980: James R. Fassett, M.D., Gonzales.
1981: Jack C. Gilbert, M.D., Cedarville.
1982: Robb Smith, M.D., Orange Cove.
1983: Ehler H. Eiskamp, M.D. Watsonville.
1984: George J. Wood, M.D., St. Helena.●

RELIEVING NEW JERSEY'S OVERBURDENED JUDICIARY

● Mr. LAUTENBERG. Mr. President, recently I joined my colleague from New Jersey [Mr. BRADLEY] in urging President Reagan to move expeditiously to fill vacancies in the Federal district court in New Jersey. We urged the President to move expeditiously to nominate qualified and able candidates for the bench. In case the President might have difficulty identifying such candidates, we offered to make some suggestions of our own.

The President has not accepted our offer. Yet, the need is well documented. The Federal judges in New Jersey carry a heavier caseload than do the judges in the other districts in the third circuit.

Mr. President, the New Jersey Law Journal recently published an editorial, praising the President for his renomination for Joseph Rodriguez for one of the openings, but pleading with him to move swiftly on the other openings in order to address the problem of the overburdened Federal judiciary in New Jersey.

I ask that the editorial of April 4, 1985 be printed in the RECORD.

The editorial follows:

WE NEED THREE MORE FEDERAL JUDGES

The failure to fill three additional Federal judgeships established for the District of New Jersey by Congress over 10 months ago is affecting the work of that court. Eleven Federal judges together with an active senior judge, simply cannot continue to carry the extraordinary load of criminal and civil federal litigation, often complex in nature and of long duration, which confronts this state.

The 1984 statistics from the Administrative Office of the United States Courts proves the point that almost all federal practitioners intuitively appreciate: New Jersey Federal judges carry a much heavier case load than do their brethren in the Third Circuit and in other comparable districts throughout the country. Only by dint of prodigious effort are they able to move those cases with reasonable dispatch.

For example, in 1984 there were 5,700 new cases filed in this district, or 518 per judge. This was the highest average in the circuit, and significantly higher than the 428 cases per judge filed in the Middle District of Pennsylvania, the next highest district in this circuit (barring the Virgin Islands where there are virtually no significant or complex cases).

More significant, the weighted filings—a mathematical adjustment of filings which gives heavier count to cases known to be of more difficult and time consuming nature—average 582 per judge, compared with the next highest figure of 433 per judge in the Eastern District of Pennsylvania and the national average of 496. Just by way of comparison, the Southern District of New York, which most laymen and perhaps lawyers regard as the busiest district in the country, averaged only 378 new filings per judge and 422 weighted filings per judge in 1984.

Nonetheless, our Federal judges have managed to keep their collective heads above water. The median time from filing to disposition for criminal trials is 5.4 months (compared with the national average of 5.0 months), and for civil cases is only 8 months, compared to the national average of 7 months. The more significant figure, which discards those cases terminated before issue is joined, is 17 months from issue to trial for civil cases, compared with the national average of 14 months.

But our judges cannot keep it up. Pending cases have increased year by year from 3,224 in 1979 to 4,842 in 1984, and from 293 to 440 per judge in the same period. In short, they are falling further and further behind. Unless there is immediate action to fill their ranks, the administration of justice in our Federal court inevitably will deteriorate, not just because litigants will wait longer for their day in court, but because our Federal judges will be debilitated by volume and unable to give the thoughtful attention and considerable time most of their cases require. Quantity, not quality, may become the result.

Ordinarily a senator of the same political faith as the President would be the official responsible for suggesting appropriate judicial nominees to the Department of Justice and the Administration for the three vacancies which now exist. Because New Jersey has two Democratic senators, that role falls to the Governor. We applaud his steadfast adherence to his previously announced determination to recommend Joseph Rodriguez for one of those vacancies and the President's renomination of Rodriguez. However, there seems to be considerable foot dragging with respect to the other two. We discern little concerted effort to present viable, capable, responsible nominees to the President for consideration.

Meanwhile the bench, the bar and the public suffer. A full complement of active, capable Federal judges must not be a matter of pork barrel politics. The demonstrated need for more Federal judges in this state has been recognized by Congress; their selection is not a matter of juggling alternative priorities.

We urge the Governor, as leader of the Republican party in this state, to proceed to draw up a list of worthy candidates for Federal judgeship and promote them with vigor

to the President for consideration and action now.●

THE KIRKPATRICK LEGACY

● Mr. KASTEN. Mr. President, last month the Heritage Foundation released a backgrounder entitled "At the U.N.: The Kirkpatrick Legacy." This study is a thorough, thoughtful look into the 4 years Ambassador Kirkpatrick has been the U.S. permanent representative to the United Nations. Her leadership has "strengthened the U.S. role at the United Nations, slowed the pace of attacks on Western values and institutions, and attempted to bring the United Nations back to the original purposes of its charter." That is quite a legacy.

Mr. President, I would like to share this document with my colleagues. I ask that this study be inserted in the RECORD.

The study follows:

AT THE U.N.: THE KIRKPATRICK LEGACY

(By Roger A. Brooks)

INTRODUCTION

Ambassador Jeane J. Kirkpatrick, after four years as the chief U.S. representative at the United Nations, will be returning to private life next month. During her long tenure at the U.N., she has demonstrated that the United States need not always be on the defensive and need not always apologize for pursuing U.S. interests. Her willingness to state U.S. positions forcefully and directly and at times to be confrontational has begun paying dividends. She has strengthened the U.S. role at the U.N., slowed the pace of attacks on Western values and institutions, and attempted to bring the U.N. back to the original purposes of its Charter. This contrasts sharply with the defeatist policies pursued at the U.N. by her Carter Administration predecessors—Andrew Young and Donald McHenry. Kirkpatrick declared to the U.N., for example, that the U.S. would no longer wear the "kick me" sign at the organization, and argued convincingly that those who use the U.N. as a political "playpen" demean the organization. She therefore set out not only to argue passionately and persuasively for U.S. interests, concerns and values, but also, and more important, to get the votes needed to actually win some key decisions within the organization. As such, the Kirkpatrick years at the U.N. have left the U.S. an important legacy and teach the U.S. valuable lessons about how to conduct U.S. diplomacy successfully in international organizations.

A key part of the Kirkpatrick legacy is her perception, as she told the U.S. Senate last year, that other member-states of the U.N. must be shown that "their votes, their attitudes and their actions inside the U.N. system inevitably must have consequences for their relationship (with the U.S.) outside the U.N. system." [1]

She also identified a number of trends at the U.N. which not only work against U.S. interests, but prevent the U.N. from fulfilling the worthwhile goals of its Charter. Among these trends are:

The use of the U.N. by the Group of 77 (the Third World bloc) and the Soviet bloc to attack the free enterprise system in general, and multinational corporations in particular, as the source of the world's "economic ills";

The "globalization" of world problems by bringing local or regional issues to the General Assembly, forcing every nation to take a stand;

The U.N.'s support for terrorist organizations and the elevation of those organizations, particularly the Palestine Liberation Organization (PLO) and Southwest African Peoples' Organization (SWAPO), to quasi-member status;

A "double standard" by which the U.N. majority practices "selective indignation" over alleged human rights violations by the U.S., Israel, South African, and other Western states, while so often overlooking outrages committed by socialist and communist countries.

Succeeding Kirkpatrick at the U.N. is General Vernon Walters. If he is to build on the Kirkpatrick legacy, he must be prepared to address the U.N. problems identified by Kirkpatrick and reduce, if necessary, the U.S. role and financial support for those components of the U.N. that promote agendas inimical to U.S. interests and the West. Where appropriate, he must be willing to review U.S. participation in those programs and bodies.

Most important, Walters should be aware of the seven major lessons of the Kirkpatrick years at the U.N.:

LESSON 1: TAKE THE U.N. AND ITS AGENDA SERIOUSLY

In testimony before congressional committees, in speeches at the U.N. and to audiences throughout the world, Kirkpatrick has emphasized the importance of "taking the U.N. seriously." [2] At the U.N. she demonstrated that Washington no longer would "shrug off what happened at the U.N. as though it didn't really matter." [3] She did so, for example, in April 1981 when she headed the U.S. delegation to the U.N.'s International Conference on Assistance to Refugees in Africa (ICARA-I) in Geneva. After learning that the majority at the Conference was about to introduce a resolution to expel Israel, she declared that if the resolution were introduced she would fly back to New York with the more than $200 million which the U.S. had earmarked for the refugees. The anti-Israeli initiative collapsed.

She was similarly tough later that year when the so-called "nonaligned" countries on September 28, 1981, issued a communiqué criticizing the U.S. by name for a host of the globe's political and economic ills. On October 6th, Kirkpatrick sent a letter to most of the U.N. ambassadors of the nonaligned nations, expressing surprise and dismay at the communiqué, and asking each of them whether the statement actually represented the views of their country. The letter noted that the Soviet Union, which was conducting or supporting wars in Afghanistan, Cambodia, and Chad, was not mentioned even once in the document, while the U.S. was condemned nine times. Many of the "nonaligned" delegates were dumbfounded that anyone would care what the communiqué said, or that any U.S. official would even read such a document. When Kirkpatrick made it clear that the U.S. was paying attention to what happens at the U.N., many nations began acting more carefully when it came to offending Washington. Kirkpatrick had gotten the message across.

Kirkpatrick told The Heritage Foundation that the job required using all her skills as a seasoned political scientist. It also required that she carefully select articulate, intelligent and high-principled individuals to serve her in a forceful "management team" at the U.S. Mission to the U.N. This "team" included Charles Lichenstein, Richard Schifter, Jose Sorzano, Alan Keyes, Kenneth Adelman, Carl Gershman, and Allan Gerson.

An obvious result of the Kirkpatrick policy of taking the U.N. seriously was the unusual moderation in tone of the recently concluded U.N. 39th General Assembly. Verbal abuse was generally diminished, direct assaults on the U.S. were few and muted and even vitriolic attacks on Israel declined. The earlier condemnation of the U.S. for its "colonial" and "imperialist" domination of Puerto Rico, a staple of U.N. resolutions for two decades, arose neither in U.N. committees nor in the plenary. Furthermore, an intensive U.S. lobbying campaign in world capitals and New York produced two 62 to 47 vote victories for the U.S.-backed amendments that deleted the words "in particular the United States and Israel" from a general condemnation of Western aid to South Africa.[4] Perennially, the U.S. and Israel had been singled out for condemnation.

In another case, the Nicaraguans withdrew an anti-American resolution in the General Assembly when they found that they could not marshal sufficient votes for its adoption.

A recent press report on a preliminary study of 1984 U.N. voting records indicated that the U.S. voted with the majority of U.N. members only 14 percent of the time in 1984, down from 21 percent in 1983.[5] Kirkpatrick explains, however, that when the statistics are examined according to issues the U.S. considers important and when other, unquantifiable factors are taken into account, the last General Assembly "was substantially more constructive than [it] had been for some time."[6]

In 1984, for example, the U.N. majority, as in previous years, targeted Chile, El Salvador, and Guatemala for "selective indignation" in three separate resolutions,[7] while ignoring abuses in Cuba and Nicaragua. Though the U.S. voted against all three resolutions, Kirkpatrick succeeded in changing much of the language in the resolution condemning El Salvador so that it was far preferable to previous General Assembly resolutions on the same subject.

Kirkpatrick's resolve to take the U.N. seriously prompted her to use the veto in the Security Council when U.S. security interests, or those of U.S. allies and friends, were at stake. Since 1981, the U.S. cast 17 of the total 39 vetoes it has cast since the U.N.'s inception. During Kirkpatrick's tenure, the U.S. has cast the lone opposition vote 12 times. She admits that she would like to have avoided this, but that the U.S. was going to stick to its principles, with or without help from other countries.

LESSON 2: CONFRONT SOVIET HUMAN RIGHTS AND U.N. CHARTER ABUSES

Kirkpatrick and her team forcefully confronted the Soviets and their clients on their human rights abuses and their continuing effort to export war, revolution, and unrest. She also began to confront the Soviets on their abuses of the U.N. Charter within the U.N. Secretariat.

Addressing the General Assembly on December 17, 1984, for example, Ambassador Jose Sorzano of the U.S. Mission, deplored the "shameless introduction" by the USSR of a resolution on "State Terrorism." Sorzano noted that this demonstrated "George Orwell's point that totalitarian regimes seek to hide their own despotic practices by . . . accusing others of acts in which they themselves systematically engage."[8] The U.S., joined by 29 other nations, abstained on the resolution in order to demonstrate contempt for the "multilateral cynicism" of the U.N.[9]

Kirkpatrick and her deputies made equally strong statements on the Soviet war and occupation in Afghanistan and the Vietnamese aggression against the people of Cambodia. For the fifth year in a row in each case, the General Assembly voted to condemn the occupation of those countries by "foreign forces," without condemning by name the Soviets in Afghanistan or the Vietnamese in Cambodia.[10]

Kirkpatrick successfully opposed Moscow's candidates in 1984 for the non-permanent members of the Security Council. The Soviets sponsored Outer Mongolia and Ethiopia. Through the exercise of what one of Kirkpatrick's advisors has called "good machine politics," the U.S. successfully pushed the election of Thailand and Madagascar for the two vacant seats.

More important, perhaps was Kirkpatrick's determination to expose Soviet use of the U.N. Secretariat as a base of espinoage operations against the U.S. and as a center of dissemination of Soviet propaganda. Soviet espoinage activities at the U.N. recently have been documented in the recollections of Arkady Shevchenko, a former Soviet Under-Secretary General in the U.S.[11] Kirkpatrick also brought to the attention of the U.N. Secretary General and the media that the Soviet bloc, through inordinate influence within the U.N. Secretariat, controls important staff appointments and the daily agenda of U.N. conferences, agencies, and meetings.

General Walters should work with Congress to ensure passage of legislation to reduce the numbers of Soviet bloc personnel in New York and to restrict their mobility within the U.S. There is a need too to press the U.N. Secretary-General to appoint more Americans to high level Secretariat positions. He should also reemphasize to the Secretary-General President Reagan's demand to put an end to Soviet propaganda activities in the U.N. through the Secretariat's Political Information News Service (PINS).

LESSON 3: FIRMLY OPPOSE ATTACKS ON ISRAEL ANYWHERE IN THE U.N. SYSTEM

During Kirkpatrick's years at the U.N., Israel has dominated the U.N. agenda. Of the Security Council's 88 sessions in 1982, for example, 46 were on issues related to Israel. In the 37th General Assembly in 1982 and its seven main committees, debates on the Middle East consumed over one-third of the delegates' time and led to 44 resolutions. The 39th General Assembly produced 36 Israel-related resolutions.

Kirkpatrick has made U.S. firmness in the defense of Israel a focal point of her tenure at the United Nations. Not only did she work to ensure U.S. opposition to attacks on Israel, but also worked with lawmakers in Washington, including Senator Robert Kasten and Congressmen Jack Kemp and Stephen Solarz to enact legislation tying Israel's status within the U.N. to that of the U.S.: if Israel is driven out, says the legislation, then the U.S. leaves too.

The message sent by the U.S. Congress and reinforced by Kirkpatrick have reduced the severity of threats to expel Israel from the General Assembly and other U.N. bodies in 1984. At the 39th General Assembly the annual effort by radical Third World elements, joined by the communist and Arab countries, to expel Israel foundered. It had less support than in previous years.

General Walters should re-affirm the strong U.S. commitment to Israel at the U.N. He should ask Congress to ensure that, if the U.S. leaves a U.N. body when Israel is expelled, the U.S. will not restore funding lost to the organization if and when the U.S. returns.

LESSON 4: WORK TO DISRUPT U.N. VOTING BLOC PATTERNS

Kirkpatrick split several of what had been solid U.N. voting blocs. She developed previously untapped and underutilized sources of support among moderate states within the so-called "nonaligned" movement in the U.N. In a January interview with The Heritage Foundation, she pointed to the most notable of these "moderates": Cameroon, Ivory Coast, Morocco, Niger, Pakistan, Senegal, Togo, Zaire, the Eastern Caribbean states, and the nations of the Association of Southeast Asian Nations (Brunei, Indonesia, Malaysia, the Philippines, Singapore, and Thailand). To some extent, this is becoming true of the Portuguese-speaking countries of Guinea-Bissau, Sao Tome, Mozambique and Cape Verde.

In an attempt to circumvent the normal voting blocs within the U.N., the U.S. has been going to U.N. member-state capitals to voice opinions on issues under consideration by the General Assembly, agencies, and committees, and to rally support for Security Council resolutions. Kirkpatrick and her colleagues have visited scores of capitals. Along with those of State Department and U.S. embassy officials, the visits also conveyed displeasure with the way a country may have voted or spoken at the U.N., or expressed gratitude for support within the world body.

Working behind the scenes with individual countries before and during a General Assembly session have helped the U.S. in the work of the U.N.'s First (Disarmament) Committee. There were three notable U.S. successes in the disarmament area during the 39th General Assembly.

First, the U.S. successfully sponsored a carefully worded resolution on chemical and bacteriological weapons that called for the "strict observance of existing international obligations regarding prohibitions on chemical and biological weapons," and condemned "actions that contravene them."[12] The resolution, which implicitly condemned Soviet chemical weapons use in Afghanistan and Cambodia, received 118 votes of support. An alternative resolution, sponsored by East Germany, and implicitly critical of the United States for "the intended production and deployment of binary chemical weapons," received only 84 "yes" votes.

Second, Ambassador Sorzano, assisted in this case by other U.N. delegations and a well-documented U.N. Secretariat report, blunted the efforts of several developing countries to undermine the Antarctic Treaty, and move Antarctica under the questionable management of the U.N. In the process, they also discouraged a resolution that would have declared the resources of the Antarctic the "common heritage of mankind," U.N. code-language for the redistributionist strategy of the "New International Economic Order."

Third, U.S. negotiators convinced the Committee on the Peaceful Uses of Outer Space (COPUOS) to return to the consensus voting principle on substantive matters. This will require the Committee to seek uniform agreement on such issues before passing a draft resolution to the General Assembly. This enables the U.S. to wield a veto in the Committee.

In the past four years, nations discovered that lending the U.S. support on key votes and in crucial debates within the U.N. would not go unnoticed or unappreciated by Washington. Congressional legislation requiring the annual accounting of how nations voted in the U.N. also helped gain behind-the-scenes support from some countries.

Furthermore, the commitment of the U.S. to leave UNESCO at the end of 1984 sent shock waves throughout the U.N. system. To numerous delegates from moderate Third World states, U.S. withdrawal demonstrated that the Reagan Administration was not bluffing when it warned that it was going to take the U.N. seriously.

LESSON 5: CONTROL THE EXPANSION OF THE U.N. BUDGET

Despite U.S., industrialized nation, and Soviet bloc opposition or abstention on all three budget resolutions, the 39th General Assembly approved a U.N. budget for the biennium 1984-85 of $1.6 billion. Of this, the U.S. must pay 25 percent, or approximately $400 million. What is worse, the U.S. and 14 other countries in the U.N. will pay around 85 percent of the assessed contribution alone, or about $1.3 billion. The U.S. contribution, however, is only part of the total $1.5 billion that the U.S. hands over to the U.N. bodies, agencies, and voluntary programs each year.

Two recent examples illustrates the difficulties encountered and moderate success enjoyed by the U.S. in controlling the U.N. budget:

In 1984, the U.N.'s International Civil Service Commission (ICSC) recommended that all U.N. employees in New York receive a 9.6 percent "post adjustment" salary increase, the first half of which would become effective immediately. The increase was also effected in all other U.N. duty stations throughout the world. At the 39th General Assembly, because of strong U.S. opposition, the second half of the "post adjustment" increase was voted down by the General Assembly's Fifth (Budgetary) Committee.

In December 1984, over U.S. opposition, the General Assembly approved the construction of a $73.5 million conference center in Ethiopia, even as millons of Ethiopians were starving. The U.S. delegation em-

[12] U.N. General Assembly Resolution 39/65A.

phasized the utter hypocrisy in such a vote, embarrasssing a large number of West European states that did not oppose the resolution.

Under Kirkpatrick's leadership, U.S. policy regarding the U.N. regular or assessed budget has been to encourage the U.N. to maximize the level of program output through better use of available resources and to exercise "significant restraint in budget growth.[13] The U.S. has also encouraged administrative reform in the U.N. system and has sought and gained assistance from other delegations to hold down the level of budget growth.

Yet, as 1982 U.S. House of Representatives Appropriations Committee hearings discovered, there is little or no incentive at the U.N. to hold down budget growth or reduce cost. The reason is that the vast majority of nations voting on a budget pay a tiny share of U.N. outlays. Thus, for every $1 million increase in the United Nations budget, the 80 developing countries who contribute the minimum 0.01 percent of the U.N. budget are assessed a mere $100. These countries, of course, receive far more aid and assistance from each $1 million the U.N. spends than their $100 investment. Thus, it is the U.S. and other developed countries who bear the burden of increased budgets, and not the developing nations who insist on budget growth. The trouble is that the U.S. and the developed nations have relatively few votes with which to influence budget decisions.

Nonetheless, Kirkpatrick enjoyed significantly more success than her Carter Administration predecessors in holding down the growth of the regular U.N. budget. Even though the 39th General Assembly approved a revised approriation for the current two-year budget (1984-1985) of $1.61 billion, with the U.S. and 16 other nations opposing the resolution, this budget still represents less than a 10 percent increase over the 1982-1983 appropriation. Indeed, during Kirkpatrick's tenure at the U.N., the average increase in the regular biennial U.N. budget has been around 13 percent. On the other hand, the average increase for the U.N. regular budget for the biennia 1978-1979 and 1980-1981, during the Young-McHenry tenure at the U.N., was approximately 30 percent. The reduction in U.N. regular budget growth in recent years derives significantly from Reagan Administration economic policies which have virtually eliminated inflation in the U.S. and strengthend the dollar throughout the world. Yet Kirkpatrick's effectiveness in articulating Reagan Administration policies, and her tenacity in holding down U.N. spending have played equally important roles.

LESSON 6: PROMOTE ECONOMIC OPPORTUNITY AND FREE ENTERPRISE FOR THIRD WORLD DEVELOPMENT

The economic welfare of the globe's inhabitants is best served by expanding their economic opportunities, and thus increasing their living standards. Regrettably, the U.N.'s approach to development policy—and international economic issues in general—has retarded economic growth much more than advanced it. The U.N.'s economic philosophy is hostile to the free enterpise system and nearly ignores the market economy. This is shortsighted because private sector trade and investment benefit industrialized and developing nations alike.

Alan Keyes and Dennis Goodman, Kirkpatrick's deputies for economic issues, have argued firmly at the U.N. for increasing free market opportunities and ending statist barriers to growth in developing countries. They also have waged a tough campaign against the New International Economic Order, the predominant U.N. economic ideology, which calls for the transfer of wealth from developed to developing countries without regard for economic incentives. This new "order' also depicts multinational corporations as the source of all social evil and economic distress in developing countries.

The U.S. delegation opposed many U.N. guidelines and codes that would circumscribe and eventually reduce the activities of multinational corporations in the developing world. In cases where they did not oppose these initiatives, the U.S. delegation worked to improve the draft guidelines or codes. Keyes and his staff, for example, played a constructive role in the Economic and Social Council's efforts to come up with sensible Consumer Guidelines relevant to the needs of the developing world.[14]

U.S. policy in economic development at the U.N. should be to support those U.N. programs that help people rather than governments; that have limited and clearly defined goals; and that concentrate on producing results rather than on simply amassing or increasing inputs of resources. U.S. policy should assist U.N. member-state representatives in understanding that governments are not the chief engine of development, and that they indeed are often the obstacle to development. U.S. delegates should emphasize the importance of including the private sector in U.N. approaches to development problems.

The postwar transfer of resources from Western nations to the less developed countries, both direct and through multilateral bodies such as the U.N., appears to have accorded with neither of the two original premises for extending "development assistance"—it has not improved the climate for productive international investment and it has not contributed generally to self-sustaining economic growth. Ironically, financial transfer from the industrialized states in the U.N. actually may have made it possible for many nations to avoid participating more fully in the world economy.[15] Many U.N. development programs, particularly those conducted by the U.N.'s Food and Agriculture Organization, do not encourage economic health or self-sustaining growth in low-income nations; indeed, they actually subsidize practices that perpetuate or even generate poverty in certain places. The U.S. should insist on change in these programs. Where change is resisted, the U.S. should consider diverting its contributions to other U.N. and non-U.N. programs which actually promote self-sufficiency and economic health.

LESSON 7: THE U.S. PERMANENT REPRESENTATIVE MUST RESIST TRADITIONAL STATE DEPARTMENT POLICIES REGARDING THE U.N.

Charles Lichenstein, who served as a deputy to Kirkpatrick from 1981 to 1984, maintains the State Department establishment often posed greater problems for the U.S. Mission than did the U.N. itself. Kirkpatrick too is believed to feel this way. Frequently, State Department careerists tried determinedly to dilute Kirkpatrick's counteroffensive against attacks in the U.N. on U.S. interests and her efforts to halt the mismanagement of U.N. programs and agencies. Lichenstein and others close to Kirkpatrick have told the Heritage Foundation that each stage of increasing U.S. effectiveness at the U.N. faced the active opposition of the Department of State, usually at the "desk" level, sometimes from higher up.

Lichenstein recalls that State Department Personnel who took part in negotiations at the U.N. often dismissed Kirkpatrick's opening position as being unacceptable to other U.N. member-states. As such, these State Department staffers would exercise "preemptive capitulation" by giving in to other countries' demands even before negotiations began.

Kirkpatrick and her colleagues found that the predominant State Department view of the U.N. was that attacks leveled at the U.S. or its allies and friends merely represented the Third World "letting off steam" or what Kirkpatrick terms the "Turkish Bath" theory of the U.N. Senior State Department personnel maintained that other countries really did not mean any harm to the U.S., and that they would even "feel better" by venting some anger.

The key 1983 law, in fact, that requires compilation of U.N. voting records (P.L. 98-151 and 98-164) was criticized by the State Department as being inappropriate and "unproductive."

Because probably of Kirkpatrick's persistence, the State Department has begun to provide more support to the U.S. Mission to the U.N. on important issues, and may appreciate that at times it pays to be firm in dealing with friends and adversaries at the U.N. Says one of her deputies: "Once they saw that we could be successful with a tough policy, they didn't object."

OVERCOMING PAST LEGACIES

In contrast to her predecessors, Kirkpatrick has had the advantage of longevity at the U.N. She has served in the role of U.S. Permanent Representative longer than any other ambassador since Adlai Stevenson. When she departs the U.N. this month, she will have been there 50 months—almost three times the average tenure of U.S. representatives at the world body. This extended term allowed her to become more effective at the U.N. and in the Department of State.

Upon arrival at the U.N., Kirkpatrick felt that she would have to overcome no small degree of bias against her as a woman. She has often said that any time a woman is involved in nontraditional roles, she is likely to encounter certain kinds of discrimination.

Kirkpatrick soon found that she would have to overcome a legacy of acquiescence and timidity left by her predecessors. The Carter Administration, in particular, allowed U.N. debate to depict the U.S. as the principal source of instability and injustice in the world.[16] The posture of U.S. Ambassadors Andrew Young and Donald McHenry seemed to signal to the world that the U.S. was ready to abdicate its role as defender of the free enterprise system, of Israel, and of its other allies and friends. Young and McHenry also were reluctant to criticize

[13] U.S. Department of State, *"U.S. Participation in the U.N."* Report by the President to Congress for the Year 1983 (Washington, D.C.: U.S. Government Printing Office, September 1984), p. 335.

[14] "The Administration's Consumer Guidelines Effects on the U.N.," the New York Times, Oct. 30, 1984.

[16] Daniel P. Moynihan, "Joining the Jackals: The U.S. at the U.N. 1977-80," Commentary, Feb. 1981, p. 24.

Soviet and Third World human rights abuses. On numerous occasions, moreover, Young and McHenry indicated that the U.S. was willing to join the U.N. majority in calling for the adoption of a long list of new "orders," most notably, the New International Economic Order (NIEO) and the New World Information and Communication Order (NWICO)—a U.N. blueprint for restricting press freedoms throughout the world.

Because of a policy characterized in part by defeatism and self-deprecation, the U.S. found itself under attack, outvoted and outmaneuvered in the U.N. The attacks against the U.S. and the West continued for some time after Kirkpatrick arrived in New York. Realizing that these attacks were not going unnoticed outside the U.N., however, Kirkpatrick strengthened the prevailing image of the U.S. and eventually reasserted U.S. moral and political leadership in the organization.

CONCLUSION

Jeane Kirkpatrick has demonstrated that the U.S. need not always be defeated at the U.N. nor always on the defensive. She demonstrated too the continuing validity of key basic principles in the conduct of foreign policy:

That international relations depend above all on the relative power of nations;

That the power of international affairs is cumulative—the more you have, the more you get and vice versa;

That the relative position of the U.S. and the Soviet Union depends in very important measure on U.S. success in dealing with noncommunist nations in the world;

That U.S. influence with other nations depends largely on hopes of gains and fears of losses; and finally

That U.S. effectiveness and power in organizations as the United Nations require absolutely that the U.S. believe in itself and have confidence in its own values and experience.[17]

Kirkpatrick outlined these principles, which were first offered by American diplomat George Kennan thirty years ago, in a recent speech in Honolulu. She added that "even though we are a great nation, we became virtually powerless in the United Nations in the course of 20 years, largely because we ignored these basic facts about politics."[18]

Whether Kirkpatrick's legacy continues will depend to a great extent on the actions of her successor. Few candidates for her post seem more qualified to build on the legacy than Vernon Walters. He would be wise to maintain the momentum that she started. But he could go beyond this, using his office and his prominence in the Reagan Cabinet to focus attention on much-needed structural reform of the U.N. system. He should look closely, for example, at the U.N. Relief and Works Agency (UNRWA), a woefully expensive organization which has subsidized training bases for Palestine Liberation Organization (PLO) terrorists.

Other bodies requiring intense scrutiny are the U.N. Conference on Trade and Development (UNCTAD), the U.N.'s think-tank for furthering the ideology of the New International Economic Order; and the Food and Agriculture Organization (FAO), a Rome-based specialized agency of the U.N., which has wasted enormous sums of money and has betrayed its mandate to provide sound economic development advice to the Third World.

Many other problems at the U.N. also deserve attention. In focusing on them, Vernon Walters can count on help from key members of Congress and the American people. Their awareness of the United Nations' shortcomings and threats to the U.S., indeed, may be one of the most valuable of the Kirkpatrick legacies.●

FARRAR LEAVES "WEAVING SHED"

● Mr. PELL. Mr. President, there is an old school of journalism that finds its best expression in the dedicated, objective, and thoroughly professional reporter who enjoys his work and covers his beat like a blanket.

George R. Farrar, who recently retired from the Woonsocket Call in Rhode Island, is just such a reporter. He knows his city and its people. He also has never lost track of its roots—the textile mills that long were the backbone of its economy.

He sometimes referred to his desk at the Woonsocket Call as the "weaving shed." It was at that desk that he gathered all the threads of his notes, his knowledge, and his observations to weave a complete story about the news of the day in Woonsocket.

He once told a group gathered to honor him that his newspaper experience "has been a pleasant road for me. I've done what I've wanted to do all of my life, be a reporter."

George R. Farrar's byline became a guarantee of a comprehensive and readable story about city, State, or national events. Readers will miss the stories that carried his byline and continually demonstrated his insight.

Fortunately, despite his retirement, his byline and his work may continue to appear in the Woonsocket Call. I expect his byline to reappear with news of the Rhode Island State House or a thoughtful analysis of local events.

The Woonsocket Call termed his retirement the end of a "Farrar Era," but I suspect it is only the beginning of a new one.

Mr. President, I ask that an article by James Anagnostos, assistant managing editor of the Woonsocket Call, be printed in the CONGRESSIONAL RECORD. The article is titled: "Farrar Era Ends at the Call."

The article follows:

[From the Woonsocket (RI) Call, Apr. 6, 1985]

FARRAR ERA ENDS AT THE CALL

(By James Anagnostos, Assistant Managing Editor)

A number of reporters preceded George R. Farrar into retirement in the years since we joined The Call. A number will follow. But George's was special. He seemed such a fixture. Would the press retire?

We can recall the departure of Zel Levin, who was executive editor when he departed in October, 1950, to publish his own newspaper, the Sunday Star. He was followed by many others over the years up to the departure one week ago yesterday of our colleague Farrar.

Retiree names which come to mind include those of William Stonebraker, Daniel J. Kelleher, Otto R. Frueh, Edgar J. Allaire, Arthur E. Monahan, Eileen Doyle Hurley, Edward Berman, William H. Burlingame, Harvey S. VanBrocklyn Sr., Gregory C. Greene, Peter Fitzgerald, Harold T. Gilbert, Woodrow L. Abbott, Walter Wilcox, J. Richard MacMullen, Philip E. Thomas Jr., Louis Bleiweis, William A. Crouse and his predecessor as managing editor, Paul L. Smith, Normand H. Chamberland.

There were many others who joined the staff, stayed for a while and went on to greener pastures. The names of Martin S. Bander, Robert T. Grey Louise J. Lind, John H. Luttrell, Douglas Weatherly, Diane Houle Dufresne, Brian Beaulieu, Stewart Jenkins, Bruce Smith, Donald Jeffrey and William Jere Green come immediately to mind.

It matters not for the moment to name all who have come and gone. The point we seek to make is that George Farrar worked with all of them and for many of them.

Many have died. All of his colleagues over the years would agree that if this man named Farrar had anything over them it is his dedication to his profession. George Farrar is first and always a reporter.

He once told a group of veterans gathered to honor him that "newspaper experience has been a pleasant road for me. I've done what I've wanted to do all of my life, be a reporter."

He may not have been cut out to be a super columnist or a big city star reporter, but no other journalist, as famous as one might have been, could muster more dedication to a task than could George Farrar.

He lived his profession. He was reporting at every minute, on duty or off. He was paid for an eight-hour day but the other 16 hours belonged to the newspaper, too.

We should not talk of George in the past tense. He may have given up his video terminal at The Call, but he is not through reporting, and readers of this newspaper and others will still be seeing his byline.

George Farrar covered Woonsocket municipal affairs like a blanket for nearly three decades. He did the work which before him had required the efforts of two reporters. He had his pulse on every aspect of municipal life. He did it so well that it appeared he was an official part of it and this resulted in his being criticized for being an apologist for the administration—anyone which might have the City Hall reins, except for one, we recall. He was not in the pocket of any mayor or any administration. His great knowledge of "the crazy house," as he familiarly referred to City Hall, surpassed that of many chief executives; and his desire for good government led him to suggest, prod, provoke, counsel, advise. He was anxious to see good government, and he felt it was his duty as a citizen and a close observer of the City Hall scene to help if he could. At times that smacked of favoritism, but only among those on the outside trying to get inside.

There have been—and there will be more—but none has covered a story with greater intensity. We have watched him cover the sports scene. Though he loved all sports, he could play few because of a childhood bout with polio. This did not restrict him from being a manager, coach, umpire or referee.

He was a graduate of the school of hard knocks, learning his profession by doing, and by accepting any challenge thrown at him. Unfamiliarity has not retarded his venturesome soul. He has tackled any assignment and has gained mastery over all. He has been as familiar at the capital as he has been on the municipal scene.

George Farrar has earned his retirement, but neither the mind nor the soul will permit this aching body to sit still. We can look for him to continue his journalistic endeavors wherever the challenge exists and the opportunity affords itself. He impended his "30" in the final article. The end of an era at The Call. But that was only for those who want to believe this. We don't, and we feel that the Farrar mill will continue to churn out the copy on stories which need to be told and which less experienced souls may not discern as readily.●

JAMES W. BALDWIN

● Mr. DOMENICI. Mr. President, the Silver City Daily Press recently printed an article about Silver City school teacher James W. Baldwin. The paper recognized him for his leading participation in the first discovery of a rare fossil in the State. This discovery of a jaw from a young hadrosaur (duck-billed dinosaur) at a site south of Farmington came after Mr. Baldwin noticed what looked like a very small tooth row exposed in a block of sandstone. At the time he was working with two other Mexico teachers, Mariann Patterson of Bingham and Mary Peckinpaugh of Roswell.

The discovery marks another significant milesone in Mr. Baldwin's unique career. The La Plata Junior High School teacher is also known and honored for his discovery of the only known complete fossil of the extinct mammal Titanothere, a hippopotamus-like creature.

Mr. Baldwin, who could teach at any level, including college, chooses to teach at the junior high level because of his great interest and dedication to this age group. The science teacher keeps current in his profession by combining summer college courses and field trips in various scientific fields, including the important one of energy uses and applications. He uses these experiences to bring hands-on education to the classroom, a technique so important to learning.

These examples contribute to why, in 1983, James Baldwin was chosen by the National Association of Geology Teachers as their Teacher of the Year. Mr. President, I feel proud that we can honor a New Mexico teacher such as him. I want to share the following two news articles with my colleagues, and I ask that they be printed in the RECORD: From the Silver City Daily Press, Oct. 20, 1984; From the Silver City Daily Press, May 18, 1983.

The articles follow:

DINOSAUR'S JAW FOUND NEAR FARMINGTON

SOCORRO.—The discovery of a jaw from a young hadrosaur (duck-billed dinosaur) at a site south of Farmington was announced this week by Donald Wolberg, paleontologist with the New Mexico Bureau of Mines and Mineral Resources at New Mexico Tech. This is the first discovery of an infant dinosaur fossil in the state.

The jaw, which Wolberg believes came from a hadrosaur between six months and one year in age, was found in late Cretaceous rocks roughly 72 million years old in the San Juan Basin about 35 miles south of Farmington.

It was recovered from a block of sandstone excavated by a group of teachers participating in a master of science teaching program during the summer. The field paleontology course taught by Wolberg brought 22 teachers, primarily from New Mexico, to an excavation site in "the Fossil Forest" south of Farmington.

Three teachers—James Baldwin of Silver City, Mariann Patterson of Bingham, and Mary Peckinpaugh of Roswell—actually worked on the sandstone block that contained the jaw.

"We were interested in this particular block because it contained a reasonably preserved humerus (shoulder), radius and ulna (arm bones), and an isolated tarsal (toe) bone. I think it was Jim Baldwin who first noticed what looked like part of a very small tooth row exposed in the block," Wolberg said.

"At the time it seemed almost too good to be true that a juvenile jaw would be contained in the block," he continued.

Under the direction of Wolberg and Adrian Hunt, now a doctoral student at the University of New Mexico, Baldwin, Patterson, and Peckinpaugh carefully excavated the block containing the fossils. The group trenched down on four sides of the massive block and gradually undercut beneath it.

The top and sides were covered by newspaper, burlap strips soaked in plaster, wood strips for added strength, and additional plaster. The block, measuring three by four feet, was overturned and the process repeated.

"The MST field paleontology course provides teachers with 'hands-on' experience in a field environment and enables the teachers to translate what they have learned to the classroom. I found the teachers to be extremely well-organized, hardworking and interested in the work," Wolberg said.

"They were able to cope with extremes in weather and uncomfortable field conditions," he continued. "They have made a substantive contribution to our understanding of the paleontology of New Mexico."

Well-preserved remains of infant dinosaurs were previously unknown in New Mexico but have been found elsewhere. One of the best of these sites in Cretaceous rocks from Montana is presently being studied by Jack Horner of the Museum of the Rockies in Bozeman, Mont.

Wolberg said that Horner's localities represent an ancient inland environment, perhaps bordering a lake, whereas the recent San Juan lower Kirtland discovery is from a stream channel deposit not too far from what was the shore of a vast north-south trending seaway that covered much of the western interior region.

"I had expected that dinosaurs nested inland," Wolberg said, "and didn't hold out much hope for finding dinosaur eggs or juveniles in the Fruitland or Kirtland formations. My ideas should have changed when Dr. Barry Kues, of the University of New Mexico, recently reported egg shell fragments from the Upper Fruitland.

"I figured that Barry had probably found turtle, lizard or crocodile shell fragments, important discoveries on their own but not terribly unusual," Wolberg said. "Barry's egg shells ought to be looked at more carefully now to see if they possibly are dinosaur shell fragments."

After description of the infant dinosaur jaw is completed, the fossil will be on display at the New Mexico Bureau of Mines and Mineral Resources Museum in Socorro.

JAMES BALDWIN WINS TEACHER OF YEAR

GEOLOGISTS PROVIDE HONORS

(By Frank Thayer)

If the epitome of teaching is to be a highly competent professional who chooses the classroom out of a sense of dedication then Jim Baldwin deserves to be Teacher of the Year.

With 17 years of science teaching to his credit, Baldwin is the 1982-83 Teacher of the Year as chosen by his professional peers, the National Association of Geology Teachers (NAGT) which is a group of educators representing junior high, high school, college and university professionals.

Baldwin's selection singles him out as the best of the profession from West Texas, New Mexico, Arizona and Southern Colorado.

Baldwin's La Plata Junior High School classroom has the aura of both earth and space sciences and it displays the teacher's love for his field and his sincerity in trying to communicate this commitment to his students.

Students in Baldwin's science classes are busy calculating the number of astronomical units distance from the planet Pluto to the sun and are learning from shelves of samples the difference between igneous and metamorphic rock.

His eighth graders are exposed to science from the fossil records of millions of years ago to the latest knowledge from interstellar space—not just out of textbooks but from Baldwin's firsthand experience.

Baldwin, who holds his bachelor of science in geology from Utah State and a master's in science teaching from New Mexico Tech in Socorro, keeps current in his field by gaining at least two college semester hours each summer but that is only the beginning of his professional self-development.

The La Plata science teacher is known for his discovery of the only known complete fossil of the extinct mammal Titanothere, a creature which walked the Americas not long after the disappearance of the dinosaurs and resembled to some extent a long-snouted hippopotamus with lumps on its head not unlike those of the modern rhinoceros but of varying shapes.

Baldwin made this important fossil discovery in the Big Bend National Park in Texas.

Astronomy is also one of Baldwin's major interests and he spends part of each summer at the McDonald Observatory on Mount Locke in Texas as part of a group called the Texas Star Party. D. Clyde Tombaugh, the discoverer of Pluto, addressed the group last summer and the observatory will be the site of a 300 inch telescope, the world's most powerful optical telescope, when it is built.

Baldwin is qualified to teach at any level, including college, but he teaches junior high students because, in his words, "I really like them." He also says that he prefers to teach in Silver City because the area is an outstanding laboratory for the earth scientist.

La Plata Junior High Principal Bill Rogers said of Baldwin, "One of the most significant things about him is that he does keep himself abreast of major developments in his field and he does provide a lot of first-hand experience for his students through the samples he brings back from his field trips."●

THE SILENT SCREAM

● Mr. HUMPHREY. Mr. President, Dr. Bernard Nathanson's film, "The Silent Scream," has continued to cause controversy. Dr. Nathanson is certainly qualified to comment on abortion in America, having once been a major advocate of abortion on demand and an abortionist himself. Over the years, because of the advance in medicine and technology, he was faced with the obvious need to reexamine his position and to recognize that the preborn child is not only a living human being but also a patient deserving of the protection of the physician. He believes that these scientific advances will also play a part in the ultimate reversal of the Supreme Court's Roe versus Wade decision which legalized abortion in 1973.

Dr. Nathanson's career is noteworthy, and he has a remarkable story to tell from a remarkable vantage point. His unique experience can assist us in taking a better look at abortion and its ramifications than the Supreme Court did in 1973. For this reason, Mr. President, I ask that the article entitled "The 'Scream' of Bernard Nathanson, the Obstetrician's Odyssey, From Abortion King to Anti-Abortion Activist," which appeared in the Washington Post on Sunday, March 24, 1985, be printed at this point in the RECORD.

The article follows:

[From the Washington Post, Mar. 24, 1985]

THE "SCREAM" OF BERNARD NATHANSON

(By Phil McCombs)

NEW YORK.—Dr. Bernard N. Nathanson, in dark blue suit, conservative tie and cuff links, opens the door of his Manhattan brownstone. There is a certain gravity in his manner, in his careful smile.

With a well-placed toe, he stops Counselor, the family dog, from breaking toward the sunny, wind-swept street.

He is calm, controlled, a man at home.

And a man at the center of the rising storm of debate over abortion.

Nathanson originated the idea for and narrates the grisly antiabortion film "The Silent Scream," which shows an abortion-in-progress by means of ultrasound photography, a relatively new technology. It has been seen by millions on "Donahue," the Rev. Jerry Falwell's weekly cable television progam and elsewhere. At President Reagan's suggestion, copies of the film are being given to every member of Congress. Critics call it propaganda, and inaccurate at that, but the film's emotional megatonnage has hit "pro-choice" forces hard.

"For the first time," Nathanson narrates flatly in the film, his words a slow, sepulchral march, "we are going to watch a child being torn apart, dismembered, disanticulated, crushed and destroyed by the infeeling steel instruments of the abortionist."

Words spoken with the intensity of a convert.

Nathanson was formerly a leading advocate of abortion on demand. His change of mind has given new ammunition to "pro-life" forces, who also point to his self-proclaimed atheism as evidence that the appeal of their movement reaches beyond the hard religious right.

As the head of a major clinic here in the early 1970's Nathanson by his own count presided over 60,000 abortions. He himself performed thousands. He helped lead the pro-choice movement that preceded the 1973 Supreme Court approval of abortion on demand, which opened the way for an estimated 18 million abortions since.

He was dubbed the Abortion King.

Now, on a pleasant Saturday morning in his home, Nathanson leads the way upstairs to his library, a sanctum of dark wood and comfortable old furniture, of brandy snifters on the coffee table. An entire section is devoted to Joyce.

He settles into a deep armchair, touches his fingertips together.

He says, among other things, that he must confine his antiabortion work to weekends because his life centers on his practice here in obstetrics and gynecology, and he has no partners.

He smiles warmly.

"I'm just a practicing doc."

Nathanson's patients sometimes come to him wanting to end pregnancies.

He tailors his response to each case.

"You really have to try and read your patient carefully," he says, "and understand, and really get some sort of a visceral nexus with the patient." If I feel this woman has made up her mind after turmoil, and she's there only to have me carry it out, I just say. "No, I don't do abortions, you'll have to find somebody who does. I want to reassure you that the moment the abortion's finished you can come right back to me, because if there's any complications . . . I want to see you. Don't worry about my feelings on it . . . I do not try to persuade such women from abortions. I know that they have gone through a terrible turmoil [and] it's a very private thing and I don't want to interfere."

But if a patient appears undecided:

"I will try to draw out her feelings . . . counsel her against the abortion . . . tell [her] that it does involve another human being, and that the human being is being torn apart . . . that there is enough support out there to help her through this . . . No obstetrician practices with only one patient in mind, and you have to tell the one patient about the other patient and balance their needs. [If her] situation is so extreme that it justifies the destruction of a human being, well then, that's the way she thinks. But you have to understand that this is . . . not at all dissimilar to infanticide . . . If I begin to counsel them and I notice they're beginning to pull away from me, I will not pursue it."

Bernard Nathanson, 58, has now stood publicly and vociferously on both sides of one of the great issues of contemporary life, each time investing, he says, his entire moral being in the effort.

Each time seen as a pariah.

Critics accuse him of grandstanding, but he says he must speak loudly now because he spoke loudly before.

Accused of making money on both sides, he says he lost income doing abortions and is not paid for pro-life activities now.

"It is extremely telling that this man, who is a doctor and who has performed by his own account at least 5,000 abortions, can claim to say he never knew what was there [in the womb], that he didn't know what the fetus was, and now he does," says Judy Goldsmith, president of the National Organization for Women.

Recently in a speech she said, "It was only 15 years ago that a woman who had to terminate a pregnancy risked fear, pain, injury and even death."

Nathanson says he saw these kinds of horrors as a young doctor and that they helped prompt his early activism. In his 1979 book, "Aborting America," he tells of a harrowing experience as a student at McGill University Medical College in Montreal. Nathanson got his girl pregnant and sent her for a back-alley abortion; she returned with "a pool of clotting blood on the floor of the cab. She was ashen and trembling violently."

It poisoned the relationship and eventually they broke up.

Barbara Radford, director of the National Abortion Federation, a group of clinics, says Nathanson fails to grasp what abortion means for women. "Any woman who's faced with an unplanned, and often unwanted, pregnancy goes through a lot of pain . . . We're not saying that abortion is an easy decision . . . but one that must remain available [and] safe."

The criticism can get personal.

"Bernie Nathanson from the beginning had seemed willing to be more radical than radical," says feminist Betty Friedan, recalling the late 1960s when she, Nathanson and others started the National Abortion Rights Action League (NARAL). "He seemed to be a really avid supporter . . . but there were things . . . that began to make me uneasy."

One night after dinner at Nathanson's house, she says he took a saber or knife "and he sticks it at my throat. I said, 'Bernie, what's wrong with you?' . . . He ran it up and down on his thumb . . . gloating in the sharpness of the knife . . . I began to wonder, 'God, where are some of these men coming from?' Any movement is going to attract all kinds."

Says Nathanson: "That's purely a figment of her imagination . . . I don't fool around with such instruments. I don't think it's funny at all. I don't know where she got this."

Nathanson's sense of humor can be a bit macabre. On ABC's "Nightline" Dr. Hart Peterson of Cornell University Medical School attacked "the notion that the fetus is being tortured" during abortion and Nathanson said: "If [pro-choice advocates] think that they're going to see the fetus happily sliding down the section tube waving and smiling as it goes by, they're in for a truly paralyzing shock."

"I don't understand why people castigate my husband for, in good conscience, having a change of mind," says Nathanson's wife of 20 years, Adelle. (They have an 18-year-old son.) "He didn't just wake up and say, 'hey, I'm not in the limelight any more, I've got to change!' That's outrageous. I know, I was there. He is a man [of] the utmost conscientiousness."

She always hated the idea of abortion.

They would argue, and she remembers that he once said the difference between a fetus and a baby was like the difference between a set of blueprints and a building.

"I believe in the sanctity of human life," she says, "so I'm quite delighted and, really, very very proud of my husband."

Nathanson's Odyssey.

The son of a New York obstetrician, he was destined for a medical career. His father

was a religious skeptic, and after Bernard was bar mitzvahed he didn't attend synagogue. His family had no direct experience with the Holocaust, Pro-life leaders call abortion a silent holocaust, but Nathanson avoids the term, saying it trivializes what happened under the Nazis.

In 1952, Nathanson became a resident in obstetrics and gynecology in a Manhattan hospital and "began to see for the first time the harvest of illegal abortions. Women . . . very ill, and often requiring major surgery."

He doesn't remember his first abortion but by 1965 was performing "legal psychiatric abortions" regularly. "Every abortion I ever did was legal. We would submit letters to the therapeutic abortion committees and indicate that the woman was suicidal."

In 1967 Nathanson then in his mid-thirties and with two marriages behind him, met radical activist Larry Lader, who had written a book advocating abortion on demand. After that, Nathanson says, he was "swept up."

"Those were years in which the passions were rolling around in the country, and I suppose the overriding theme of it all was antiauthoritarianism." He took part in antiwar activities, "and this idea with Lader of striking down all abortion laws seemed to me not only good medicine but in the spirit of the times, the Zeitgeist. The appeal was powerful to get rid of all this garbage and let's really set women free."

In 1971 Nathanson agreed to direct the Center for Reproductive and Sexual Health here. By the time he left a year and a half later, more than 100 abortions a day were being performed at the center.

He then took a job as chief of obstetrics at New York's St. Luke's Hospital, and soon began to have doubts about abortion.

The doubts, he says, were not of heart or spirit, but were intellectual, scientific.

"It was about that time that we were moving in all this new equipment and technology. The ultrasound machines came in and the electronic heart-monitoring machines and fetascopes . . . which I began to work with . . . beginning to look at this child in the uterus. And then, again, as in the pro-abortion time of my life, when it seemed that a confluence of events just pulled me on . . . in the middle '70s another concatenation of events swept me along [including the increasing emphasis on the welfare of the fetus, or child."

A recent edition of "Williams' Obstetrics," a textbook, puts it this way: "Happily, we have entered an era in which the fetus can be rightfully considered and treated as our second patient." Dr. Nancy W. Dickey, chairman of the American Medical Association's judicial council, says two new specialties developed in the 1970s: neonatology, the care of newborn problem babies; and perinatology, the care of high-risk pregnancies. Perinatologists, Dickey says, "most emphasize the two-patient concept. They go in and operate on the fetus sometimes. It's almost Buck Rogers stuff."

Nathanson began to change.

"I began to look at this. I began to say, 'Wait a minute, what is going on here? I mean, we are wiping out this creature that I am charged to take care of.' "

In 1974, while still performing abortions, Nathanson confessed in the New England Journal of Medicine to being "deeply troubled by my own increasing certainty that I had in fact presided over 60,000 deaths. . . . There is no longer serious doubt in my mind that human life exists within the womb from the very onset of pregnancy."

It caused a big stir.

Nathanson wrote that he still believed abortion should be "unregulated by law," but wanted somehow to end the "moral evasiveness."

As the years passed, he wrestled with the problem.

He discovered with his wife and close friends the "accumulating weight of evidence," gradually "breaking down the mechanism of denial."

He continued to do abortions, but "more and more reluctantly."

Finally in 1977 when Nathanson was temporarily in charge of obstetrics at a large Manhattan hospital, he was told that a woman 33 weeks pregnant was about to be admitted for an abortion.

"And I said no way would I sanction that. I said, 'I am literally going to stand in the door and prevent this.' But this time the weight of evidence was beginning to just drag me down. . . . The woman had what is called a thanatophoric dwarf she was carrying. They had diagnosed it by ultrasound. Thanatophoric dwarfs are misshapen and they live a very short time, but I said, 'There can be no abortion at 33 weeks while I am here.' "

There was a furor.

Nathanson was ousted and the abortion performed.

But he had made his stand.

How could he have performed so many abortions without feeling, thinking, seeing what seems so clear to him now?

"Because I didn't see it, didn't see it! I didn't know what it was about, I mean, I hadn't seen that fetus. Oh, I'd listened to its heartbeat. . . ."

When you take them out, you don't see them?

"Naw, you don't see anything."

What about in "The Silent Scream," all those abortion clinic tubs filled with recognizable dead human forms?

"You mean the second-trimester abortions? First-trimester abortions are suction, where this child comes out all chopped up and you don't see anything. All you see is just bloody meat. . . . These second-trimester abortions, you have to understand this, we would inject the saline and then we would leave [his voice grows soft], and the women would deliver these fetuses in the bed with the nurse in attendance. We never saw them."

Never?

"Naw. They'd be sent right to the pathology lab. I don't think I saw, of all the hundreds, maybe thousands, of second-trimester abortions I did, I didn't think I saw half a dozen fetuses."

And it never bothered you when you did?

"Not particularly, no. I mean, this was the end product. This was a lifeless, limp thing lying there."

But it had a human form?

"Oh, absolutely."

You looked, but you didn't see?

"Naw, I was busy denying it. You could not continue to do this unless you were busy denying it. . . . We were shielded from it. The nurses took the brunt of it."

They didn't say anything to you?

"Well, no, but we could not escape the fact that a nurse's tenure on such a unit was pretty short."

On "Nightline," Nathanson said he thought the Supreme Court would reverse Roe v. Wade, the 1973 decision legalizing abortion on demand.

What he really wants, however, is not a legal but a technological solution.

A medical miracle that will make the whole problem go poof! Gone. Everybody happy.

"Ten years from now," he says, "we are going to be able to take that pregnancy out of the uterus of a woman who doesn't want it, put it into either somebody else's uterus, or into a life support system, and let it just grow to maturity."

Not likely soon, if ever, says Prof. LeRoy Walters, director of the Center for Bioethics at Georgetown University.

"It's possible to keep earlier and earlier premature infants alive at the newborn end," says Walters. ". . . At the other end, with *in vitro* fertilization, embryos are cultured for several days before being transferred to the uterus. But there is that long period between four days and, say, 22 or 24 weeks where there simply is not any technology that comes close."

Nathanson, however, has "not the slightest doubt" of an eventual breakthrough.

He says: "Until then, my feeling is we must declare a moratorium on what's going on now. I think as history looks back on this era, it will be contemptuous of us, because we have been contemptible.

"The Silent Scream" is about pain.

Do the unborn "often feel pain—pain that is long and agonizing" during an abortion, as President Reagan said in his Jan. 30, 1984, speech before the National Religious Broadcasters, kicking off his reelection campaign?

Nathanson got the idea for the film after the president made the assertion.

"I thought, well, listen, there's only one way to answer this question," he say. "Let's just do an ultrasound of an abortion and see what we come up with."

Ultrasound is a system using sound waves and computers to project an image of a fetus moving within its mother's womb. In hospitals today, parents watch the movements on TV screens as a doctor studies the same images for possible problems.

Through acquaintances, Nathanson arranged to film ultrasound images of an abortion at 12 weeks, the end of the first trimester.

Statistics kept by the Alan Guttmacher Institute, a research organization, show that slightly more than half of the roughly 1.5 million abortions done each year occur at eight weeks or less, and 91 percent occur by the end of the first trimester. About 130,000, or 8.7 percent, are in the second trimester.

Using the ultrasound film and Nathanson's narration, American Portrait Films produced the 28-minute "Scream."

The title is drawn from Nathanson's statement in the narration that, "The child's mouth [is] wide open in a silent scream."

Nathanson also says that, as the abortion instruments approach, "the child will rear away . . . is extremely agitated . . . the heart rate has speeded up dramatically . . . it does sense aggression . . . is moving away . . . to escape . . . "

This is, critics say, propaganda.

"Emotional pornography," says NOW's Goldsmith. "These are gross lies."

"Leading doctors have said that the movement is just a reaction to stimulus," says NARAL spokeswoman Emily Tynes.

Critics say the ultrasound film is so unclear that, without the narration, one couldn't tell what is happening. One can generally, however, discern a small babylike image—its two-inch size magnified on the television screen—that moves, appears to suck its thumb, and then becomes a swirl of

movement after the abortion instruments enter the picture.

Controversy over the pain question began in the medical community shortly after Reagan's statement last year. The American College of Obstetricians and Gynecologists issued a statement saying there was no scientific evidence "that a fetus experiences pain early in pregnancy."

A dissident group of college members, including Nathanson, issued a statement saying the unborn "do respond to stimuli."

The official college statement itself left open the possibility that a fetus might be well enough developed to "perceive pain" at some point in the third trimester. (Asked about this recently, a college spokesman said: "It would be ludicrous for us to say in the ninth month a baby isn't going to feel pain.")

In a recent telephone interview, Dr. Jennifer Niebyl, director of maternal and fetal medicine at Johns Hopkins Hospital, says a fetus at 12 weeks that moves in response to stimulus "is exhibiting reflex behavior" and doesn't feel anything "on a conscious level."

"The nervous system is so undeveloped it doesn't feel pain as we know it," she says. She says one can stick a needle in a fetus and get a "reflex from the spinal cord, but that message may not be communicated to the brain as conscious awareness."

At some point between seven months and term, she says, a fetus may feel pain.

"Nobody really knows for sure."

Niebyl has seen "The Silent Scream," and says that what Nathanson describes as the fetus recoiling from pain and seeking to escape may be, in fact, simply the kind of movements fetuses make all the time.

"They have periods of quiet and periods of violent activity," she says.". . . That was what you might see in a baby at 12 weeks" that was not being aborted but simply moving about in the womb.

Niebyl also says suction abortions aren't as drawn out as appears on the film, but are "almost instantaneous . . . It takes maybe a couple of minutes."

The particularly disturbing scene in the film where the fetal skull is crushed with forceps to make it small enough for extraction is not typical of a 12-week abortion, Niebyl says.

The film, she says, "has parts that are accurate, but it has exaggerations of the parts that are unpleasant statements that have no factual documentation. We can't say that the baby feels pain, and he acts like he knows it does."

"You have to understand that this is a mute creature," responds Nathanson during the interview in his home. "Incommunicado, like an animal, and all we can do with animals is infer that they are in pain from response. They cannot tell you, 'I am in pain.' But you look, and you see . . . the grimacing here and the violent churning and the agitation . . . And you must infer from this that this is a creature in pain."

The Practicing Doc settles deep into his chair.

Says he didn't particularly like obstetrics and gynecology in medical school. He tried, when young, general surgery and other specialties.

"I liked it [surgery], but it didn't speak to me. I don't know, I just can't tell you, but on some . . . level it didn't speak to me, and the same with urology."

He came around, finally, to his old man's specialty.

"If you want a real paean of praise about obstetrics, talk to my father. He just adores obstetrics."

Nathanson thinks.

"It's joyous."

Laughter wells up, burbling into his words.

"It is incredible, and even at 4 o'clock in the morning, tired, hungry, you do this, you help this woman, you see, in whatever small way you can. And I am not any longer so young and so egocentric as to think that I deliver the baby. I mean, no, the doctor is there to just oversee it a little bit, guide it along, but the women do it . . ."

He laughs happily.

". . . Women really have put the doctor in the proper perspective. I was one of the early boosters of Lamaze [a "natural" birth procedure]. Twenty years ago I did that. I love it. I thought it was just tremendous. No more did we take over the delivery rooms! . . . My father, unfortunatley, never agreed, because he was brought up in the era when you really were an authoritarian, patriarchal figure."

Birth.

"Oh, it's great. I mean, you look at the baby, and it's really a remarkable . . ."

He searches for the word.

". . . Miracle! I mean, I am not a religious man, I'm an atheist. But I must tell you that probably I get as close to, uhhh, accepting some beneficent order in the universe when I look at a baby as I never do . . ."

As if in some crazy confirmation, the little antique clock on the mantlepiece begins chiming 2.

". . . It's at that instant that I know that there is some kind of elliptical poetry in the universe . . ."

His voice softens.

". . . And, for a moment, my mind snaps onto it, you see. And then I think, 'Aw, wait a minute, I'm gettin' carried away here.' "

Pause.

He laughs suddenly, explosively, his face bunching into a great wreath of a smile.

"But it is such a compelling sight! Such a compelling experience!"●

MOUNT SINAI RECEIVES APPROVAL TO REBUILD

● Mr. D'AMATO. Mr. President, we are all concerned with the need to contain rising health care costs while insuring that the quality of care provided to our citizens is not diminished by such efforts. Balancing these two concerns will not be easy. This task will be most difficult for our older voluntary hospitals in major cities, where aging and obsolete facilities make it difficult to provide the care local residents require.

I rise today to inform my colleagues about one such hospital whose efforts deserve our recognition. The Mount Sinai Medical Center in New York City has just received New York State approval for a major rebuilding and renovation project. Their project reflects 7 years of intensive work to create plans that will improve health care in the local community, provide a more pleasant environment for their patients, and develop new health care delivery systems to improve cost-effectiveness.

A strategic planning effort begun by Mount Sinai's trustees in 1978 made clear the urgent need to rebuild the Mount Sinai Hospital, part of which was constructed more than 75 years ago. Construction on the new hospital will begin in early 1986 and be completed in 1991. A 10-story patient care pavillion with 633 beds will replace 10 outmoded buildings. The remaining three patient pavillions will be renovated and modernized. To improve the efficiency of hospital operations, related patient services, such as operating rooms and intensive care units, will be clustered together.

Reflecting national concern for health care cost containment and health care trends, the new hospital will contain fewer beds and expanded ambulatory, or outpatient, care services. A reduction of 100 beds during the course of construction will bring Mount Sinai's bed capacity from 1212 to 1112. In addition, Mount Sinai's rebuilding project includes plans for a new Ambulatory Surgery Center, providing facilities for outpatient surgery, certain diagnostic tests and outpatient chemotherapy. With new medical technology, outpatient surgery is a realistic option for many patients. It reducers costs and eliminates the need for a hospital stay.

Mount Sinai's project incorporates plans to improve health care in the local community as well. The emergency room will be rebuilt and expanded. In addition, the hospital will be working with other local health care agencies to improve primary care services and prenatal care in east Harlem. Mount Sinai also will develop a consumer health education and promotion program for its community within the next year.

Finally, the rebuilding project will produce an environment that is more conducive to compassionate patient care. The floors in the new hospital are designed so that each room will be visible from a central nursing station. Two hallways will be created, so that patient and visitor traffic will be separated from laundry carts, supplies, and other support service transportation.

The cost of constructing the new Mount Sinai will be $275 million. I am pleased to note that the medical center has taken responsibility for raising $110 million of that total in philanthropy. The remainder will come from a long-term, tax-exempt bond issue.

All of us can be proud of the work Mount Sinai has done in developing this plan, which will result in better and more efficient health care services for all New Yorkers. The outcome will be one of the most modern and effective medical centers in the country, one which serves our health care needs well into the 21st century.●

LOYALTY DAY

● Mr. LAUTENBERG. Mr. President, on May 1 the United States will again celebrate Loyalty Day. This day of celebration was established by Congress in 1958 and has become a part of our national tradition. Loyalty Day is appropriately celebrated on the 1st of May as it represents a season of renewal and hope. Spring festivals and maypoles have occurred in observance of this day since ancient times. But in recent years, this day has taken on greater meaning.

All over America, Loyalty Day has come to signify a day on which we renew our faith and commitment to the preservation of the basic freedoms we enjoy. At all of these celebrations, the American flag, the symbol of our commitment to these freedoms and to our democratic institutions, is raised high. Loyalty Day is an occasion for us to rededicate ourselves to our fundamental values.

The Veterans of Foreign Wars are always in the forefront of Loyalty Day celebrations. I commend the many veterans and VFW branches in New Jersey for taking the lead in sponsoring observance of this day of patriotism and for providing a means for all Americans to express their pride in our heritage, and our accomplishments.

The essence of Loyalty Day is the time taken by each American to examine what living in America means to him or her, and what steps we can take to make our country even greater. We may have different dreams and different viewpoints. But, that is the essence of America—the freedom to try to make our dreams come true in all their diversity.

Mr. President, that is the reason that throughout our history people have come to this country from all over the world, seeking freedom and peace and opportunity. In achieving these goals, they have made an invaluable contribution to our rich and diverse national heritage and to the strength of our country. On Loyalty Day we all renew our allegiance to the United States of America.●

THE SDI BUDGET

● Mr. CHAFEE. Mr. President, I join with my colleagues, Senators MATHIAS, BUMPERS, and PROXMIRE in cosponsoring S. 879, an alternate Strategic Defense Initiative [SDI] budget, which cuts the administration's $3.7 billion request to $1.86 billion. This is legislation that will bring a realistic and fiscally responsible approach to the SDI.

I feel that the SDI, as it is proposed, could threaten the ABM treaty within the next 10 years, and cost enormous sums of moneys.

I bring to your attention the following points:

Accelerating the Strategic Defense Initiative [SDI] will have a negative impact on the upcoming United States-Soviet space weapons negotiations. The administration is not willing to give up the SDI in the Geneva negotiations; President Reagan and Secretary Weinberger have both stated that it is not a bargaining chip. The prospects for reaching an agreement on space weapons will be strongest if the United States maintains a strong but steady level of ABM research. Our legislation earmarks $75 million for a new hard point defense technology development program to continue R&D of conventional ABM systems. In case of Soviet breakout of the ABM treaty, the advanced strategic missile system program—the Air Force Penaids Program—would be doubled in fiscal year 1986 as well. The legislation also establishes a strategic defense evaluation panel, comprised of four Congressmen and four Senators, which would evaluate defensive R&D activities of DOD, the status of work on SDI, and the effect of SDI on U.S. arms control goals and policies.

The SDI threatens the long-term future of the 1972 ABM treaty. The administration maintains that all SDI activities fully comply with the ABM treaty. However, current U.S. policy and planning regarding the SDI seriously undermine both the principles and the provisions of the treaty and threaten its long-range future. Acceleration of the SDI at the rate sought by the administration is likely to lead to the erosion, if not a deliberate abandonment, of the ABM accord, which has served as the cornerstone of arms control.

The SDI is outrageously expensive. President Reagan has requested $3.7 billion for the SDI in fiscal year 1986. This request is $2.3 billion over last year's level and would more than double the program's budget in a single year. Under the administration's long-term projections, total costs for the SDI will go over $60 billion before deployment occurs in the early 1990's—if deployment occurs. Estimates of the cost of full-scale deployment range from several hundreds of billions to over $1 trillion.

We propose to cut the administration's $3.7 billion request to $1.86 billion. This appropriation would still be a 33-percent increase over the fiscal year 1985 level. This bill provides a realistic approach to achieving the goals of the SDI while at the same time acknowledging the constraints of the Federal budget.

Funding at the $1.86 billion level will provide a comprehensive and vigorous research program to explore the potential of newly emerging technologies. At the same time, it will reaffirm Congress' commitment to the antiballistic missile treaty—the principal accomplishment of strategic arms control to date. To achieve this, we would hold demonstration projects within the SDI to a 4-percent increase. This would avoid creating a dangerously unstable international situation in the near term.

The critical question which SDI research must answer is whether a militarily effective defensive system can perform in the face of the Soviet offensive threat and countermeasures. This bill, therefore, funds the system survivability and lethality and hardening research projects at the rate the administration requested. Additionally, a new program would be created called threat analysis, to research Soviet countermeasures and offensive nuclear response.

I urge my colleagues to view this bill as a complete package for a more realistic pursuit of the Strategic Defense Initiative. I call for your support.●

ST. MARY MEDICAL CENTER'S FIGHT AGAINST ALCOHOL ABUSE

● Mr. QUAYLE. Mr. President, the staff of St. Mary Medical Center and the concerned citizens of Gary and Hobart, IN, are to be commended for organizing and taking part in the fourth annual northwest Indiana "I'm Not Drinking Today" on Tuesday, April 16, 1985.

For the fourth year in a row, the Alcoholism Treatment Program [ATP] at St. Mary Medical Center has sponsored the "I'm Not Drinking Today" observance to call public attention to the serious problem of alcohol abuse.

As a member of the Senate Labor and Human Resources Subcommittee on Children, Family, Drugs and Alcoholism, I am painfully aware of the detrimental effects of alcoholism on the individuals, their families and friends, and society as a whole.

The responsibility for protecting our society from the growing problem of alcohol abuse is shared by all of us as citizens, educators, business and community leaders, and Government and elected officials. I am personally disturbed about the rising incidence of alcohol abuse, especially among our young people. That is why for the fourth school year in a row I sponsored the VOLS Conference [for Voluntarism—Opportunities for Leadership and Service] for Indiana's high school students. The 1985 VOLS Conference was held on April 13 in Indianapolis to encourage students to get involved in efforts to curb alcohol and drug abuse. This year I was joined by Ken Kercheval, star of the hit CBS-TV series "Dallas," Indianapolis Colts quarterback Art Schlichter, and Bill Essex, founder and president of an alcohol/drug abuse consulting agency and a 16-year veteran of the Indiana State Police.

Each year, 25,000 Americans die on our Nation's highways due to drunk driving. The impact of alcohol abuse on health, job performance and economic security can be devastating. Alcoholism is a disease that touches all of our lives to some degree.

Since its inception in 1977, St. Mary Medical Center's Alcoholism Treatment Program has provided care and treatment to over 3,500 persons between the ages of 17 and 72, who have alcohol problems. Today, nearly 3,000 of those patients are still following a more desirable lifestyle.

I am proud to have this opportunity to thank the dedicated professionals from St. Mary Medical Center and the business leaders and residents of the Gary and Hobart communities for their continued efforts to fight this growing menace which threatens our lives and the lives of our children.●

A BLANK CHECK FOR THE PRESIDENT IN NICARAGUA?

● Mr. KENNEDY. Mr. President, as we approach the vote next Tuesday on whether to approve an additional $14 million in funding for the Contras fighting in Nicaragua, we should pay special attention to what the Senate is actually voting on. In a perceptive oped piece that appeared last Sunday in the Los Angeles Times, Senator CRANSTON has urged the Senate to examine the precise language of this resolution. He argues that an affirmative vote on this measure might "provide an even more specific and generous license than Congress gave the executive in 1964 in the fateful Gulf of Tonkin Resolution."

According to Senator CRANSTON,

> If this Congress adopts the Nicaragua resolution, it would give the President arguable justification for immediate use of the substantial U.S. military forces that we have amassed on Nicaragua's borders.

I urge my fellow Senators to read Senator CRANSTON's piece and to take heed of its warning.

I ask that this article by Senator CRANSTON be printed in the RECORD.

The article follows:

REMEMBER THE GULF OF TONKIN—PRESIDENT'S BID FOR CONTRA AID HAS CHILLING SIMILARITY

(By Alan Cranston)

The Senate vote on the President's bid to expand military operations against Nicaragua is not simply a question of approving another $14 million for "secret" anti-Sandinista operations. The stakes could be far higher. Under the terms of the Nicaragua resolution that will be before Congress next week, the President will be requesting authorization of what could substitute for a virtual declaration of war.

Examine closely the precise language that the White House is trying to have adopted: "Congress approves the obligation and expenditure of funds available for fiscal year 1985 for supporting directly or indirectly military or paramilitary operations in Nicaragua."

An affirmative vote on this proposal would provide an even more specific and generous license than Congress gave the executive in 1964 in the fateful Gulf of Tonkin resolution. That sufficed for more than a decade as a substitute for a declaration of war against Vietnam, Cambodia and Laos. More than 50,000 American troops died in the supposedly "limited" war authorized by the 1964 congressional resolution.

Congress believed that the Gulf of Tonkin resolution simply provided rhetorical backing of a popular President for a show of force against a pesky Third World nation. But the White House subsequently used the hurried-through resolution as a far more broad grant of authority. Interviews conducted for a recent Senate study showed that key officials in the 1964 Administration recognized this opportunity. McGeorge Bundy, then the national security adviser, conceded, "Congress surely did not believe in 1964 that it was voting for the war that happened." Yet, as Bundy noted, the executive branch later persisted "in describing the (Tonkin Gulf) resolution as the functional equivalent of a declaration of war." Nicholas deB. Katzenbach, who was deputy attorney general in 1964, later admitted that the reported torpedoing of U.S. ships in waters off Vietnam was "nothing." But Katzenbach would insist in key 1967 Congressional hearings that the Gulf of Tonkin resolution "is as broad an authorization for the use of armed forces for a purpose as any declaration of war."

If this Congress adopts the Nicaragua resolution, it would give the President arguable justification for immediate use of the substantial U.S. military forces that we have amassed on Nicaragua's borders. These forces include 5,000 U.S. troops that the Pentagon has engaged this month in infantry, tank and air support exercises rumbling within three miles of Nicaragua's border. The Pentagon also has maintained a semipermanent naval presence within tight of both Nicaragua's western and eastern shores; these navel forces begin new exercises this week.

The President would, of course, have to come back to Congress for additional funding. But with a blanket authorization in hand and U.S. troops already in combat, the White House would be in a strong positon to get what it wanted from a Congress reluctant to "withdraw under fire."

This is not simply a debate over parliamentary formalisms, over the proper mechanism for authorizing acts of war. We should take the opportunity provided by next week's first full, public Senate debate and vote on military operations against the Sandinistas to consider an escalating U.S. policy gone wrong.

Our Nicaragua policy is wrong because it is immoral: U.S. taxpayer dollars should not be used to sponsor acts of international terrorism in Nicaraguan villages, harbors and cities.

It is wrong because it is illegal: U.S. funding of military efforts to overthrow a government that we recognize violates not only the charter to the United Nations and the Organization of Amercan States but our own Constitution as well.

It is wrong because it violates our national principles: No matter how we deplore the Sandinistas" curbs on civil liberties and their support from Havana and Moscow, we must not adopt the attitude that our ends justify our means. We ill serve America's mission of promoting democracy when we emulate our adversary's most deplorable tactics.

But for those who feel that morality and legality and national principles have no place on a troubled planet, I would hope that the impracticality of current Administration efforts would be decisive.

The fact is that U.S.-bankrolled efforts to undermine the Sandinistas have proven utterly counterproductive. They have increased domestic, nationalist support for the Sandinistas. They have isolated Nicaraguans opposed to the Sandinistas and have made them, by association, allies of CIA-backed terrorists. They have provided the Sandinistas with ready-made excuses for curbing press and political freedoms and for relying heavily on Warsaw Pact nations for security assistance. And after four years and nearly $100 million in U.S. taxpayer funds, these efforts have failed to wrest one inch of soil from the Sandinistas control. A resolution authorizing direct or indirect military or paramilitary operations in Nicaragua will not help either.

On the 10th anniversary of our withdrawal from our "limited war" in Vietnam, we should recall some of the lessons of opposing nationalist movements in urban and jungle warfare on their own soil.

Just as the Gulf of Tonkin resolution did, the Nicaragua authorization could open the door for a war that the American people do not understand, will not support and do not believe holds the promise of advancing our national interest in stable democratic developments in a turbulent region.

Congress must not repeat the tragic error of 1964.●

THE 1985 CONGRESSIONAL CALL TO CONSCIENCE

● Mr. CHAFEE. Mr. President, I rise today to join Senator BOSCHWITZ and other distinguished colleagues in the 1985 Congressional Call to Conscience for Soviet Jewry.

As we all know, the Government of the Soviet Union has long persecuted the Soviet Jews. Under official Soviet policy, Jews who struggle to maintain and carry on their cultural and religious heritage are denied educational and employment opportunities and—in thousands of tragic cases—imprisoned or forced into internal exile. Those who comprise this courageous segment of Soviet society struggle daily for the basic human rights we in the United States take for granted.

In the last year, as the Soviet Government has slowed emigration to a trickle, the plight of Soviet Jews has become even bleaker. The figures are becoming familiar to all of us, but they bear repeating: In 1979, 51,320 Jews were allowed to emigrate; in 1984 that figure plummetted to 896, the lowest level since 1970. It is estimated that some 350,000 Soviet Jews have received invitations from Israel to leave the Soviet Union and settle in a land where they would be welcome as citizens and free to practice their beliefs. We now face a situation in which almost all of those brave enough to apply for exit visas are refused and face an uncertain future of unemployment, KGB harassment, and false

arrest. The persecution of these refuseniks has discouraged thousands of other Jews who long to leave the Soviet Union from even expressing that desire.

I recently joined 38 of my distinguished colleagues in signing a letter to Mr. Mikhail Gorbachev, the new leader of the Soviet Union, urging him, at this crucial junction in Soviet-American relations, to review his Government's current policy toward Soviet Jews and open once again the door of emigration.

It is vital that Soviet leaders be made aware of our deep concern in this matter, not only because of the emigration problem, but also because of the stepped-up suppression of Jewish cultural activities. According to a State Department report entitled "The Soviet Crackdown on Jewish Cultural Activities," in late July 1984, the Soviet authorities began a major, sustained crackdown on Hebrew teachers and other Jewish cultural activists. The report adds, "There can be no doubt that the campaign has been consciously directed by Soviet authorities to discredit the revival of Jewish culture in the Soviet Union."

One victim of this kind is Igor Guberman, a refusenik whose case recently was brought to my attention. Mr. Guberman is a writer, the author of popular books and science articles for young people, and the former editor of the unofficial Jewish cultural journal, "Jews in the U.S.S.R." In December 1978 he applied for an exit visa and was contacted several months later by the KGB with an offer of a visa in return for spying activities and denunciation of fellow Jewish activists. Mr. Guberman refused to collaborate and was arrested shortly thereafter on false charges of selling icons, of which he had been a collector for many years. He was convicted and sentenced to 5 years of hard labor, and at last word he was living in internal exile in Siberia, far from his wife and two children.

I urge my distinguished colleagues to consider the fact that there are thousands of Igor Gubermans whose stories never reach the West. Their treatment by the Soviet Government is an intolerable denial of some of the most basic human rights—the right to think and believe as one chooses, and to preserve one's cultural heritage. Let us hope that our call to conscience is heard by the new Soviet leadership and that the persecution of Soviet Jews will soon come to an end.●

ORDER OF BUSINESS

Mr. ARMSTRONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

The PRESIDING OFFICER. Without objection, the order for the quorum call is rescinded.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will now stand in recess until the hour of 2 p.m.

Thereupon, the Senate, at 11:58 a.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. MATTINGLY].

EXECUTIVE SESSION

NOMINATION OF JOHN E. KRINGS TO BE DIRECTOR OF OPERATIONAL TEST AND EVALUATION, DEPARTMENT OF DEFENSE

The PRESIDING OFFICER. Under the previous order, the hour of 2 p.m. having arrived, the Senate will now go into executive session to consider the nomination of John E. Krings, to be Director of Operational Test and Evaluation, Department of Defense, which the clerk will report.

The assistant legislative clerk read the nomination of John E. Krings, of Virginia, to be Director of Operational Test and Evaluation, Department of Defense.

Mr. DOLE. Mr. President, while we are waiting for the managers to come to the floor, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The time for consideration of the nomination will now be limited to 4 hours, to be equally divided and controlled by the chairman of the Armed Services Committee, and the ranking minority member or their designees, with motions, appeals, or points of order to be in order, and following conclusion of the yielding back of the time, the Senate shall proceed immediately to vote on the confirmation of the nomination.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that any further quorum calls be equally divided between both sides.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. PRYOR addressed the Chair.

Mr. NUNN. Mr. President, how much time does the Senator desire?

Mr. PRYOR. Mr. President, I say to the distinguished Senator that I do not think I will take over 15 minutes.

Mr. NUNN. I yield to the Senator from Arkansas such time as he may require.

Mr. PRYOR. I thank the Senator very much.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, after a delay of a year and a half, the administration has announced a nominee to be the first Director of the congressionally mandated Office of Operational Test and Evaluation: Mr. Jack Krings.

Of all the appointments that the Senate will review during the 99th Congress, this will probably be the one most crucial to the defense of this Nation. Whoever holds this job will determine whether our soldiers, sailors, and airmen will be forced to fight the next war with weapons that do not work.

I have met Mr. Krings. I like him and find him superbly qualified to direct noncombat testing. But too many lives are at stake to permit someone without any experience at all in realistic combat-type testing and with 29 years of pro-industry orientation to set the first and most lasting precedents for this vitally needed new function. It is therefore with great reluctance—and only on behalf of those who will have to risk their lives in combat—that I am forced to oppose Mr. Krings' appointment and urge my colleagues to join me.

The Senate voted 91 to 5 to establish this independent position and this office because it was becoming all too clear that, since well before the Vietnam war, we have been buying an increasing number of weapons that have failed, or will fail, in combat. The Congress wanted someone quite independent of development and procurement interests to insure adequate combat-type testing before each major procurement decision and to insure unbiased reporting of the results of that testing to the Secretary of Defense and the Congress.

The minimum qualifications necessary to perform this job properly are:

First, solid experience in the difficulties of conducting and/or analyzing realistic operational tests; that is, tests that realistically reproduce the stressful, hostile combat environment rather than tests under the clean, idelized conditions of the engineering test range.

Second, demonstrated independence from bureaucratic pressures and a proven willingness to risk career in order to report truthfully on matters affecting survivial and effectiveness in combat.

I know that people meeting these minimum qualifications do indeed exist. Twice in the last year, at the administration's request, Members of the Senate and House have recommended

Col. James Burton, an officer who has certainly proven that he exceeds these standards. Of course, I understand that the administration is under no constraint to accept such a recommendation. On the other hand, having twice requested congressional advice, the administration is obligated to come up with a candidate at least as qualified as the one we recommended. This they have failed to do. Much to my regret, Mr. Krings cannot come close to meeting either one of these minimum standards.

First, with respect to experience in conducting or analyzing realistic operational testing, Mr. Krings has none—as, to his credit, he clearly stated that before the military reform caucus on March 19. I believe he has outstanding qualifications as a corporate engineering test pilot, but that kind of carefully rehearsed and controlled developmental testing has no relationship to the world of operational testing; that is, to reproducing the rigors and surprises of combat in order to weed out weapons that will fail in war. As just one example of this absence of experience, when asked by the military reform caucus, Mr. Krings was unable to give even a cursory description of how he might approach testing a new ICBM under combat-like conditions.

Second, with respect to demonstrated independence from the pressures of industry and the weapons acquisition bureaucracy, I greatly admire Mr. Krings' 29 years of loyal, successful service to McDonnell Douglas. But, based on Mr. Krings' own statement, the attitudes ingrained by those 29 years are likely to be an insurmountable obstacle when the time comes to demand a year's production slippage in order to test an excessively flammable armored infantry carrier or to report forthrightly the failure of a major missile program with $5 billion already invested.

This we see, Mr. President, as a prime example of the revolving door in reverse. In the revolving door syndrome, usually we see military personnel who make giant awards to contractors and then only a few days or even a few hours later are working for those same contractors.

Mr. Krings, on the other hand, has been with McDonnell Douglas, one of the prime and major contractors in the defense industry, for 29 years, and whether or not he would occupy this position of an institutionalized whistle blower remains in my mind much in doubt.

A few other examples, Mr. President, will demonstrate some of the reasons for my concern.

Mr. Krings told the Senate Armed Services Committee that he hoped the need for an independent operational testing director would disappear after he had restored confidence in the testing process.

Mr. President, to my way of thinking, this is very similar to naming a Secretary for the Department of Energy or a Secretary for the Department of Education to hear them only in their first day at work to say that their role and their mission is to abolish that particular Department.

When asked by the military reform caucus whether he would have opposed a highly artificial "success-oriented" McDonnell Douglas operational flight test of an F-18 that took place under him, Mr. Krings responded, "No"—and went on to explain that a test pilot's job is to simply carry out the tests that are assigned to him without questioning their usefulness or realism.

Mr. President, perhaps that is the creed of a test pilot, but if we name a person with that philosophy to direct our new Office of Operational Testing, then I fear this exercise we are engaged in this afternoon is futile.

Similarily, he told the military reform caucus that, as Director of Operational Testing he would not review or question the combat realism of service "requirements" for a weapon and, further, that he would simply test any system against those requirements, independent of their artificiality.

Jack Krings is an accomplished corporate test pilot and an admirable individual. He has remarkable qualifications to help develop weapons, but not for the job of Director of Operational Test and Evaluation. I know that candidates fully qualified for the job exist. As anxious as I am to have this long-vacant position filled, I am convinced that an individual with excellent but unrelated qualifications would be worse than no Director at all. After all, the first leader of this critical office will set the standards for realistic testing and unbiased reporting for years to come.

The Director of Operational Test and Evaluation will be our servicemen's last line of defense against a slipshod weapons acquisition process that has repeatedly—in World War II, Korea, and Vietnam—produced weapons that have cost the lives of too many of our young people in combat.

We owe these young people, Mr. President, the right person for this job, one who is not afraid to blow the whistle, one who is not afraid to stand up to the contracting industry, one who is not afraid to stand up to the Pentagon itself, and one who will certainly stand up and speak for our military personnel at home and abroad.

I do not think, Mr. President, in all due respect to Mr. Krings, that he is the proper man for this role. He has evident talents. He is sincere. He is conscientious.

I believe those talents and his long experience in developmental testing would be extremely valuable in the highest DOD developmental testing position, the Director of Defense Test and Evaluation under the Undersecretary for Defense Research and Engineering, a job which is now vacant and for which I believe Mr. Krings, to be eminently qualified.

The first Director of the Operational Test Office will set the tone and precedent for those who follow, and it is especially important to find a man who is tough enough and stubborn enough to stand up to extraordinary pressures. I have three sons of draft age and do not want any of them to ever have to rely on an M-16, a Bradley tank or an Aegis system that has not received rigorous testing.

Of all the thousands of bureaucrats, should you prefer to call them that, Operational Testing Director is the most responsible for the safety of the soldiers, sailors, and airmen who will fight our wars. The buck stops on his desk.

Mr. President, Jack Krings is a good guy, but he is the wrong guy for the job we are considering at this moment.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. Mr. President, I yield whatever time the Senator from Georgia may need.

Mr. NUNN. I thank the chairman. I believe that I have time in my own right. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. NUNN. Therefore, I will be using my time.

Will the Senator from Arkansas give me some indication of how much more time he will require so we make sure we have plenty left for him?

Mr. PRYOR. Mr. President, I think the Senator from Arkansas has all kinds of time—ample time, as a matter of fact. I have no further statement, I say to my friend from Georgia. I would perhaps engage in a question or two should questions arise, and I should like to reserve that opportunity. I might want to make a summary or a closing statement before the vote.

Mr. NUNN. Does the Senator from Arkansas know of others who will speak on this subject?

Mr. PRYOR. Yes. We have at least one other speaker on this side of the aisle, I say to my friend from Georgia. I think there is a speaker, in addition to the chairman of the Armed Services Committee, on the other side. I am not certain about that. I understand that another Senator from that side will be speaking.

Mr. NUNN. Mr. President, I yield myself such time as I may need.

Mr. President, I rise in support of the nomination of John E. Krings of Virginia to be the Director of the Office of Operational Test and Eval-

uation at the Department of Defense. The Armed Services Committee reviewed his nomination carefully, conducted a thorough confirmation hearing, and favorably reported his nomination with no opposing votes and one "present" vote. I believe that Mr. Krings is qualified for this new position by reason of his extensive testing background and his firm commitment to ensuring an independent office. I am satisfied that, after he fulfills his commitment to dispose of stock within 90 days in two companies which are on the defense master list, Mr. Krings will not have any actual conflict of interest, or the appearance of a conflict of interest with his new responsibilities.

In my review of the nomination in the Senate Armed Services Committee, I concluded that Mr. Krings would be able to effectively carry out the important statutory responsibilities which Congress is expecting of this first Director of the Office of Operational Test and Evaluation.

As my colleagues recall, this Office was established by Congress in 1983. I want to complement the Senator from Arkansas [Mr. PRYOR], the Senator from Kansas [Mrs. KASSEBAUM] as well as my colleagues on the Armed Services Committee (Senators HART and LEVIN), for their leadership in creating this office. I share their concern about the importance of an independent, highly-trained, and functional Office of Operational Test and Evaluation. Pursuant to the requirements of the statute, that Office was charted by the Secretary of Defense just over 1 year ago, on April 2, 1984. I ask unanimous consent that a copy of the charter for the Office be inserted in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. NUNN. We have also received two annual reports from the Office, as required by the statute, and have recently received classified reports on the results of tests on three specific systems.

I believe the charter of the Office meets all of the requirements set forth in the law. In fact, the Secretary of Defense has gone one step further by making the Director of the Office of Operational Test and Evaluation a full member of both the Defense Systems Acquisition Review Council [DSARC] and the Defense Resources Board [DRB]. In my judgment, it is important to get a qualified director of this office confirmed and on board at the earliest opportunity.

Mr. President, I know that there have been concerns raised about Mr. Krings' experience in the area of operational testing. While I share my colleagues concern about the critical role of operational testing, I believe that Mr. Krings does have experience in this area. As my colleagues know, there are basically three types of testing. The first is done by the contractor to ensure that the system they produce meets the service's requirements, as the contractor understands them. The second type of testing is called "developmental testing," done by the services in cooperation with the contractor. This developmental testing is done under highly controlled conditions to ensure that the contractor has in fact met the services' specifications for the system. The final type of testing, done exclusively by the services, is called "operational testing," and is conducted under simulated combat conditions. This operational testing has been referred to as the "final exam" before a service decides whether to buy a system.

Under long-established Defense Department policy, a contractor is not permitted to participate in this final checkout phase. So to the extent that Mr. Krings has acknowledged that he does not have extensive "operational" testing, it is because, as a test pilot and director of testing for a contractor, he has been precluded from doing operational testing. But, in reality, during the last stages of developmental testing both the contractor and the services work together on a series of tests that are tantamount to "operational" testing in everything but name.

Finally, I believe it is important to note that it is common practice within the aerospace industry for the contractor to assist in the design, and to conduct, the equivalent of "operational testing" before a foreign government will purchase a system. Mr. Krings has been involved in several foreign government sales and has designed and monitored the "operational testing" of some of those systems.

In my view, it is important that we confirm a qualified Director of this Office so that the Office can become fully staffed to meet the important responsibilities which Congress expects. Critical testing is now being delayed within the Office of Test and Evaluation under the control of the Under Secretary of Defense for Research and Engineering because of a "fence" on their funds Congress adopted last year until a Director of OT&E is confirmed.

I was supportive of that fence. I think the Pentagon had delayed much too long in making the appointment.

It is also important that we confirm a qualified Director so that upcoming operational testing of major weapons systems can be planned and carefully monitored as the Congress expected.

Mr. President, I believe Jack Krings is qualified for the important position that we are considering him for today. He assured the committee during his confirmation hearings that he will exercise the independence so critical to the success of the Office's operation. In the long run, I believe the Office will provide the Secretary of Defense and the Congress with valuable information on the performance and capabilities of the major weapons systems that we are providing to our fighting men. With the confirmation of Mr. Krings for this important job, the responsibility shifts to him, to the Secretary of Defense, and to the President, to ensure that he fully and completely carries out the task which Congress has prescribed. He has agreed to keep in close touch with Congress on these issues and to maintain the highest standards of objectivity and integrity.

I intend to vote to confirm John Krings for the position of Director of the Office of Operational Test and Evaluation within the Department of Defense.

Mr. President, I reserve the remainder of my time.

EXHIBIT 1

[Directive]

DEPARTMENT OF DEFENSE,
April 2, 1984.

Subject: Director of Operational Test and Evaluation

(c) DoD Instruction 5000.2, "Major System Acquisition Procedures," March 8, 1983.

(d) DoD 5025.1-M, "DoD Directives System Procedures," April 1981, authorized by DoD Directive 5025.1, October 16, 1980.

(e) DoD Directive 5000.19, "Policies for the Management and Control of Information Requirements," March 12, 1976.

A. PURPOSE

This Directive:

1. Implements section 136a of reference (a) which establishes the position of Director of Operational Test and Evaluation (Director, OT&E).

2. Assigns responsibilities, functions, relationships, and authorities, as prescribed herein, to the Director, OT&E, pursuant to the authority vested in the Secretary of Defense under reference (a).

B. DEFINITIONS

1. DoD Components. The Office of the Secretary of Defense (OSD); the Military Departments; the Organization of the Joint Chiefs of Staff (OJCS); the Unified and Specified Commands; the Office of the Inspector General, Department of Defense; and the Defense Agencies. The term "Military Services" as used herein, refers to the Army, the Navy, the Air Force, and the Marine Corps.

2. Independent Test Agency. The Army Operational Test and Evaluation Agency, the Navy Operational Test and Evaluation Force, the Air Force Operational Test and Evaluation Command, and the Marine Corps Operational Test and Evaluation Agency.

3. Low Rate Initial Production (LRIP). The production of a system in limited quantity to be used in OT&E for verification of production engineering and design maturity and to establish a production base.

4. Major Defense Acquisition Program. As specified in section 136a of reference (a):

a. A DoD acquisition program that is not a highly sensitive classified program (as determined by the Secretary of Defense) and:

(1) That is designated by the Secretary of Defense as a major defense acquisition program; or

(2) That is estimated by the Secretary of Defense to require an eventual total expenditure for research, development, test, and evaluation of more than 200 million dollars (based on fiscal year 1980 constant dollars) or an eventual total expenditure for procurement of more than 1 billion dollars (based on fiscal year 1980 constant dollars).

b. A DoD acquisition program that is so designated by the Director, OT&E, for the purpose of carrying out the responsibilities, functions, and authorities of this Directive.

5. Operational Test and Evaluation. The field test, under realistic combat conditions, of any item of (or key component of) weapons, equipment, or munitions for the purpose of determining the effectiveness and suitability of the weapons, equipment, or munitions for use in combat by typical military users; and the evaluation of the results of such test.

C. POLICY

1. Within the Department of Defense it is recognized that operational testing is the continuum of realistic, operational field tests conducted by a Military Service independent test agency. Operational testing begins during the development period before a final decision to proceed beyond low rate initial production. This continuum of tests will employ increasing operational realism as engineering design nears its final form to provide an independent measure of development progress and of the ultimate operational effectiveness and suitability of weapon systems, equipment, or munitions, or their components. Operational testing of production (or production-representative) articles is intended to confirm that the items actually tested are effective and suitable for intended to confirm that the items actually tested are effective and suitable for combat.

2. A follow-on phase or phases of operational testing on production systems, equipment, or munitions, or their components are normally conducted after the decision is made to proceed beyond low rate initial production to assess the operational effectiveness and suitability of any changes made in the systems, equipment, or munitions, or their components.

D. RESPONSIBILITIES

The Director of Operational Test and Evaluation shall serve as the Principal Staff Assistant and advisor to the Secretary of Defense on OT&E in the Department of Defense and the principal OT&E official within the senior management of the Department of Defense. In this capacity, the Director, OT&E, shall:

1. Prescribe policies and procedures for the conduct of OT&E within the Department of Defense.

2. Provide advice and make recommendations to the Secretary of Defense, and issue guideline to and consult with the heads of the DoD Components with respect to OT&E in the Department of Defense in general, and with respect to specific OT&E to be conducted in connection with a major defense acquisition program.

3. Designate selected special interest weapons, equipment, or munitions as major defense acquisition programs, as the Director, OT&E considers appropriate to carry out section 136a of reference (a) and the responsibilities, functions, and authorities assigned to the Director, OT&E under this Directive. Such a designation applies exclusively to the implementation of section 136a of reference (a) and this Directive, and does not extend to other purposes for which the term may be used outside of this context.

4. Develop systems and standards for the administration and management of approved OT&E plans for major defense acquisition programs.

5. Monitor and review all OT&E in the Department of Defense to ensure adherence to approved policies and standards.

6. Coordinate operational testing conducted jointly by more than one DoD Component.

7. Coordinate Joint Operational Test and Evaluation (JOT&E) programs to obtain information pertinent to operational doctrine, tactics, and procedures.

8. Initiate plans, programs, actions, and taskings to ensure that OT&E for major defense acquisition programs is designed to evaluate the operational effectiveness and suitability of U.S. military weapon systems.

9. Review and make recommendations to the Secretary of Defense on all budgetary and financial matters relating to OT&E, including operational test facilities and equipment.

10. Review and report to the Secretary of Defense on the adequacy of operational test planning, priorities, support resources, execution, evaluation, and reporting for major defense acquisition programs while avoiding unnecessary duplication.

11. Promote coordination, cooperation, and mutual understanding within the Department of Defense and between the Department of Defense and other federal agencies, state, local, and foreign governments, and the civilian community with regard to OT&E matters.

12. Serve on boards, committees, and other groups pertaining to assigned OT&E, and represent the Secretary of Defense on OT&E matters outside the Department of Defense.

13. Execute such other related responsibilities as the Secretary of Defense may prescribe.

E. FUNCTIONS

The Director, OT&E, shall carry out the responsibilities described in section D., above, for all aspects of OT&E, to include the following functions:

1. OT&E programs of the DoD Components, to include their operational test facilities and resources and the coordination of Military Service OT&E activities.

2. JOT&E programs and Joint Military Service operational testing.

3. Analysis of OT&E results on all major defense acquisition programs.

4. Review of budget submissions to determine the adequacy of OT&E funding.

5. Approval of OT&E sections of the DoD Test and Evaluation Master Plan (TEMP) for major defense acquisition programs.

6. Review of new major system requirements documents, system concept papers, decision coordinating papers and, if appropriate, integrated program summaries for OT&E implications.

7. Enhancement of operational test realism.

8. Development and administration of an OT&E data base.

F. RELATIONSHIPS

1. In the performance of assigned functions, the Director, OT&E, shall:

a. Report directly to the Secretary and Deputy Secretary of Defense without intervening review or approval.

b. Provide guidance to and consult with the Secretary and Deputy Secretary of Defense and the Secretaries of the Military Departments with respect to OT&E in the Department of Defense in general and with respect to specific OT&E activities to be conducted in connection with major defense acquisition programs.

c. Coordinate and exchange information with officials of DoD Components exercising collateral or related functions. In particular, the Director, OT&E, shall consult closely with, but be independent of, the Under Secretary of Defense for Research and Engineering.

d. Use existing facilities and services of the Department of Defense or other federal agencies, and allied countries whenever practicable, to avoid duplication and to achieve maximum realism.

3. Serve as a permanent member of the Defense Systems Acquisition Review Council and the Defense Resources Board for the purpose of carrying out the principles and policies of DoD directive 5000.1 (reference (b)) and DoD Instruction 5000.2 (reference (c)), and DoD Directives System issuances pertaining to test and evaluation activities.

2. Other OSD officials and heads of DoD Components shall coordinate on all OT&E matters as prescribed herein.

3. The Secretaries of the Military Departments shall report promptly to the Director, OT&E, the results of all OT&E conducted by the Military Departments and on all studies conducted by the Military Departments in connection with their OT&E activities.

G. AUTHORITIES

The Director, OT&E, is hereby delegated authority to:

1. Issue DoD Instructions, DoD publications, and one-time directive-type memoranda, consistent with DoD Directive 5025.1-M (reference (d)), that implement policies approved by the Secretary of Defense in order to carry out the functions assigned to the Director, OT&E. Instructions to the Military Departments shall be issued through the Secretaries of those Departments or their designees. Instructions to Unified and Specified Commands shall be issued through the JCS.

2. Obtain reports, information, advice, and assistance, consistent with DoD Directive 5000.19 (reference (e)), as necessary in carrying out assigned functions. Have access to all records and data in the DoD (including those of each DoD Component) that the Director, OT&E, considers necessary to review in order to carry out assigned functions.

3. Act as prior approval authority for OT&E section of the TEMPS and for OT&E funding for each major defense acquisition program. Operational testing of a major defense acquisition program may not be conducted until the Director, OT&E, has approved in writing the adequacy of the plans, including the adequacy of projected levels of funding and resources for OT&E to be conducted in connection with that program.

4. Require, as the Director, OT&E, determines necessary, that observers designated by the Director, OT&E, be present during the preparation for and the conduct of the test part of any OT&E conducted by DoD Components.

5. Monitor and review all OT&E conducted in the Department of Defense and ana-

lyze the results of OT&E conducted for each major defense acquisition program.

a. The Director, OT&E, shall submit a report to the Secretary of Defense and to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives that addresses specifically:

(1) The adequacy of the test and evaluation performed; and

(2) Whether the results confirm the effectiveness and combat suitability of the items or components actually tested.

b. Copies of the report will be provided to appropriate DoD officials and Components to facilitate the development of comments by the Secretary of Defense.

c. A final decision to proceed with a major defense acquisition program beyond low rate initial production may not be made until the report has been submitted to the Secretary of Defense and received by the Armed Services and Appropriations Committees.

6. Prepare an annual report for the Secretary of Defense and the Congress by January 15 of each year summarizing the OT&E activities of the Department of Defense during the preceding fiscal year.

a. The report shall include such comments and recommendations as the Director, OT&E, considers appropriate, including comments and recommendations on resources and facilities available for OT&E and levels of funding made available for OT&E activities.

b. Copies of this report shall be provided to appropriate DoD officials and Components to facilitate comments by the Secretary of Defense, if desired.

7. Communicate directly with the heads of DoD Components. Communications to commanders of the Unified and Specified Commands shall be coordinated with the JCS.

8. Arrange for DoD participation in nondefense governmental programs for which the Director, OT&E, is assigned primary DoD cognizance.

9. Communicate with other government agencies, representatives of the Legislative Branch, and members of the public, as appropriate, in carrying out assigned functions.

H. EFFECTIVE DATE

This Directive is effective immediately.

WILLIAM H. TAFT IV,
Deputy Secretary of Defense.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. GOLDWATER. I yield myself what time I might need.

Mr. President, there are three points I should like to make this afternoon about the nomination of Jack Krings to be Director of Operational Test and Evaluation at the Department of Defense, but first let me say a few words about Mr. Krings himself. He is a graduate of Louisiana State University with a degree in chemistry and physics. He served in the Air Force as a fighter pilot from 1952 to 1956. He served 4 more years as a pilot in the Air National Guard. He has attended and graduated from the U.S. Navy Test Pilot School. Since 1956, Mr. Krings has been employed in weapons system testing by the McDonnell Douglas Corp. and served as chief test pilot for that company. He is recognized by the military test and evaluation community as a leading authority and expert on flight test and evaluation. He has made significant personal contributions to the design, development, test and evaluation, from concept formulation through production, of three major aircraft, the F-4, the F-15, and the F-18. And he also planned and flew the first flight series for the F-18 aircraft.

Mr. President, I should like to step aside from the job of an aircraft test pilot for just a moment because we are talking about a man who has been that.

I remind my colleagues that the M-1 tank employs test people. They test these tanks under every kind of weather condition that can be conceived, every condition that might be met in war—through rain, snow, mud, smoke, gas, and everything else. We do not have to confine ourselves to the M-1. We can talk about the Bradley battlewagon, which I watched being tested just 2 weeks ago down in Fort Benning, GA. I cannot think of a single weapons system of the Army, Navy, Air Force, or Marines that does not go through the type of testing we are interested in.

I am quite concerned about and interested in what my friend from Arkansas has said about the job qualifications. I read from what he said:

First, solid experience in the difficulties of conducting and/or analyzing realistic operational tests—that is, tests that realistically reproduce the stressful, hostile combat environment rather than tests under the clean, idealized conditions of the engineering development test range.

I imagine that if you were to find a man like that, he would have about eight or nine bullet holes in him; he would have been badly wounded in war and managed to survive.

What we are talking about is men—and I have to say women, also—who engage in the job of taking a weapons system out and trying it out under every conceivable condition that might develop on the field of battle. Then they have the power to say, "I don't think it is going to work," or, "If it is going to work, we have to do this to it."

This man is the inventor of the up-front control on target, designated control for today's aircraft cockpits. He planned and managed and conducted the F-15 spin test program.

He has been active in contemporary avionics design, development, and testing.

Mr. Krings has had continuous participation in military flight operations with the U.S. Air Force, the U.S. Navy, and allied foreign air forces. He has been chairman of the Flight Test Operating Committee of the Aerospace Industries Association. He has received numerous awards for professional achievement, and is the author of several publications on aircraft testing.

Jack Krings is clearly one of the leading experts in the United States on the testing of weapons. He may be the leading expert today in the testing of aircraft.

I have made clear to the Secretary of Defense that I would not endorse the confirmation of any Presidential nominee for a position in the Defense Department unless the person had direct prior experience with the responsibilities he would have at DOD. I have said the same thing in articles that have been published. I intend to stand by my word.

I am supporting Jack Krings' nomination in the strongest possible way because he is exactly the kind of nominee that we want. He is a demonstrated expert in his field, he is tough minded and independent, and he has all of the necessary qualifications to perform with competence and distinction in this job.

Second, notwithstanding Mr. Krings' obvious abilities and the relevance of his former experience, the Senator from Arkansas asserted in a letter of April 2 to all Senators that Mr. Krings lacks the two major qualifications to perform effectively as Director of Operational Test and Evaulation. I must respectfully disagree with the Senator from Arkansas.

Jack Krings has experience in conducting tests that realistically reproduce stressful, hostile combat environments. He led a team of experts that planned and conducted force-on-force tests between the F-15 and F-18 aircraft and those combat operational aircraft of the Israeli, Japanese, Spanish, British, and Australian forces to determine which aircraft was the most combat effective. This was done in a realistic operational environment. Another operational experience factor that needs to be considered is that for 8 years Jack Krings flew combat operational aircraft as a member of the U.S. Air Force and the Air National Guard. This experience enables him to relate and understand how the airmen, soldiers, and seamen feel and how they depend upon the system to provide them with equipment that will work in combat.

The Senator from Arkansas also questions whether Mr. Krings has the personal courage to speak his mind and, in the words of the Senator from Arkansas, has a "demonstrated independence from the pressure of industry and the weapons acquisition bureaucracy." The fact that the Senator from Arkansas would ask the question indicates that he fails to recognize that a test pilot for an aircraft manufacturer must be an internal critic who will speak his mind. Who is to tell McDonnell Douglas that it has problems with its aircraft if not the chief test pilot?

Jack Krings has testifed before the Armed Service Committee that he is not afraid to truthfully report on matters affecting survivability and effectiveness of weapons in combat. I have heard no challenge to his entegrity nor has any reason been given to disbelieve his statement. Yes; he has worked for industry. But to find an individual that meets all the qualifications for this job requires that he be a senior industry executive or a senior military officer. The Congress has stipulated that the appointee must come from civilian life and there is no better choice than Jack Krings. We are fortunate to have such a highly qualified nominee.

Third, all Senators should be aware that the Committee on Armed Services has met its responsibilities with regard to evaluating this nomination. The committee held a hearing on March 7 at which Mr. Krings appeared and was examined at some length by Senators who were present. In my view, Mr. Krings satisfactorily answered all questions that were asked of him. No Senator, to my knowledge, expressed any reservation about Mr. Krings' nomination prior to this hearing, when there was ample time and opportunity to do so.

The Senate operates through reliance on its committees. It cannot do its work in any other way. I do not dispute the right of any Senator to bring any matter he wishes to the floor of the Senate. But I believe it would be more effective and more courteous. If Senators intend to oppose a nomination, to provide some notice to the cognizant committee before the nomination has been acted upon so that the committee can consider the objections that are to be raised.

After the hearing in the Armed Services Commttee, 16 members of the committee voted to confirm Mr. Krings. One Senator voted present and two Senators did not vote. Thus, even amongst the membership of our committee, which represents a broad spectrum of the Senate, Mr. Krings was unanimously endorsed.

I hope that, under such circumstances, the Senate would defer to the judgment of the committee responsible for the nomination.

I shall make one final point. Jack Krings has elected, at the request of the President of the United States, to leave a career in private industry in order to enter public service. I am thankful to him for making that decision, because the country needs his services. I am greatly concerned that if nominees who are highly qualified, such as Mr. Krings, are subjected to unfair criticism and personal disparagement as part of the confirmation process, we will soon find that no one of Mr. Krings' character, background, and qualifications will be willing to accept a Presidential request to serve his country.

I urge all my colleagues to evidence the appreciation which they ought to feel to Mr. Krings for the service he is willing to render by voting to confirm his nomination.

Mr. President, I certainly do not classify myself as a weapons expert, nor do I classify myself as a test pilot. But just last night I was out in St. Louis, at the factory of McDonnell-Douglas, and sat in the cockpit of a simulator in which they had installed a new fire control system. A fire control system is what the fighter pilot has to worry about when he goes into combat, to see the enemy, and so forth. This is a new concept.

How do you test that? You try it. You take it up and fly it or sit in a simulator and assume that you are in the air. After you have done that, you travel to a test base, get in the aircraft, take it up, and fly it against targets. This goes on day after day in every branch of service.

When you try to say Mr. Krings is not qualified to do this, you are slapping one of the greatest organizations of people who spend their lives, devote their lives—in fact, lose their lives—to proving that a weapons system will or will not work. The experimental test pilot is one of those groups. Frankly, I do not like to hear them belittled.

I do not know who this group is, the Military Reform Caucus. I have never heard of them. I do not think they are a part of Congress.

Mr. Krings did appear before the Armed Services Committee, which is a proper committee of this body to hear the testimony of people such as this. After many, many long years of an interest in this type of work and quite a bit of practice in this type of work, I have to say that he is one of the finest men of his kind to ever come before our committee.

Mr. President, I have no qualms at all about this man and his ability to test and evaluate.

So far as weapons failures are concerned in the wars we have fought, yes, we have had them, and we will always have them. I do not imagine that any man who has been in combat has found that his gun fired every time, that the airplane started every time, that everything worked perfectly. As long as things are made by men, there are going to be mistakes.

So I hope this body will vote, and vote soon, on this man. He does fill a position that was created by my good friend from Arkansas.

I think it is a very worthwhile position and one that should be filled.

I can think of no better man right now for this job. I can think of a lot of other men in this country who might do as a good a job. But it must be remembered that this man is giving up his private life and probably giving up a nice, happy home and a nice, happy family, to come to this town and try to exist and put up with it. That, in itself, is quite a test; and if he can live through that, I think he can live through any combat.

Mr. THURMOND. Mr. President, I rise in support of the nomination of Mr. John E. Krings to be the Director of Operational Test and Evaluation for the Department of Defense. I feel that the allegations about Mr. Krings being unqualified for this position are unfair and without merit.

Mr. President, I would like to point out that the Committee on Armed Services held a confirmation hearing for Mr. Krings on March 7, 1985. He was questioned at length concerning his qualifications for the position for which the President has nominated him.

Not one Senator raised any objections concerning this nomination prior to this confirmation hearing, and the committee recommended his confirmation with opposition.

Mr. Krings is imminently qualified for this position. He has served as the chief test pilot for the McDonnell Douglas Corp., where he was responsible for the evaluation of both the F-15 and F-18 aircraft. He has helped to invent aircraft components and participated in aircraft redesign following testing results. We are lucky to have a man with his experience willing to serve the public at a considerable loss of personal income.

Mr. President, I urge my colleagues to support the recommendation of the Armed Services Committee and vote in favor of the confirmation of Mr. John E. Krings to be the Director of Operational Test and Evaluation.

Mr. ROTH. Mr. President, I am going to vote to approve the nomination of Mr. Jack Krings to be Director of the Defense Department's Office of Operational Test and Evaluation. I have met Mr. Krings and he has assured me that he will be open with Congress and candid concerning his views with respect to testing matters. He has a long background in the technical aspects of weapons design and performance and his experience as a test pilot should give him knowledge which he can use in monitoring and evaluating operational tests and in recommending whether weapons should enter production.

Obviously, the performance of the candidate for this position will be important to the ultimate success of the OT&E Office. However, while we all have our own preferences as to the abilities and characteristics of a nominee for Director of OT&E, I think the crucial factor in the effectiveness of the new Office will be the support it receives from the Secretary of Defense. Without his support, his willingness to accept the Director as a key

advisor on weapons testing and production and his recognition and protection of the statutory independence of the Director, it will be difficult at best for anyone to succeed as the head of the new OT&E Office no matter what his qualifications.

I made these points in a letter I recently sent to Secretary Weinberger. I ask unanimous consent to have it printed in the RECORD at this point. Based on the supportive manner in which the Secretary has worked with Joe Sherick, the independent inspector general of the Defense Department, I believe there is good reason to be confident that the new Director will be given the latitude and support he needs to do his job.

There being no objectrion, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON
GOVERNMENTAL AFFAIRS,
Washington, DC, April 2, 1985.

Hon. Caspar Weinberger,
Secretary, the Department of Defense, the Pentagon, Washington, DC.

DEAR CAP: As you know, I was one of the principal authors of legislation establishing the independent Office of Operational Test and Evaluation in the Department of Defense. I believe that operational tests, conducted and evaluated by an independent test agency in an environment simulating as closely as possible the actual conditions under which weaponry will be used, are a crucial component in the development and production of effective defense hardware. The safety and effectiveness of our military personnel depend on the existing of a rigorous and comprehensive operational testing process.

A nominee for the Director's position was submitted to Congress some weeks ago and is expected to come before the Senate in the near future. The success of this Office depends heavily on its initial performance. I urge you to take a personal interest in the Office as the new Director takes over. The Office can only be effective if the Director is able to obtain the data and resources he needs to do his work in an independent and thorough manner.

I believe that the independent advice of the Office Director will greatly aid you in determining whether a weapon is ready to begin production. I stand ready to assist you and the new Director in strengthening the operational testing process and look forward to working with you on this important issue.

Sincerely,

WILLIAM V. ROTH, Jr.,
U.S. Senate.

Mr. ROTH. Mr. President, I am a principle author, along with Senator DAVID PRYOR, of the legislation to establish the Office of Operational Test and Evaluation. I yield to no one in my belief that we simply must have the most effective test and evaluation process possible in order to assure the safety and combat readiness of our military personnel. Where the safety of the troops is concerned, we can ill afford to skimp on or, even worse, ignore necessary operational testing. Test results must be a key component in the decision on whether to proceed to production of weaponry.

The legislation Senator PRYOR and I developed provides safeguards for the independence of the Director of OT&E, makes him the key adviser to the Secretary on all matters related to operational testing, gives him the authority and responsibility to review and approve all test plans for major weapons programs and mandates that he constantly monitor the performance of the service test agencies. This is a big and important job but I believe the legislation we developed provides the tools needed to do it. If Mr. Krings' nomination is approved here today by the Senate, he will not find the position of Director of OT&E an easy one to fill, but it is not supposed to be. However, he can rest assured that there are many of us here in Congress who are very concerned about the operational testing process and committed to seeing the OT&E Office become a success.

The PRESIDING OFFICER. Who yields time?

Mr. NUNN. Mr. President, I yield the Senator from Arkansas such time as he may desire.

Mr. PRYOR, I thank the Senator from Georgia for yielding me a few minutes to respond to my very good friend, my eloquent friend, from Arizona, Senator GOLDWATER.

Mr. President, first, in no way did I intend or mean, by any stretch of the imagination, to belittle the wonderful test pilots in our country who bravely test the aircraft we use, not only militarily but also commercially. Not only do I have the greatest respect for those test pilots, but also, as I have said probably 13 times today, I have tremendous respect for this individual whose name we are considering, Mr. Krings. I respect him in every way for any job, with the exception of Director of Independent Testing. Development testing, yes. Acquisition, yes. Any position except Independent Director of the Office of Operational Testing and Evaluation.

In fact, I have recommended that he be named for the now vacant position of development testing, which I understand is vacant. He would be splendid in that role. However, with respect to his capabilities or his expertise in the area of creating a battlefield scenario, in creating those conditions under which the real test of weapons is going to be called for, he has admitted that he has had no particular training in that field. I simply want the chairman of the Armed Services Committee, whom I respect him, and I want all my colleagues to recognize that any other position is fine for this gentleman, except this particular one.

The second point: The Senator from Arizona has raised the question of the military reform caucus.

He said it was not a part of the Government, and it is really not a part of the Government. It is a small, loosely knit group of individuals who meet maybe once a month, once every 2 months, where we bring in a speaker or where we take upon ourselves some area in the whole arena of military concerns, things that we feel need to be changed. I would not call us bomb-throwers. In fact, one of our members of this very loosely knit Democratic-Republican, liberal-conservative group is the distinguished Senator from Georgia, Senator NUNN. The immediate past chairperson of the military reform caucus is the very distinguished Senator from Kansas, Senator KASSEBAUM. On the House side, the co-chair of the military reform caucus is none other than a very fine Republican Congressman from Oregon, Congressman DENNY SMITH. So it is bipartisan. It has no official sanction.

But I must say that 1½ years ago, I think without the military reform caucus getting behind the concept of the need for an independent director of operational testing sent to us by the President and confirmed by the Senate, I do not feel that legislation would have passed the House or the Senate had it not been with this group of people giving it their support.

The military reform caucus, by the way, is open to any and all Members of the Senate. We invite the membership of those who may not have joined thus far.

Mr. President, I sincerely believe that Mr. Jack Krings is not the person for this task which lies ahead, and I am going to vote against him. I do so with reluctance, and I do so also, Mr. President, because I feel that this particular job, at this particular time, there is no more important job that we have in properly testing those weapons under the battlefield scenarios and conditions before we either commit billions and billions of dollars to weapons that do not work or we see that those weapons under battlefield scenarios will not work.

Mr. President, at this time, I reserve the remainder of my time.

Mr. GOLDWATER. Mr. President, I do not have anyone on this side at this time who cares to speak. I do not know about the Senator from Arkansas, but on this side, I am perfectly willing to yield back its time if the Senator from Arkansas is, and we can proceed to vote.

Mr. NUNN. Mr. President, much as I would like to go ahead and vote on this nomination—of course I agree with the Senator from Arizona in substance—I would have to reserve the remainder of my time at this point.

Mr. PRYOR. If I am not mistaken, let me say to the Senators from Arizona and Georgia I believe there is one additional speaker on this side. I think

the Senator is on his way over here at this time. I will just assume he will be here momentarily.

Mr. NUNN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. Will the Chair inform Senators what the time remaining is on both sides?

The PRESIDING OFFICER. The majority has 111 minutes remaining and there are 90 minutes remaining on the minority.

Mr. NUNN. I thank the Chair. I reserve the remainder of the time.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HART. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, with considerable reluctance, I must oppose the nomination of Mr. Jack Krings to be the first Director of the Office of Operational Test and Evaluation. The reputation of Mr. Krings in these deliberations is not in any way at issue. He is an accomplished corporate test pilot and an admirable individual. The issue is whether this nominee possesses the degree of independence necessary to carry out this very, very difficult assignment.

Mr. President, Congress mandated creation of an independent Office of Operational Test and Evaluation in 1983. We did so because of our growing concern that the Department of Defense had been funding development of increasing numbers of overly-complex, untested weapons systems that would ultimately prove ineffective in combat. We recognized that such practices posed a clear and pressing threat to this country's national security. We believed an independent agency to implement and oversee rigorous weapons testing was essential to ensure adequate combat capability of weapons systems before major procurement decisions were made, as well as to guarantee that those test results were reported accurately and without bias both to the Congress and to the American people.

Mr. President, for this type of unique, independent testing office to function effectively, its Director must possess certain basic qualifications.

First, this individual must have firsthand experience in the difficulties of conducting and analyzing tests that simulate realistic combat situations. This is known in the parlance as operational testing. Second, that individual must be entirely independent of private interests in defense contracting activities.

The administration has finally put forward a nominee for this position after a year and a half delay, but it has proposed a nominee who, regardless of his other accomplishments, fails to meet these very, very rigorous criteria.

Mr. Krings has clearly stated that he has no experience in conducting realistic operational testing. He has been an outstanding corporate engineering test pilot but in that capacity has had no requirement to consider or recreate the rigors and surprises of actual combat operations.

Further, Mr. President, Mr. Krings has given nearly 30 years of service to the McDonnell Douglas Corp. Without in any way calling into question Mr. Krings integrity, because that is not in question, this period of service to one individual weapons contracting corporation—and it could have been any one of many others—does not qualify this nominee to provide the independent, rigorous oversight required of this critical agency.

Mr. President, the Director of Operational Test and Evaluation will have overwhelming influence over whether our servicemen and women will be forced to fight the next war with weapons that are untested and do not work. For that reason, this nomination will be critical to the future of our national security. Our Armed Forces deserve someone in this office who has the experience to do this job effectively beyond perhaps any standard we have ever created.

Mr. President, my own decision in this matter is heavily influenced by private conversations, not a matter of public record or appearance before our Armed Services Committee, in which very difficult and tough questions were put to this nominee about whether he would pursue the activities of this office as rigorously as the office will require.

This individual will probably be tested in ways that are even more difficult than the weapons he himself has been called upon to test. I am not satisfied, Mr. President, with the responses given by this nominee with regard to the importance of this office or its continued existence. In fact, I think, as the Senator from Arkansas [Mr. PRYOR] has commented already in these deliberations, it is Mr. Krings' goal to see that the office is eliminated. It is the goal of those of us who helped establish that office to see it continues as long as this country requires a Department of Defense and a structured, permanent national security apparatus.

Mr. President, it is with a great deal of reluctance, because of the other high qualifications this individual possesses, that I ask my colleagues to join with me, the Senator from Arkansas, and others in opposing this critical nomination.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, I do not see the Senator from Arkansas on the floor. I am wondering if the Senator from Colorado might know where he is, because, so far as this side of the aisle is concerned, we have no further debate, and I am perfectly willing to yield back the remainder of my time, if we can get the Senator from Arkansas to do the same.

Here he is now. I was just saying, I say to the Senator from Arkansas, that this side has completed its arguments, and I am perfectly willing to yield back the remainder of my time and proceed to vote.

Mr. PRYOR. I say to the Senator from Arizona that so far as this Senator is concerned, I am prepared, on our side, to vote. I think the minority leader wants to be on the floor for a moment.

Mr. NUNN. Mr. President, if the Senator will yield, it is my understanding that Senator BYRD is coming to the floor and will address this subject in a moment.

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, after discussion with my good friend from Arkansas and the minority leader, I am again prepared to yield back the remainder of my time, if the Senator from Arkansas is willing to do so. If he says yes, I will suggest that, since the yeas and nays have been ordered, the clerk call the roll and we go on.

The PRESIDING OFFICER. Is all time yielded back?

Mr. NUNN. Not yet.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. All time has been yielded back.

The PRESIDING OFFICER. The Chair notes that time has been yielded back on one side only.

Mr. GOLDWATER. I thought the Senator had yielded back his time.

Mr. NUNN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is, Will the Senate advise and consent to the nomination of John E. Krings, of Virginia, to be Director of Operational Test and Evaluation, Department of Defense? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I ann ce that the Senator from Washington [Mr. EVANS], and the Senator from Utah [Mr. GARN], are necessarily absent.

I also announce that the Senator from Alaska [Mr. STEVENS] is absent on official business.

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN], the Senator from Missouri [Mr. EAGLETON], and the Senator from Louisiana [Mr. LONG], are necessarily absent.

I further announce the Senator from Vermont [Mr. LEAHY], the Senator from Michigan [Mr. LEVIN], and the Senator from New Mexico [Mr. BINGAMAN], are officially absent.

The result was announced—yeas 73, nays 18, as follows:

[Rollcall Vote No. 30 Ex.]

YEAS—73

Abdnor	Goldwater	Metzenbaum
Andrews	Gorton	Murkowski
Armstrong	Gramm	Nickles
Bentsen	Hatch	Nunn
Boschwitz	Hatfield	Packwood
Bradley	Hawkins	Pell
Burdick	Hecht	Pressler
Byrd	Heflin	Quayle
Chafee	Heinz	Rockefeller
Cochran	Helms	Roth
Cohen	Hollings	Rudman
Cranston	Humphrey	Simpson
D'Amato	Inouye	Specter
Danforth	Johnston	Stafford
DeConcini	Kassebaum	Stennis
Denton	Kasten	Symms
Dixon	Kennedy	Thurmond
Dodd	Lautenberg	Trible
Dole	Laxalt	Wallop
Domenici	Lugar	Warner
Durenberger	Mathias	Weicker
East	Matsunaga	Wilson
Exon	Mattingly	Zorinsky
Ford	McClure	
Glenn	McConnell	

NAYS—18

Baucus	Harkin	Proxmire
Boren	Hart	Pryor
Bumpers	Kerry	Riegle
Chiles	Melcher	Sarbanes
Gore	Mitchell	Sasser
Grassley	Moynihan	Simon

NOT VOTING—9

Biden	Evans	Levin
Bingaman	Garn	Long
Eagleton	Leahy	Stevens

So the nomination was confirmed.

Mr. EXON. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to the nomination of John E. Krings.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, all the matters I will take up have been cleared with the distinguished minority leader, Senator BYRD, and he has agreed that I can proceed without his presence.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR OFFICIAL LEAVE OF SENATOR STEVENS

Mr. DOLE. Mr. President, I ask unanimous consent that Senator STEVENS be granted official leave of the Senate until Monday, April 22, 1985, while he attends the arms control negotiations as an official Senate observer in Geneva.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE HELD AT DESK

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate receives from the House Joint Resolution 33, National Child Safety Week, it be held at the desk pending further consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 12 NOON

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 12 noon, Wednesday, April 17, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Further, Mr. President, I ask unanimous consent that following the two leaders under the standing order, there be a special order of not to exceed 15 minutes for the Senator from Wisconsin [Mr. PROXMIRE].

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Following that special order, Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond 1 p.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Following routine morning business, it will be the intention of the majority leader to turn to any of the following Commerce Committee authorization bills if part of the 3-day rule can be waived: S. 597, shipping technical changes; S. 814, pipeline safety; S. 817, earthquake hazards; S. 818, fire prevention. For most, if not all, I think we could get unanimous consent. There is still a possibility of rollcall votes. I do not see any need for rollcall votes on these relatively minor measures, and I would hope there would not be rollcall votes.

Also, the Senate could turn to any other legislative or executive items that have been cleared, but again it is my understanding that both the Legislative and Executive Calendars are fairly clear right now.

RECESS

Mr. DOLE. Mr. President, there being no further business, I move the Senate stand in recess until 12 noon on Wednesday, April 17, 1985.

The motion was agreed to; and, at 5:34 p.m., the Senate recessed until Wednesday, April 17, 1985, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate April 16, 1985:

DEPARTMENT OF STATE

Douglas W. McMinn, of Virginia, to be an Assistant Secretary of State, vice Richard T. McCormack, resigning.

Executive nominations received by the Secretary of the Senate April 15, 1985, under authority of the order of the Senate of January 3, 1985:

DEPARTMENT OF STATE

Thomas R. Pickering, of New Jersey, a career member of the Senior Foreign Service, personal rank of career ambassador, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Israel.

U.S. COMMISSION ON PUBLIC DIPLOMACY

Hershey Gold, of California, to be a member of the U.S. Commission on Public Diplomacy for a term expiring July 1, 1987. (Reappointment.)

CONFIRMATION

Executive nomination confirmed by the Senate April 16, 1985: Department of Defense.

John E. Krings, of Virginia, to be Director of Operational Test and Evaluation, Department of Defense.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—Tuesday, April 16, 1985

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Help us, O God, to lift our eyes to the gracious gifts we have received, and not only to the real problems that we meet. In spite of the trials and difficulties that we face, may we begin each day with a prayer of thanksgiving for the life that You have breathed into our souls and for the many good people who are colleagues and friends. For our concerns, give us strength, and for our blessings, we offer this word of praise. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 661. An act entitled the "George Milligan Control Tower";

S.J. Res. 47. Joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week";

S.J. Res. 52. Joint resolution to designate the month of April 1985 as "National School Library Month";

S.J. Res. 63. Joint resolution to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week";

S.J. Res. 67. Joint resolution to designate the week of October 6, 1985, through October 12, 1985, as "Mental Illness Awareness Week";

S.J. Res. 90. Joint resolution commemorating the 75th anniversary of the Boy Scouts of America;

S.J. Res. 94. Joint resolution to designate the week beginning May 12, 1985, as "National Digestive Diseases Awareness Week"; and

S.J. Res. 109. Joint resolution to designate the week of April 14, 1985, as "Crime Victims Week."

MARVELOUS MARVIN HAGLER

(Mr. DONNELLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DONNELLY. Mr. Speaker, Marvelous Marvin Hagler is one of the great athletes of our age.

If anyone still had any doubts, he put them to rest last night with a spectacular defense of his undisputed middleweight boxing championship.

Marvin Hagler's courage, dedication, and athletic ability put him in the same class as the legendary Rocky Marciano, another son of Brockton, MA, the city of champions.

His boxing career began 12 years ago in Brockton, and he has worked his way to greatness under the guidance of longtime local trainers Pat and Goody Petronelli.

Boxing is a test of one man's strength, skill, and heart against another's, one on one. Marvin Hagler is simply the best.

CHILDREN AND YOUNG FAMILIES—AMERICA'S NEW POOR

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, 25 years ago, the poverty rate for America's elderly people was close to twice the national average. Today, it's well below average. In fact, when all transfer payments are taken into account, the poverty rate for the elderly is only about 3 percent; that's less than for any other age group.

This is a tremendous national accomplishment. We can take pride in knowing that our society provides a decent and comfortable retirement, with good health care, for our senior citizens.

But a new problem has popped up. We have a new population of poor people. Young families. Young adults, single and unemployed. Small children. The poverty rate for Americans under the age of 25 is the highest for any age group. Over the past 5 years, that rate grew by almost 50 percent—while the rate for the elderly fell by 7 percent.

In the 1981-82 recession, young people were especially hard hit—as they will be again, if we hit another downturn.

It is on top of this that we add, year after year, $200 billion of public debt to our children's burden, and $100,000 in extra taxes for each of them to pay just to carry the interest on the $2 trillion of debt that is their inheritance.

HARD CHOICES ON MEDICAL CARE

(Mr. ROWLAND of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Georgia. Mr. Speaker, once again, attention is being focused on the difficulty of addressing complex medical issues by the tragedy of Karen Ann Quinlan, which happened 10 years ago today.

Mr. Speaker, highly sophisticated life-support systems have helped to increase the life and improve the quality of life for many of our citizens, but on the other hand, these same systems have become monsters. The Department of HHS has recently released regulations that have to do with Baby Doe cases and in the decision that is made there, there can be no decision with reference to quality of life that can be used.

Mr. Speaker, it seems to me that this is an infringement upon families and physicians and upon our Maker, third parties becoming involved in these decisions. We talk about increasing cost of medical care in this country on the one hand; but then on the other hand, we do those very things that will increase the cost of medical care.

Mr. Speaker, there are some hard choices that are going to have to be made by the people in this country.

LOCAL GOVERNMENTS' CONCERNS WITH THE DEFICIT DEBATE

(Mr. CLINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLINGER. Mr. Speaker, recently, my good friend and colleague, Congressman TOM RIDGE, and I conducted a survey of, and held field hearings with, local government officials from our districts to get a clear idea, in light of the current budget debate, which Federal programs they considered to be truly vital. Not surprisingly, we heard support expressed for continuing programs like UDAG, Community Development Block Grants, the various economic development programs, and others. The merits and successes of such programs are always more apparent outside the Capitol Beltway.

At the same time, most local officials are not ignorant of the Federal deficit's magnitude, and are realistic about the prospects for their favorite programs surviving forever. They were almost unanimous, however, in cautioning that the abrupt cancellation of general revenue sharing could be dis-

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

51-059 O-86-31 (Pt. 6)

astrous, resulting in local property tax increases of 25 to 50 percent.

Local governments have prudently and properly included revenue sharing in their operating budgets through next year because we, in Congress, promised them it would be there. Less than 2 years ago, this body voted overwhelmingly to continue this relationship with local authorities, and our President told us we had never spent money more wisely.

One writer recently said the Federal Government may have so thoroughly woven itself into the American social fabric that it cannot now be removed without ripping it. I propose that, if revenue sharing is to be finally eliminated, we owe it to our local governments to not rip the social fabric, to phase it out properly, allowing them adequate lead time to plan.

With this in mind, I have decided to cosponsor H.R. 796 to reauthorize the general revenue-sharing program for 3 years.

□ 1210

WORLD WOMEN PARLIAMENTARIANS GROUP OFFERS UNIQUE PERSPECTIVE FOR LASTING PEACE

(Mrs. BOXER asked and was given permission to address the House for 1 minute, and to revise and extend her remarks, and include extraneous matter.)

Mrs. BOXER. Mr. Speaker, as Congresswoman SCHROEDER has stated, she and Congresswoman SCHNEIDER and I represented America in the first ever Women's Peace Summit in Stockholm, Sweden. It was very exciting and rewarding to work with women from 15 different countries from all kinds of political systems, but with one goal, to make sure the world never explodes in a nuclear holocaust.

We believe, with women parliamentarians from all over the world, that we bring a unique perspective to the nuclear arms race. We are daughters, we are mothers, we are grandmothers, we have raised our children to thrive in a peaceful world, not to die in war, and we want a just and lasting peace for all God's children. This year, in the bilateral talks between the Soviet Union and the United States, there will be a real chance for a lasting peace, and I hope that this new organization of women parliamentarians from all over the world will help that chance.

LESSONS OF THE HOLOCAUST

(Mr. SAXTON asked and was given permission to address the House for 1 minute.)

Mr. SAXTON. Mr. Speaker, the 40th anniversary of the end of the Holocaust is being observed this week in ceremonies throughout the United States. I commend my colleagues for voting to allow one such ceremony in the Capitol rotunda.

Today, I am also asking my colleagues in the House to cosign a letter to the President. This letter encourages him to finalize plans for a visit to Dachau concentration camp in his forthcoming trip to West Germany.

I appreciate the President's theme of reconciliation and peace in his visit. However, I believe it is also important to acknowledge and honor the victims of man's inhumanity to man.

There are those, I know, who argue that time should heal all wounds, and that generations born after the Holocaust should not have to bear responsibility for the tragedy.

Yet remembrance of the Holocaust teaches us that racism of any kind is a curse to all mankind.

It was for this very reason that I sponsored legislation in the New Jersey Assembly in 1979 which provided for an educational curriculum on the Holocaust.

I believed then, as I believe now, that our children must know of the history of the Nazi rise to power, and the resulting horrors perpetrated against humanity.

History teaches us many lessons. And perhaps this one is the most difficult—yet the most important—of all.

SUPPORT URGED FOR CONTADORA PEACE PROCESS

(Mr. BOUCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, my recent travels in Nicaragua have persuaded me that our policy of providing aid to the Contras is having the opposite of its intended effect.

The President's goal is to destabilize Nicaragua's Government, but by supporting remnants of the hated Somoza National Guard he is facilitating consolidation by the government of its control.

Nicaragua's neighbors, our allies in the region, have produced a treaty which they believe will protect their security interests. It would prohibit the placement of foreign military bases on Nicaraguan soil. It would prevent the Nicaraguans from arming or training insurgents in other countries, and it would provide for onsite inspection to ensure Nicaragua's compliance.

These are treaty terms which will protect the security of our Latin American allies and our security as well. Rather than conduct an illegal covert war against Nicaragua we should promote stability and our long-term security by supporting the Contadora peace process.

A "CLOSE VOTE" IN INDIANA

(Mr. FAWELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAWELL. Mr. Speaker, there is an old adage in the law that says, "bad cases make bad laws."

In the past 52 years, only three election recounts have been conducted by the House. In all three cases the decision to proceed with a congressional recount was based on at least one or more of three objective standards. These standards are:

First, no State certificate of election had been issued, or if issued, had been revoked, and/or

Second, the State in which the election was held lacked a statute providing for a recount, and/or

Third, there were allegations of fraud.

None of these standards apply in the McIntyre election.

Objective standards to determine when this House should take jurisdiction of a congressional recount have thus been removed by congressional action in the McIntyre case and replaced with a subjective criteria, which is: a congressional recount is in order solely on the grounds of a "close vote." There is no definition of what is a "close vote."

That precedent will eventually come back to haunt future sessions of Congress.

"GHOST VOTERS" HOLD KEY TO INDIANA RECOUNT RESULT

(Mr. DURBIN asked and was given permission to address the House for 1 minute.)

Mr. DURBIN. Mr. Speaker, for those who have been following the saga of the Eighth Congressional District in Indiana, you will be interested in knowing the plot has taken a surprising turn.

Over the past 4 months this body has been subjected to a barrage of speeches by our Republican colleagues over the election contest in Indiana's Eighth Congressional District.

In an expensive media campaign by the Republican National Committee the Democrats have been accused of denying the Republican candidate a victory which at various times he has claimed to have won by 34 or 418 votes.

The facts of the recount dispute these false Republican claims.

As of this morning the candidates are separated in the recount by only one vote.

In two counties there are 40 more votes appearing on the voting machines than the total number of voters who signed in at the polling place.

If these ghost voters are counted, the Republican candidate may prevail.

If the recount committee does not add in these ghost voters, the Democrat will be declared the victor.

This 1984 Indiana election contest finally rests on a very simple question.

Will the voters of Indiana's Eighth Congressional District make the choice and return Frank McClosky to Washington or will 40 ghost voters send us their choice, Mr. McClosky's opponent?

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1617, NATIONAL BUREAU OF STANDARDS AUTHORIZATIONS, 1986 AND 1987

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 99-41) on the resolution (H. Res. 128) providing for the consideration of the bill (H.R. 1617) to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1986 and 1987, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1210, NATIONAL SCIENCE FOUNDATION AUTHORIZATIONS, 1986 AND 1987

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 99-42) on the resolution (H. Res. 129) providing for the consideration of the bill (H.R. 1210) to authorize appropriations to the National Science Foundation for the fiscal years 1986 and 1987, and for related purposes, which was referred to the House Calendar and ordered to be printed.

THE MOST IMPORTANT DEBATE OF THE DECADE

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, these Chambers will soon witness the latest chapter in what perhaps is the most important debate of the decade. This debate will not only be about Nicaragua and its establishing of a Soviet Communist base on the land bridge between North and South America, it will be about the soul of the Democratic Party. All over the country Democrats are holding conferences on how to move their party back toward the center.

Well, I call upon my Democratic colleagues to see this crucial debate on Nicaragua as an opportunity to show the American people that you are serious about returning to the mainstream.

The fringe philosophy of "blame America first" has heralded our foreign policy setbacks and paralleled the setback of the Democratic Party in national elections.

As a Republican, I might welcome this self-immolation, but as an American I view it as a disaster for the well-being of our mutual enterprise.

Mr. Speaker, the ghosts of Franklin Roosevelt, Harry Truman, John F. Kennedy, Hubert Humphrey, and Henry Jackson will be present during this debate.

Democrats who are talking about recapturing the center should pay heed to them. Not to do so will only injure their memory and further injure the Democratic Party itself.

CENTRAL AMERICA: A DOSE OF REALITY

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, beginning today, I will speak to the issue of Central America. Each day, I will seek to provide factual background, because we cannot hope to formulate a workable policy without a clear understanding of Central America, what our role has been, and how our policy has not only violated decency and offended commonsense, but has violated the letter and spirit of law after law.

I will discuss how our own laws have been violated in Central America. I will show how our policy has violated international law. And I will discuss what the region is like, what our role there has been, and how current policy in no way differs from failed policies of the past.

Each day, I will present a little dose of reality. Each day, I will light a little match, in the hope of igniting a torch of honesty, in a region where dishonesty and utter cynicism has been the rule of our policy. After all, where else in the world but Central America, and specifically Nicaragua could or would a U.S. President justify support of a dictator as evil as Somoza by saying: "He may be an SOB, but he's our SOB." It is long past time that our policy becomes more decent than that. It is time that we understand how we are perceived, what we have done, and we can now do to redeem ourselves in Central America, the most notable scene in the world of benign neglect and malign action from our Government. It is time that we base our policy on decency rather than expediency, on humanity rather than greed, and on honesty rather than paternalism.

HOUSE SHOULD CONSIDER RESOLUTION CONDEMNING SOVIETS FOR MURDER OF MAJ. ARTHUR D. NICHOLSON

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, earlier this morning, the House Democratic leadership made a capricious decision to remove House Resolution 125 from consideration by the House. House Resolution 125 is the resolution condemning the Soviet Union for the brutal murder of Maj. Arthur D. Nicholson, and had over 60 cosponsors, including 18 members of the Foreign Affairs Committee, from both sides of the aisle.

I believe that if the majority of Members feel that it is not in the best interest of the United States for the House to issue such a condemnation, then they should vote the resolution down—but we should not be prevented from considering the issue on its merits.

By playing down the importance of the murder of Major Nicholson we are once again doing our best to paint a rosy picture of the nature and intentions of the Soviet leaders, and in the process creating a false hope for a faithfully observed arms reduction agreement.

For once let's expose the dishonorable methods and motives of the Soviet leadership, and let the people of the world pass judgment. As a start, let's consider House Resolution 125.

This is the strongest statement to date expressing American indignation over the murder, and our refusal to tolerate future violations of treaties and agreements. If Mr. Gorbachev is testing our resolve, let's show him we've come to play hardball. If Mr. Gorbachev is seeing just how far he can push us, let's call his bluff.

No retaliation, as such, is necessary. My proposal is simple: Present the facts to the people of the world and let them pass judgment. This means maintaining a full-scale information barrage throughout the United States and the world. If ever there was a situation which demands public diplomacy, not silence, this is it.

SOCIAL SECURITY/REAGAN

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, last November President Reagan promised that he would never stand for a reduction in Social Security.

Last month Ringling Brothers Circus announced that its new star attraction would be a live unicorn.

Both turned out to be a hoax.

President Reagan has now given his blessing to a Republican budget plan which proposes a major reduction in Social Security. By supporting this plan, he has flatly broken his promise to millions of senior citizens.

Mr. Speaker, we Democrats believe a promise is a promise is a promise. Obviously, the Republicans believe a promise is a promise only as far as the next election. After all, if Mr. Reagan did not cut Social Security, he might have to forego an increase in Pentagon spending or, even worse, close tax loopholes that allow thousands of wealthy Americans and corporations to avoid taxes, General Dynamics, which paid no taxes last year, should be very happy with President Reagan.

Mr. Speaker, when the circus promised a unicorn, it delivered a goat. When the President promised to protect Social Security, he delivered a turkey.

ACCEPT THE LAWFUL RESULT

(Mr. ECKERT of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKERT of New York. Mr. Speaker, here we are more than 5 months after the general election and still there is no representation in this House for the people of the Eighth Congressional District of Indiana. What a travesty of our representative system of government! The political motivations which have prevented this House from permitting the duly elected—and properly certified—candidate—Rick McIntyre—to assume his rightful place here are a blot on the record of the House.

Mr. McIntyre won his election in a fair count of the votes on election day. He won again in a strict recount of the votes in the district conducted under Indiana election law. His election was properly certified by the responsible officials of the State of Indiana under the laws of that State.

What we apparently have now is yet a third count under improvised rules of a House task force which exist in no election law and which have been applied to no other congressional election. And even these rules are being subjectively, unevenly applied in different areas. What if there is a result at odds with the first two counts? Will we be asked to accept the 1-out-of-3 result achieved by dubious standards irregularly employed?

Mr. Speaker, we are a government of law. Let the House accept the results of the lawful election of the State of Indiana and seat Rick McIntyre.

THE PRESIDENT HAS BEEN FAILING TO PROVIDE NORMAL LEADERSHIP

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, of all events, human tragedy should not be politicized. That is especially true of the supreme tragedy—the Holocaust.

As a result, there was a muting of public criticism by many in political life when the President first decided to refrain from a trip to a concentration camp on his trip to Germany.

My personal concern was heightened when I heard the President explain that decision in these words:

> Very few alive (in Germany) remember even the war . . . they do have guilt feelings that's been imposed upon them.

Then the President decided to visit a German military cemetery. The Holocaust was a cataclysmic event that tolerates neither equivocation nor political or publicity tradeoffs. A President has a unique opportunity to exert moral leadership. In this case, President Reagan has been failing the Nation; indeed, the world.

□ 1230

REMOVAL FROM AGENDA OF HOUSE RESOLUTION 125 CONDEMNING SOVIET GOVERNMENT FOR MURDER OF MAJ. ARHUR D. NICHOLSON, JR.

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I have before me a copy of the program of the House of Representatives for this week. Listed as one of the items that we were to take up today is House Resolution 125 condemning the Soviet Government for the murder of Maj. Arthur D. Nicholson, Jr.

It is now my understanding that we will not take up that resolution. I am disappointed. We have waited far too long already to condemn the brutal, calculated murder of that American soldier.

It seems to me that we had, by scheduling it today, a chance to correct our waiting too long. By pulling it off the calendar we will now wait more. That is wrong, Mr. Speaker.

When we talk about moral leadership, we need to provide some moral leadership right here, too, by condemning those who murder as a part of their political will.

HOUSE RECOUNT OF INDIANA EIGHTH CONGRESSIONAL DISTRICT

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PANETTA. Mr. Speaker, I take this time to update the House on the results in the Eighth District election.

Today the actual count will be completed in all 15 counties so that the actual counting process in all 15 counties will, in fact, be completed by today.

However, it is clear that out of some 234,000 votes that were cast that the result will be extremely close. It is a dead heat at this point.

The final count will depend on two things: a resolution by the task force in three areas. One, the ballots that are segregated by the various teams. We expect about a dozen of those to have to resolve. A final resolution of questions relating to unnotarized absentee ballots, and also third, a final resolution of reconciliation questions that have come up in about 40 of the 400 precincts.

This has been a difficult and challenging process. I want to commend the GAO auditors and the teams and the various individuals involved with this count as well as the members of the task force who have been involved in trying to resolve these issues.

I also want to thank the House for its patience in this difficult issue. My hope is that a final report will be completed on Thursday and reported to the House floor at the beginning of next week, and that the result will be a credible count. It will be a close count, obviously. But I think the House will be true to its responsibility to the Constitution and to the people of the Eighth District.

Mr. Speaker, as I indicated to the House on April 2, during the debate on House Resolution 121, and again 2 weeks ago on Thursday, before the House recessed for the Easter district work period, the task force, after consultation with the recount director, had set today as the target for completion of the House recount of the eighth Congressional District of Indiana.

The counting teams, under the direction of the recount director, Mr. James Shumway, whose appointment the members of the task force unanimously agreed to, have nearly completed the counting, and although I am not able this afternoon to announce the final vote totals, I can assure you that those figures will be known in short order.

Let me bring you up to date on where we are in the counting process. First, as of this moment, the GAO counting teams have completed counting in 12 of the 15 counties which make up the Eighth Congressional District. There will be counting teams in each of the three remaining counties today. The 14 GAO auditors and the GAO Supervisor, Mr. Jim Meissner, comprise 7 counting teams. Each member of each counting team is rotated daily to ensure that no two auditors serve together on consecutive days.

At each counting location during the recount, the task force has assigned House staff from the majority and the minority, who share responsibility with the recount director for the maintenance of order in the recount process. The majority and minority staff are the House watchdogs, ensuring that the process is carried out under the recount procedures agreed to unanimously by the members of the task force.

In addition, majority and minority staff are responsible for deciding which ballots the task force must individually examine. The task force then determines whether each such ballot can be counted under the counting rules, which were adopted, with one exception, by unanimous agreement of the task force.

In addition to the GAO counting teams, and the majority and minority staff at such counting location, each of the candidates is allowed an observer for each of the seven GAO counting teams. Each of the candidates has assigned such observers, who watch the process and inform the majority and minority staff of any problems which they might observe.

To ensure that the press and the public are well served and fully informed, the counting process is open to observation firsthand, and any and all interested parties are free to observe and to witness all of the events connected with the counting.

So let me summarize with respect to the cast of characters who are present at each counting location. First, the recount director, or in his absence the GAO supervisor, oversees the counting teams, ensuring that all records are properly maintained, and that the ballots remain secure.

Second, the majority and minority task force staff share responsibility for orderliness, and determine which ballots are set aside for individual consideration by the task force.

Third, each candidate has observers, one for each of the seven counting teams at each counting location.

And fourth, the press and the public are regular observers of all the recount processes.

Now, what about the recount process itself. What are the mechanics which are taking so long to complete? Well, for one thing, as the counting teams have gone through each precinct in each county, they have been examining each ballot separately, to determine whether each ballot complies with the counting rules adopted by the task force. There are 22 task force counting rules, and there are approximately 234,000 ballots in the Eighth Congressional District, and before the recount is through, each will have been separately examined for compliance with the counting rules.

And as is true with any undertaking of this magnitude and complexity, the counting teams have run across situations for which no rule exists. In such cases, when the matter cannot be ironed out by the recount director with the concurrence of both the majority and minority staff, the matter is referred to the task force for resolution. These unanticipated and unavoidable situations have required approximately a third again the amount of time that the recount was supposed to have taken.

Now, how these situations, and the ballots which have been segregated for task force review, get resolved? Well, under the task force counting procedures, all such decisions must be made in the Eighth Congressional District of Indiana. So the task force has convened in the municipal building in Evansville, IN on 3 separate days during each of the last 3 weeks to resolve such matters.

So far the task force has examined the several dozen ballots referred to it, and in all but two instances, has unanimously agreed to count each of the ballots. In each of the two instances, the ballots bore marks which the task force considered distinguishing marks, which are marks placed on the ballot by the voter to identify that ballot to that particular voter. Under the task force counting rules, and under House precedents and most State laws, ballots with distinguishing marks are invalid as a matter of public policy.

A second category of questions has been referred to the task force for consideration. That is the category of reconciliation. There are over 400 precincts in the eighth Congressional District, and as you can imagine, the numbers in many of the precincts do not add up perfectly. The discrepancies usually take the form of one or two more, or one or two fewer ballots cast than the number of persons who signed in on the poll book.

The task force has directed the recount director to reconcile these differences wherever possible. In order to do so, the recount director, in the presence of majority and minority staff and GAO auditors, has been reexamining balloting material in the possession of precinct officials on election day.

In some cases, the discrepancies have been reconciled. For example, in Vanderburgh County, the largest county in the eighth Congressional District, there were 11 precincts with discrepancies. After searching the balloting material in one precinct, a single ballot was found in the stack of secrecy envelopes. These envelopes are used by the voter to enclose his or her ballot before depositing it in the ballot box, to ensure its secrecy. That ballot, when added to the other ballots which were counted on election night in that precinct, caused the precinct totals to balance. And it is absolutely clear that in processing the ballots on election night, that ballot was merely overlooked by the precinct officials. Despite an extensive search, the recount director was unable to find a basis for reconciling the remaining 10 precincts in Vanderburgh County.

And that brings me to an important point. The task force is operating, as I believe it should, on a presumption with respect to the administration of the election. The presumption is that of regularity. That is to say, in the absence of demonstrated facts, to the contrary, the task force has assumed that, in the administration of this and any other election, the normal range of administrative errors or omissions will lead to discrepancies in the number of ballots cast versus the number of persons who signed into the poll book in some precincts. The Vanderburgh precinct I mentioned earlier is just such an example. Had the pack of secrecy envelopes not been searched, the ballot would never have been included in the vote totals, and the precinct would have never been in balance.

Given the intense scrutiny which this election has received, it is amazing that the number of precincts slightly out of balance is so few, in the range of 40. Such discrepancies will show up in any election, and most of the discrepancies in this election will never be resolved, even after a thorough review of unreconciled precincts by the recount director, who is an experienced veteran in the administration of elections.

Two precincts were more out of balance than the others, one having 12, and the other having 15 more ballots cast than the number of persons who signed in on the poll books. In each of these instances, the task force directed the recount director, in the presence of majority and minority staff and GAO auditors, to test the lever machines used in each of the precincts, and to make inquiries as to how the machines were used on election day. The finding of the recount director was that the reconciliation questions posed by these two precincts could reasonably have been caused by numerous shortcomings in the administrative processes used by the county on election day. Based upon the presumption of regularity under which the task force is working, and in the absence of facts to the contrary, the variation of 12 and 15 in the two precincts from the number of persons who signed into the poll books does not vitiate the results from that county.

But this entire discussion about reconciliation is a bit of a red herring. The fact is that the House has gone back to the voting materials in the possession of the precincts' officials on election night, and has counted all of the ballots which it could find under a

uniform set of counting rules which did not vary from county to county. And the House recount has demonstrated beyond any doubt that there was no uniform set of counting rules which applied to the 15 counties of the Eighth Congressional District on election night.

Hence, whether or not each of the 400 plus precincts in the Eighth Congressional District is in balance, the House has examined, or will have examined by the end of the counting process, all the ballots which were in the hands of the precinct officials on election night. The House has no way to determine what the precinct officials did on election day, which may have caused too many or too few ballots to be in the ballot box in those precincts with discrepancies. The most frequent explanation proffered by the recount director is that precinct workers, during the course of the day, neglected to have one or more voters sign in, thus causing a discrepancy between the number of ballots cast and the number of persons who signed the poll book. But there were also instances in which there were more people signed into the poll book than there were ballots in the ballot box. Hence a ballot shortage discrepancy. Again, the explanation that some voter or voters chose to take their ballots with them rather than put them in the ballot box may be the reason for the shortage. But whatever happened on election day, you can be certain of one thing. The House recount teams have looked at each and every ballot in the hands of precinct election officials on election day, and have counted or not counted those ballots throughout the Eighth Congressional District under a consistent set of counting rules. So by the time the recount is done, the House will have examined all such ballots, and will have an accurate count of the number of ballots cast for each candidate. That is the number upon which the House can rely in deciding which of the candidates has the final right to the seat.

And that brings me to the third problem with which the task force has been confronted. The problem is one of determining how to deal with a class of ballots which were improperly sent to the precincts by at least 4 of the 15 county clerks, and were then mistakenly and inconsistently treated by precinct officials in such counties. By "inconsistently treated" I mean that most of such ballots were opened and cast by the precinct officials, and such ballots are not now segregable from other valid ballots which were put into the ballot box.

The reason these ballots should never have been sent to the precincts is that they were absent voter ballots which were deficient in either notarization, witnessing or signature, or some combination of these factors. In most of the counties, those ballots were never sent to the precincts, so they never became integrated with other ballots at the precinct level. However in some counties, the precinct officials opened and voted the ballots. Hence the ballots are now scrambled up with the other ballots in that precinct, and are not segregable.

The question with which the task force was faced was how to deal with such ballots.

If all ballots in such a category were to be left out of the count, and those already in the count were to be thrown out, then some mathematical formula would have to be devised which would, in effect, arbitrarily disenfranchise voters merely to get the numbers to match. And such a mathematical formula would be difficult, and in some cases impossible to work out. For example, where there is one such ballot among other valid absent voter ballots, and you must therefore remove a single ballot, for which candidate do you remove a ballot? Or should this race be determined by just reaching in the hat and arbitrarily pulling out one such ballot. And are we perhaps thereby disenfranchising a voter who cast a perfectly valid ballot.

If all of such ballots were to be brought into the count, then the task force is faced with a similar dilemma. If such deficient absent voter ballots were not handled and maintained by the county clerks in a manner identical to other regular ballots, then there is no way of ensuring their integrity. In the instances where such ballots sent to the precincts, we know that they were treated with the sanctity accorded all other regular ballots. But those which were never sent to the precincts, and were retained in the clerks' offices, were not afforded the identical treatment as ballots which were sent to the precincts. By virtue of their being maintained in the clerks' offices, they were not afforded the identical treatment given to ballots sent to the precincts. But to ensure that like ballots are treated alike, the task force is asking each clerk to certify whether such deficient ballots, maintained by the clerks, were afforded identical treatment, in accordance with the statute, to those ballots sent to the precincts. If any were, then the task force will have to revisit its decision, and determine how to deal with such ballots.

So to summarize, the task force has met in Indiana to decide upon individual ballot questions—that is—whether or not such ballots should be counted under the uniform set of counting rules adopted by the task force. We have received reports, and have directed inquiry into precincts where there are reconciliation discrepancies, and expect to receive a report from the recount director at the conclusion of the counting. And we have made a determination to count ballots which were included in precinct materials on election night, even if they contain some technical deficiencies in notarization or witnessing.

As of this moment, I anticipate that the task force will convene on Thursday afternoon in Evansville, IN, to make the final decisions necessary for the recount director to render a final tally. I will keep you informed of any further developments as they are reported to me this week, and look forward to wrapping the counting up shortly.

The staff of the task force reports that the counting teams have been doing yeoman service. That was certainly my observation when I visited a counting location. They are making every effort to conclude the recount in the most expeditious manner consistent with accuracy. Having a count upon which the House can depend is essential to our responsibility to the Constitution, the House and the people of the Eighth District.

WORLD WOMEN PARLIAMENTARIANS FOR PEACE

(Mrs. SCHNEIDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHNEIDER. Mr. Speaker, I would like to take a moment to share with my colleagues my experiences at the World Women Parliamentarians for Peace meeting recently held in Stockholm. This meeting was held to prepare for the U.N. Conference on the Decade of Women which is to be held in Nairobi in July. It is of extreme importance that the U.N. Conference address world peace—it is most appropriate that women members of parliamentary bodies are the moving force in this effort.

The Conference in Stockholm was marked by a lack of nationalistic fervor. We witnessed no threats, no posturing, no name calling. Rather, we participated in an informed discussion by people who are very concerned about the future of the world. We discussed peace, not only as the absence of international hostilities, but also as the need for social justice and equality for all people in all nations. We discussed the drain on world resources that is caused by the arms race, and the need for redirecting these resources to end hunger, homelessness, and illiteracy.

We left Stockholm with no delusions about the difficulty of the task facing us. But we left with a sense of urgency mixed with hope; a sense that the involvement of women in the search for peace is an absolute necessity.

REPUBLICAN HYPE ON INDIANA EIGHTH CONGRESSIONAL DISTRICT ELECTION

(Mr. COLEMAN of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN of Texas. Mr. Speaker, isn't it amazing?

At first, the Republicans did not want to count all of the votes in the Eighth Congressional District of Indiana. Now they want to count 40 additional votes that were cast by people who cannot be identified.

Contrary to the indignant statements of the Republicans on the floor of this House, no one knew who won, nor by how many votes.

A bipartisan committee and the General Accounting Office auditors are working on a full and fair recount. Who opposed that? The Republicans on the floor of this House.

Blatantly false accusations by the Republican media campaign that the Democrats were planning to steal the election have been proven for what they are: political hype.

Let us count the votes of the voters of the Eighth Congressional District of Indiana and seat the winner.

PROTECT SOCIAL SECURITY

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, during the last campaign, the President said he would cut Social Security only over his dead body. The President said he would permit a "cost-of-living adjustment to the Social Security recipients" even if inflation is below 3 percent." And he said he would "never stand for a reduction of the Social Security benefits to the people that are now getting them."

Yet, the President proposes to cut Social Security in his budget compromise with the Senate. Mr. Speaker, this is outrageous. Haven't our Nation's seniors suffered enough under this administration's budget cuts? The administration claims seniors must bear their fair share of the deficit reduction burden. What is fair about cutting Social Security and energy assistance and Medicare and Medicaid and elderly housing and nutrition programs at a time when our Nation's seniors are faced with rising utility bills, escalating medical costs, and higher food and housing costs?

This cut is simply wrong. Two years ago, we in the Congress passed legislation to assure the soundness of the Social Security system. Today that system is running a surplus. Why should Congress allow the President to hold Social Security hostage to the budget process. The Congress should refuse to balance the budget on the backs of this Nation's elderly, and so should the President.

MR. PRESIDENT, WHERE IS YOUR SENSE OF DECENCY?

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, what in God's name is the matter with Ronald Reagan?

First he refuses to include a visit to the site of the Dachau concentration camp on his forthcoming trip to Germany. To do so, he says, would open old wounds.

But now Mr. Reagan says he will visit a German military cemetery which contains the graves of Nazi SS troops.

The President's sense of the appropriate is shockingly out of control. To refuse to honor the memory of the millions who were slaughtered by the Nazis in the Holocaust, but to pay respect to their executioners, dishonors all of those, including the many thousands of Americans, who fought and died in the battle against Hitler's evil forces.

Mr. President, where is your sense of history? Where is your sense of decency?

NATIONAL TAX AMNESTY/DEFICIT REDUCTION ACT OF 1985

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, Benjamin Franklin once said, "in this world nothing is certain but death and taxes." However, the Treasury Department might dispute this statement as it relates to taxes. They estimate that for the tax year which ended yesterday, they will be cheated out of between $89 and $92 billion dollars by the "tax gap"—the difference between what they are owed in taxes and what they will be paid.

Both in response to this and to the urgent need to find ways to reduce our deficit, yesterday I introduced H.R. 2031, the National Tax Amnesty/Deficit Reduction Act of 1985. It provides for a 6-month amnesty during which time those Americans who have failed to pay their full tax obligations could come forward and pay and be free from civil and/or criminal penalties and forgiven of 50 percent of any interest penalty. Those who are involved in administrative or judicial proceedings before the IRS would be exempt.

Tax amnesty has worked with great success in 12 States. It has produced more than $345 million in new State revenues from payment of overdue taxes by 200,000 individuals and businesses.

It is estimated that a 6-month national tax amnesty could produce $20 billion in new revenues which could be applied directly to reducing the record deficit. It may be the only opportunity we have to raise new revenues without increasing anyone's taxes. Tax amnesty belongs in any deficit reduction plan we consider this year.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON TOMORROW

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on tomorrow, April 17, 1985.

The SPEAKER pro tempore (Mr. AuCoin). Is there objection to the request of the gentleman from Florida?

There was no objection.

□ 1240

HOUR OF MEETING ON TOMORROW, APRIL 17, 1985

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has been concluded on all motions to suspend the rules.

HELSINKI HUMAN RIGHTS DAY

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and pass the Senate joint resolution (S.J. Res. 15) to designate May 7, 1985, as "Helsinki Human Rights Day."

The Clerk read as follows:

S.J. Res. 15

Whereas this year will be the tenth anniversary of the signing of the Final Act of the Conference on Security and Cooperation in Europe (hereafter in this preamble referred to as the "Helsinki Accords");

Whereas on August 1, 1975, the Helsinki Accords were agreed to by the Governments of Austria, Belgium, Bulgaria, Canada, Cyprus, Czechoslovakia, Denmark, Finland, France, the German Democratic Republic, the Federal Republic of Germany, Greece, the Holy See, Hungary, Iceland, Ireland,

Italy, Liechtenstein, Luxembourg, Malta, Monaco, The Netherlands, Norway, Poland, Portugal, Romania, San Marino, Spain, Sweden, Switzerland, Turkey, the Union of Soviet Socialist Republics, the United Kingdom, the United States of America, and Yugoslavia;

Whereas the Helsinki Accords express the commitment of the participating States to "respect human rights and fundamental freedoms, including the freedom of thought, conscience, religion or belief, for all without distinction as to race, sex, language or religion";

Whereas the Helsinki Accords also express the commitment of the participating States to "promote and encourage the effective exercise of civil, political, economic, social, cultural and other rights and freedoms all of which derive from the inherent dignity of the human person and are essential for his free and full development";

Whereas the Helsinki Accords also express the commitment of the participating States to "recognize and respect the freedom of the individual to profess and practice, alone or in community with others, religion or belief acting in accordance with the dictates of his own conscience";

Whereas the Helsinki Accords also express the commitment of the participating States in whose territory national minorities exist to "respect the right of persons belonging to such minorities to equality before the law, will afford them the full opportunity for the actual enjoyment of human rights and fundamental freedoms and will, in this manner, protect their legitimate interests in this sphere";

Whereas the Helsinki Accords also express the commitment of the participating States to "recognize the universal significance of human rights and fundamental freedoms, respect for which is an essential factor for the peace, justice and well-being necessary to ensure the development of friendly relations and co-operation among themselves as among all States";

Whereas the Helsinki Accords also express the commitment of the participating States to "constantly respect these rights and freedoms in their mutual relations and will endeavour jointly and separately, including in co-operation with the United Nations, to promote universal and effective respect for them";

Whereas the Helsinki Accords also express the commitment of the participating States to "confirm the right of the individual to know and act upon his rights and duties in this field";

Whereas the Helsinki Accords also express the commitment of the participating States in the field of human rights and fundamental freedoms to "act in conformity with the purposes and principles of the Charter of the United Nations and with the Universal Declaration of Human Rights" and to "fulfill their obligations as set forth in the international declarations and agreements in this field, including inter alia the International Covenants on Human Rights, by which they may be bound";

Whereas the Governments of the Union of Soviet Socialist Republics, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, and Romania, in agreeing to the Helsinki Accords, have acknowledged an adherence to the principles of human rights and fundamental freedoms as embodied in the Helsinki Accords;

Whereas the aforementioned Governments have not fulfilled their commitments to the Helsinki Accords by denying individuals their inherent rights to freedom of religion, thought, conscience, and belief;

Whereas on May 7, 1985, a meeting of experts on human rights and fundamental freedoms will be convened in Ottawa, Canada, to discuss questions concerning respect for human rights and fundamental freedoms as embodied in the Helsinki Accords;

Whereas this meeting is called for in the concluding document of the Madrid Review Conference of September 9, 1983; and

Whereas this meeting will be attended by representatives of all Helsinki signatory nations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That—
